CAMBRIDGE OARSMEN VICTORS IN RACE

Seven Die When Snowslide Wipes Settlement Out

Tragedy at Taseko-Motherlode Property in B.C. Believed to Have Occurred During January Snowstorm; Men Sent in By Company Find Body Mutilated By Wolves

Two of Miners From Vancouver

Canadian Press

Vancouver, April 6.—Bodies of seven miners rested to-day in the snowslide which claimed their lives at Taseko Lake, about forty miles northwest of Bridge River, B.C., while two brothers told of tragedy at the Taseko-Motherlode mining property and discovery of one body partly devoured by wolves.

The dead:

C. Christensen, formerly in charge of the Standard Mine.

H. Gustafson, no address.

Hans Petersen, brother of John Petersen, well known in British Columbia mining circles.

M. S. Stewart, resident of the Bridge River district.

B. J. Bacon, North Vancouver.

W. Hobson, no address.

E. Carlson, no address.

Mrs. Christensen, widowed by the accident, resides in Vancouver, and Mrs. Bacon, also widowed, two daughters and one son live in Vancouver. It was believed the other victims were all unmarried.

William Allaire and his brother were dispatched March 30 by the mining company to travel on snowshoes to develop the property. They returned to tell that the camp had been completely wiped out by a snowslide believed to have thundered its death message during British Columbia's great January snowstorm.

MANY SNOWSLIDES

The Allaires arrived at the camp after a gruelling four-day trek through desolate mountain country. As they neared the camp's location they found unusually heavy snow and signs of many snowslides.

They were unable to find the main cabin where the men were wintering. Down the hill, some distance, they discovered a number of rough boards which led them to fear a tragedy had occurred.

Eventually, in a huge pile of snow left by the slide, they found a deep hole and, near the bottom, the mutilated remains of a human body. They believed wolves had dug through the overlying snow and had partly devoured the body.

B.C. Considers Prison Changes

Attorney-General Visits Institutions; Report Made on Oakalla

Study of Oakalla Prison farm methods with a view to making improvements has been started by the provincial government, Attorney-General Gordon Sloan announced here to-day, after returning from an inspection to of Oakhalla and the B.C. penitentiary yesterday.

The chief reason for his visit yesterday, said Mr. Sloan, was to compare the system used in the Dominion penitentiary with that in the provincial jail at Oakhalla.

Col. J. H. McMullin, superintendent of B.C. Police, accompanied Mr. Sloan.

The Attorney-General said he had already received a report from Professor Coral Topping, one of Canada's outstanding sociologists and penalogists, upon the women's section at Oakhalla. Possible changes based upon this report are now under consideration.

Mr. Sloan did not say in what particulars changes might be necessary, but indicated they would deal with general improvement.

Nazis Expected To Kill B. Jacob

German Journalist Abducted From Switzerland to Be Tried For High Treason

Basel, Switzerland, April 6—Berthold Jacob, German journalist, allegedly kidnapped by Nazis from Switzerland and rushed over the German border, will be tried for high treason and is certain to be decapitated, the Berlin correspondent of The Basel National Zeitung reported today.

In any event, the correspondent adds, Germany will not submit the case to arbitration, as provided for in the treaty between the two nations.

Earlier this week Switzerland sent a note of protest to the Wilhelmstrasse charging Jacob had been seized in this country by Nazis, and demanding his return to Swiss territory.

EMPEROR VISITS TOKIO

Tokio, April 6—Emperor Kang Teh of Manchoukuo, unseated from the Dragon Throne of the Manchus by the Chinese Revolution, came to Japan to-day on a state visit to Emperor Hirohito to thank his Japanese foster parents for setting him up at the head of the new Asiatic kingdom.

When Germans Play War It Is Rough Game

This gaping crater in a Berlin street was a memento—until repaired—of Germany's celebration of its freedom declaration in which 150 battle planes soared over the capital, dropping "common cracker" bombs on a city darkened for the demonstration. One bomb set fire to a building. The mock attack was thrillingly realistic and included a real gas attack on one section of Berlin by the first German military complete to take the air since the Great War.

Debate On Trade Control Expected To Be Lengthy

All Price Spreads Committee Members But One Agree on Commission, But Views Differ on Details of Regulation

Reports in Cabinet's Hands Next Week

Canadian Press

Ottawa, April 6—Sweeping in its recommendations for regulation by governmental authority of "Big Business" throughout Canada, report of royal commission on mass buying will be a historic document. Should the government decide to introduce legislation implementing the report at the present session of Parliament, indications are that, a number of points being highly controversial, the session will be prolonged beyond ordinary expectations.

With the exception of E. J. Young, Liberal, Yale, under date Saturday, March 23, who is submitting a brief minority report, all the commissioners are in substantial agreement; but other Liberal members have written lengthy reservations on a number of issues. It is these factors which contribute to the controversy surrounding the document as a whole.

SEVERAL BOARDS

As previously indicated, the report will, it is understood, recommend the establishment of several boards, over which will be one central authority to be known as the federal trade and industries commission. Important Canadian industries, particularly

(Turn to Page 2, Col. 3)

Governor-General's Reception To-night

The Legislative Chamber at the Parliament Buildings to-day was transformed into the resemblance of a beautiful drawing room in preparation for the public reception to be held this evening in honor of the Governor-General and the Countess of Bessborough. Desks of the legislators have been removed. Potted plants and palms decorated the chamber.

The east door of the buildings will be thrown open at 8.15 o'clock and presentations to Their Excellencies will start at 8.50 o'clock.

GIRL FIGHTS MAN; DOG IS STABBED

Associated Press

Seattle, April 6—A small dog in the arms of thirteen-year-old Betty Joy Rees was stabbed here yesterday evening as the girl and her pet fought [illegible]

Betty Joy had been sent outdoors to bring in Tootles and as she was returning to the House she was seized by the man, her parents told police to-day.

Holding the dog in her arms, the girl fought off the attacker and the dog growled and snapped at the man. Joy said her assailant drew a knife when Tootles bit him and stabbed the pet in the side.

Mrs. June Taylor, mother of the girl, rushed into the yard and the man fled. Tootles was taken to a hospital.

Betty Joy was not harmed.

NEWSPAPER BILL DEBATED

Commons Advances Church's Measure For Publication of Owners' Names

Canadian Press

Ottawa, April 6—A bill sponsored by T. L. Church, Conservative, Toronto East, to force newspapers to register and publish certificates of ownership, was given second reading in the House of Commons yesterday evening. A similar bill has passed the House several times in past years, but was rejected by the Senate.

"Why should we throw a cloak of secrecy around the identity of any newspaper?" the Toronto member asked. English and American newspaper owners were compelled to disclose their identities, and "there never was a time in the history of Canada when it was so imperative as it is to-day that we should know the identity of every newspaper, when we consider the agitation that is going on throughout the country among certain people for amalgamation of the railways; when we consider the fact that the natural resources of the country have been given away to favorites and when we consider the new deal which, since the opening of the session, has been supported by the three parties."

The bill, Mr. Church contended, would foster freedom of the press, part of which, he said, was controlled by industrial combines and mergers.

Mr. Church could see no reason why newspapers should not be registered with the Postoffice Department. "The postoffice gives them second-class mail for the papers at a net loss of $9,000,000," he said. "The department cannot afford to pay its employees a decent rate of wages, because of the franchises handed to the press."

HELD BY POLICE

Vancouver, April 6—Sought by police for the last thirteen months, Wilfred J. Charbonneau, 24, was held to-day on a charge of attempted murder.

GREAT DIAMOND IS REPORTED SOLD

London, April 6—A dispatch from Capetown to the Associated Press says the Jubilee diamond, found in South Africa last year and reputedly the fourth largest in the world, has just been sold to an unidentified United States citizen for an undisclosed sum.

Reports a week ago mentioned $100,000 as the price asked for the Jubilee diamond. The stone weighs 226 carats. In the picture above it is compared in size with a shilling, which is of approximately the same dimensions as a Canadian 25-cent piece.

Oxford Crew Beaten By Over Four Lengths In Contest On Thames

Lead Taken By Light Blues Early in Race Too Much For Oxford to Overcome; Time 19 Minutes and 48 Seconds

Twelfth Successive Win For Cambridge

Canadian Press

Putney, Eng., April 6.—For the twelfth year in succession Cambridge defeated Oxford in the classic varsity boat race this afternoon. The winners' lead at the finish was four and a half lengths.

The stylish light blue eight got off at the start of the four-and-a-quarter-mile grind slightly behind the stronger Oxford crew, but within a minute raced to the front and stayed there. The victory made the tally in the historic contest forty-six wins for Cambridge, forty for Oxford and one dead heat.

WINNERS EASED UP

At one time the Cambridge eight were six lengths in front of the Oxonians, but they eased up nearing the finish and crossed the line rowing thirty to the minute. Oxford, after keeping within striking distance for more than half the journey, dropped back to twenty-eight strokes on the end.

The officials said Cambridge's winning margin was four and a half lengths. The time was 19 minutes 48 seconds, far above the record established by Cambridge last year of 18 minutes 3 seconds.

WIND IS COLD

The toss-up before the start of the race was won by Cambridge, which elected to row the sheltered Surrey side of the course.

A cold wind mostly from the west blew and the water was slightly rough. Owing to the winding nature of the course and a quarter-mile stretch the wind was a headwind in parts.

NOT DOWNCAST

Though Oxford had not won a race since 1923, Michael Mosley, president of the Oxford Rowing Club, said just before the start: "We are not suffering from any inferiority complex."

The starting gun was fired at 2.47 p.m., and the crews were away.

Oxford got away slightly in front at a rate of 36 strokes to the minute, but the Light Blues soon swept into the lead, and at the boat houses had nearly a length advantage.

The Light Blues got away at the same rate as the heavier Oxford crew, thirty to the minute. After one minute's rowing the Cambridge men pulled up splendidly, and were a length ahead, when Oxford put on a spurt.

This reduced the Light Blues' advantage to half a length, but they had a long way to go. At Beverley Brook Cambridge held a half length lead, but at Fulham football grounds had increased it to one and one-quarter lengths.

CAMBRIDGE

The Light Blues continued to widen the gap, racing along with effortless style, and at the mile post were two lengths in front. Both crews were rowing at a thirty-four clip there.

One and a half miles from the start Cambridge was three lengths in front, but Oxford hung on doggedly,

(Turn to Page 2, Col. 2)

A picture of the victorious Cambridge crew appears on Page 2.

NO RECORD ON FIRST BOAT TEST

Miami Beach, Fla., April 6—Gar Wood to-day drove his Miss America X over a measured mile course here at a speed of 118.6704 miles an hour in the first of two official trials to establish a new world motorboat speed record. In order to claim a new record, he must make the two runs at an average speed of more than 124.86, the present mark, which he holds.

BUREAU ASKS FOR $25,000

Request Made to City to Put Grant on Old Basis

Re-establishment of the city's grant, cut from $25,000 a year some time ago to $15,000 last year, is sought by directors of the Victoria and Island Publicity Bureau, according to a letter filed at the City Hall to-day.

The letter refers to the vital importance of the tourist business to the city of Victoria, and the increasing competition that this city must now meet in order to hold and increase this lucrative industry.

If Victoria is to retain its position as the premier tourist resort of the Canadian Pacific Coast, it is absolutely essential that financial assistance be given to the bureau so that this organization can continue its work on behalf of the city, the letter says.

A request that audience be given to a delegation of citizens so that they may lay before the council in more detail the reasons for restoring the grant to its previous figure is made.

FEED BY PLANE FOR ELK HERD

Associated Press

Jackson, Wyo., April 6—Cut off from the main herd by severe snowstorms, 1,600 elk in the Jackson Hole country may get their food from the sky.

Sufficient hay to take care of the marooned animals for ten days is available, but if roads remain snow-blocked, it may become necessary to drop feed to the elk from airplanes to keep them from starving, according to game wardens.

B.C. Minister Conducts Cases

Attorney-General Sloan to Be Crown Counsel For Province in Supreme Court

HON. G. McB. SLOAN
Attorney-General.

Carrying out his intention to act personally for British Columbia in court cases, Attorney-General Gordon McB. Sloan will appear for the province in four actions scheduled to go to the Supreme Court of Canada.

Mr. Sloan expects to leave shortly for the east, and will appear as crown counsel for the province.

Of the four cases he will handle, three involve important points in criminal law and the other in that of the Wapside and Nicola mines investigations.

This case, dealing with the powers of the government under the B.C. Securities Act, is regarded as the most important. Upon the outcome hinge drastic changes in the present act, which were contemplated during the last session but withheld until the present cases are decided by the courts. It will also have a bearing upon similar legislation in other provinces.

(Turn to Page 2, Col. 6)

GREAT FUND FOR WORKS IN U.S.

B.C. SUPPORTS HOUSING PLAN

Scheme to Get Building Trades Back to Work Favored Here

The B.C. Government to-day found satisfaction in Ottawa proposals that a $50,000,000 housing scheme for Canada be instituted.

Premier Pattullo, who has been an ardent advocate of such a programme to provide jobs, said he was very pleased to note reports that a concrete plan was being laid down.

"Everybody realizes," he said, "that the building trades have suffered the worst during the depression. This is just the sort of thing that will help them out. We made representations to the federal government on this matter many months ago, and we can only hope now that these will be successful."

MONEY SEIZED

New York, April 6.—The government's campaign against sweepstakes and lottery tickets has brought grief to at least five "lucky" ticket holders within the last few days.

The five, who received cheques for small amounts after a recent Montreal prize drawing, were compelling to open their envelopes in the presence of post office inspectors and surrender the contents.

The cheques, along with accompanying sweepstakes literature, were sent to Washington "for final disposition."

Roosevelt About to Sign $4,880,000,000 Bill; "From Relief to Employment" Is Slogan

Associated Press

Washington, April 6—The New Deal to-day staked $4,880,000,000—greatest peace-time appropriation in history—on its plan to swing from relief to public works while the nation watched to see who would be chosen to direct the task and just how the job would be tackled.

Showing a bit of last-minute speed after seventy-five days of struggle and delay, Congress completed action on the mammoth measure yesterday when the Senate passed a conference report on it, 66 to 13, and the House did likewise, 217 to 70.

SENT BY PLANE

The President, fishing off the Florida coast, was expected to sign the legislation as soon as it could be sent to him by airplane. Vice-President Garner and Speaker Byrns planned to affix their signatures to-day, winding up the congressional formalities.

The question, "Where is the money coming from?" was raised in last-minute Senate debate yesterday. Senator Thomas, Democrat, Oklahoma, asserted there had been little talk about that phase of the matter, and protested the bill should contain his plan for issuing more silver-backed currency.

Senator Glass, Virginia, Democrat, retorted the $4,880,000,000 would come from the taxpayers, and that "when

(Turn to Page 2, Col. 4)

Use of Spotters By R.C.M.P. Protested

Methods in B.C. Will Be Investigated, Minister of Justice Tells Commons When T. Reid Complains

Canadian Press

Ottawa, April 6.—Use of spotters and stool-pigeons by the Royal Canadian Mounted Police in British Columbia will be investigated, according to an announcement by Minister of Justice Hugh Guthrie.

Thomas Reid, Liberal, New Westminster, introduced the subject in the Commons yesterday afternoon by claiming that two men, Herbert Handley and Eddie Kemp, had planted smuggled liquor, cigarettes and a radio on unsuspecting merchants, then caused their arrest. A split was made on the fines.

Handley, the British Columbia member claimed, was waiting by Attorney-General Sloan's office during the trial to give the police all the time he was employed by the R.C.M.P. Both he and Kemp are in jail on liquor charges.

TWO BLACK SHEEP

"I will admit," said Mr. Guthrie, "in this instance, in a force of 2,000 or 3,000 men we have succeeded in securing the services of two black sheep." Handley and Kemp, he said, were dismissed as soon as they were found of the liquor laws and the R.C.M.P. took no part in their detection.

(Turn to Page 2, Col. 1)

EX-GOVERNOR OF VERMONT DIES

Associated Press

St. Albans, Vt., April 6—Former Governor Edward Curtis Smith, eighty-one, died here to-day. He served as chief executive of Vermont from 1920 to 1923.

Victoria May Lose Basketball Classic

Oak Bay Building-Inspector Refuses Permit For Changes to Main Building at Willows Owing to Fire Hazard; Up to Insurance Companies

Staging of the Western Canada and possibly the Canadian basketball finals in Victoria this month is contingent on the agreement of insurance companies carrying the fire and public liability risks on the main building at the Willows Exhibition ground.

Announcement that the Western playoffs might not be staged here broke like a bombshell at the City Hall to-day when it was learned Oak Bay, the municipality in which the Main Building is located, had refused a permit to erect bleachers in the structure on the grounds of a fire menace. The municipality, however, was willing to waive objections if the city would accept the responsibility.

It was understood the City Council could not give authorization unless the insurance companies extended their policy clauses to cover fire and public liability with new constructions made in the Main Building.

NEED MAIN BUILDING

J. A. Barnwell, manager of the Blue Ribbons, the team virtually assured of representing Victoria in the western play-offs, stated the series would be cancelled if the Ribbons were unable to secure the Main Building for the series.

Thomas Watt, Oak Bay's building inspector, said he had declined to give a permit for bleacher construction in the Main Building on the grounds of the fire risk.

"They can use the building if the city assumes the risk. In my opinion it is not a safe bet," he stated.

(Turn to Page 2, Col. 5)

BIGGER U.S. ARMY ON PACIFIC COAST

Associated Press

Washington, April 6—Increased army strength on the Pacific Coast was promised by Secretary of War Dern to-day in a letter to Senator Steiwer, Oregon Republican.

The Secretary, answering a specific inquiry from Steiwer on the future of Fort Stevens, Ore., said:

"The War Department had made plans, which, in the event the War Department appropriation bill is finally passed, retaining the increase in enlisted strength of 46,250 men, will provide material increases in the garrison of Fort Stevens, Ore., as well as of all garrisoned posts of the Pacific Coast.

"There is a further possibility for augmentation of both anti-aircraft and seacoast armament in the harbor defences of the Columbia (River) as well as of all other harbor defences on the Pacific Coast, in the budget recommendations of the President for inclusion in the latest deficiency bill," the Secretary wrote.

EAST PHILIPPINES HIT BY TYPHOON

Manila, P.I., April 6—A typhoon of severe intensity struck the eastern Philippines to-day. No reports of damage were received here immediately.

Preliminary warning signals were displayed in Manila, but weather observers said the slowly moving storm would probably pass south of this city. The unseasonable disturbance formed unexpectedly three days ago in the South Pacific. Typhoons normally strike the Philippines in August.

Half Hundred Bills In Manitoba Signed

Canadian Press

Winnipeg, April 6—The third session of the nineteenth Manitoba Legislature was prorogued to-day, Lieutenant-Governor W. J. Tupper giving royal assent to fifty-six bills passed during the last few days of the session. More than 100 bills were enacted during the session.

Among the bills signed to-day are money measures providing for total expenditures of $14,000,000 during the next fiscal year.

Enabling legislation making Manitoba the first province in the Dominion to take steps to provide pensions for blind persons also was approved.

Prorogation was informal, without the customary military units and artillery salutes.

WINNERS IN TO-DAY'S BOAT RACE ON THAMES

The Cambridge crew, above, had a lead of four and a half boatlengths over the Oxford crew at the finish of the contest.

Elephants Are Coming to Town

Seven Die When Snowslide Wipes Settlement Out

(Continued from Page 1)

The two men continued the search, but darkness prevented further discoveries that night, and, having concluded the other men had also been victims of the slide, they returned to Bridge River to report the tragedy.

SEARCH IS PLANNED

Company officials and police plan to send a search party to the camp site. Interested persons state there is no doubt all seven miners perished in the snow.

Development of the mine was begun last year, when the seven men were sent to Taseko Lake to open up the property. Camps were built, equipment transported to the property and machinery installed. Supplies sufficient for the entire winter were also taken in.

Transportation to the mine stopped in November, and the seven men settled down for a period of about six months of complete isolation.

TURNED BACK

Authorities state the camp buildings were designed to meet severe winter conditions regarded as inevitable.

Early in February a man was dispatched by the company to the mine to discover if the crew were safe. Trail conditions, however, were so difficult that, after the snowshoer had traversed part of the distance he was forced to turn back.

The severe snowstorm which swept British Columbia January 30 took a total toll of twenty-one lives in addition to the seven dead at Taseko Lake. Property damage extended into millions of dollars and rail and wire communications were tied up on the lower mainland for nearly two weeks.

Use Of Spotters By R.C.M.P. Protested

(Continued from Page 1)

When Mr. Reid said there were other spotters working for the mounties in British Columbia, the minister said he would investigate, although it was difficult to detect liquor law violators without the use of under-cover men.

C. W. Bell, K.C., Conservative, West Hamilton, urged the investigation be enlarged to cover the narcotic squad of the mounties, but the minister made no reply.

FUNDS VOTED

The police vote, before the House most of yesterday afternoon, was finally passed, along with most of the items of the Justice Department.

As British Columbia had a provincial police force, the R.C.M.P. had only a limited sphere of action in British Columbia, said Mr. Guthrie. Handley was employed as an agent and after some three months was arrested "with his running mate Kemp" and charged with an offence.

They were found guilty and the R.C.M.P. took no part in their defence. Handley's record in Australia and other countries was not known, and the R.C.M.P. admitted they did not make full investigation and should not have employed the man, said the minister.

PAID FOR TIPS

Kemp was never employed by the force, but was an informer who was sometimes paid for giving tips which led to convictions, said the minister. So far as Mr. Guthrie knew, both men were still in prison. He regretted that the two men Mr. Reid had mentioned were thoroughly discreditable, but they had been dismissed as soon as their character became known.

The same thing was still going on, said Mr. Reid. The two men were no exceptions. Others just as despicable were still going around trying to induce people to commit offences in order that they could inform on them and bring about arrests. Mr. Guthrie said he would be glad to have the names of any such spotters, and Mr. Reid promised to supply them.

NO ANTI-RED SQUAD

Mr. Guthrie told J. F. Pouliot, K.C., Liberal, Temiscouata, Que., the R.C.M.P. did not make a special job of checking Communist activity in Canada. In routine work, if anything special was uncovered, it would be reported to Ottawa, but there was no anti-red squad. Foreign-language papers were checked carefully.

Mr. Guthrie said no blanket instructions were issued to Royal Canadian Mounted Police officers to search all houses on a street or certain houses indicated by number. The minister was answering Pierre Casgrain, Liberal, Charlevoix, Saguenay, Que., who complained of Mounted Police harassing a prominent lawyer and his wife by going to his house at night and insisting on searching it without a warrant. Mr Guthrie promised to look into the particular case.

FINGERPRINTS

Protest against the fingerprinting of accused persons before conviction was made by C. W. Bell, K.C., Conservative, Hamilton West, who described it as an outrage.

Maurice Brasset, K.C., Liberal, Gaspe, Que., complained of a man being forced by Mounted Police to give his fingerprints after he had been acquitted of a crime, although a crown appeal in the case was pending.

Mr. Guthrie said he had received a report on the case and was considering it. He promised to inform Mr. Brasset about it later.

Cambridge Oarsmen Victors In Race

(Continued from Page 1)

and at two miles was two lengths behind, both crews rowing strongly at thirty-two to the minute.

At Harrod's wharf Cambridge was two and a half lengths in front and at Hammersmith bridge two and three-quarter lengths ahead.

When Chiswick steps were reached, more than half the distance covered, the Cantabs were three and a half lengths in front, and they held that lead, racing through choppy water along Duke's Meadows.

SIX LENGTHS AHEAD

At three miles the Cambridge men were four lengths ahead, and passing Devonshire Meadows five to six lengths in front. Cambridge, stroking beautifully, maintained a full six lengths lead at Bull's Head, stroking thirty to the minute to Oxford's twenty-eight, and they kept the full advantage at Barnes Bridge.

A quarter of a mile from the finish the Oxford oarsmen made their greatest effort and succeeded in cutting the lead to four lengths. Cambridge easily held off the challenge, and won by four and a half lengths.

WEIGHT AND STRENGTH

As in most recent years, the 1935 "Battle of the Blues" was a battle of weight and strength against style and stamina. The Oxford crew averaged 181 pounds with P. R. S. Rankes at No. 4 tipping the scales a fraction below 200 pounds, and A. V. Sutcliffe, once again at stroke, going just over that mark.

For the first time in the history of the race, which began in 1841, the shells did not include the president of either university rowing club. Bradley of Cambridge was out with an injury suffered while skiing in Switzerland, and Mosely of Oxford stood.

The umpire was the famous Oxford stroke of bygone years, R. C. Bourne, who has recently assisted in umpiring debates on the India bill as deputy chairman of committees of the House of Commons.

TRAINED ON BEER

Cambridge trained on a special brew of beer, except for the cox, who lost five pounds in three weeks. Both crews became experts at shooting darts during the training confinement.

Both the eights were on the river at 10.30 this morning for the windup of their training, having a brief spin at the oars.

The wind veered and, when the crews got out for the last spin they encountered a fairly strong head wind, the breeze coming from the southwest. The water was at dead low at the time.

Before noon the wind was a three-quarter head wind from Putney to the mile post, there a headwind, from Corney Reach on a cross wind and from Duke's Meadows to the finish a head wind again, owing to the changes in the river direction.

DOMINION SUGAR

Montreal, April 6 (Canadian Press).—Net profits for 1934 of $3.66 a share are reported by Canada and Dominion Sugar Company Limited. Profits totaled $1,839,563 after all charges, including $350,000 provided for contingencies, were deducted.

Debate On Trade Control Expected To Be Lengthy

(Continued from Page 1)

those which more directly affect the primary producer, will be subject to regulation by its own special board, representation on which will be given to all parties affected. The function of these boards will be to iron out difficulties relating to marketing and prices, and to control in some measure the spread between what the primary producer receives for his product and the price at which the retailer sells to the consumer.

LENGTHY SESSIONS

Culminating months of labor, the reports are to be ready for presentation to Hon. R. B. Hanson, Minister of Trade and Commerce, early next week. Members of Parliament, it is understood, will be given an opportunity to study the approximately 250 pages during the long Easter recess, from April 18 to May 20. It is the intention of the government to table it in the House of Commons before adjournment.

It has been learned that one of the main causes of difference between members of the commission had to do with methods of protecting consumers from combinations in restraint of trade. A majority of the committee, made up of Conservative members including Hon. H. H. Stevens, and also a United Farmer of Alberta member, D. M. Kennedy, favored allowing regulated combines under certain conditions. Liberal members, although signing the main report, made a very definite reservation in this respect.

The Liberals who signed with reservations are: J. L. Ilsley, Hants-King's, N.S.; Samuel Factor, Toronto West Centre, and Oscar Boulanger Bellechasse, Que.

E. J. YOUNG'S VIEWS

E. J. Young, Liberal, Weyburn, Sask., did not sign the report at all. He wrote his own report, taking in brief the stand that Canada has all the regulating machinery it needs at present and the way to fight combines, monopolies and unfair practices is to lower the tariffs.

COMMISSION PLAN

All members of the commission except Mr. Young are in favor of setting up a governing body with wide powers, to be known as the Federal Trade and Industry Commission. This commission would stand as a commanding force to see justice was done in matters of trade. What has been nobody's business in particular in the past, such as enforcing the Combines Investigation Act, prosecuting against false advertising and unfair business practices and preventing unfair discounts and rebates, would be the business of this commission.

In dealing with monopolies, there was no such divided opinion as in the matter of combines, although the Liberals put in a reservation in this connection. The idea is that the commission would take steps from time to time to hinder merging companies from establishing monopolies, but when a monopoly is developed, the commission or some of its sub-boards would regulate it.

For example, if the commission should find the steel industry has become a monopoly then an order-in-council would be requested of the government declaring it to be a monopoly. With that passed, the commission would proceed to regulate it, protecting the consumers against unduly high prices and fixing regulations governing many of its activities.

BY ACT OF PARLIAMENT

In connection with monopolies, the Liberals put in a reservation that instead of a monopoly being declared by order-in-council, it should be declared by act of parliament. They contended it did not need to be rushed and therefore could wait for parliament to pass on it.

The Liberals took the position that the Combines Investigation Act should be rigidly enforced.

The majority of the commission took the view that in certain situations combines should be allowed. For example, if the furniture industry companies should find they were becoming the victims of ruinous competition, they might combine to regulate prices, methods of conduct and the like. All these regulations would be subject to sanction of the federal commission.

LIVESTOCK BOARD

A livestock commission would be established to govern that industry. It would be under the Marketing Act. Many provisions were made to enable the farmer to sell his livestock in competitive yards.

MASS BUYING

The report goes extensively into the ramifications of mass buying, it has been learned. The object is said to be to protect the small merchants. While it is admitted that big buyers such as department and chain stores should get somewhat lower prices than the smaller merchants, the large buyers should not be allowed to use their power to hammer down prices and thereby put the smaller men out, it is held. The Liberals made some reservations in this connection, giving the chain stores credit for certain improvements they have made in the retail trade.

FISH BOARD

The report would put the fisheries industry of the Maritime provinces under a board governed by the Marketing Board. To this the Liberals dissented absolutely. They contended it would be impossible to regulate so fluctuating a trade as fish by a central board.

In many respects the mass buying report would provide for secondary products what the Marketing Act provides for primary products.

CHANGES IN CODE

The report is said to recommend many changes in the Criminal Code to prevent evasion of the fair wage laws and the hours of labor laws. In this it is said all parties who signed the report were in agreement.

SALES OF SECURITIES

Agreement was also reached in connection with a sub-commission under the federal commission to regulate the sale of securities. This sub-commission would be given wide powers to prevent watered stock and various types of fraudulent promotions. Provisions were made for submitting prospectuses.

The commissioners were also agreed on a board to regulate weights and measures.

The report itself contains about 250 pages, and the reservation about fifteen pages.

W. W. Kennedy, Conservative, Winnipeg South Centre, is chairman of the commission.

B.C. Minister Conducts Cases

(Continued from Page 1)

The other three cases, appeals taken by defence counsel from B.C. decisions, involve lengthy legal argument.

Rex vs. Schwartzenhauer, a manslaughter action, involves the issue as to whether a dying declaration may be used against a third party.

Rex vs. Yip Sing is an argument on the right of the Court of Appeal to hear new evidence.

Rex vs. Korber involves the extent of the doctrine of recent possession of stolen goods.

It will be the first time in many years that a B.C. attorney-general has appeared personally for the province before the Supreme Court. Mr. Sloan initiated the policy of taking an active part in court work when he handled the prosecution in the Carr and Gisborne murder cases.

Great Fund For Works In United States

(Continued from Page 1)

it comes there will be the biggest howl ever heard."

JULY 1 DATE CHOSEN

July 1 was circled on the administration's calendar to-day as the date for putting the main part of the programme into effect. On that date, officials said, the government will move to provide 650-a-month jobs for ablebodied men and women now on the dole. An effort will be made to increase the number on work relief quickly from the present total of 2,500,000 to 3,500,000.

The relief administration has said it would go ahead at that time also with its plan to remove "unemployable" from relief rolls and return them to the care of states and communities. This country has been delayed in the hope that Congress will pass pending social security legislation to aid the states as they reshoulder this task.

URGES AUTO PENALTIES

T. L. Church Asks Commons to Increase Punishment For Reckless Drivers

Canadian Press

Ottawa, April 6.—Amendments to the Criminal Code providing severe penalties for persons convicted of recklessly driving automobiles or other vehicles, including boats, submarines and aircraft, are contained in proposals filed with the clerk of the House of Commons by Thomas L. Church, Toronto East, Conservative, it became known to-day.

Mr. Church's proposed amendments include provisions that any persons driving while under the influence of liquor or narcotics shall be guilty of an offence and liable. The penalties would apply also to persons in charge of automobiles or motor vehicles while under the influence of liquor or narcotic drugs even if the vehicle is not in motion at the time.

He proposes penalties of one year in prison and a $500 fine, or both fine and imprisonment for anyone found guilty of racing an automobile on a public route, whether the race is prearranged or not. The same penalties would be applied to anyone who incites another to "dangerous or furious speed by striving to pass him or by endeavoring to cut in ahead of another car, causing an accident, . . . or driven or raced wantonly or furiously or with disregard to human life . . .

TWO-YEAR MARGIN

The Torontonian's proposed amendments include a provision that anyone driving within two years after he has been culpably involved in a fatal accident shall be liable to imprisonment for not more than one year and a fine of not more than $500.

A person responsible for a fatal accident through reckless driving would be guilty of involuntary homicide and subject to imprisonment of not more than six months, a fine of not more than $100, or both fine and imprisonment.

Persons involved in accidents might be required under Mr. Church's proposals to pay to the injured party damages of not more than $1,000. Failure to pay the damages within a specified time would make the offender liable to three months' imprisonment.

Victoria May Lose Basketball Classic

(Continued from Page 1)

Called into immediate consultation, H. S. Pringle, city solicitor, and D. A. Macdonald, city comptroller and treasurer, studied existing policies on the Exhibition Buildings.

UP TO COMPANIES

In both fire and public liability documents were qualifying clauses stating no structural alterations could be made and leave the policies the same.

"If the insurance companies are willing to allow the insurance to stand with the seating facilities added to the building, the matter can be approved by the City Council," Mr. Pringle stated.

Other officials of the City Hall declared the construction of the bleachers would be thoroughly sound and could be guaranteed not to collapse.

Alderman T. W. C. Hawkins, president of the British Columbia Agricultural Association, expressed surprise the issue should have been raised.

"I, as president of the agricultural association, have already given the basketball interests permission to use the building," the alderman stated.

With the town simmering in a basketball fever the like of which it has not experienced in its history, the question was one of the most talked of issues to-day.

Alderman Archie Wills, who took an active part in the investigations to see if some plan could not be evolved to clear up the issue, to-day reaffirmed his statement a civic auditorium was necessary here.

"If there was ever a time in the city's history when we needed a big auditorium and hall, it is now," Alderman Wills declared. "The City of Nelson has just passed a by-law authorizing the construction of an auditorium to cost $150,000. If a town that size has courage to meet a pressing need then the Capital City of the province, bigger and richer, should step out and get an auditorium."

BONDHOLDERS AGAINST U.S.

Associated Press

London, April 6.—Holders of United States bonds in Europe are prepared to bring concerted action against the gold decision of the United States Supreme Court should there be any change in the personnel of the court, it was learned to-day.

Barnet Hollander, a London barrister, has been retained by a protective committee for investors to prepare the groundwork for suits which will be prosecuted vigorously.

Hollander will make a hurried trip to the United States starting April 17, after which he will call a joint meeting of committees representing French, Netherland, Swiss, Belgian and British investors in Paris to map out plans.

The suits, when brought, probably will be on behalf of one individual bondholder from each country, Hollander said.

E. A. ROBINSON PASSES AWAY

New York, April 6.—Edwin Arlington Robinson, thrice winner of the Pulitzer Prize and honored as "America's foremost living poet," died early to-day.

The sixty-five-year-old poet had been in a New York hospital since January 17 for treatment of a chronic ailment. He recently underwent an operation and on Wednesday suffered a relapse.

Mr. Robinson, to whom the world was "a kind of spiritual kindergarten," was forced to submerge his literary expression for years in prosaic jobs.

He held various jobs in New York city. Once he worked in the customs house. Again, he was a subway inspector. All this time his first and deepest love was poetry, and he was continually engaged in its composition.

He received the Pulitzer Prize in 1921 for his "Collected Poems," in 1925 for "The Man Who Died Twice" and in 1927 for "Tristram," which became a best seller.

LIBERAL PLANS ARE OUTLINED

National Reconstruction to Follow Election of Party, Says Hon. I. Mackenzie

Canadian Press

Montreal, April 6.—Platform of the Liberal Party in the coming Dominion election will be based on "national reconstruction involving the problems of housing, slum clearance, civil aviation and reforestation," Hon. Ian Mackenzie, Liberal member of Parliament for Vancouver Centre, stated at a Liberal rally here yesterday evening.

Among the policies the Liberal Party would adopt if returned to office, Mr. Mackenzie said, were the calling of an interprovincial conference "to sit for three months, if necessary," to discuss amendments to the British North America Act; conversion of the Bank of Canada into a government-controlled institution and the introduction of legislation to cure the abuses disclosed by the price spreads and mass buying committee.

Unemployment and debt would be two of the problems to the fore in the coming election, stated the Pacific Coast Liberal member, who termed the government's record in the last five years "one of incompetence and ineptitude."

CALLED ON TO EXPLAIN

For political as well as sentimental reasons, Mr. Mackenzie hoped Prime Minister R. B. Bennett would make a speedy recovery, as he had to explain why unemployment had increased from 117,000 to 500,000 during his five years of office.

"Another thing we shall demand to know," he said, "is the extent of the wheat activities of John I. McFarland. Up to now details of the operations of the wheat dictator have been refused, but when the Liberal Party comes into power it will require an exact accounting of the moneys spent."

C.P.R. GUARANTEE

The government had no justification, he said, in guaranteeing the Canadian Pacific Railway $60,000,000 when thousands of Canadians were walking the streets and municipalities were facing bankruptcy.

In discussing the price spreads committee to which the Liberal Party had rendered "most complete co-operation," Mr. Mackenzie asked why Hon. H. H. Stevens, former Minister of Trade and Commerce, had not supported the Liberals in 1933 when they sought an amendment to the Combines Investigation Act. The Liberal Party would bring in legislation to prohibit illegal practices when it came into power, said Mr. Mackenzie.

Big Conference On Security

All-Europe Conclave at London Is Newest Proposal

Associated Press

London, April 6.—Plans for a great London conclave at which all European nations would join in a united effort to solve the security problem were understood to be crystallizing here to-day.

This conference, qualified quarters announced, is being envisaged as a sequel to the Anglo-Franco-Italian meeting at Stresa, Italy, next Thursday.

Great Britain would continue the role of mediator at this all-European meeting, with Prime Minister MacDonald presiding, these quarters said.

Although officials refused either to confirm or deny that such a conference was planned, their reserve was attributed rather to prudence than to any objections to such a meeting.

ANXIOUS TIME

Rt. Hon. Anthony Eden, British Long Privy Seal, who returned to London yesterday evening from his peace and security talks in European capitals, according to The London Daily Telegraph, holds the belief that "the situation is an anxious one but the dangers of serious conflagration are less imminent than was generally imagined."

The newspaper declared he was known to have informed Whitehall officials that both Germany and Poland might be persuaded to drop objections to the proposed "Eastern Locarno."

He urged Great Britain's foreign policy must be "frank and firm and stalwart" as he alighted at Victoria station.

"No one who has been on such a journey can doubt the reality, the formidable character of the difficulties of the present European situation," he added, maintaining, however, they are "not insuperable."

STRESA TASK

Britain's major job at the Stresa conference next week will be to try to keep a French resolution condemning German rearmament from wrecking the work of the British ministers who have moved through Europe's capitals in the last fortnight in search of a peace formula, it was said.

It was feared that too strong a protest would increase the tension which Foreign Secretary Sir John Simon and Capt. Eden have sought to relieve.

FRENCH FORCES

April 6.—Sixty thousand soldiers belonging to the class which was due to leave the French army on April 13 will be kept under the colors until July 14, under a decision reached to-day by the ministerial council.

The class originally contained 130,000 men, but exemptions made in favor of those serving a postponed period of duty, and for other reasons, brought the total down to approximately half that number.

The men kept under colors will be used to guard frontiers and defensive organizations. They will be exempted from part of their ordinary reserve duty. While July 14 was fixed as the final date for their army service, they may be liberated earlier if training of the new conscript class is sufficiently advanced, it was announced.

To-day's decision will keep the active army stationed in France up to 350,000 trained men for the next three months. By that time it was expected that the 130,000 conscripts due to enter the army immediately after Easter will have been sufficiently trained to take their place in the ranks.

The decision was reached at a council of ministers presided over by President Albert Lebrun. It followed the advice of the superior war council, which met yesterday to consider measures necessary to keep France strong in the face of a rearming Germany.

RELIEF MEN ASK FOR WORK

But Tell Commission They Are Handicapped When They Seek It in B.C.

Vancouver, April 6.—The commission under the Inquiries Act which is investigating conditions in British Columbia relief camps, went into the field yesterday and was told relief camp men are not welcomed by employers of labor.

Seated around a blanket-covered table in the recreation hall at Camp 205 at White Rock, Hon. W. A. Macdonald, chairman, and his fellow commissioners, Rev. E. D. Braden and Charles Mollatt, heard middle-aged Robert Kirk state employers do not and will not employ men who have been in unemployment relief camps. A camp record, he said, placed a stigma on a man.

"Yes, it does," he continued when commissioners looked dubious. "I know a case of a Swede who was a good experienced man. He went to a Squamish logging operator and asked for a job. He admitted having been in a relief camp. The operator would not hire him. He asked why. 'We do not take men from the relief camps,' the operator said. The Swede asked why and the logger told him such men had been too long away from work to be much good now."

Kirk's statement was endorsed by several fellow members.

WORK AND WAGES

Later the commission moved to Camp 206 in the same district and heard the same plea for "work and wages" that characterized the public hearing in Vancouver on Thursday.

"The main squawk is having to stay here. Work and wages, that's what we want. Perhaps you gentlemen will be able to help us," William Bradley told the commissioners. "Once in a relief camp, what chance has a man of getting employment unless he goes out and finds a job?"

It was the evident interest of the commission in this phase of the discussion that brought Frank Gildea, sub-foreman, into the discussion with a suggestion to open up a channel between employers seeking help and the men in camps.

The men in camps had little or no contact with employment needs, he said. Men in town get the first chance at jobs. He suggested it might be possible to devise some contact between the men and those who wanted help. As it was at present men could not hope for a chance of employment as long as they stayed in camp, he added.

DEPORTATION SOUGHT

Prince Albert, Sask., April 6 (Canadian Press).—Teodor Segin, alias William Pavelchuk, who escaped from an immigration officer at Watrous a few days ago and who then recaptured, is not wanted in Poland for murder, it was learned from an authoritative source yesterday. Again, it was said, he has already served a seven-year term in a Polish prison for murder. Authorities seek to deport him on the grounds of his criminal record.

'MYSTERY MAN" GOE S TO TROUBLE SCENE?

The sick and weary eighty-five-year-old "mystery man" of Europe, Sir Basil Zaharoff, financier and munitions salesman, recently left Monte Carlo for an "unknown destination." He left on the Riviera Express, which travels in the direction of Paris. Closely guarded, he is one of the hardest men in the world to photograph. The above picture shows him leaving the Hotel de Paris in Monte Carlo. At the extreme left is Sir Basil's secretary. His valet is opening the door of the car and a detective stands beside the valet. In the foreground a hotel employee is "looking out" for photographers.

New Lindbergh Kidnap Charge

Man at Warsaw, Poland, Accuses His Two Sons of Crime in U.S.

Warsaw, April 6—The Lindbergh kidnapping case was introduced in a Warsaw court yesterday when Bruno Richoffen accused his two sons of being the kidnappers. As proof of his charges, he presented a letter written to him by his sons, then in Chicago, asking for money to return to Poland to escape the United States police, and a photograph of the two men with Col. Charles A. Lindbergh and the baby.

A little upset by the startling charges and the explanation of them, the court ordered the brothers Richoffen held while the matter is being investigated.

NAMED ARMY CHIEF

London, April 6 (Canadian Press)—General Sir Robert Archibald Cassels yesterday was appointed commander-in-chief of the army in India. He will succeed Field Marshal Sir Philip Chetwode on completion of the latter's tenure of office, November 30 next. Sir Philip has been commander-in-chief since 1930.

Control Plan For Coal Mining

Canadian Press

Regina, April 6.—Complete government control over the Saskatchewan coal mining industry through a system of licensing forms the major recommendation of the report of Mr. Justice W. F. A. Turgeon, who made a complete investigation into the coal mining industry of the province.

Amongst other recommendations of the commission, the government recently brought down legislation giving the Lieutenant-Governor-in-Council power to inaugurate a system of licensing coupled with plans for establishment of certain codes to govern the mining industry. Under terms of the coal mining operators would be limited to licensed operators who subscribe to the terms of the codes laid down.

DOGS ESCAPE

Springfield, Mo., April 6 (Associated Press)—Using only their teeth to cut through sides of their prison, fifteen desperate prisoners escaped from the death cell here yesterday evening. None has been recaptured. The pallbreakers were stray dogs.

Reluctive prospecting for gold is to be conducted by a Dutch organization in the Snow Mountains region of New Guinea.

5 famous FEATURES

and you get them Only in the STYLE and QUALITY Car in the Low-Price Field

FOR 1935, the Master Chevrolet improves on its own famous quality record of last year—offering you five famous modern features, not one of which can you get on any other car in Chevrolet's price class!

"Turret Top" Fisher body—the first real all-steel body ever offered in the low price field! KNEE-ACTION—for safety and comfort! Blue Flame Engine—the valve-in-head type used in costly cars! Cable-Controlled Brakes—weatherproof, positive and always equalized! No-Draft Ventilation—the famous Fisher all-weather system!

When you can get all these features of beauty—performance—easy-riding—safety—dependability—in only one low-priced car . . . see and drive that car before you buy! Call in today at our showrooms. We have a new, 1935 Chevrolet Master Six all ready for you to "take the wheel"—and prove for yourself that you get more quality at lower cost in Chevrolet!

DANZIG READY FOR ELECTION

Tide of Nazi-ism in Free City, Where People Vote To-morrow

Associated Press

Danzig, April 6.—A flood tide of Nazi fervor carried the Free City's populace along to-day, the last before the Volkstag elections, which may result in a Nazi dictatorship.

Rudolf Hess, spokesman for Adolf Hitler, addressed the voters yesterday evening, declaring Soviet Russia is the obstacle to Nazi Germany's agreement to an eastern pact.

"Soviet leaders repeatedly have declared the only purpose of pacts with capitalistic countries is the promotion of world revolution for the purpose of damaging the economy of other nations," he said. "We believe Soviet leaders see a capitalistic state in Germany, and we are sceptical that fighters for a world revolution are good partners in international pacts and guarantors of peace."

Hess, speaking directly of the coming election, demanded the establishment in the Free City of "the same internal system as prevails in Germany."

The voters to-morrow will renew the Volkstag, the lower house of the city's parliament, for the sixth time since the League of Nations took over guardianship after the Great War.

The city was most excited on the eve of the election. The Catholics, Social Democrats and Poles worked furiously to stave off the Nazi advantage which was captured by the visits of Hess, General Herman Wilhelm Goering, Premier of Prussia, Dr. Paul Joseph Goebbels, Minister of Propaganda, and lesser Nazis.

NEGOTIATIONS ON RELIEF

Ottawa Government to Deal With Provinces During Easter Recess

Canadian Press

Ottawa, April 6—The long Easter adjournment of the House of Commons, announced yesterday by Acting Prime Minister Sir George Perley, will probably be utilized in part by the government for negotiating new relief agreements with the provinces as well as preparing legislation based on reports of the mass buying commission and the house committee on housing.

Rt. Hon. W. L. Mackenzie King, Liberal leader, opposed a long Easter adjournment, principally on the grounds it would delay the general election, and until that issue was decided he believed business in Canada would not settle down to a satisfactory trend.

Sir George Perley said the Easter recess would run to May 20. Adjournment would be moved when the order paper was exhausted, but it is not believed that will be before April 17.

TO VOTE EXPENSES

Some of the sting was taken out of the announcement when Sir George assured the members there would be provision in the estimates to compensate the members for extra expenditures involved in their return after Easter.

Communications will be sent soon to Premiers of the provinces on the subject of new relief agreements. The relief act for 1935 was given royal assent on Thursday and the government is now in a position to negotiate new terms with the provinces. Meanwhile the monthly lump sums paid the provinces as grants in aid since last August have been continued for April.

It is possible a Dominion-provincial conference will be called during the recess, but no invitations have been sent yet and this, it is stated, may not be necessary.

Threat Against U.S. President

Massachusetts Laborer Who Sent Letter Has Hallucinations; Is in Custody

Associated Press

Boston, April 6.—Thomas F. Murphy, twenty-nine, a laborer of Cambridge, Mass, arrested by United States secret service agents yesterday on a charge of sending a threat, was arraigned and committed to a psychopathic hospital for observation.

Murphy was held in personal bail of $5,000 after arraignment before U.S. Commissioner Harry F. Gutterman. He was examined by Dr. George F. Houser of the Boston state hospital. The physician's report said Murphy was suffering from hallucinations of persecution by a former employer.

SOCIAL CREDIT IN ELECTION

Group in Alberta Prepares to Enter Candidates in Provincial Contest

Canadian Press

Calgary, April 6—Alberta's election pulse beat faster to-day with four parties bidding for power.

The Alberta Social Credit League wound up its southern and central Alberta convention yesterday evening after voting to contest the provincial general elections against the present governing party, the United Farmers of Alberta, and the Liberals and Conservatives. Voting is expected in June.

William Aberhart, fifty-four-year-old high school principal and dean of the Calgary Prophetic Bible Institute, was endorsed as leader of the League and given wide power over selection of Social Credit candidates in the various constituencies. The convention decided that if the social credit group commands a majority in the next Legislature, then Mr. Aberhart will be invited to take the premiership, though he will not be a candidate in the election.

Organization for the election rests chiefly with Mr. Aberhart and an advisory council which he will appoint. A convention for northern electoral constituencies will be held in Edmonton April 25 to consolidate the efforts of northern Social Credit supporters and prepare for election day. Numerous groups are already organized in the north.

NO NAMES YET

At the convention here, at which 175 delegates represented twenty-four constituencies, a distinct departure in the naming of candidates was decided on. The names of the nominees selected will not be made public until after Premier R. G. Reid announces the date of the election.

The platform drawn up contains ten planks, including the major "basic dividend" clause, which, the proponents of the movement claim, would provide a "living allowance" for every man and woman in Alberta. Urban and dural dwellers, workers and farmers, share in the proposals Social Credit has to offer.

WOMEN MUST HAVE LICENSE

Female Anglers Checked in Game Act Changes; Cheaper to Hunt

Special to The Times

Nanaimo, April 6—James Cunningham and F. B. Butler, members of the newly-appointed game commission for British Columbia, addressing members of the Nanaimo Fish and Game Association in Eagles' Hall Thursday night, appealed for co-operation in the conservation of game.

R. Bayley, president of the local association, was in the chair.

Mr. Cunningham told of the attempt during the last twenty years to conserve game and outlined recent changes in the Game Act. The changes, he said, were introduced to regulate non-resident anglers and hunters and to benefit farmers.

Among the changes enumerated were: That fallow deer are being released from James Island and can be shot as game; women over eighteen will be obliged to take out anglers' licenses under the act which calls for anyone over twenty-one to have a license; firearms licenses reduced from $5.50 to $3; farmers licenses reduced to $2; non-resident sportsmen's license reduced from $10 to $5 and the daily $1 license abolished.

Pitlamping penalties will be increased from thirty to sixty days in jail, with a fine of from $500 to $1,000.

DOES NOT WANT SHORTER NAME

Associated Press

Pontiac, Mich., April 6—A rose by any other name might smell as sweet—but not to Glafkos Pappatheodorohomonnondoronionicucopoulos!

The man of letters—count them, thirty-seven—vased wroth as a conspiracy on the part of his children, abetted by the school teachers, to shorten the family name to Protopappas. Stella, sixteen, one of the seven children, drafted the abbreviated form of the full name which, she explained, was built by the addition of a name with each generation.

Legally, Glasfkos says, the old name stands—from "Pap" to "Lon."

If You Like Them Cool

We don't know your exact personal preference, but we'll wager that you, too, like to roll cigarettes that are cool, as well as satisfying. If we're right, swing to Ogden's Fine Cut and get what you want.

Every leaf bought for this tobacco is ripe and mellow—and nature takes the harshness out before it's used in Ogden's. That's why Ogden's is such a cool, satisfying smoke. And of course, you know that any cigarette is better if rolled with "Vogue" or "Chantecler" papers.

CAMBRIDGE WINS AGAIN

SIXTEEN TIMES SINCE THE END OF THE GREAT War the "battle of the blues" has been fought out on the Thames between Putney Bridge and Mortlake. Of this post-war series fifteen victories have gone to Cambridge and one to Oxford—in 1923. For twelve successive years, therefore, the light blues have carried off the palm.

The triumphs of Cambridge, incidentally, have varied from one length in 1921 to as much as ten lengths in 1928. When the two boats finished at Mortlake to-day the dark blues were four and one-half lengths in the rear. The year 1925 was a heart-breaking one for the Oxford oarsmen; their shell became water-logged in the neighborhood of Hammersmith Bridge, about two miles from the starting point and two and one-quarter miles from the finish. At that time Cambridge had a lead of 120 yards.

To-day was the eighty-seventh race of this classic series which began as far back as 1829 and the record now gives Cambridge forty-six victories and Oxford forty, with one dead heat—in 1877. From 1915 to 1919 there were no contests for the obvious reason that both Oxford and Cambridge sent every available man to the colors. Nor was there a race in 1838, 1843, 1844, 1850, 1851, 1853, or 1855. It will be noted, moreover, that not until after the war did Cambridge even the score, but since 1923 they have continued to run away with the lead.

A good deal depends on which team wins the toss for selection of position. On practically every occasion there is a stiff breeze at this time of the year either from direct north or direct south. To-day, however, it was mainly from the west, and a cold one, too. Cambridge, therefore, having won the toss, selected the Surrey, or south, side which afforded considerable shelter for their shell except in those parts of the winding course where both bows headed straight into the wind.

As this is written "boat race night" is in full swing in London. The great rowing classic of the year is over. Hard training of the last few weeks gives place to a night of hilarity, and in the neighborhood of Leicester Square and Piccadilly Circus the stolid London "bobbies" have their work cut out to control the crowds and the traffic, to say nothing of ministering to those exuberant spirits who feel that either a light blue or a dark blue ribbon on the lapel of their coats is sufficient warranty for a little extra celebration.

CONSIDERING IT

HON. HUGH GUTHRIE, MINISTER OF JUSTICE, told the House of Commons yesterday that he would consider an investigation of penitentiaries by a Royal Commission, and that a commission will inquire into the charge that a high penitentiary official had made slighting statements about Miss Agnes MacPhail, M.P.

Serious unrest in Canadian penitentiaries has been manifest for the last three or four years and the whole matter should have been adequately investigated long ago. It is not complimentary to the intelligence of the Canadian people to inform the House, after admitting there has been serious trouble at one or other of our penal institutions, that "changes have been made" or that all is quiet on this or that particular penitentiary's front. What the public is entitled to know, is what caused the trouble in the first place. The money for the upkeep of this country's prisons is furnished by the taxpayers of the Dominion.

The taxpayers, moreover, are not a collection of sobsisters who would treat malefactors as honored guests of the government at their expense any more than they will be a party to punishment by a form of repression which belongs to the middle ages. What they want is to be assured that these institutions are being competently conducted, that the first, or even second, offender shall not be considered one who may abandon all hope.

The longer the government postpones the most searching inquiry into this matter, the more suspicious the public will be that there is something radically wrong.

MUST STOP, LOOK AND LISTEN

ITALY MUST PROCEED WARILY IN HER DISPUTE with Ethiopia, notwithstanding the marked disparity in fighting power between the two countries. While the Italians have an overwhelming superiority in equipment, especially in the vital element of aircraft and competent aviators, the physical conditions of the country ruled by the "Lion of Judah," "King of Kings," and so on, would make conquest difficult and costly, and no country under a dictatorship can afford a difficult or costly campaign, even though it be victorious.

Spain under the dictatorship of Prima de Rivera found this out with a vengeance. The price she paid for suppressing the Riffs in northern Africa, who were comparatively near and much more easily got at than the Ethiopians are from Italy, was a revolution which pulled down not only the dictator but the dynasty. There also is the fact in the Italy-Ethiopia controversy that the tensity of the European situation limits the number of effectives they can transport to the African field. A bad set-back out there might have serious repercussions at home. It might easily create the crater through which smouldering discontent would issue like the lava which periodically bursts forth from Vesuvius.

All dictatorships fear—and with good reason—the people to whom for the moment they are able to dictate. None of them dares risk a prolonged conflict which does not quickly produce results in which the advantages signally outweigh the losses, for every one of them knows that once they slip the hostility of those they suppress will break out in revolution.

Napoleon was able to maintain his domination over France by a long list of spectacular victories over his adversaries which he could capitalize at home without disclosing the cost of them to the people. It was easy to keep the public in the dark then. It is impossible to do it now, for no matter how tight the censorship may be there always are ways and means, either in the air, or on the land, of revealing the facts. A single disaster in the field would put Stalin, Hitler and Mussolini out of business, no matter how meritorious may have been their services at home. Even in democracies, governments fall when their armies or navies suffer reverses, but they suffer through constitutional channels. In dictatorships there are no constitutional channels, so when they fall it is through direct action in the form of revolution and civil war.

BILLIONS COMMON NOW

SINCE PRESIDENT ROOSEVELT launched his "New Deal" for the people of the United States the government at Washington has caused to talk in terms of hundreds of thousands of dollars; millions, even, have come to be regarded as almost insignificant sums unless there are several hundreds of them under consideration. So our neighbors by this time have got used to talking in terms of billions.

The latest measure to be adopted by Congress and which now merely awaits President Roosevelt's signature is the great public works bill which permits of the spending of no less a sum than $4,000,000,000 for such programmes as may be considered most effective for the relief of the idle. Although supporters of the administration dominate both the House of Representatives and the Senate, it took ten weeks to get this legislation through Congress. It has been assailed from many quarters, Republican, of course, but also from some Democrat sources, while a section of the press has been very hostile.

The object Mr. Roosevelt had in mind when he asked for this huge sum was the application of relief moneys to productive undertakings so that the dole system might be done away with. The bill provides for the expenditure of this fund on actual work and what is described as "work-relief"—at the discretion and under the direction of the President, except in respect of highway funds which will be apportioned under the existing procedure.

It also is provided by the bill that funds are to be earmarked in eight general classifications but without definite requirements as to how the money shall be spent, while it also gives the President authority to fix wages but requires him to pay prevailing wage rates on all federal building projects.

The "New Deal"—or the NRA, to give it its official title—has been scoffed at by economists in the country of its origin and in other countries. Not even Mr. Roosevelt himself would contend that it has done all that he expected it would do. But the way to look at it is to consider what sort of a condition the country on the south of us would have been in to-day if the new government at Washington had not started something entirely different.

The President realized at the outset that a changed world demanded the application of fresh formulas. These formulas have been responsible for putting about four millions back on the payrolls of the country. Not only is there this result to be set down on the record, but the psychology of the people has undergone something in the nature of a revolution; the despair of 1932 has given way to the hope of 1935.

It is worthy of note, moreover, that that conservative body, the United States Chamber of Commerce, according to a statement to-day, declares that business all round in the neighboring republic was better by 10 per cent in the first two months of this year than it was in the corresponding period of 1934. This is a heartening report, because any improvement in business in the United States must have a favorable reaction in Canada.

WHAT OTHER PAPERS SAY

SHOULD REDS HAVE A VOTE?

The New Orleans Times-Picayune

One of the surest ways of breeding Communists is to make martyrs of them, and it would be difficult to think of a procedure more likely to give them the feeling of persecution than denial of the use of the ballot.

SIR MALCOLM'S SPEED

The New York Times

It is not likely that more than 100 miles an hour will ever be made on open roads as we know them. So we must content ourselves with admiring the man who flew over the sands at a speed that few airplanes ever reach. His courage, his skill, his coolness, his physical stamina are magnificent. But they are adornments of a time more man rather than aids to the engineer at this late stage in the automobile revolution.

IGNORANCE IS OFTEN MUTUAL

The New York Sun

Unsophisticated citizens of the United States have often been chagrined on learning that the American Revolution occupies a small place in the history of England, that the great of this country, with a few notable exceptions, are unknown even to Britons who talk charmingly of blood that is thicker than water, hands across the sea and a common language. It seldom occurs to them to boast of their ignorance of Great Britain as an offset to the serene—and not unnatural—ignoring of their country by Britons. The United States is not the only land whose spokesmen sometimes feel aggrieved by an attitude they perhaps misconstrue; lately Canadians loyal to the empire have been irritated to a degree which has led them to complain to London of what they call "British ignorance of Canada." Mr. Calvin, a Canadian, has suggested in a letter to The Spectator that an attempt be made to enlighten the Britons by publication of a history of the Dominion for their benefit.

THOUGHTS

So King Solomon exceeded all the kings of the earth for riches and wisdom.—I Kings x 23.

The wealth of man is the number of things which he loves and blesses, which he is loved and blessed by.—Carlyle.

Neither murmur ye, as some of them also murmured, and were destroyed of the destroyer.—I Corinthians x 10.

Just as you are pleased at finding faults, you are displeased at finding perfections.—Emerson.

Just Folks

by Edgar A. Guest

WORKS AND CITY STREETS

When the leaf comes back to the bough
And the time comes back to the year,
When the farmer turns to the plough,
When the sap starts up in the spear—
A length in an alley
From the cold gray walls of the street,
And the tiny carbuncle of the day
Where the grass is cut to the feet.

Not that for the urging of cars,
Not the numbers of labor to be done
Only urge the desire to the start
The earth heats up beneath the sun;
Where nothing of brick and cement
Has added to a ribbon-like track
The wanderer detours that were meant
To brighten man's pathway with blooms.

I walk through the city and think,
With the pain shooting up from the ground,
Of the petals of purple and pink
Which under the pavements lie dead.
Man has stifled the warm earth with stone
And has shut out the sun and the rain.
And never these roadways will own
The butterfly glory again.

When the leaf comes back to the bough
And the spring of the year is at hand,
I've a yearning to wander somehow
To the feel and the charm of the land;
To see daisies reach up to the sky
As if singing an anthem of May
While the streets of the city decay
And the markers of cities decay.

(Copyright, 1935, Edgar A. Guest)

Twenty-five Years Ago To-day

THE VICTORIA DAILY TIMES April 6, 1910

From The Times files

It present calculations of the city engineer's department do not miscarry, the spring and summer of the present year will witness the employment on public undertakings in Victoria of the largest number of men in the history of the city. G. H. Bryan, assistant city engineer, when asked this morning about the matter, made the prediction that at an early date there would be at least 1,000 men at work in the employ of the city.

* * *

A considerable number of English immigrants are arriving to make their homes on Vancouver Island. Yesterday five families reached the city from Yorkshire.

* * *

The provincial government has decided to place a reserve upon the entire watershed on both sides of Okanagan Lake, as well as on the various streams feeding it, in order to ensure an abundant supply of water for domestic and irrigation purposes in the rapidly-growing and very important part of the province.

* * *

All descriptions of the new G.P.T. steamers that are to ply on this coast, the Prince Rupert and the Prince George, indicate that they will be second to none in their class afloat. They are slightly larger than the Princess Victoria, but a little smaller than the Princess Charlotte. Equipped in the most up-to-date way in every respect, they are quite equal to the C.P.R. crack coasters, if not superior in some respects.

* * *

C. Betterton, who has for the past few months been absent from this city, returned on the steamer Tees yesterday afternoon from the West Coast.

* * *

There was a pleasant incident at the Dominion Immigration building yesterday morning when Dr. Milne presented on behalf of himself and his staff a beautiful cane to S. Reid, who is leaving the immigration building.

THE RHYMING OPTIMIST

By ALINE MICHAELIS

TO A YOUTH

Never doubt that spring will come,
Lasting not one flower;
Song of thrushes, bees' loud hum,
All its age-old dower!

You are young, lad, and in youth
Loss may seem Earth's ending;
Later you will learn this truth:
Hearts were made for mending!

Never doubt that spring will wear
All of beauty's guises;
Primrose petals in her hair,
April's gay surprises.

However dear the thing
Life from you has taken,
Still the lark is on the wing,
Still the rose will waken!

SIDE GLANCES By George Clark

"Now your principal duty will be to keep an eye on the rest of the employees."

Other People's Views

WARNING!

The Times urges its correspondents to restrict their contributions to 600 words.

Henceforth it positively will not print communications which exceed that length.

These letters must be plainly written on one side of the paper only, and must be accompanied by the names and addresses of the writers, not necessarily for publication but as a guarantee of good faith.

Letters will not be re-written for publication. If they are not legible no attempt will be made to read them.

Letters not used will not be returned to the writers.

Letters containing offensive personal reflections will not be printed.

These rules, which henceforth will be carried out absolutely, are designed as much for the protection of our patient readers as for that of The Times.

CAUTION!

The Times will not assume responsibility for the return to the writers of articles sent for publication in the Correspondence Column or anywhere else in this newspaper, whether they are published or not, unless they have been specially solicited.

PARKING

To the Editor:—We operate a garage in the heart of the city, and time after time storage customers of ours would find themselves prevented from entering the garage at nights because a locked car would be parked directly in front of the approach to the garage doors.

The city no longer places yellow lines along such approaches, but we are glad to note that it will shortly become a legal offence for any car to be parked in front of and obstructing a proper approach, so preventing access to the place the approach serves.

We, and others who are inconvenienced by the carelessness of the few car owners who persist in disregarding other's rights, will not be sorry when they can be summoned for parking just where they might please.

A GARAGEMAN.

WHY NOT CANADIANS?

To the Editor:—I wish to join my protest with those who wonder why all our splendid men in Canada have been overlooked in the appointment of a Governor-General. It is an insult to Canada. The same thing applies to Victoria sending to England for a bishop. What can we do to stop this taking of jobs from our own men? Could we get up a petition and send it to the King objecting to John Buchan's appointment? Thousands in Victoria would sign it, and other cities would follow suit. As Col. Hodgins remarks, he is to be the governor of the people, and it is the people's opinion that matters. If some leader like Dr. Clem Davies will give us a lead we will follow. A similar petition could be sent to the primate in regard to sending to England for a bishop. I appeal to all who love Canada.

"CANADIAN JUSTICE."

Victoria, B.C.

LORD SHAFTESBURY

To the Editor:—I have read the reports of Dean Quainton's recent lecture on Lord Shaftesbury. It covers many of the activities of that great philanthropist, but no mention is made of one of his greatest activities. I refer to his work to combat vivisection.

Unfortunately, either through ignorance, indifference or fear of appearing to be associated with this burning question of animal experimentation, it is customary to eliminate any reference to this phase of Lord Shaftesbury's work, yet he, himself, considered it one of so great importance that when a movement was organized to combat it by that noble woman, Miss Frances Power Cobbe, Lord Shaftesbury threw himself heart and soul into the combat. He became the president of the first society organized in England. Among the vice-presidents we find the names of Lord Chief Justice Coleridge, Cardinal Manning, Robert Browning, Thomas Carlyle and Alfred Tennyson. The movement of reform was supported by the greatest scholars, philanthropists and philosophers, as well as by medical men, in England.

A man so highly ethical as the Seventh Earl of Shaftesbury is not likely to have supported the torture of animals. "The thought of this diabolical system disturbs me night and day," he wrote in his diary. To his dying day he fought against vivisection, and in the House of Lords his pleading voice was raised again and again in defence of the defenceless. Total abolition was his object.

Because he was a dear and valued friend of members of my family and because it is now so customary to neglect any reference to his attitude on the question of vivisection, and because he cannot speak to-day for himself, I feel it my duty and my pleasure to supply the omission.

The thronging crowds which pass year in and year out through the world's great metropolis, see the poised, joyous figure of "Love," the memorial raised to the memory of England's beloved statesman and reformer, a man who refused any compromise with the things that he considered evil, dangerous and degrading, a man who in every deed and thought lived to fulfil the motto of his house—"Love—Serve."

DORA KITTO,
Honorary Secretary, Canadian Anti-vivisection Society, Victoria.
315 Hayward Building, April 4.

BOUND TO WIN

To the Editor:—Noticing a letter re unemployment, the dean and the church, I personally would like to have my little say in this matter—I am very grateful to the never-failing generosity of Dean Quainton—having been able to regain my feet, I cannot say anything too high of the value of the church here in Victoria, also the manliness of our dean. I am a well-known person of this city and have served a sentence in Oakhalla—also an easy mark for small town gossip and opinion. But who cares? Have the courage of your convictions, give society a dose of its own medicine and also have the will power to take it—win or lose—God helps those that help themselves. Anyone requiring verification of my statements can do so through The Times. But please remember, God bless our dean and the church—political fools and the flock of human sheep that are so easily swayed by gossip will realize sooner or later that it takes guts to stand and fight—one is bound to win with God and the dean on his side.

AN EX-CONVICT.

DAYLIGHT SAVING

To the Editor:—I am sure your readers will be interested to learn that I have presented to the Victoria City Council a petition signed by 1,500 firms and individuals favoring the use of daylight saving time in Victoria this summer. Our canvasser confined his efforts entirely to the central business section of the city. The large number of names on the petition indicates an opinion overwhelmingly in favor of daylight saving.

Actually the petition received support to the extent of 100 per cent of the staff of the Standard Furniture Company, approximately 95 per cent of the staffs of David Spencer Limited, Hudson's Bay Company, British American Paint Company, Liquor Control Board, the City Hall, grocery and confectionery wholesalers, and all but one of the fruit and vegetable wholesalers, etc., and approximately 75 per cent of the proprietors of jewelry, shoe, grocery, drug, men's clothing, women's clothing, flower, sporting goods, electrical and other stores.

In my opinion daylight saving is desirable and beneficial to the great body of the people.

During the winter months our working hours are fairly central between daybreak and darkness. In the past, when most people worked on the land in the open air, starting work from 5 to 6 a.m., the hours of labor were fairly central in the summer also, and people worked in the sunshine. At present, however, when the large majority of citizens are engaged in industry and commerce, and spend their days inside office, store and factory buildings, starting work from 8 to 9 a.m., and finishing at from 5 to 6 p.m., conditions are different, and the working hours during the summer months are not central. This leaves an average of approximately two hours only of the comparatively weak sunshine of late afternoon available during our leisure time when we may take advantage of its health-giving rays. This fact makes it desirable to centralize the summer working hours, so that a longer time in the sunshine may be secured in the evenings when the citizens generally are able to fully enjoy it.

The legitimate objections to daylight saving are few. For instance, there have appeared in the press letters signed by "tired mothers," stating that under daylight saving they would be unable to get their children to bed at a reasonable hour. I believe most mothers have sufficient control over their children to get them to bed at the proper time. Some parents, it is true, either cannot or will not make their children retire at proper hours even now, when we do not have daylight saving. Invariably, games, shows and other evening performances are well attended by children up to a late hour.

So far as the smaller children are concerned, the changing of the clock would make no difference whatever, as their sleeping and waking are regulated entirely by nature.

I am at a loss to find justification for statements regarding transportation difficulties.

Victoria is a comparatively small centre, having but one train a day to Nanaimo, two boats to Vancouver, and two boats to Seattle, while the San Francisco boats arrive and sail late at night. The ships from the Orient and Australia stay here for very brief periods, and the only automobile ferry we have connects with Port Angeles. Victoria therefore cannot be seriously affected in this question.

An extra hour of sunlight would be of incalculable value to clerks, bookkeepers, etc., who by the nature of their employment must work inside, in many cases under artificial light in a vitiated atmosphere.

SISTER MARY'S KITCHEN

FOOD ACCESSORIES WILL BRIGHTEN UP DIETARY ENSEMBLE

By MARY E. DAGUE

I've been noticing in the fashion columns that the stylists stress the importance of dress accessories. Well, there are food accessories, too, that are pretty vital.

Nuts, dates, raisins, coconut, candied fruit, jelly—these and many other materials combine happily with haste foods to make nutritious and economical dishes. And they add interest, too, with relatively little expenditure of either time or money.

I feel strongly that the carefully chosen food accessory should not be regarded as extravagance. If two or three chopped dates added to the children's cereal can make the dish a treat instead of a morning bone of contention, surely that is worthwhile. Especially since the dates add about 100 calories as well as food iron to the cereal dish.

INCREASING FOOD VALUES

Chopped nuts or raisins, or both, combined with baked apples, materially increase the food value and adult as well as juvenile pleasure in the dish. A spoonful of jelly is an attractive variation too, placed in the core-cavity.

Cup custards and plain cornstarch puddings gain by a sprinkling of nuts. Two tablespoons chopped English walnuts furnish 100 calories of protein, fats and carbohydrates as well as vitamins A and B and mineral constituents.

Canned peaches, in fact almost all canned fruits, are made more inviting by a sprinkling of shredded coconut. The healthful dessert of sliced oranges and bananas acquires new character if shredded coconut is added to the combination. Fruit salads, too, are given increased food value by the addition of coconut.

Candied fruit is more expensive than the other accessories but it will do wonders to almost any everyday dish. Liquid pudding sauces, for instance, take on new character with the addition of a few tablespoonfuls of finely chopped candied cherries or pineapple.

Sauces, too, are valuable accessories. Mushroom sauce, for instance, over buttered spinach turns that underfire vegetable into something exciting, see if it doesn't.

CREAMED EGGS AND PEAS

Four hard cooked eggs, 2 cups cooked peas (canned or fresh), 3 tablespoons butter, 3 tablespoons flour, 1½ cups milk, ½ teaspoon salt, ⅛ teaspoon pepper.

Cut eggs in thick slices and arrange in a well buttered baking dish in alternating layers with peas. Pour a sauce over the whole and bake thirty minutes in a moderate oven (375 degrees F.). Serve from baking dish. The sauce is made by melting butter and when bubbling, stirring in flour. Slowly add milk, stirring constantly. Bring to the boiling point and season with salt and pepper.

TOMORROW'S MENU

Breakfast—Baked apples, cereal cooked with dates, cream, crisp toast, milk, coffee.

Luncheon—Creamed eggs and peas, whole wheat bread, marmalade, rhubarb tart, milk, tea.

Dinner—Salmon loaf, spinach timbales with creamed mushrooms, stuffed prune salad, pineapple upside-down cake, milk, coffee.

TEXAS GUNMAN IS RECAPTURED

Raymond Hamilton, Who Escaped From Death Row, Is Again Behind Bars

Dallas, Texas, April 6—Raymond Hamilton, Southwestern desperado and one of a trio labelled by the Department of Justice as No. 1 Public Enemies, was behind bars to-day for the first time since he escaped from the Texas Penitentiary death row.

The slippery twenty-two-year-old bandit, an understudy of the slain Clyde Barrow and ranked in the criminal world with Alvin Karpis and Thomas H. Robinson, was captured yesterday evening without a shot being fired.

Although he had sworn never to be taken alive, Hamilton submitted meekly when Sheriff Smoot Schmid, his deputies and Fort Worth officers encountered the bandit in a railroad yard at Fort Worth.

Deputy Sheriff Bill Decker of Dallas County put a gun against his ribs and told him "hoist 'em, Ray," and Hamilton obeyed.

Hamilton was rushed to the Dallas County Jail, where plans were made to take him to the prison at Huntsville for electrocution as the murderer of Major Crowson, prison guard slain in a penitentiary delivery engineered by Barrow.

Daily Health Service

CONSIDER BLOOD SUPPLY IN PLANNING HYGIENE

Quality and Adequacy of Body's Circulation Are Important to Prevent Anemia and Infectious Diseases

By DR. MORRIS FISHBEIN

Blood is the most important material in your body. Not only must your tissues be supplied with blood, but the blood must be sufficient in amount, contain enough oxygen, and carry enough antisubstances to infection to keep the body free from disease.

Because of this, you should consider the circulation in planning any programme of hygiene. For instance, poor posture crowds the heart by adding the pressure of the chest wall and that of the organs to the burden which the heart has to bear, and in this way poor posture is bad for the circulation. Insufficient exercise results in poor muscle tone and poor muscle tone increases the burden of the heart, because it results in congestion in the tissues.

The heart must be a well-functioning organ or it cannot propel the blood in circulation. When it weakens in its work, fluid accumulates, congestion increases, and the burden becomes incredibly great.

* * *

One of the first signs of a deficiency in the blood is appearance of anemia. This means that the blood doesn't contain enough red blood cells and hemoglobin, or red coloring matter, or else that certain portions of the body are not sufficiently supplied with blood.

One of the most common causes of anemia is the loss of a good deal of blood from the body following a wound, or disturbance of the periodic functions in women. The blood cells also are destroyed by chronic infections and by invasion of parasites such as occur in malaria. There may also be a failure in the diet of substances necessary to stimulate formation of red blood cells.

When any part of the body becomes suddenly white, it is a sign that the blood vessels have become constricted and that the blood is not going suitably to that part. If a sudden stoppage of the flow of blood to the brain occurs, dizziness and faintness occur, and then loss of consciousness.

There are also certain unusual forms of blood diseases which may be inherited. An example of this is hemophilia, a condition in which the blood does not clot after a wound. This condition affects only male members of a family and is transmitted only by female members.

* * *

To build up proper blood, certain substances are important. In the diet, liver and lamb kidneys are essential, because these stimulate the formation of red blood cells better than almost any other foods. An extract which is known to have this power has also been prepared from the wall of the stomach.

Iron is of exceeding importance as a drug for overcoming various forms of anemia and is especially necessary in development of the red coloring matter in the blood. The vitamins also are known to be useful.

Finally, one of the most significant features of proper formation and maintenance of a good blood supply is rest. In fact, many of the leading authorities emphasize a great deal of rest in bed as the most significant factor in overcoming anemias.

By this is meant complete rest, including avoidance of any muscular or mental effort.

There are various rough-and-ready methods of determining whether the blood is adequate. You may compare the redness of the palms of the hands or of the fingernails, but the scientific method is most certain.

A few drops of blood are taken from a puncture in the ear or fingertip. They are diluted with a solution which keeps the red blood cells in good order. Under the microscope the number of red blood cells is counted.

Comparisons also are made of specimens to determine the percentage of red coloring matter in comparison with normal. These actual measurements show definitely the state of the blood and whether stimulation is necessary.

Fashion Show To-day Rivals Spring Gardens

Gay Colors and Floral Fabrics in Lovely Gowns Shown By Plume Shop at Empress Hotel: Sponsored By I.O.D.E. Chapter

Easter is just around the corner, and with it comes the promise of gay clothes and Easter "bonnets"—and some of them really are bonnets from the colorful era of the Regency. At the Empress Hotel this afternoon a lovely galaxy of frocks suitable for all occasions, including the Easter wedding, was displayed by the Major John Hebden Gillespie Chapter I.O.D.E., assisted by The Plume Shop.

Miss Jean Moody, Mrs. J. Alan Fraser, Miss Betty Bapty, Mrs. L. Green, Mrs. Arthur Webster, Miss Ena Henderson, Mrs. Denis Hager, Mrs. F. Auger, Miss Helen Crawford, Miss Dorothy Cameron, Mrs. J. Speck and Miss Rhoda Clark acted as mannequins, while in the wedding scene which formed the climax of the show, Miss Gwen Winsby was the fair and radiant bride.

AN EASTER WEDDING

The bride's gown was of lustrous ivory crepe satin on molded lines, the graceful skirt flaring at the back to a sweeping train. Made with long, tight-fitting sleeves, the bodice was cut with a cowl neck in front, caught at the back with a triple pearl buckle, a similar buckle marking the front of the knotted girdle. Her exquisite veil of filmy net was arranged with an upstanding coronet, caught beneath the chin with a strap of braided tulle, and confined at the back with orange blossoms. She carried a beautiful sheaf of Madonna lilies.

In the wedding group Mrs. Webster was in a lovely frock of yellow taffeta with a quaint jacquette edged with wide box-pleated ruffles of the taffeta, with which she wore a large picture hat of orchid mohair; Miss Crawford, in a graceful frock of green taffeta with a net cape edged with taffeta ruffles, worn with a tiny turban of green velvet flowers, edged with a stiffened veil; Mrs. Speck wore a powder blue ninon frock, with a becoming hat of pink lace straw, and becoming hat of pink lace straw. Each carried a sheaf of spring flowers to match her gown.

Mrs. Hager, as the matron of honor, modelled a graceful frock of [illegible] brown shading to yellow and flame, with a sash with sweeping ends of brown velvet, the boat-shaped neck outlined with velvet gardenias in a flame shade. A large picture hat of black mohair with a tulle edge was worn with it.

Floral ninon of lovely design also fashioned a beautiful evening gown with a novel coatee, fastening at the back, with large, full sleeves. The girdle of plaited ninon, in plain tones picking up the colors in the frock, could be worn with the frock or with the coatee.

In the evening wrap section, a quaint short yellow evening cape of stiff, quilted taffeta, tied at the neck, was worn over a gown of turquoise blue ninon. Miss Bapty also showed one of the new long Regency evening coats of powder blue taffeta, with tie collar, worn over a charming frock of the same material. A cerise evening frock of ninon, worn by Miss Dorothy Cameron, was finished with a quaint coatee, its large sleeves reminiscent of a bed jacket in design.

WOMEN'S WORKROOM

WED TO-DAY AT ALBERNI

Miss Elizabeth Hilton Becomes Bride of Mr. Peter Crozier

A wedding of wide interest and attended by many friends was solemnized this morning at All Saints' Church, Alberni, V.I., when Elizabeth, eldest daughter of Dr. C. T. and Mrs. Hilton of Port Alberni, and Mr. Archibald (Peter) Crozier of Port Alberni, son of Mrs. Crozier and the late G. Crozier of London, England, were united in marriage. Rev. Glen Stevenson officiated.

The bride entered the church on the arm of her father, a radiantly lovely picture in a model gown of white and silver brocade suede lame, cut on close fitting princess lines, with slight train. The dolman sleeves were tight from elbow to wrist, terminating in long points, edged with pleated net, the high neck being similarly edged. White glacee and white velvet sandals were worn. A circular veil was becomingly arranged with a halo of pleated net surrounded with orange blossoms. The bride's bouquet was of roses and carnations in shower formation.

Miss Motreen Hilton, as her sister's bridesmaid, wore a becoming frock of yellow point d'esprit, designed in long close-fitting lines, with three deep frills on the bottom of the skirt. A deeper yellow velvet ribbon was used for the belt, and also in a large bow on her yellow crinoline hat. She wore yellow mittens and carried an old-fashioned bouquet of pastel shaded flowers. Mr. H. Preston Nightingale supported the groom.

The church pews and choir stalls were beautifully decorated with daffodils, and on the altar calla lilies and daffodils were arranged by friends of the bride.

The hymn "Lead Us, Heavenly Father, Lead Us" was sung at the opening of the service, and during the signing of the register Miss Caroline Morden sang "O Perfect Love," accompanied by Mrs. W. R. H. Prescott at the organ.

The ushers were Mr. Cecil Raikes and Mr. Dick Hilton.

Following the ceremony a reception was held at the home of the bride's parents in Port Alberni, where Mrs. Hilton, wearing a becoming black lace gown, small model straw hat and corsage of roses, received the guests, assisted by her sister, Mrs. Clarence Wise of Qualicum.

The bride's table was most artistically arranged with hyacinths, snapdragons and stocks and the traditional wedding cake. Daffodils, hyacinths, snapdragons and spring blossoms were used throughout the rooms. Assisting in serving were Messrs. Dick Hilton, Cecil Raikes, W. A. Ashland, Fred Paton, J. B. McCallum and Russell Turner.

For traveling the bride wore a bois de rose crepe dress, with brown straw hat, brown shoes and accessories, and a cape of quilted taffeta in matching shade of brown.

Mr. and Mrs. Crozier left by motor, traveling south. On their return they will make their home on Third Avenue, Alberni.

Miss Margaret Halse of Vancouver, Mr. and Mrs. A. J. Patton and Mrs. William Straith of Victoria were among the out-of-town guests.

HOWL—BOWSER

Vancouver, April 6.—A wedding of widespread interest in British Columbia was solemnized Wednesday, when Janet Baxter Bowser, youngest daughter of Mrs. Francis Bowser and the late Mr. Bowser, pioneer Vancouver residents, was married to Arthur Randolph Howl, formerly of Birmingham, England, and now of Vancouver.

Rev. F. T. Wilkinson officiated at the ceremony which was held in Christ Church Cathedral.

The bride is a niece of the late W. J. Bowser, a former premier of British Columbia, and is a granddaughter of the late Chief Justice Bowser, as chief factor of the Hudson's Bay Company at Fort Fraser, played a prominent role in the pioneer history of the Canadian Northwest.

TEMBEY—CARSON

Nanaimo, April 6.—Rev. Mr. Bell united in marriage at the Presbyterian manse April 4, Margaret Young, daughter of Mr. and Mrs. John Carson, Pine Street, and William Highmore, son of Mr. and Mrs. Samuel Tembey, Five Acres. The bride was given away by her father, and looked charming in a royal blue dress with accessories to match. She was attended by Miss Florence Tembey, sister of the groom. The groom was supported by Mr. Thomas Gordon. A reception was held in Harewood Community Hall following the ceremony. The happy couple left for Vancouver and mainland points, where the honeymoon will be spent. On their return they will reside at Five Acres.

MILLIGAN—BENJAMIN

A wedding of much interest to the residents of Alberni took place on Saturday last, March 30, at Nanaimo, when Miss Lillian Benjamin, youngest daughter of Mrs. Benjamin and the late James Benjamin, of Alberni, became the bride of Mr. Joseph Milligan, youngest son of Mr. and Mrs. R. Milligan, of Cherry Creek.

The ceremony was performed by Rev. W. P. Bunt at St. Andrew's United Church, Nanaimo. The bride wore for the occasion a smart ensemble of russet brown charmeuse with hat and accessories to match, and carried an arm bouquet of calla lilies.

After a few days spent at Vancouver, Mr. and Mrs. Milligan will take up residence at the Morley residence at Alberni.

Plan Historical Pageant — The Primrose Lodge of the Daughters of England will give an historical pageant under the auspices of the James Bay ladies on Wednesday, April 10, at 8 p.m., at the church. Such figures as Boadicea, Florence Nightingale, Edith Cavell, Queen Elizabeth, Joan of Arc and Mary Queen of Scots will be shown.

WILL BE MARRIED NEXT MONTH

MISS PATRICIA RINES

MR. ERNEST B. CODE

—Photo by Steffens-Colmer.

Mr. and Mrs. L. D. Rines of 628 Moss Street announce the engagement of their youngest daughter, Patricia (Patsie), to Mr. Ernest B. Code of Seattle, only son of Mrs. E. E. Code, Linden Avenue, Victoria, and the late Mr. E. E. Code of Victoria and Winnipeg. The wedding will take place early in May.

PERSONAL

Her Excellency the Countess of Bessborough received a delegation from L'Alliance Francaise at Government House at noon to-day, those presented including Mrs. M. Little, acting president; Mrs. Hamilton Smith, treasurer, Miss Dorothy Kennedy, secretary, and Mme. Sanderson-Mongin. Lady Bessborough, who expressed great interest in the work of L'Alliance, was presented by Mme. Sanderson-Mongin, on behalf of the Victoria branch, with a charming bag of Indian design, the handiwork of Miss Ravenhill, as a souvenir of her visit to Victoria.

* * *

Miss Irene Miller entertained at tea at her home in Ottawa recently in honor of Mrs. John Walker of Victoria, B.C., who is the guest of her sister, Mrs. R. J. Young.

* * *

Mr. and Mrs. Peter Viaud, of Galahad, Alberta, who have been spending the winter months in Victoria, will leave next week for the mainland on their return to their home in Alberta.

* * *

Mrs. J. H. Taylor, St. Patrick Street, Oak Bay, who has been visiting in Vancouver this week with friends, returned this afternoon to her home here.

* * *

Among the guests at the Dominion Hotel are: Mr. C. D. Lewis, Nanaimo; Mrs. J. N. Carey, Edmonton; Mr. J. Polly, Vancouver; Mr. and Mrs. L. Francis, Seattle; Mr. G. Boloff, Seattle; Mr. J. Lewis, Nanaimo and Mr. J. E. Noel, Vancouver.

* * *

Mrs. W. H. Whiteley, Yates Street, and Mrs. J. W. Saunby, Sumas Drive, will leave on Monday for Seattle, en route for a holiday trip to California, and expect to be absent for about a month. While in the south, Mrs. Whiteley will be the guest of her daughter, Mrs. B. W. Trench, Los Angeles.

* * *

The Colwood Golf Club will hold a bridge party, for both ladies and gentlemen, at the clubhouse on Friday evening, April 12, at 8.30 o'clock. Contract will be played, and prizes and refreshments served. Reservations may be made at the clubhouse or with Mrs. P. M. Bryant, G 3026.

* * *

Mrs. M. E. Bowden, The Uplands, accompanied by her son, Mr. Wallace Bowden, and Mrs. R. J. Jameson, The Uplands, have left by motor for New York via the southern States. They will sail for England from New York on May 2, and expect to spend five or six months in Great Britain.

* * *

Mrs. J. Baron, Queen's Avenue, entertained with two tables of bridge on Thursday afternoon. The prize winners were: First, Mrs. M. Townsend; second, Mrs. B. Gough; consolation, Mrs. A. Miller. After bridge a dainty tea was served, Mrs. B. Gough pouring tea. Others present were Mrs. J. H. Erb, Mrs. H. Robinson, Mrs. A. Gough, Mrs. W. E. Skett and Mrs. J. Baron.

* * *

A surprise kitchen shower was held on Thursday evening by the Misses Lillian and Hazel Smethurst, 2322 Vancouver Street in honor of their sister, Florrie, whose marriage will take place shortly. The many useful gifts were presented in a basket decorated in pale pink and apple green, and the dining table was centred with pink carnations. During the evening court whist was played, the winners being Misses May Mick and Yvonne Hartley. Those present were: T. Berg (O'Brien Bay), and Misses Katie Simpson, May Mick, Florrie, Lillian and Hazel Smethurst, Yvonne Hartley, Daisy Lyle, Winnie Beecher, Pearl Matthews, Nellie Hume, Marjorie Gillies, Irene Davies, Eva Middleton and Audrey Hanson.

Mrs. E. M. Adams, of Vernon, wife of the Bishop of Kootenay, is visiting in Victoria, and is a guest at The Angela. On Friday next Mrs. Adams will be joined by her daughter.

* * *

In honor of Miss Maidie Innes, whose wedding will take place shortly, Mrs. Guy Barclay entertained this afternoon at her home on Island Road, Oak Bay.

* * *

Mrs. L. Ashburnham of Cowichan Lake has been visiting in the city as the guest, in turn, of Mrs. Chas. Fisher Corbett, at Cadboro Bay, Mrs. R. W. Gibson, York Place, and of Mrs. Homer Dixon, and will leave for her home about the middle of next week.

* * *

Members of the debators' group of the Junior Chamber of Commerce met on Thursday evening at the home of Mr. John Baxter, St. Andrew's Street, for a business meeting. After the business, Mr. Baxter served refreshments and a social hour was enjoyed.

* * *

Mr. and Mrs. Leon Moser, 2318 Douglas Street, announce the engagement of their second daughter, Mary Madeline, to Mr. Michael Patrick, second son of Mr. and Mrs. Alex. Grant, 2317 Blanshard Street. The wedding will take place on April 22 at St. Andrew's Cathedral.

* * *

Mrs. F. Barron entertained quietly at her home on Prior Street the Friendship Bridge Club, there being four tables of play in progress. Prizes were won by: First, Mrs. W. Skett; second, Mrs. R. Rance. Refreshments were served by the hostess from a table decorated with daffodils. During the evening Mrs. E. Rance presented Mrs. W. Skett, treasurer of the club, and Mrs. J. Stephenson, secretary, with gifts from the members. The invited guests were: Mesdames A. Gough, M. Townsend, J. Jefferson, F. Rawnsley, I. Erb, F. Oliver, A. Phelps, D. Gallie, W. Skett, A. Steer and J. Stephenson. The guests of the evening were Mrs. Culross, Mrs. Robinson, Mrs. Price, Mrs. J. Browning and Mrs. A. Maynnith.

* * *

At the home of Mr. and Mrs. P. A. Stock, 3148 Cedar Hill Road, a happy party of friends met on Tuesday afternoon to honor Mrs. Barbara Skelton, on the occasion of her seventy-ninth birthday, Mrs. P. A. Stock and Mrs. J. Davey being the joint hostesses. The reception rooms were gaily decorated with spring flowers in a color scheme of yellow and white. Mrs. W. Chadwick presided over the artistically arranged tea table, a dainty birthday cake occupying the centre. Mrs. G. Lovitt and Mrs. E. Rowbotham assisted the hostesses in serving tea. Mrs. Skelton came to Victoria from England twenty-three years ago and has made many friends here, her fine sterling qualities endearing her to old and young alike. In a few well-chosen words Mrs. Chadwick conveyed to Mrs. Skelton the esteem and good wishes of those present, and on their behalf presented her with a suitable gift. A lovely bouquet of spring flowers was also given to the guest of honor by little Frances Rowbotham. Those invited included: Mrs. B. Skelton, Mrs. W. Wardale, Mrs. W. Chadwick, Mrs. J. Armstrong, Mrs. W. Shepherd, Mrs. Alex. Martin, Mrs. S. Henry, Mrs. G. Lovitt, Mrs. G. Knight, Mrs. F. Edwards, Mrs. E. Rowbotham, Mrs. S. Sauvery, Mrs. H. Beeson, Mrs. R. White, Mrs. F. Beeson, Mrs. Bland, Miss Annett, Mrs. J. Bland, Misses Frances Rowbotham and Vera Bland, Masters Roger Edwards and Daniel Stock.

Over 100 guests attended the very successful silver tea held under the auspices of the Metropolitan Church Flower Guild on Wednesday afternoon at the home of Mrs. W. J. McArthur, 2290 Woorlawn Crescent. Mrs. R. Hetherington, Mrs. R. F. Church and Mrs. E. W. Whittington assisted the hostess in receiving the guests. The reception rooms were gay with daffodils, similar flowers, with tall green tapers, adorning the tea-table. Mrs. Ralph Snider and Miss Gertrude Snider were responsible for the floral decorations. Mrs. W. E. Harper, Mrs. A. J. Daniels, Mrs. Aaron Reid, Mrs. Aaron Parfitt, Mrs. Arthur Lee and Mrs. F. J. Brumpton presided at the table. Contributing to the attractive programme were Mrs. Nellie McClung, Mrs. R. Keir, Miss Louise Noble and Mrs. Dorothy Morton Gough. Mrs. R. J. Cozier Smith was the general convener, and her little daughter, Olive, daintily frocked in primrose yellow, opened the door.

* * *

Another old-time dance was held Tuesday evening under the auspices of Vancouver Encampment No. 1, I.O.O.F. Those in attendance included: Misses Lillian Jamieson, Hazel Fenerty, Muriel MacDonald, I. H. Wilde, M. Snider, T. Moore, B. Gibson, Edna Teagle, Beatrice Williams, Clarice Hopkins, Lettie Johnson, Alice Johnson, Romeo, Dorothy Hill, Agnes Nathan, L. Hughes, M. Muir, Frances Prowse, E. Rose, D. Morrison, Holdcroft, D. Gardiner, I. Curtis, Jackson. Mesdames Muir, Coll, Lane, Jamieson, A. Clifford, F. C. Hurry, Jackson, Scott, A. B. Prowse, McCorquodale, Collins, Stewart, J. Spence Matthew, A. H. Geiger, H. Matthews, H. Dobson, J. Davies and many others. Tombola prize winners were: Miss D. Gardiner, Mrs. Jackson, Mr. H. Gonnason, Mr. G. Foster.

ORPHANAGE TO HOLD SHOWER

The annual linen shower of the Protestant Orphans' Home will be held on Thursday, April 11 at the home, Hillside Avenue and Cook Street. The usual supplies of linen, will be gratefully received. Unbleached single sheets, towels and pillow cases are needed. Baskets for the receipt of parcels for the Home have been placed in the Hudson's Bay and Spencer's Limited stores for the convenience of intending donors.

Afternoon tea will be served and guests will have the opportunity to inspect the home and see the children and hear something about the work.

News of Clubwomen

Notices for publication in this column on Saturdays must be written, and handed in not later than Friday afternoon.

St. Mary's Tea—Tuesday, April 30, has been chosen by the members of St. Mary's Ladies' Guild, on which day they will hold a jubilee guest tea in St. Mary's Parish Hall, Oak Bay.

Cadboro Bay Dance—Cadboro Bay Sea Scouts W.A. will hold their monthly dance in the New Scout Hall, Wednesday, April 10, from 8.30 to 12, with good music and refreshments.

Chapter to Meet—The Sir Matthew Baillie Begbie Chapter I.O.D.E. will meet at the headquarters, Union Building, on Friday afternoon, April 12, at 2.30 o'clock.

Esquimalt I.O.D.E.—The Mary Croft Esquimalt Chapter I.O.D.E. will hold the regular monthly meeting at Municipal headquarters, Union Building, at 3 p.m. on Monday.

"Starlets" Met—The "Starlets" met recently at the home of Miss Bessie Cruickshank. Following the business, an enjoyable social evening was held. The next meeting will take place at the home of Miss Nancy Davies.

H.M.S. Resolution I.O.D.E. — The monthly meeting of H.M.S. Resolution Chapter I.O.D.E. will be held on Tuesday evening at 8 o'clock at the home of Miss E. Barrowclough, 1633 Beach Drive.

Church of Our Lord Tea — The Ladies' Aid of the Church of Our Lord, Free Church of England, will hold an Easter tea and sale of work in the Cridge Memorial Hall on Tuesday afternoon from 3 till 6 o'clock.

Rebekah Head Coming.—Mrs. L. M. Trethewey, president of the Rebekah Assembly of B.C., will pay her official visit to Colfax Rebekah Lodge No. 1 I.O.O.F., Tuesday, April 9, at 8 p.m., in the I.O.O.F. Hall. There will be a banquet at 6.30 p.m. A full attendance of members is requested and visiting members are welcome. A luncheon has been arranged for in honor of the president on Wednesday, April 10, at 1 p.m. in the private dining-room of the Dominion Hotel. For information phone E0269 or G7408.

Fairfield Women's Association—The regular monthly meeting of the Fairfield W.A. was held on Thursday at the church hall, Mrs. Thomson, the president, being in the chair. There was a good attendance of members and friends. The secretary and treasurer's report was very satisfactory. It was decided to hold a cafeteria supper in the church hall on Tuesday, April 16, to be followed by a good musical programme. The meeting closed with the benediction, after which refreshments were served by the ladies.

Comosun Chapter I.O.D.E.—At the home of the regent, Mrs. George Miles, 1340 Stanley Avenue, yesterday afternoon, the monthly meeting of Camosun Chapter I.O.D.E., was held. Mrs. James Stewart was appointed as delegate to provincial annual meeting to be held in Vancouver on April 11 and 12. Mrs. A. H. C. Phippe extended an invitation to the members to attend the Boy Scout rally to be held on Saturday, April 13, at the Willows, commencing at 2.30 p.m. Votes of appreciation were passed to Mrs. A. M. Bannerman and Miss Bannerman for their hospitality in making the recent tea such a success. A letter of congratulation was ordered sent to Mrs. Reese Burns upon the recent success in Vancouver of the Forbes-Robertson Players. One new member, Mrs. Brock, was proposed and accepted. Tea was served by the hostess.

WON OLYMPIC BRIDGE PRIZE

—Photo by Savannah.

MRS CHAS. C. COOPER

Mr. and Mrs. C. C. Cooper, Menzies Street, were the winners of the North-South prize for British Columbia in the recent World Bridge Olympic, held here simultaneously with centres all over the world. Victorians also won the East-West prize for B.C., these going to Mrs. H. E. Bidewood and Mrs. Carew Martin.

JUNIOR SAILERS TO OPEN SEASON

The social season for junior members of the Royal Victoria Yacht Club will get under way next Friday with a dinner and dance in the club quarters at Cadboro Bay. Under the chairmanship of Gordon Campbell, commodore, and Harry Barnes Jr., secretary, a dinner will precede the dance. This affair will be for junior members only.

The dance will commence at 9 o'clock, with Len Acres' four-piece orchestra providing the music. A committee of juniors has been energetically at work to assure the success of the function, and a large attendance is anticipated. Tickets may be obtained from members.

Garrard, Victoria, jam; Fulford Harbor Women's Institute, jam; Parksville Women's Institute, two and one-half cases eggs; Mrs. Glosson, Mill Bay, eggs; Mrs. S. J. Taylor, 232 St. Andrew Street, three sweaters; Mrs. H. C. Saunders, 2883 Dewdney Avenue, engine and rails; Mrs. Powell, 1118 Pandora Avenue, books and scissors; Mrs. Young, 2849 Dewdney Avenue, two sweaters and three pairs knitted bed socks; Lady Lake, 1094 Terrace Avenue, dolls and materials for dresses; James Bannerman Hurst, 1823 Chambers Street, books; Mrs. Stevenson, 2068 Goldsmith Street, three tins jam; "Kopanee" Branch, Junior Red Cross, Balfour School, Balfour, B.C., St. Patrick greeting cards; anonymous, one bottle jam and two bottle fruit; anonymous, cards, puzzles and scrap book; two friends, a doll; Maple Leaf Branch, Junior Red Cross, Sardis School, pages of cut outs; Brian Goodwin, 735 Princess Avenue, books; Mrs. Barnsley, 99 Moss Street, cards; J. K. Hodges, Esq., Manager Empress Hotel, for anonymous donor, $3.50; Mrs. W. J. Pendray, Victoria, $20; proceeds of collection box at Solarium, $12.06; Miss Phyllis Anthony and Miss Gwen Berill, 65 cents; Prince George Women's Institute, $25; Mr. T. Welch, 50 Menzies Street (avtive membership), $5; Provincial Chapter, I.O.D.E., $69.50; Florence Nightingale Chapter, I.O.D.E., $20; Hon. Justice H. B. Robertson, $25; Malaspina Chapter, I.O.D.E., $2.65; Howe Sound Women's Institute, $9; proceeds of collection box at Hudson's Bay Co., $7.04;

Donations to X-ray fund sponsored by the Royal Oak Women's Institute, collected at the Solarium office: Judge F. B. Gregory, $5; Mrs. R. H. Pooley, 1162 Old Esquimalt Road, $300; Mrs. Harry Bird, Hampton Court, $5; Alumnae Association of the Royal Jubilee Hospital, $25; Chilliwack Women's Institute $5.

Original Music Will Be Feature

For the last few weeks the members of the juvetle society of the Eurydice Arts Club, together with their directors, have been working with great zeal over their forthcoming production, "The Magic Shirt," which is to be produced at the Shrine Auditorium on April 12. This is a three-act play having a story full of charm and young fancy, but with an undercurrent of elfin wisdom which will appeal to young and old alike.

A high standard of excellence has been set these young people in two previous presentations by the junior society of their club, a division comprised of older boys and girls, but the juveniles, who range from seven to about twelve years of age, are confident that "The Magic Shirt" will prove of equal merit.

The Dominion Academy of Music, under Stanley Shale, is assisting the Eurydice Arts Club with the programme, and senior students, with one exception, will contribute piano, vocal and elocution numbers during the evening. The exception alluded to above will appear in the person of Robin Wood, aged ten, who will play his own composition.

A highlight of the programme, and one of great interest to Victorians in general, will be the appearance of Josephine Charlebois of a poem by Audrey Alexandra Brown which has been set to music by Stanley Shale. The "Dryad in Nanaimo" will thus be presented for the first to local audiences, in musical form.

Other items of outstanding interest are a group of piano solos, composed by Stanley Shale and played by Maquinna Daniels, and the performance by Evelyn Harper of the Second Rhapsody of Liszt.

Entire proceeds of this concert are in aid of the Eurydice Arts Club and tickets may be obtained at Fletcher Bros. and the Willis Piano Co.

To Hold Social — The sisters of Court Maple Leaf will stage a social entertainment following their regular meeting on Monday, April 8, at 7.30 sharp. A number of local artists have been engaged to take part. Refreshments will be served, and a dance will follow. All Foresters and friends are invited.

DIGNITARIES VISIT BABES

Canadian Press

Callander, Ont., April 6—Archbishop J. C. McGuigan of Toronto and Archbishop M. J. O'Brien of Kingston were visitors to the Dafoe Hospital to see the Dionne quintuplets. They were in North Bay, about nine miles from here, to attend the installation of Rt. Rev. R. H. Dignan as bishop of the Roman Catholic diocese of Sault Ste. Marie.

The ten-months-eight-days-old babes to-day all registered substantial gains. Their net increase was 8½ ounces and Dr. A. R. Dafoe, their physician, said they were in "perfect" condition.

Weights and changes from yesterday:

	Lbs.	Ozs.	Change In Ozs.
Yvonne	16	10¼	1¼ gain
Cecile	16	9½	1½ gain
Annette	16	8	2½ gain
Emilie	14	13	1 gain
Marie	14	4¼	2¼ gain

Totals: 76 lbs. 13 ozs. Net gain 8½ ounces.

Your Baby and Mine

By MYRTLE MEYER ELDRED

SCIENTIFIC INFORMATION ON CORRECT DIAPER SIZE

I have just finished reading an article whose conclusions I am happy to pass on to readers. The article appeared in the "Journal of Home Economics," January 1935 issue, and is on the pertinent subject of diapers.

Having personally been one of those mothers who lived through the era of triangle diapers and into the oblong, I find myself as much in need of this advice—based upon scientific investigation—as any of my readers. There is and always has been an enormous difference in what each mother considers to be a satisfactory diaper, both as to sizes and materials. It is splendid to have some excellent advice.

ALL SIZES AND SHAPES

Because of space limitations I can print but a part of the article. In, "A Study of Diaper Sizes and Folds," by Miss Ruth L. Howard she writes, "Our objective was to determine one diaper size most satisfactory in actual use for the entire diaper period. We first investigated the actual sizes of babies.

We studied available statistics on infant's weights and measurements, then went out with a tape measure and collected necessary statistics on waist and thigh measurements, in hospitals and homes. We measured babies from two weeks to two years, tall and short, fat and thin, male and female, black and white. These statistics supplied definite width and depth measurements which folded diaper must meet.

TRIANGLE IS OUT

"The old eternal triangle fold, long the only fold, is now little used. It has been replaced by the 'oblong fold' also called the 'Swedish.' The new fold, now widely recommended and used, is unquestionably best from every standard of hygiene and baby care.

"To make a long story short, we assembled our complete set of measurements (allowing for pinning at each side) and our information on folding methods, allowing for four thicknesses (through the centre) then by logical, straightforward steps we reached the conclusion that nineteen by forty inches shrunk size is the most satisfactory for the entire diaper period. Of the sizes now on the market twenty by forty inches is the nearest size. We believe that the nineteen by forty inch shrunk size should be made standard."

This ought to simplify the mother's perplexities when assaulted by varying advice as to the sizes of comfortable, economical and practical diapers.

Mrs. Kootenai Brown Buried at Waterton

Associated Press

Lethbridge, Alta., April 6—Mrs. "Kootenai" Brown was buried yesterday at Waterton national park with white man's honors.

She was laid to rest beside her late husband and his first wife. Although she had requested she be buried with full Cree Indian honors it was found impossible to do so.

A member of the Chipewayans, northern Saskatchewan Cree tribe, she was bought by John George "Kootenai" Brown, for five ponies. Their marriage followed the purchase.

Brown was a character of the old west. Formerly a British soldier, he became U. S. Indian fighter, packer and fur trader in Southern Alberta in the 60's and 70's. His efforts resulted in founding of Waterton Park.

Esquimalt W.I. — The Esquimalt Women's Institute will meet on Tuesday evening at 7.45 in the parish hall, St. Paul's Garrison Church. An address will be given by Mrs. Palmer on the League of Nations.

PASSES FIRST MILESTONE

—Photo by Robert Fort.

This happy little person is Geraldine Eleanor Mae, one-year-old daughter of Mr. and Mrs. W. H. Stuart Smith, 190 Menzies Street, and granddaughter of Mr. and Mrs. D. McKenzie, 2981 Shelbourne Street, and of Mr. and Mrs. W. A. Smith, 405 Vancouver Street.

FREAK HOUSE INVESTIGATED

Society Woman Fined For Keeping Hundreds of Animals and Birds Indoors

London, April 6—An imposing mansion at Chislehurst, Kent, is perhaps one of the strangest houses in England, given over entirely to hundreds of animals and birds. In drawing-rooms, bedrooms and dressing-rooms, live monkeys, squirrels, rabbits, guinea-pigs, rats, mice, dogs and cats.

The house stands in ten acres of beautifully-wooded grounds. It belongs to the Hon. Mrs. Alice McLaren Morrison, daughter of the late Baron Furbright and sister of Countess Maximilian von Lowenstein Scharffneck. But she never lives there. She bought the property a year ago to house her pets.

Mrs. Morrison was fined £10 with £5 5s. costs at Bromley Police Court on a summons accusing her of neglecting animals recently. Mr. Gordon Jones, prosecuting, said that R.S.P.C.A. inspectors found at the house 50 dogs, 27 cats, 100 foreign birds, 17 monkeys, a goat, mice, guinea-pigs, rabbits and other animals.

He said the animals were apparently in a grossly neglected condition, though not undernfed. Doors and windows were closed—some of them hermetically sealed—and the atmosphere was almost unbearable owing to fires kept going night and day. Mrs. Morrison denied that the conditions were as described.

SCREENED WINDOWS

Heavy tapestry curtains and screens cover the windows of rooms occupied by monkeys and squirrels. On create settees lie cats, and in one room an exquisite dressing table is the repository for their food.

Mr. Gordon Cook, who was in charge of this menagerie, said: "The food bill is more than £2,000 a year. Last month £70 was paid to a London store for meat, fruit, poultry, vegetables and other provisions."

Mrs. Morrison, who lives in a West End hotel, said: "For many years I have been getting together my collection of animals. I have some of the most valuable dogs and cats in the world. One of the monkeys is the largest of its species. I spend as much time as I can with my pets, and my special favorite is a blue-eyed white Persian cat."

Culbertsons Won Seven Rubbers

Associated Press

New York, April 6.—Prospects were far from rosy for P. Hal Sims to-day as they concluded the second week of their 150-rubber bridge match with the Ely Culbertsons.

They faced the job of cutting down a Culbertson lead of 14,640 points, the biggest the Culbertsons have held since they took the lead on the second day of the match.

The Culbertsons won seven of the eight rubbers played yesterday afternoon, more than doubling their previous lead of 7,100 points.

Of the eighty-eight rubbers already played, the Culbertsons have won fifty-one and the Sims thirty-seven. The point score stands 76,150 to 61,510.

Bessboroughs At "Trovatore"

Governor-General and Lady Bessborough Express Appreciation of Local Efforts

With Their Excellencies the Governor-General and the Countess of Bessborough among those present, a repeat performance of Verdi's great opera "Il Trovatore," was given by the Victoria Philharmonic Society in the Empress Hotel ballroom yesterday evening before a fair-sized audience. Proceeds will be donated to the King George Silver Jubilee Cancer Fund.

As in its debut February 19, when "Il Trovatore" was also presented, the society scored a success. The principals were in splendid voice and the chorus sang beautifully, all under the capable baton of Basil Horsfall. Outstanding again was the performance of the orchestra, also under Mr. Horsfall. At times the orchestra was a little too loud, perhaps, and tended to drown out the soloists, but on the whole the performance was remarkably good for so difficult an opera, and Lord and Lady Bessborough obviously enjoyed it, applauding frequently.

MRS. PRINCIPAL

At the conclusion of the performance Their Excellencies advanced from the section reserved for them in the centre of the ballroom and congratulated Mr. Horsfall upon the excellent performance. They expressed a wish to personally meet the principals, who were informally presented, each receiving warm congratulations. Lady Bessborough thanked all the performers for their part in promoting the cancer fund, which she started some weeks ago in Ottawa.

Ruth Helen Tait, in the role of Amneris, again charmed the audience by her splendid singing. Elbert Leroy Bellows, the guest artist from Seattle, who sang the role of Manrico, has a robust tenor which stands him in good stead for the tenor role. Thelma and Harry Johns, whose voices are among the finest in the city, again sang the roles of the Count di Luna and Leonora. Phyllis Deaville and Clifford Prescott showed thorough understanding of their minor parts and both did extremely well.

CHORUS NUMBERS

To the chorus fell such beautiful numbers as the "Gypsy Chorus" and the magnificent "Miserere," with Mr. Bellows and Mrs. Johns in the solo parts. Mr. Bellows and Mrs. Tait, in the last act, gave a finished rendition of the famous duet, "Home to Our Mountains."

Their Excellencies showed great interest in the newly-formed society, and as he accompanied them to their cars Mr. Horsfall told them "Faust" would be presented in a few weeks, followed by "Lohengrin," early in June.

BRITISH-U.S. BEAUTY RACE

Chas. B. Cochran and London Daily Mail Staging Contest

Canadian Press from Hayes

London, April 6.—London is looking to a three-cornered beauty contest featuring sixteen British girls handpicked by Charles B. Cochran, British theatre and screen producer, sixteen girls from the United States and sixteen others chosen by The London Daily Mail from among its readers.

The contest was to be a clear-cut issue between British and American girls. Cochran, who learned his stagecraft on the United States stage in his youth, offered to match the sixteen girls who will appear in one of his forthcoming West End revues, against any similar American team in Great Britain. He offered to stake $500 on his team.

This lead The Daily Mail to stage yet another beauty competition. It invited its young women readers to send in their pictures, from which a team will be assembled.

All three arrays of beauty will appear at special matinee in a London theatre. The audience will choose the winning team.

I.O.D.E. RECALLS PRE-WAR WORK

Sir James and Lady Douglas Chapter Luncheon Commemorates Founding

The early history of the Sir James and Lady Douglas Chapter I.O.D.E. was recalled in the programme at the interesting birthday luncheon held at the Hudson's Bay yesterday, and attended by over eighty guests. Mrs. Colin Cummings, the regent, and Mrs. R. B. McMicking, honorary regent, and Miss Josephine Crease and Miss McMullin, vice-regents, received the guests.

After welcoming the guests, Mrs. Cummings, who presided, recalled the chapter's first executive, including Mrs. R. B. McMicking, Mrs. J. D. Gordon, Dr. H. Mackenzie Cleland, Mrs. D. B. McConnan, Mrs. McArthur, Mrs. David Donald, Miss Violet Sweet and Miss Dorothy McTavish, several of whom were present as special guests.

Mrs. McMicking then briefly recounted the steps leading to the formation of the then Lady Douglas Chapter in 1912, and Miss Alma Russell, one of the charter members, read the minutes of the first meeting. Mrs. Llewellyn Thomas, who as Miss Violet Sweet was the chapter's first standard-bearer, read the speech which was made by the late Mrs. Dennis Harris, daughter of Lady Douglas, in presenting the first flag, and Mrs. Cummins read the words with which Mrs. McMicking accepted it, including a verse on "The British Union Jack."

Mrs. J. D. Gordon, in reminiscent vein, spoke of the activities of the chapter in its first years. The closing remarks of the chairman were followed by the singing of the national anthem.

Mrs. A. M. Boyd was general convener of the luncheon; Mrs. Bertha Parsons and Mrs. James Shaw were at the receipt of customs, and Mrs. A. M. Pillar, Mrs. Cotsford and Miss E. B. Hill, of the executive, also assisted in various ways.

THOSE ATTENDING

Among those present yesterday were: Mr. and Mrs. G. S. McTavish, Mrs. A. D. Muskett, Miss McMullin, Mrs. Sisman, Miss Moore, Miss Hill, Mrs. Jennings, Mrs. Jenns, Mrs. Justin Gilbert, Mrs. Prowd, Miss Drummond, Mrs. Monk, the Misses Crease, Mrs. J. J. Collison, Mrs. Drummond-Hay, Mrs. Fitzherbert Bullen, Miss Pooley, Mrs. Cree, Mrs. Berton, Miss E. Perry, Mrs. Sylvester, Miss Sylvester, Mrs. Austin Gale, Mrs. Lawrence Hader, Mrs. W. C. Kersey, Mrs. Dunbar, Mrs. Harold Grant, Mrs. E. Currie, Mrs. Whittier, Mrs. Whillans, Mrs. M. S. Wheatley, Mrs. Downes, Mrs. Pattison, Mrs. Mallett, Mrs. Barnsley, Mrs. Wolfenden, Mrs. Cotsford, Lady Lake, Miss Kitty Lake, Miss Baxter, Mrs. Potter, Mrs. Webb, Mrs. St. J. Gospel, Mrs. Bennett-Thompson, Mrs. W. S. Drury, Mrs. Lane Holmes.

Mrs. J. H. Gillespie, Mrs. Duncan McTavish, Mrs. D. C. Hughes, Mrs. T. W. Hearne, Mrs. Holden, Mrs. A. W. Pillar, Miss Pillar, Mrs. Langhyde, Miss Langworthy, Miss A. Harvey, Mrs. W. J. H. Holmes, Miss Lee, Miss Bowron, Mrs. Murchison, Mrs. H. Hamlet, Mrs. W. Hamilton, Mrs. Browne, Mrs. Truesan, Mrs. Walter, Mrs. Christie, Mrs. A. M. Boyd, Mrs. Shaw, Mrs. Panson, Mrs. Vantreight, Miss Hill, Miss Rhodes, Mrs. Lombard and Mrs. Marks.

C.G.I.T. NOTES

LEADERS' COUNCIL MEETING

The regular monthly meeting of the Girls' Leaders' Council of Greater Victoria will be held on Tuesday evening, April 16. This meeting will take the form of an Easter banquet, and will be held at the Y.W.C.A. at 6.30 o'clock. The theme will be in keeping with Easter, and Easter music and an inspirational message will be given. This meeting will be open to all C.G.I.T. leaders, directors of girls' work, and teachers of 'teen-age girls' Sunday School classes and others interested in the work. All those who are contemplating attending this function are asked to notify Miss Lilian Parfitt, the chairman of the council, Miss Lauretta McCall, Miss Minnie Beveridge or the secretary of the council, Miss Olive Lynn, E 6021, by next Saturday.

EMMANUEL BAPTIST

The C.G.I.T. department of the Emmanuel Baptist Church is holding an informal Easter fellowship evening on Friday evening, April 12, at 7.45 o'clock. The Easter message will be given in song and story, and at the conclusion of the programme tea will be served. A collection will be taken in aid of the missionary fund of the church.

Spring Cleaning and Easter

Now is the time to send your suits, dresses, curtains, rugs, etc., to be spruced up for Easter and spring.

Curly-headed Joan Taylor, daughter of Mr. and Mrs. R. J. Taylor of 2459 Bethune Avenue, and granddaughter of Mr. and Mrs. J. M. Smith, 639 Dunedin Street, and Mr. and Mrs. F. Taylor, 1612 Fairfield Road, had her first birthday yesterday.

ENJOYABLE TEA AT Y.W. ANNEX

A large number of guests attended the successful tea held in the Y.W.C.A. Annex yesterday afternoon, Mrs. W. H. Whiteley and Mrs. A. E. Lewis receiving the guests.

The rooms were a profusion of spring flowers and on the table were arranged daffodils flanked by yellow tapers. Pouring were Mrs. A. J. Dallain, Mrs. H. Drummond-Hay and Miss Lily Gilchrist, and those assisting in serving included Miss McIlwraith and Miss Elizabeth Thomas. Miss Agnes Spencer was at the receipt of customs, and had charge of a table of Easter novelties, including many charmingly dressed dolls, children's dainty aprons and other articles, all her own handiwork. Miss Johnston read teacups.

The musical programme added much enjoyment to the afternoon. Mrs. John Gough played several pianoforte solos, and accompanied her mother, Mrs. S. M. Morton, who contributed contralto solos. Miss Louise Noble and Mrs. Carter also gave vocal solos, with Mrs. Hole as accompanists.

Britannia W.A.—The general meeting of the W.A. to Britannia Branch Canadian Legion will be held on Tuesday at 8 p.m. A social hour of fun and entertainment will be held after the meeting and refreshments will be served by members of the executive.

"Bluebirds" Met—The fortnightly meeting of the "Bluebirds" Sewing Circle was held at the home of Mrs. Beadle, St. Lawrence Street, on Thursday. Refreshments were served at the close of the meeting. The next meeting will be held at the home of Mrs. Restell, Bay Street, on Thursday, April 11, at 8 p.m., Mrs. B. Ross being the hostess.

Lake Hill Card Party — The Lake Hill Women's Institute have arranged a utility 500 party for Monday, April 15, at 8.15 p.m.

Retiring Hospital Matron Is Honored

Alberni, April 6—Members of the nursing staff of the West Coast Hospital were informal hosts at the nurse's home Thursday evening in honor of Mrs. M. V. Duncan when they presented her with a farewell gift and entertained at supper. Members of the kitchen and engineering staff were also hosts when they presented Mrs. Duncan with a kodak.

Mrs. F. Cochenour was a bridge hostess Wednesday evening, honoring Mrs. M. V. Duncan, former matron of the West Coast Hospital, who is leaving the district. Mrs. H. Carter and Mrs. Fred Boyt were prize winners for high score. Other guests were Mrs. Gordon Motion, Mrs. Will Littleton, Mrs. Keith Gill, Miss Page, R.N., and Miss Jean Wilkinson.

Complimenting Miss Betty Hilton, whose marriage takes place Saturday, Miss Mamie McDonald, Miss Belle Frost, Miss Agnes Patterson and Miss Martha MacDonald, of the staff of the West Coast Hospital, entertained with three tables of bridge at the home of the former Wednesday evening. Prizes were won by Miss Mary Wood and the guest of honor. Invited guests included the Misses Evelyn Hanes, Miss Helen Manning, Miss Effie Redford, Miss L. Porter, R.N., Margaret Wrotnowski, Mrs. H. P. Nightingale, Mrs. R. W. Jones, Mrs. J. C. Thomas and Mrs Leslie Tocker.

Miss Dorothy Nichol, of the teaching staff of the public school, left for Victoria Thursday to visit her parents, Mr. and Mrs. M. Nichol, Southgate Street.

LANGFORD

The final card party of the winter series took place Wednesday evening in the Women's Institute Hall. Miss [illegible] and Mrs. [illegible] Rutland obtained the prizes for highest contract bridge scores, and W. Savory received the consolation. Auction bridge winners were Mrs. A. Cowie and W. Hamilton, with R. J. Phillips obtaining the consolation. Prizes for the highest scorers throughout the series were won by A. A. Forbes Calland for contract, while Mrs. R. J. Smith and W. Hamilton carried off the prizes for auction.

An Easter card party was arranged for Friday, April 26.

Final of the series of card parties sponsored by the Canadian Legion, Prince Edward branch, No. 91, will take place in their club rooms on Saturday, April 6, at 8 o'clock.

A lecture was given by E. E. Richards Tuesday evening in the Legion club rooms on "London and the Empire."

The April meeting of the members of St. Matthew's Guild at the home of Mrs. A. F. Bayles was held Wednesday afternoon. Arrangements were made for a silver tea at the home of Mrs. R. M. Maggie, St. Aidan's House, Wednesday, April 24.

Under the auspices of the Prince Edward Branch, No. 91, Canadian Legion, a concert will be held in the club rooms Friday, May 3.

A meeting of the committee of St. Matthew's Church will be held on Monday, at 8 o'clock, in the vicarage.

Rev. R. E. J. Terburgh will preach at the evening service in St. Matthew's Church at 7 o'clock on Sunday.

Canadian Daughters' League—Canadian Daughters' League No. 3, met on Thursday evening, the president, Miss D. Willing, in the chair. A donation was voted towards the Jubilee Cancer Fund. Plans were made for the installation ceremony at the next meeting. After the business meeting adjourned, the members attended the installation of the officers of Far West Assembly No. 30, whose members were entertaining for the provincial president, Mrs. E. S. Whitey of Vancouver, who was on her official visit.

WIXAL, BOSTON
(6.040 Kilocycles)

Broadcasts musical and educational features on Tuesdays and Thursdays from 4.30 to 6.00 p.m. and on Sundays from 2.00 to 6.00 p.m.

WIXAL, BOUNDBROOK, N.J.

Broadcasts NBC-WJZ programmes daily except Sunday from 6 to 7 a.m., and on Tuesdays, Thursdays and Fridays from 12 noon to 1 p.m., on a wavelength of 16.870 metres (17.780 kilocycles). The station also broadcasts on Mondays, Wednesdays and Saturdays from 2 to 3 p.m., and on Saturdays from 9 to 10 p.m. on a wavelength of 49.18 metres (6.100 kilocycles.)

WIXK, PITTSBURGH, PA.

Broadcasts NBC-KDKA programmes daily at the following times and over the following wavelengths: 1.30 to 10.00 p.m. (6.06 metres (6.140 kilocycles); 7.00 a.m. to 1.15 p.m., 19.72 metres (15.210 kilocycles); 1.30 to 7.00 p.m., 25.27 metres (11.870 kilocycles), and 4.00 to 11 a.m., 13.93 metres (21.540 kilocycles).

FINE PIANIST

Henrietta Schumann, brilliant young Russian-born concert pianist, is frequently heard as one of the principals of Roxy's Gang, in the programmes over the nationwide Columbia network. She became a favorite last year in broadcasts of "The Big Show" and "Summer Interlude." Recently she has been featured as conductor and pianist at the Paramount Theatre in New York. Roxy threatens to draft her as an assistant conductor for his programmes heard over Columbia from 5 to 5.45 P.S.T., Saturdays.

Radio Freaks

An interesting example of the queer tricks played by radio has been sent to The Times by J. R. Fuller, 213 Vancouver Street.

Mr. Fuller says:

"While experimenting with an elementary crystal set (a typical home-made set), which I may say had no extra gadgets to increase volume or wave lengths, I had the phenomenal luck to receive quite clearly Salt Lake City and Beverly Hills, Calif., one evening about 9 o'clock. This set was in no way connected with a larger set.

"I am quite confident that if I again assembled this set it would repeat the performance."

The Times will be pleased to hear of other examples of tricks played by radio, such as that told by Mr. Fuller. They should be addressed to the Radio Editor, The Times, Victoria.

QUARTETTE IN RADIO DEBUT

Kolisch String Group of Vienna Will Present Premiere of Two Works

The famous Kolisch String Quartette of Vienna, making its American debut before an audience in the Library of Congress Music Salon in Washington, D.C., will be heard over an NBC coast-to-coast network at 8.15 a.m., P.S.T., on Monday.

The concert by the Kolisch String Quartette will be the first of the Chamber Music Festival concerts to be held in the Library of Congress under the auspices of the Elizabeth Sprague Foundation.

The quartette, consisting of Rudolf Kolisch, first violinist; Fleix Khuner, second violinist; Eugen Lehner, violist, and Benar Meifetz, 'cellist, will give the world premiere of new works written under the commission of the Library of Congress, Alban Berg's "Lyriches Suite," and Bela Bartok's Fifth String Quartette. The programme will be completed with Beethoven's Quartette in B flat, and his Grand Fugue, Opus 133.

The programme will be heard over stations KPO, KJR and KPI.

RADIALITIES

A description of the St. Bernard passes in Switzerland and a broadcast from the ancient hospice in the Alps will be relayed across the Atlantic to NBC network listeners within a few weeks, according to arrangements made by Max Jordan, NBC director for Continental Europe, with the Swiss government.

Since the time of the Romans the St. Bernard passes have played an important part in the wars of Europe. The greater pass is between Martigny, Switzerland, and Aosta, Italy.

• • •

The sixty-first running of the Kentucky Derby will be broadcast over the coast-to-coast Columbia network Saturday afternoon, May 4. At the mike will be Thomas Bryan George, noted turf commentator

• • •

A lovely grey-haired woman, formerly Paviova's accompanist, was Lanny Ross's guest Wednesday evening, March 27, on his Log Cabin broadcast. She played a piano accompaniment while Lanny sang an old Welsh air his mother taught him, "Calm Is the Night." It was the very song he had sung in his first public appearance, when he was only seven years old.

When he finished the old melody, he smiled at his accompanist and bowed his best bow.

HUSBAND SAVED DAY

Probably very few people knew that it was Gladys Swarthout's husband, Frank Chapman, concert baritone, who sang with her in the Beauty Box Theatre's presentation of "The Merry Widow." And behind his unheralded appearance lies a bit of backstage drama.

At dress rehearsal the leading singer suddenly became ill. It was already late in the afternoon, in a few hours the show would go on. The producers were in a jam. Whom could they get on such short notice to step into the role? Telephones started buzzing.

Then someone looked out of the control booth and saw Frank Chapman chatting quietly with his lovely wife. Could he—would he—walk in "cold" and sing that important role on a coast-to-coast broadcast? Chapman looked at his wife and she said, "Please . . ."

That night, Chapman stood beside Miss Swarthout and gave a performance that commanded nation-wide attention.

Eddie Cantor has just signed a contract to broadcast in the spring and fall of 1936 for his present sponsor.

• • •

TWO-STREET-CAR VOICE

Theodore Webb, NBC baritone, once had his voice measured by a volume recorder and his official rating was "equivalent to two street-cars." Now he is wondering how he would stack up against a tri-motored transport plane.

• • •

Ray Perkins and Arnold Johnson, who direct the National Amateur Night broadcasts over CBS, claim they have the largest collection of unique stationery in existence. Votes cast by the radio audience have been mailed in on laundry tags, frayed collars and cuffs, a dog's collar, tops of tennis shoes, a cigarette butt. One listener sent in his vote written in chalk on an old razor blade.

• • •

The latest wrinkle along the amateur front, according to Ben Allen, is for would-be performers to send him phonograph records of their acts. If this thing spreads, says the comedian, he will have to make a recording of the gong and set up a mail-order business.

A few days ago Richard Bonelli entertained a prominent Hollywood movie executive, and during the evening brought out some of his films, which he had taken himself from the wings of the Metropolitan Opera stage. As a direct consequence, a popular soprano has been signed to make a movie on the Coast.

More than 100 persons, a newly created telephone exchange and 250 trunk lines have been called into service to enable nearly 30,000 radio listeners in New York and Chicago to vote for their favorites on Major Edward Bowes' amateur hour broadcast each Sunday afternoon over National Broadcasting Company networks.

To handle the vast volume of calls, the New York Telephone Company has created a new exchange in a room containing 2,250 square feet of space and adjoining the broadcasting studio in Radio City.

SALT SPRING

Ganges, April 6.—Trail Rangers under Colin Mouat are beautifying the grounds of the Lady Minto Gulf Islands Hospital. The boys are clearing and preparing a plot of ground near the entrance, which, under the supervision of George Borradaile, will be laid out as a rose garden, the bushes for which are donated by the Rangers.

Dr. and Mrs. Raymond Rush have left for New York via Panama. Dr. Rush will take a post graduate course at Rochester.

Miss Louise Layard, Rainbow Beach, is visiting her grandmother, Mrs. Layard, at Deep Cove.

Mrs. F. C. Turner, Ganges, is visiting in Vancouver, where she is the guest of Mr. and Mrs. J. B. Farquhar.

Mrs. Rawlings, Mayne Island, returned to her home Tuesday after a visit with Capt. and Mrs. George Maude at Fulford Harbor.

Mrs. E. Leigh has returned to "Fruitvale," Ganges Harbor, after spending ten days in Vancouver with her parents, Mr. and Mrs. McNeil.

Mr. and Mrs. D. S. Harris and their son Delmar have returned to the island after motoring in California.

Mr. and Mrs. Dermot Crofton, who since their marriage last fall have resided at "Rockridge," Ganges, have removed to the Taylor residence on Ganges Hill.

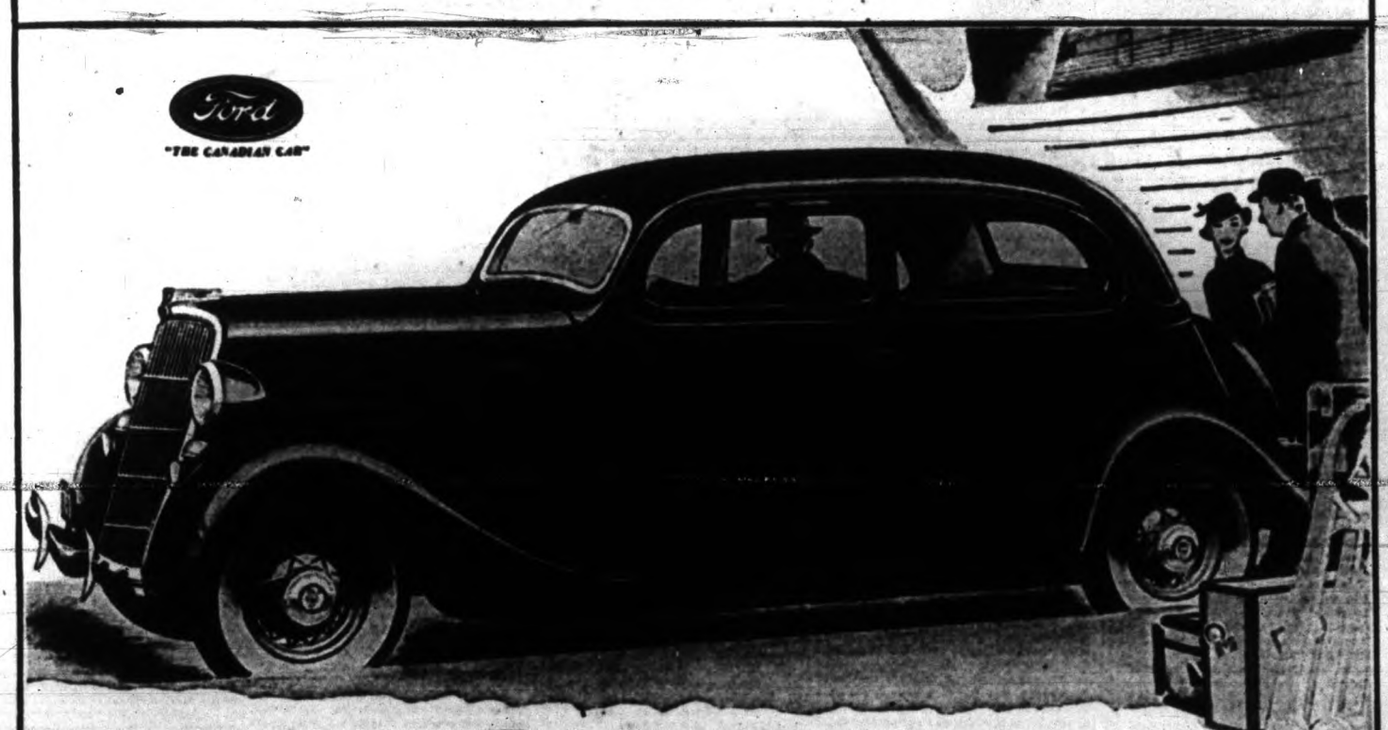
Dr. Helem of Vancouver has taken up residence in the home of Br. and Mrs. Rush on Ganges Hill.

On Tuesday next, April 9, the South Salt Spring Island Women's Institute will hold an open meeting, with silver tea to follow, in the Institute Hall, Fulford. A demonstration of spinning on a home-made spinning wheel will be given by Miss B. Hamilton. Proceeds will be in aid of new linoleum for the Lady Minto Hospital.

Always Buy the Best

"SALADA" TEA

THE CAR FOR EVERY MOTORIST



because of V·8 performance, comfort and design

NO WONDER the 1935 Ford V-8 is making motor car history . . . serving to a greater extent the country's transportation needs. V-8 performance and economy, an entirely new conception of riding comfort, and a restrained though beautiful modern style make it the *balanced* car for today and tomorrow. And there are many, many other features that make it a great car to own.

Go over the New Ford. Note the new easier-to-operate brakes, softer clutch, finger-touch steering. Try the restful wider seats, roomier interiors. Examine the rich upholstery and appointments. You'll be astonished at the number of "expensive-car features" that are standard equipment on this Ford. It has many new improvements.

These improvements were adopted only after tests had shown that they would help make the New Ford better looking, more comfortable . . . easier to drive . . . safer for your family . . . more economical for you to run and keep running. See this motor car at your Ford dealer's. Take it out on the road. Drive it!

TUNE IN the FORD SUNDAY EVENING HOUR. *Symphony orchestra and celebrated guest soloists. 9 o'clock Eastern Standard Time, Columbia System.* FRED WARING AND HIS PENNSYLVANIANS. *Thursday evening at 9:30 Eastern Standard Time, Columbia System.*

NEW REDUCED PRICES

$32 a month and a reasonable down payment now buys a Ford V-8. See the nearest dealer for details.

A Lecture on Christian Science

Entitled

Christian Science: God's Message of Hope and Healing

by

Robert Stanley Rose, C.S.B., of New York City

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts

An ever increasing number of persons are searching for a practical religion. They are no longer satisfied with promises regarding a future-world salvation. What they want is a religion that will help them here, on earth, now.

Christian Science is essentially practical. It offers to mankind everything they may have searched for elsewhere, but have failed to find. Like the Christianity of the Master, Christian Science heals the sick, corrects wrongdoings, uproots false appetite, dispels poverty, and reveals the present unity of God and man.

In other words, Christian Science promises to improve the present condition—however hopeless it may seem to be—of every person who sincerely embraces its teaching and yields to its divine influence. It accomplishes this by revealing—on the basis of infinite good—the unreal nature of evil and the method by which the discords that seem to beset human experience may be overcome.

The Discoverer and Her Book

Unwilling to accept the common belief that the marvelous works of Jesus were supernatural occurrences peculiar to him alone, instead of natural effects of a divine law available to all, Mary Baker Eddy, through the process of reason, revelation, and proof, won her way to the point where she discovered the divine Principle of Christian healing. After demonstrating, in both her own and other cases, that this perfect Principle heals to-day as surely as it did in the days of old, she named her discovery Christian Science. That was in the year 1866.

In 1875, following years of selfless giving in return for worldly ingratitude and opposition, Mrs. Eddy published the Christian Science textbook, "Science and Health with Key to the Scriptures." In this unique volume Mrs. Eddy expounded her subject so clearly that all who should study it with the teachableness with which they would study an academical subject, would be able to understand and practice the art of Christian Science healing.

No doubt thousands of books made their appearance during that year (1875), most of which were probably soon forgotten. Not so with Science and Health, however. Instead of passing into oblivion, it soon became a "best seller." To-day, Mrs. Eddy's book is doubtless more widely circulated and more intelligently studied than any other religious textbook, excepting the Bible. Each succeeding year finds it growing in favor and influence. Notwithstanding repeated predictions to the contrary, Christian Science and its textbook are here to stay, and the author of Science and Health rises steadily in public estimation and regard.

Hopeless Cases Healed

If those of you who are unacquainted with this amazing volume will either buy or borrow a copy and turn to the closing chapter entitled "Fruitage," you will find one hundred pages of authenticated testimonies pulsating with the joy and gratitude of persons who were healed by Christian Science after other systems of religion, philanthropy, and medicine had failed to heal them. Outside of Christian Science, most of these cases would be looked upon as hopeless.

More impressive still, perhaps, will be your discovery of the astonishing fact that every case recorded in those one hundred pages was healed solely by reading that book and obeying its precious precepts. Think of it, if you will! A book capable of straightening out warped mentalities, uprooting enslaving habits, dispelling poverty, and overcoming otherwise incurable diseases! Would not the pages of such a book have to be aflame with divine Love, and its author uncommonly close to God?

Through her unselfish life and inspiring teaching, Mary Baker Eddy has launched a spiritual ideal that is winning everywhere the hearts and minds of men. Its tender persuasiveness and healing power have established a new religion, a new philosophy of life, a new Science. Mrs. Eddy is making this ideal a living reality to perhaps millions of persons, and this is the most wonderful thing anyone could hope to accomplish.

Like some other critics, Mark Twain was at one time severely unjust in his estimate of Mrs. Eddy and Christian Science. Towards the close of his career, however, he had changed, and he said of her: "She has organized and made available a healing principle that for two thousand years has never been employed except as the merest kind of guesswork. She is the benefactor of the age." And of her discovery he said, "Christian Science is humanity's boon."

Matter and Mortal Mind Unreal

Prior to Mrs. Eddy's discovery of Christian Science, the visible universe was looked upon generally as real and substantial. In this sensible realm, persons, circumstances, and things—all material phenomena—were supposed to be created materially and governed by material law. So true did all this seem to be that the spiritually unenlightened world looked upon Mrs. Eddy as an enemy instead of a friend when she announced that the universe of sense testimony was nothing more nor less than material belief objectified and that, in the final analysis, material belief itself, viewed in the light of infinite Spirit or Mind, was a mistake.

This opposition of error to everything that threatens to expose its nothingness and thereby uncover human experiences as illusions of the carnal mind has characterized material sense from the beginning. Its antagonism to Truth can be illustrated by the resentment of a sleeper toward a friend trying to arouse him from pleasing dreams because the friend knows the sleeper should get up, dress himself, and attend to his daily duties.

Obviously, therefore, human experience—whether claiming to be good or bad—can seem to be true only to the extent that one permits one's self to remain in this material supposition or dream. In other words, by indulging the supposed reality of material sense—whether as pleasure, pain, or power—we admits the reality of the unreal and suffers the unhappy consequences; whereas the prayerful cultivation of spiritual sense, or sense of infinite Spirit, progressively awakens one from the material dream and sets one free mentally, morally, and physically.

Reality Is Spiritual and Harmonious

It is noteworthy that the spiritual teachings of the Bible accord no reality, presence, or power to evil, matter, or mortal mind. Why should they, in view of matter's admitted unreality or nothingness? Jesus said, "It is the spirit that quickeneth; the flesh profiteth nothing." How presumptuous it would be, therefore, to test the truth or falsity of spiritual or Christian Science from the viewpoint of geology, physics, and anthropology! Christian Science practice is not based upon material premises nor upon a supposed mixture of matter and spirit. Christian Science is spiritual teaching based solely and wholly on Spirit, spiritual creation, and spiritual man. How could reality be other than spiritual and perfect if Spirit or Mind is the only cause, creator, or Principle?

In her "scientific statement of being," which will be found on page 468 of Science and Health, Mrs. Eddy writes: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all. Spirit is immortal Truth; matter is mortal error. Spirit is the real and eternal; matter is the unreal and temporal. Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual."

Amazed at such a sweeping declaration of matter's unreality, the inquirer should be pardoned for asking: If it be true that the divine Mind and its ideas, God and His thought, constitute reality, how are we to account for material phenomena and their accompanying discords so evident on every hand? Does Christian Science insist flatly that the things I see, the sounds I hear, and the forces I feel are nothing? Or does it, on the other hand, offer a reasonable, satisfying explanation of that nothingness and the way in which scientifically to prove it?

Opposite Points of View

These are questions which are answered satisfactorily by another passage in Science and Health (p. 573). There Mrs. Eddy tells us that "the heavens and earth to one human consciousness, that consciousness which God bestows, are spiritual, while to another, the unillumined human mind, the vision is material. This shows that what the human mind terms matter and spirit indicates states and stages of consciousness."

It then becomes evident that a person untaught in Christian Science sees about him only a finite, limited, discordant sense of the real or spiritual universe and that he calls this misconception material persons, circumstances, and things; whereas to inspired thought the vision is spiritual, a universe peopled by divine ideas, under the government of divine Principle, Love. The author of the book of Hebrews puts it in these words, "Through faith (spiritual sense) we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear."

Obviously, then, a material point of view—because it is untrue—is always a more or less discordant point of view; hence, the discord attending it can be dispelled only by one's attaining a right or spiritual point of view; by becoming a spiritual seer or discerner of the spiritual and real. Although he, like others, dwelt in what seemed to be a material sense of existence—that sense in which other mortals believe matter to be real and substantial—Jesus' more spiritual origin and perception enabled him to displace a sense of discord with a sense of peace and harmony, not by changing matter, however, but by supplanting human beliefs with the ideas of divine Mind, God.

Convincing Demonstration

To illustrate: A Christian Scientist was one day endeavoring to accomplish an important work in the midst of a medley of disturbing noises emanating from the open windows of a business enterprise located on the floors below. The student was on his way to complain to the superintendent of the building when he stopped abruptly and asked himself whether, in case of bodily discord, he would seek such an adjustment as relief. Of course he would not; he would work out the problem mentally and spiritually in accordance with the perfect standard of Christian Science practice, the standard of infinite, ever present good.

Returning forthwith to his office, he opened the Bible to one of his favorite passages (Isaiah 32:17, 18) and read: "And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance for ever. And my people shall dwell in a peaceable habitation, and in sure dwellings, and in quiet resting places." Aided by a concordance, he then turned to the following correlated passage in Science and Health (p. 300) and read, "Undisturbed amid the jarring testimony of the material senses, Science, still enthroned, is unfolding to mortals the immutable, harmonious, divine Principle,—is unfolding Life and the universe, ever present and eternal."

Prompted by these inspiring assurances, the Scientist prayerfully gave thanks for the truth that man is now and always in the peaceable habitation, the sure dwelling, and the quiet resting place of Love's ever-presence and that in this presence there is no discord. The prayer was effectual; for from that moment the noises ceased to have any disturbing effect upon him. With a heart overflowing with gratitude, he thanked God for enabling him to prove that, notwithstanding the misleading array of sense testimony to the contrary, it was possible through Christian Science for one to be undisturbed and happy in the very midst of what seemed to be discord and confusion. With conviction based on proof he could say with Habakkuk, "The Lord is in his holy temple: let all the earth keep silence before him."

God's Ever-presence

In praise of infinite good, the Psalmist sang: "Whither shall I go from thy spirit? or whither shall I flee from thy presence? If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me." Are not these words intended to convey the thought that God, the divine Principle of being, the idea of ever present Love, is available through righteous prayer at all times and under all circumstances?

Some time ago, for example, the teacher of a Christian Science Sunday School class was discussing with her pupils the subject of God's ever-presence. The teacher had pointed out that there was no place where God is not; whereupon one of the pupils asked, "Is God in the hospitals, asylums, and prisons?" The teacher waited for an answer. Presently, a little fellow replied with conviction, "Of course He is, but they don't know it." Verily, God's protecting, healing, and saving love is everywhere; but in order to prove it, one must admit and fearlessly claim it, even as one must tune in with his receiving set if one would enjoy the broadcasting of a particular radio programme.

But, considering the question in a broader sense, are the inmates of hospitals, asylums, and prisons the only ones who seem to be unaware of God's ever-presence? Are not all mankind in bondage more or less to the same spiritual ignorance? Could anyone be tempted to do wrong, to be unhappy, ill, unemployed, or in want, save by accepting as real a sense of separation from the divine all-power? Human discord of every sort is evidence of material-mindedness, of disbelief in God's nearness; hence, all mankind need to be saved, not from evil as an entity, but from belief in and fear of the absence of God, who is ever present good.

No Real Separation

To illustrate: A few weeks ago, the quietude of a large public waiting-room was broken suddenly by the frantic cries of a little boy who believed that he had become separated from his parents and was lost. Several persons in the sympathetic group that quickly surrounded him tried unavailingly to comfort the lad with the assurance that he would soon be restored to his loved ones. A moment later, the gathering made way for a smiling young couple whom the boy joyfully recognized as his parents; whereupon the weeping ceased, the tears were dried, and all was well again.

Interestingly enough, the parents had not left the child alone. They said they were sitting but a short distance away all the time. To them there had been no lost child. Not for a moment had he been out of their careful sight. The supposed separation was entirely in the child's mistaken point of view. His tears and anguish were groundless; they were the result of false belief. As soon as he learned the truth about himself and his parents, he was free and happy.

Now, dear friends, are not mankind as a whole in much the same predicament as that little boy seemed to be? Are they not believing fearfully that man is separated from the ever present Father-Mother God, and that, as the result thereof, they are at the mercy of sin and sickness, unemployment and want, discouragement and failure, disaster and death? But, thanks to Mary Baker Eddy, we are learning through Christian Science that it is all a mistake. We are learning that even when we seem to be in the very midst of trials and tribulations, God's ever present love is available to help and heal and save.

To ever present Love there are no lost children. Not for an instant has Love's watchful eye lost sight of you and me as the precious objects of its care. Our seeming troubles are wholly the result of false belief. In God's sight they are no part of your true selfhood or mine. Changeless Love has nothing but blessings to bestow upon you and me and all. Our only need is to wake up spiritually, recognize this fact, and claim it, fearlessly claim it. Referring to God's invariable goodness, the apostle wrote, "Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning."

Reality Intact; Man Unfallen

It cannot be denied, of course, that the world has been taught to believe that, although God created the universe to be spiritual and perfect it has since become material and imperfect; and that, although God created man to be spiritual, and perfect also, man has subsequently become material and imperfect—fallen, as false theology puts it. But, dear friends, if you were to stand before a mirror, could your reflection change unless you were to change first? How, therefore, can man—God's image and likeness—be changeable, if God changes not, but is "the same yesterday, and to-day, and for ever"?

Accordingly, Christian Science declares it to be as scientifically impossible for us to have a material, imperfect universe and fallen man as it is for us to have a material, imperfect, and fallen God. It declares that God, universal good, and man are as spiritual, harmonious, and perfect as they were when the "stars sang together," and all was primeval harmony. It declares that in this wholly good universe everything is in perfect accord with divine Principle, Love. It declares that whatever seems to be otherwise is no part of God's universe; hence the unreality of matter and discord, whatever its particular manifestation may be.

Freedom Through Obedience

Nevertheless, have not many of us seen apparently inoffensive, industrious, law-abiding acquaintances, neighbors, and friends become the victims of fear and discouragement, sickness and disaster, unemployment and want? And have we not asked ourselves again and again how, if God is ever present good, such situations could come to pass?

In order to answer this question satisfactorily, let us suppose, by way of simple illustration, that a person were to disregard certain necessary steps in solving a mathematical problem and were to suffer the usual discord and confusion as the result thereof. Surely, he would not become resigned to the error and its effects, on the ground that mathematics was against him! Rather would he recognize, first of all, that he had failed to conform to the requirements of mathematical law, after which he would see the need of retracing his steps to the point of divergence and correcting the error. Mathematically speaking, this process would set him free.

Obviously, discord and limitation are always the result of unspiritual thinking. They are indications that one is out of harmony with the truth of being. They are warnings that one is participating in the popular belief that man is the victim of circumstances instead of their master. It is as reasonable to believe that obedience to divine law can cause the loss of health, happiness, home, friends, employment, money, and so on, as it is to believe that obedience to mathematical law can cause one to make numerical mistakes. The refining process does not harm the gold, but it removes the dross.

If, therefore, apparently well-intending persons seem to experience afflictions, it is not because God is against them, but because they—like all mortals—are admitting either ignorantly or willfully that matter and evil are real and powerful and capable of causing them and others to be unloving, unhappy, sick, in want, and possibly wrong thinkers and doers in other ways. The remedy, of course, lies in learning—through spiritual understanding, which always accompanies obedience to divine law—how to get rid of the dross or belief of an existence apart from God, ever present good.

Man Is Idea, Not a Mortal

The Bible tells us that no person has seen God at any time. Obviously, this means that infinite Spirit cannot be cognized by finite sense; for the infinite is incorporeal—that is, humanly bodiless. Accordingly, it can be said with equal truth that no person has seen man, God's image and likeness, at any time; for the real or spiritual man, like God, must be spiritual and incorporeal also. Consequently, man is no more subject to human discord and limitation than is God. This spiritual perfection and unity of God and man, divine Principle and idea, is demonstrable truth and is the basis of Christian Science practice.

Now, my friends, we need to understand clearly that fear and worry, wrongdoing and sickness, unemployment and want, disaster and death—all evil—are associated, not with your real, spiritual, and only self, but with a material, corporeal, bodily sense of existence claiming to be you, which sense must be unreal if, as the Bible tells us, God (infinite Spirit) is true, and material sense, or sense of matter, a liar. Accordingly, our fundamental need is never the getting of material health, happiness, home, friends, employment, money, and so on, but the giving up of the belief that man is either sick or well, poor or prosperous, alive or dead in matter or a material body.

Plainly, then, the human body expresses a material or mortal belief; hence, the only way to deprive this universal, mesmeric belief—commonly referred to as material law—of a subject, object, or victim, is progressively to dematerialize, spiritualize, or purify so-called human consciousness. It must have been this process that preserved unharmed the Hebrew boys in the flames of the Babylonian furnace, protected Daniel in the den of lions, took Jesus unseen through the midst of the mob, and liberated Paul and Silas from prison.

During the World War, for example, an American airplane got out of control and dashed two thousand feet to the ground. The plane was reduced to a mass of wreckage; but the pilot, who was a practical student of Christian Science, was unharmed. At a Wednesday evening testimonial meeting he said that if he had believed himself (his real self) to be material, he would have been destroyed also. But instead of so believing, he said that he stuck prayerfully to the truth that he was not material, nor even mentally merged with material surroundings, but that he was spiritual, harmonious, and perfect, forever safe in the indestructible substance of infinite Mind, God. This prayer of spiritual awareness was his life preserver.

True Basis of Health

Touching upon this ideal method of treatment, Mrs. Eddy writes on page 120 of Science and Health: "Health is not a condition of matter, but of Mind; nor can the material senses bear reliable testimony on the subject of health. The Science of Mind-healing shows it to be impossible for aught but Mind to testify truly or to exhibit the real status of man. Therefore the divine Principle of Science, reversing the testimony of the physical sense, reveals man as harmoniously existent in Truth, which is the only basis of health."

To illustrate: Some months ago, a person who believed himself to be desperately ill at sea, appealed by radio to a Christian Scientist friend for help. The friend, who was not a practitioner, but an earnest beginner, responded to the best of his ability by giving a treatment to a supposedly sick man at sea. An hour or more later, the man sent a second radiogram saying that the situation was unchanged and that his friend should continue to help him. His friend then gave another treatment to a supposedly sick man at sea. Experiencing no relief, the sick man sent a third radiogram saying that the situation was still unchanged.

At this point, the friend began to wonder why the treatments he had given were ineffectual. After consulting an experienced practitioner, however, who referred him to the "scientific statement of being," he realized that he had been trying to heal a sick man at sea, whereas he needed to recognize the truth that man is neither sick nor well materially; that he is not a mortal at sea, nor on land, nor somewhere up in the air, but a spiritual being, an individual consciousness, an idea of divine Mind, God. This absolutely right point of view was both spiritually illuminating and immediately effectual; for, very soon thereafter, the man who had been calling for help sent his friend a fourth message thanking him and saying that all was well.

Our Need Is Spiritual Always

In view of all that has been said, it should be evident to us that prayer, as understood in Christian Science, could never be employed successfully for any narrow, selfish purpose. True prayer is spiritual; that is, its function is solely to bring human consciousness into accord with divine Principle, Love. If, in the process of establishing a clear sense of man's unity with God, one's temporal needs are supplied adequately or abundantly, one is not apt to mistake effect for cause and be misled by the suggestion that God or Spirit gives us matter or things; for such a belief would be apt to hinder instead of help the solution of a problem.

When, for example, Solomon placed spiritual-mindedness above all other considerations, and prayed only for a wise and understanding heart, he received not only the blessing for which he prayed, but those for which he had not prayed; namely, riches and honor and length of days. Why? Because what seem to be things are thoughts or mental concepts, and the effect of spiritual ideas upon so-called human consciousness is to change a belief of lack of things—whatever its outward manifestation may be—to an awareness of plenty.

Centuries after Solomon's day, Jesus said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." And in "Miscellaneous Writings" (p. 307) Mrs. Eddy writes, "God gives you His spiritual ideas, and in turn, they give you daily supplies." In other words, our real need is never material things—however much we may so believe—but spiritual-mindedness, which requires of us first and foremost a neighborly, brotherly, loving attitude towards all.

Giving Precedes Getting

For more than two years, for example, a certain man had been out of employment. During that period, he had been going from place to place daily, trying to get a job. One day, however, he met a Christian Scientist friend whom he had not seen for a long time. After hearing the man's story, this friend asked him inoffensively whether he had ever tried giving instead of getting in order to solve his problems.

Astonished by the question, the man asked wonderingly how he could give with his savings gone, his home about to be taken from him, and his wife and children in want. How could one give without first getting? His friend assured him that, notwithstanding the seeming lack of material things, he was still, in the true sense, a wealthy man; for did he not have an inexhaustible supply of loving-kindness from which to draw? Could he not give an understanding smile, a comforting word, and a helping hand to the unhappy, the discouraged and the heavy-laden? Surely, the world was more in need of loving encouragement than of material things! Could he not begin without delay to give, and learn by giving? The Master had said, saying, "Give, and it shall be given unto you"?

The idea deeply impressed the man. He saw how he had habitually been trying to get instead of to give. He would now reverse the process; he would go out of the getting business and go into the giving business. Accordingly, he went home and surprised his wife by joyfully giving her praise and encouragement, thanking her tenderly for the years of unselfish loyalty and devotion to him and their children. Although the change in her husband's attitude caused a momentary shock, its general effect upon the wife's depressed outlook was like that of cool water upon a wilting plant; it helped her to lift her thinking above the sense of fear and limitation and to be expectant of better days. The whole atmosphere of the home immediately became more hopeful and needed supply began to come.

Love Is Power

This man had been what the world would look upon as a confirmed endseater; but now, instead of tenaciously holding on to an end seat wherever and to whatever he went, he would seat himself so as to inconvenience others as little as possible. Critically inclined, he had found fault with nearly everything and everyone; but now he would see only spiritual qualities, and give everyone credit for being truly the image and likeness of God. Impressed by the man's outstandingly cheerful, willing, and unselfish demeanor, an observing business man soon gave him employment and paid him well from the outset.

Now, I ask, was that man's primary need employment, money, food, clothing, and so on? By no means! His primary need was to serve rather than to be served; to diffuse kindness rather than to accumulate matter; to be more interested in the outgo of love than in the income of things. The moment he began to look for opportunities to give instead of to get, he was astonished at the way the world softened towards him, helpfulness came out to meet him, and opportunities for usefulness appeared on every hand.

When one of the disciples asked Jesus to show them the Father, source, or basis of his mighty power to help and heal mankind, Jesus replied, "He that hath seen me (invariable, undeviating, impartial unselfishness and love) hath seen the Father (Love)." And so, on page 122 of Science and Health, Mrs. Eddy writes, "Whatever holds human thought in line with unselfed love, receives directly the divine power."

THE MOTHER CHURCH

The imposing edifice of the Mother Church, the First Church of Christ, Scientist, in Boston. This is the headquarters for the Christian Science movement throughout the world.

Musical Festival Notes

By A. G.

Entries for the Victoria Musical Festival which will be held May 14 to May 18, have exceeded anticipations, being numerically greater than in 1934. The greatest interest, judging by the number of entrants, appears to be in the children's choral classes. The public school classes are as thoroughly representative as in the past, but in addition Vancouver is sending over several girls' and boys' choirs, under the leadership of E. C. Findlater, conductor of the famous Boys' Choir, and of Miss E. G. Lovick, another children's choral leader of repute in the mainland city.

* * *

The children's pianoforte and vocal classes are also excellently supported. The string instrumental classes, however, have been rather disappointing.

* * *

Folk dancing, with its graceful rhythmic and colorful movement, maintains its appeal, and it is anticipated that the dancing events will attract larger audiences than ever before. Each year these events have shown that public interest is increasing, and encourages the board to continue to foster this movement.

* * *

Another class which this year is receiving excellent support, is that for children's rhythmic bands. The idea of teaching children the fundamentals of music by means of rhythmic bands. The idea of teaching is comparatively new and novel in method. It is, however, a progressive movement, which educationists of foresight are endorsing. This class should be particularly interesting this year to all who are following trends and innovations in child education.

* * *

The band and wind instrument classes have attracted a great number of entries from Vancouver, including two bands conducted by Mr. Delamont, conductor of the world renowned Kitsilano Boys' Band. The New Westminster Boys' Band, under Mr. Cornfield, which ran a close second to the Kitsilano band, will also be here, so it would seem that the band contests will be one of the most attractive features of the week's programme.

* * *

The adult vocal classes, particularly the Rose Bowl, lieder, operatic and oratorio classes, have surpassed expectations, for the number of contestants, which is most gratifying. Not only that, but the competitors' own selections for test pieces are of such a high standard as to warrant the audiences anticipating a thoroughly interesting and enjoyable programme for each class.

* * *

In the adult choral classes, it is noted that Sidney and Nanaimo are to be represented. The former is sending its newly formed choral society, under the conductorship of F. W. Buckler, and its initial appearance in the festival will be of great interest to Victoria choristers, and should prove a stimulating experience for this promising organization.

* * *

Nanaimo, noted for its remarkably capable male choirs, will be out to gather the honors in the small male choir class. The commercial choir class, also promises keen competition, with the Hudson Bay Co.'s choir entered against the local Hudson's Bay Choir under Cyril Warren, and the David Spencer Choir under Frank Tupman.

* * *

The Victoria Male Choir of Vancouver in the large male choir class will be unopposed this year, and the keen spirit of this enthusiastic group is once again indicated by their entry.

* * *

First United Church Choir, under W. Fyffe, and the Metropolitan Church Choir, under F. Tupman, have again entered the large church choir class, and the test pieces for this class warrants a new auditorium to hold the audiences that should hear them.

* * *

The St. Cecilia Ladies' choir, of Vancouver, will return again this year, but it is to be regretted that Victoria will not be represented in this class at this festival.

* * *

The elocution section has attracted an excellent number of entries for each class, and the new classes introduced this year will prove interesting. The same applies to the new classes throughout the syllabus, and the piano duo class in particular will have a decided appeal for the audience.

* * *

The official programme is now in [illegible] available to the public a week or two before the opening date, May 14.

* * *

Membership tickets of $1, which admit holders to all day sessions free of charge, and to evening sessions, excepting the Saturday evening concert, at half price, are now procurable at the music stores. The board of directors has set an objective of 1,000 members for this year's festival, and it is urged that the supporters, facilitate the work of the treasurer by procuring their membership tickets as early as possible.

Toronto Conservatory Exams in June-July

The Toronto Conservatory of Music announces that the midsummer local examinations for 1935 will be held throughout Canada in June and July. Applications and fees from candidates west of Sault Ste. Marie should reach the conservatory not later than May 1.

Montreal, April 6 (Canadian Press).—William Hutton Mitchell, seventy-four, widely-known Scottish author and artist, died yesterday in London, according to word received here. Mr. Mitchell was a resident of Montreal from 1926 to 1931.

High School Notes

In the Portia Society debate in the inter-year series Wednesday, Grade Ten, represented by Helen Manning and Ida Stansfield taking the negative side of "Resolved that a standard type of costume should be adopted by women," were victors over May Riley and Ann-Mari Bjornstjett, Grade Twelve representatives.

During the week the Victoria High School boys' table tennis tournament got away to a flying start and forged right ahead to the quarter-finals from an overwhelming entry list.

Andrews beat Sneddon in the first round and then Clague, 12-21, to earn the right to meet Armstrong, who beat Norrie in the first round and then Berry, 20-24. Mabee beat Speed and then Cornwall, 21-14, and will meet Robertson, who defeated Hicks in the first round and won the second by default. Morrison will meet Bishop next week. Swainson and Brazie will meet by right of the latter's win over Slater in the first round and Young, 21-19, in the second round. Swainson beat Green in the opening draw and Elford, 21-17, in the second round.

In the girls' softball league Monday, division fifteen whipped division thirty-two 15 to 6, and division six defeated division ten 16 to 7. Tuesday, division thirteen beat division thirty-six 19 to 13. On Wednesday, division one defaulted to division thirty-eight, twenty-three defaulted to twelve and division eleven nosed out division twenty-eight 11 to 8.

The Victoria High School girls' grass hockey team defeated Oak Bay in the second game of the series for the May Tully Shield, but were held to a draw by the Norfolk House girls, who registered twice to break even with the black and yellow lasses.

Cardinal Juniors outpointed Shamrock Juniors 21 to 16. Teams and scorers follow:

Cardinal Juniors — Sneddon 2, Olsell 6, Stewart 2, Parrott 2, Dalzell 7 and Carnegie 2. Total 21.

Shamrocks—Elford, Cullen 1, Miller 5, Lucas, Laine 2, Purdy 4, McCall, Hausole 2, Lovell and Roach 2. Total 16.

Next Friday, April 12, Nuggets will face off with the Cards in the third game. They whipped Blacks 19 to 7 in the opening match.

Latest Books On Shelves Of Local Library

By BOOKWORM

NON-FICTION

"Famous Stories of Five Centuries," by Hugh Walpole and W. O. Partington, is a compilation of over ninety stories by English and American authors from Chaucer and Fielding to such modern writers as Mark Twain and Joseph Conrad. The stories are grouped under the headings: "Tales of Sons and Fathers," "Sport and the Chase," "Feasts, Fights and Punishments," "Setting Out in the World," "Life on the Ocean Waves," "Old Times and Ways," "High Adventure," "Famous Heroines," "Romance," "Problems," "Put Yourself in Their Place," "Bad Boys—Not So Bad," "Whimsical Tales," and "A Mixed Bag of Tales." The introductory article by Hugh Walpole is entitled "The Adventure of Reading and Writing Books." The book is intended primarily for young people.

"Panic," by Archibald Macleish, is a drama of the industrial crisis. The mood of "Panic" is that premonition of disaster which, in the form of economic fatalism, is one of the deepest, though least noticed, emotional characteristics of our time. The scene is New York; the time, February, 1933, at the height of the banking crisis. The action takes place in the office of an American financial titan and in a street before an electric news bulletin; the scene shifting back and forth between a group of distraught and bewildered capitalists desperately trying to shore up the old order, and the people outside whose voices rise from the street like the chorus of a Greek tragedy. This play, which is to be produced in New York by the Phoenix Theatre, promises to be an outstanding event of the dramatic season.

"Sea Lanes," by Martin D. Stevers and Capt. J. Pedlebury, takes the reader all over the globe in all kinds of craft, from the earliest boats to the modern liners. Everything about ships, the sea, and navigation, is explained as the tour's swift action unfolds. The highlights of maritime history are included—the mysteries of lost ships, the "inside stories" of famous voyages, the bargaining and bickering of trading in faraway ports. Capt. Pendlebury is well known among world travelers from his years of command on world cruises. As a boy and young man, he sailed every sea there is in windjammers. Mr. Stevers's previous works have proved his ability to make material usually considered technical pleasantly understandable.

"Letters from John Galsworthy, 1900-1932," edited by Edward Garnett, gives the record of a friendship. Edward Garnett and John Galsworthy were introduced to each other by Joseph Conrad in the summer of 1900, and a friendship was then begun which lasted to the end of Galsworthy's letters to Garnett—and a few of Garnett's—with an introductory essay on Galsworthy as a man and a writer. Most of the letters deal with Garnett's criticism of Galsworthy's novels and plays and with other literary matters.

"Six Soviet Plays," edited by Eugene Lyons, are singularly interesting, in spite of pretty clumsy translations. This entire collection is to be recommended to all readers for a better understanding of the Russia of to-day and for its revelation of the vitality of the Russian theatre. The contents are: "Days of the Turbins," by Michael Bulgakov; "Squaring the Circle," by Valentine Katayev; "Tempo," by Nikolai Pogodin; "Bread," by Vladimir Kirshon; "Tags," by Anatole Glebov, and "Peer," by Alexander Afinogenyev.

"Architecture—Here and Now," by Clough Williams-Ellis and John Summerson, might have been called "Architecture Debunked." Fascinating as it is in itself, and vital to everyone, the subject has often been dulled by ponderous handling, and there has been too much concentration on historic styles and details, with neglect of the buildings of tomorrow. The present seems to the authors the most important and the most interesting of all periods, so they have dealt chiefly with that, leaving those of their readers who have had their appetites sufficiently stimulated to pursue the subject backwards. The book has the wit and vigor which can be expected from the author of "England and the Octopus," and is very fully illustrated.

"Art of Helping People Out of Trouble," by Karl de Schweinitz, is a practical book about the troubles that arise in the life of every human being and the way in which they can be met. It is both an interpretation of the art of living and a description of a method of helping people to overcome their difficulties. Although the subject is trouble, the discussion is inspirational rather than depressing. Through it there runs a faith in the ability of human beings to achieve happiness if rightly directed. The author who has had long and successful experience in social work, is definite, lucid and informing. His book will be found invaluable by social workers and teachers, by parents, physicians, clergymen, lawyers, and by everyone who is in a position to influence other people, and as well by the person who is himself in trouble.

"Cape Farewell," by Harry Martinson, contains seventeen meditative sketches of experiences on ships or in the lands to which the ships took him. The author, who was sent to sea at the age of fifteen, is Swedish, and sailed the seas for nine years in various capacities from mess boy to stoker. He is now living and working in a cottage not far from Stockholm.

"Illusion of Immortality," by Corliss Lamont, continues the study of the problem of a future life begun in "Issues of Immortality." The author says in his preface: "I have come to the conclusion that the life which human beings know on this earth is the only one they ever will have. I do not consider this conclusion a dogmatic one. All science is based ultimately on probabilities. And in this case the probabilities against the human personality surviving in any worthwhile way the event called death seem to me so overwhelming that we are justified in regarding immortality as an illusion."

Other books added during the past week are: "Foreign Policy of the Powers," by J. Cambon and others; "Training Handicapped Children," by Amos and De la Porte; "Musical Companion," by A. L. Bacharach; "North of '53," by B. Barker; "History of Canada," by James Bungay; "Eight New One-act Plays," edited by J. Bourne; "Menace to Our National Defence," by Sir N. Angell; "Knots, Ties and Splices," by J. T. Burgess; and "Watkins's Last Expedition," by F. S. Chapman.

CITIZENS WILL PROMOTE SAFETY

Working co-operatively with the city and provincial police, a safety committee of Victoria Automobile Club directors and citizens will report to the police cases of traffic rule violations, it was announced at the directors' meeting yesterday.

The move is aimed toward providing safe traffic in the city and infractions such as speeding, failing to stop behind street cars and failing to observe stop signs, will be reported. Further violations will be followed by warnings from police, or prosecutions, as the cases warrant.

Suggestions for the improvement of roads and sidewalks along Marine Drive was made by A. D. King, and were referred to the safety committee.

Wingham, Ont., April 6 (Canadian Press).—R. J. Deachman of Ottawa, well-known tariff expert and writer on economics, yesterday was chosen Liberal standard bearer in North Huron in the coming federal election.

Spring Auto Show Will Be Opened Monday

New Developments In Motor Design Seen In Exhibit

Beautiful New 1935 Packard, Graham and Austin Models to Hold Centre of Stage at Plimley Showrooms; Prize Contest Announced; Airplane, Speed Boat and Racing Car to Be Shown

With beautiful new 1935-model automobile—representing the latest improvements in automotive engineering—on display, together with a racing car, a modern airplane and a speed-boat, a Spring Motor Show will open on Monday at the commodious showrooms of Thomas Plimley Limited, 1010 Yates Street, Horace Plimley, managing director of the firm, announced this morning.

The public is cordially invited to visit the exhibition at any time during the week before Saturday next, at midnight.

One of the features of the exhibit which undoubtedly will attract great public interest is a prize contest to test the skill of the public in estimating the gasoline consumption of a new 1935 model Graham Economy Six.

At noon on Saturday, April 13, a new stock model Graham car will be taken direct from the showroom floor. The tank will be drained in the presence of witnesses, a measured gallon of Texaco gasoline put

HORACE PLIMLEY

in and the tank sealed. Driven by a Victoria High School student, who will be accompanied by official observers, the car will then be driven downtown until the gasoline gives out. The mileage will be carefully checked before starting and again at the point where the car comes to rest through lack of fuel.

Commencing Monday, the public is invited to submit estimates as to the exact mileage the Graham Economy Six will do on one gallon of gasoline. For the closest estimate a cash prize of $25 will be given; for the second closest, $15; and for the third closest, $10. Entry forms are available at the showrooms of Thomas Plimley Limited, where the Graham Economy Six will be on display all week. All estimates must be handed into the office of the firm before noon next Saturday.

The famous new Graham supercharged cars will be on display as well as the new Austin and the new light Packard models for 1935. The latter represent Packard's entry into the lower-price field.

Prominent among other drawing cards to the exhibit is the up-to-date little Alexander "Flyabout" airplane for two passengers, owned by Ernest Eve, well-known local aviator.

Walter Adams will show a modern "sea flea," powered with the latest edition of the Johnson Outboard Motor.

A racing car built by Jack Smith and Ed. Allen is expected to prove an absorbing attraction to those interested in the last word in speed engineering in the automotive world.

The showrooms will be decorated appropriately with spring flowers and no expense has been spared to make a visit to the exhibit both pleasurable and instructive.

Much Interest In New Motor

Packard Develops Beautiful and Efficient Car in Lower Price Field

"The new, smaller and lower-priced Packard will be one of the features of the Spring Motor Show, starting Monday," Andrew Mellin, director of Thomas Plimley Limited, in charge of Packard sales, declared this morning.

"This fine car selling in the lower-price field," he said, "has the well-known Packard identifying lines, famous for years, and the Packard background of thirty-five years of quality engineering."

"The straight-eight, L-head engine is equipped with the famous Packard-Alcando aluminum alloy cylinder head and develops 110 horsepower. The car accelerates from a standing start to sixty miles an hour in 17.5 seconds and has a top speed of ninety miles or more.

"Packard engineers," Mr. Mellin said, "report that this is one of the

ANDREW MELLIN

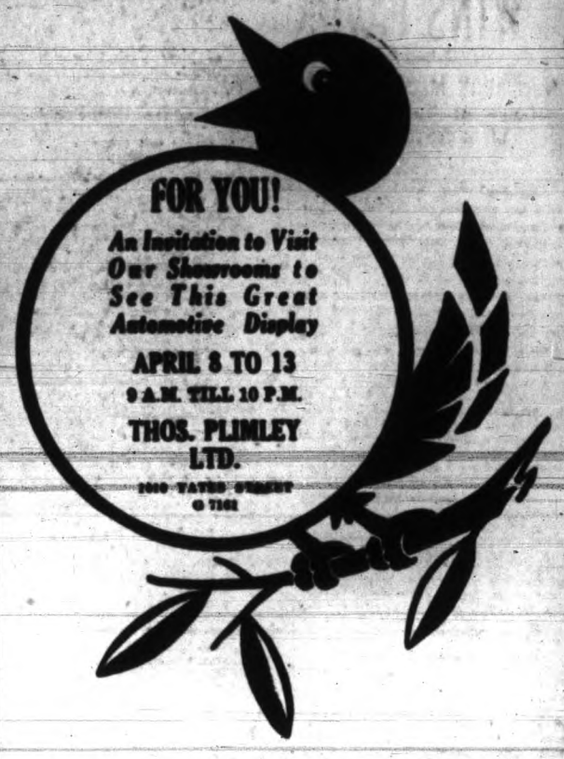
finest engines Packard has ever built. One car, tested in a 25,000-mile endurance run over all types of road at an average speed of sixty-five miles an hour showed no appreciable signs of wear on bearings and other moveable parts. At the end of the run the motor performed as smoothly and quietly as it did at the beginning."

"The new Packard is by no means an assembled car. It is built by Packard. In fact, Packard builds more of its component parts than any other car manufacturer. This includes such major units as the engine, transmission, steering, front suspension, rear axle and body.

"The Packard 120 is built in a modernized plant of its own. The machinery used in its fabrication is of the very latest design, thus reducing manufacturing costs to a minimum. The car is the beneficiary of Packard's long experience in producing nothing but precision-built products.

"The new car is designed to stand up during the most severe driving conditions and requires a minimum of upkeep expense. One of its remarkable characteristics is its simplicity and freedom from complicated features.

"Packard's long years of experience with precision manufacturing and knowledge of quality materials now serves it in good stead in producing this latest Packard car," declared Mr. Mellin. "We offer it to the public with every confidence that it will be accepted as a car worthy of its name. It is every inch a Packard."



S. JAMES HEADS WELSH SOCIETY

Selected President at Annual Meeting; Girls For Pageant Chosen

Stanley James was elected president of the Victoria Welsh Society at the annual meeting yesterday evening in the S.O.E. Hall.

Mr. James replaced David Evans, who asked to be retired after a number of years in office.

Mrs. W. C. Williams was chosen first vice-president and Mrs. J. L. Jones second vice-president. The secretary-treasurer is Miss Helen Thomas, who was re-elected for a third term with a vote of thanks for her work in the past.

The following comprise the executive committee: Robert Thomas, Mrs. Stanley James, Mrs. Richard Evans, J. C. Williams and Mrs. W. W. Kempton.

Mrs. W. P. Jeune and Mrs. T. C. Jones form the sick visiting committee.

Five young women were chosen to represent Wales at the summer pageant sponsored by the Victoria School Board. They are: Lillian Williams, Gwenneth Evans, Nancy Robe, Marjorie Kinsey and Iris Williams.

A musical programme was enjoyed after the business meeting, with the following contributing: Bert Lilley, Buster Brown, Mrs. W. C. Williams, Baby Finn, the Finn sisters, W. Lavery, Boyd McGill and J. Thomas.

INVITE CREDIT CONCLAVE HERE

The 1936 conference of credit men of the northwest will probably be held here next May, according to announcement made yesterday at the luncheon meeting of the Retail Credit Granters' Association of Victoria in the Douglas Cafe. The local body has invited the conference to this city and there is every indication it will come.

The annual gathering consists of leading credit men of Oregon, Washington and British Columbia and will bring between 400 and 500 visitors to this city.

Yesterday's speaker was Gerald Perkins, representative in charge of credit for the Beatty Washer Company here. Mr Perkins outlined some of his experiences in credit work and dwelt with the importance of the position held by the person who looks after the credit of any firm.

It was necessary to know bookkeeping and be well acquainted with the policy of the firm and the goods which it carried, he said. He also reviewed methods of handling collections.

GROUP FACES TRIAL

St. Louis, Mo., April 6 (Associated Press).—Violation of anti-trust law injunction by creating of exclusive trade territories is charged by the government in a criminal contempt action filed here yesterday against the National Retail Credit Association and fourteen other concerns and individuals.

CANDIDATE TO SPEAK HERE

JAMES S. TAYLOR

who is the nominee of the C.C.F. Party to contest Nanaimo riding in the coming federal election. Mr. Taylor will address a public meeting in the Chamber of Commerce on Monday evening, starting at 8 o'clock. The meeting will be under the auspices of the Saanich and Victoria C.C.F. District Councils and Don Smith, Victoria, will also speak. Mr. Taylor, who appeared under the C.C.F. banner in the last provincial campaign, came into the movement by way of the League of Social Reconstruction. He is a Liverpool, England, man, and in his early years was in the banking business, spending twelve years in England and South Africa. He came to B.C. in 1907, entering the real estate field. While he did not take part in public life until the last election, Mr. Taylor has made a study of sociology and economics, as well as comparative religions and the occult and psychic sciences. He was secretary of the Vancouver branch of the League of Social Reconstruction and formed its Committee on Political Action, later sponsoring the Reconstruction Party in B.C., now associated with the C.C.F. clubs.

Thrown into the sea at Inhambane, Portuguese East Africa, a bottle has been found near Mossel Bay, Cape Province, having drifted more than 100 miles in two months.

HYDRO-THERAPY INSTALLED HERE

New Spa Department Opened at Crystal Gardens; C.P.R. to Advertise Widely

As a result of arrangements made by H. P. Mathews, superintendent of the C.P.R. hotel system, a complete and modern hydro-therapy department has been installed at the Crystal Garden.

This department, which will be operated in conjunction with the other departments of the Garden which are under the direction of A. H. Cowlishaw, is under the direction of Miss Van Becker, who has had more than twenty years medical experience with doctors and hydro-therapists in London, England. The department will be open to the Victoria public as well as to the guests of the Empress Hotel.

Plans are being made to carry on a special advertising campaign to make known throughout Canada the fact that the C.P.R. now provides here all the facilities of the best known spas in addition to the facilities for salt water swimming and bathing.

Carpenters, painters, and installationists have just finished the fitting up and finishing of the hydro-therapy department. In one section will be given the hot salt water baths. Miss Van Becker explained that Victoria is now one of the few places where natural salt water is used for this purpose, with all its natural advantages resulting from the presence of its constituents of iodine, sulphur, potash, magnesia, phosphorus compounds, sodium sulphate, and chloride of sodium. Hot salt water bath treatment in conjunction with that in the steam baths is successful in bringing about weight reduction and in treatment of rheumatism as well as in treating persons who are tired and seek refreshing relaxation, Miss Van Becker explained.

In another section are the electric baths, which work with radiant dry heat, and the galvanic and high frequency treatment facilities. Here are the electric machines.

COURTENAY

Courtenay, April 6.—The death occurred Wednesday, April 3, of Mrs. Annie Margaret Halliday, a resident of British Columbia for twenty-five years, member of the Tsolum Consolidated school staff since its consolidation.

She was born in Maidstone, Kent, June 1, 1881, and leaves her daughter, Miss Jean Halliday, her mother, Mrs. W. Smith, a sister, Miss Dency Smith, and three brothers.

Only about six-tenth of the surface of the moon has ever been seen from the earth; the remaining portion is never turned toward the earth.

Public To See Handsome New Motor Cars

GRAHAM CAR WINS FAVOR

New 1935 Models Will Be Shown at Spring Motor Show Next Week

"My experience since 1922 with Graham cars has convinced me that structural features of the Graham automobile have made it one of the safest and most manoeuvrable of cars in its price field to-day," declared Ernest Eve this morning in describing the new 1935 Graham cars which will be shown in connection with next week's motor show at Thomas Plimley Limited.

Among the features of the new cars, the importance of which was stressed by Mr. Eve, who is in charge of Graham sales for Thomas Plimley Limited, were geometrically correct steering, outboard springs, full-length water jackets and super-charged power.

"Women are especially enthusiastic about Graham steering," said Mr. Eve, "due to the unusual ease of control when parking, to the self-straightening ability of the car after rounding corners or curves, and to the absence of steering wheel fight while driving over rough roads. As a safety factor the importance of an absolutely reliable steering mechanism can not be over-emphasized."

"Graham outboard springs," he continued," are mounted outside the frame instead of underneath it. This provides a much wider spring base which, with the wider wheel tread, greatly increases the car's roadability, and permits higher speeds with greater safety, especially when rounding curves. Strong, rigid outboard brackets, firmly attached to frame side members, hold supporting bolts in alignment with the springs under all operating conditions.

"Graham engines have automatic oil temperature control which ensures increased life and efficiency for oil and engine by keeping the oil temperature well within safe limits. Full-length water jackets provide maximum wall area between oil and cooling water. This construction permits rapid interchange of heat between oil and water, resulting in automatic oil temperature regulation. Distortion of cylinders and burning of valve seats is eliminated by this feature and more uniform clearance between cylinders and pistons, and a tighter valve seal are secured.

"Super-charged power is one of the secrets of Graham's fast pickup ability and surprising power, coupled with great fuel economy. The Graham super-charged eight engine develops 140 horsepower with 3¼ inch bore, 4 inch stroke and 265.4 cubic inch displacement."

ERNEST EVE

The British Government has approved a plan for building a waterway from Bristol to The Wash, cutting England in half. The proposed waterway is expected to cost $2,000,000.

A high-goal polo player often rides between eleven and twelve miles during a single game.

AUSTIN CARS ARE POPULAR

Handsome New Design Awakens Interest; Improvements For 1935 Models

Handsome new 1935 models of the famous British-built Austin cars are expected to be one of the chief drawing cards at next week's spring motor show in the showrooms of Thos. Plimley Limited, 1010 Yates Street.

Both passenger cars and light delivery vans will be on display, it was announced this morning by Louis Michelin, who is in charge of the Austin department for Thos. Plimley Limited.

Since being introduced to Victoria, the British-built Austin has attained a position of great popularity, Mr. Michelin said, referring to many letters of enthusiastic approval from delighted local owners.

Low in original cost, the Austin is without rival in economy of operation. It is phenomenally easy on gas, tires and oil and because of the precision methods of quality manufacturing, it enjoys exceptionally long life and remarkable freedom from the necessity of repairs.

In addition to the passenger vehicles the firm will show three new delivery van types—the seven, ten and twelve-horsepower models. The Austin van is forging into the leadership among firms whose requirements do not involve a heavier type of vehicle. The outstanding economy, as well as the smart appearance of the Austin van, makes it ideally suitable for light delivery tasks.

"Of the Austin improvements," said Mr. Michelin this morning, "by far the most outstanding is the introduction of an entirely new range of Austin seven-horsepower models—including the Ruby four-seater saloon. This is quite the most elegant small car now being offered the public.

"On all models the controls have been greatly simplified by the adoption of automatic ignition advance, combined strangler and throttle control, automatic return for the direction indicators worked by the reverse movement of the steering wheel, a foot operated dipping switch for headlights, and, most important of all, four forward speed synchromesh engagement for gears. The gear ratios remain unchanged.

"From among the minor improvements common to the seven range (with certain exceptions on the sports models), a new type of magnetic speedometer, electric windscreen wiper, new headlights with ribbed fronts to give an even spread of light, and the provision of separate side-lights must be mentioned.

"The sevens are more roomy, have wider doors and greater visibility. Foot wells for the rear seat passengers are entirely eliminated. This has been accomplished by lowering the floor five inches, which, in additions to giving greater roadability though a lower centre of gravity, also increases the factor of safety at high speeds."

LOUIS MICHELIN

Argentina leads all South American countries in the number of radio stations and receiving sets in use.

COAL HAULAGE COSTS GIVEN

Averaged 50½ Cents Per Ton in 1934, Commission at Nanaimo Learns

Canadian Press

Nanaimo, April 6.—Patrick Fagan, Canadian Collieries official, explained that transportation and shipping costs in 1934 averaged 50½ cents per ton, at yesterday's hearing of the Fuel Commission. Rates in previous years were 1933, 48½ cents; 1932, 48 cents; 1929, 44 cents; 1924, 52½ cents; 1919, 51 cents.

"It is a little high, isn't it?" asked C. H. O'Halloran in response to the official's announcement that $19,000 was spent on maintenance of company's railroads in 1934. This included ties, rails and labor costs. Mr. Fagan said there are fifty miles of track and siding which average $397 for maintenance.

SACKING COAL

The question of sacking was discussed with witness by J. Pitcairn Hogg, association counsel. The company does very little sacking and has only one small machine for this purpose. Witness stated that 1,200 tons of sacked coal were shipped to Alaska last year and that when coal is sacked, piled and stored for loading it deteriorates fast. For this reason none is kept in stock.

"Did it used to be sacked by the Pacific Coast Coal Co. at South Wellington?" queried Mr. Hogg. He drew a negative answer.

Witness also knew of no company that made a practice of sacking coal.

Wharf and power costs were dealt with extensively by Mr. O'Halloran before Mr. Hogg came back to the sacking item with a question as to whether the Suquash mine had shipped a large part of its output by sack in 1912.

Mr. Fagan only knew it as a prospect and stated he believed that very little coal was shipped from that point.

Witness told His Lordship that it was necessary to sack Alaska shipments because of the location of its ultimate destination. Mr. Justice Macdonald asked why sacked coal should break in a scow when it seemed to ride all right in a truck.

NO DETERIORATION

"I have good information that there is no deterioration whatever," interposed Mr. Hogg.

A. Bruce Robertson, Collieries counsel, asked what the cost of sacking amounted to. "Thirty cents," replied the witness, who then told Mr. Hogg that some coal was being sacked at the local wharves at present.

Dealing with transportation and shipping costs before the hearing adjourned until Monday morning, Mr. Fagan said that the C.P.R. charged 35 cents for a short ton and 39½ a long ton for the two and one-half miles' haul from the W.C. Co. to Stockett's Junction.

$25.00 FIRST PRIZE

For the Closest Estimate in the Graham

Economy Test

Stories in STAMPS

UNDER TWO FLAGS

OF THE thousands of islands that dot the South Pacific, the group called New Hebrides has never been claimed by a single nation. Instead, this colony remains under control of both Great Britain and France. A French explorer claimed the islands for his country in 1768, and Capt. John Cook, the famous navigator, claimed them for Great Britain in 1774. In 1878, they were declared neutral and placed under a "condominium," or joint government.

Since 1906, both British and French stamps have been issued there. In 1911, a joint issue carried the coats of arms of both countries, each still issuing its own postage under its own coinage, however. After the war, when the French franc fell, it was arranged that both types of stamps could be sold at French currency rates.

POST OFFICE APPOINTMENTS

Ottawa, April 6.—The number of permanent and temporary appointments to revenue postmasterships made between August 7, 1930, and February 28 last was disclosed in a return tabled in the House of Commons yesterday by Postmaster-General Arthur Sauve. Permanent appointees totaled 4,372 and temporary selections 1,866, the report showed.

With the number of temporary appointees indicated in brackets, appointments, permanent and temporary, in the western provinces were: Manitoba 222 (93), Saskatchewan 418 (158), Alberta 499 (244), British Columbia 361 (275), Yukon 13 (11) and Northwest Territories 29 (30).

THERE'S something ABOUT A GRAHAM

THAT GIVES IT THE feel OF A FAR MORE COSTLY CAR

Built as only Graham could build it, this new Six brings a new conception of motor car values to the lowest price range. Real Graham quality through and through, typical Graham style leadership and true Graham superiority in performance are now within the easy reach of all. You owe it to yourself to see and drive this unusual car. Come in today.

CHAMPION

EXTRA-RANGE SPARK PLUGS

Billy Winn lived up to his name by winning the Hankinson Speedway Circuit Championship for 1934. Winn is an enthusiastic Champion user.

If You Want More Miles Per Gallon, Spark Plugs Are Vitally Important and should be inspected and cleaned regularly, and changed every 10,000 miles. That's the secret of maximum miles per gallon, as well as maximum power, speed, acceleration and dependability. Insist on Champions for the simple reason that eleven consecutive years of supremacy in racing throughout the world have proved that Champions make every engine a better performing engine.

A CANADIAN-MADE PRODUCT

Fraternal Leader Visits Ladysmith

Ladysmith, April 6.—Mrs. Alice E. Savage of Vancouver, worthy grand matron of the Eastern Star, paid her official visit to Sharon Chapter, No. 4, O.E.S., Tuesday evening. After the meeting in Nicholson's Hall a banquet was held in the A.O.F. Hall.

The toastmaster was Bro. C. Graham, worthy patron.

"Grand Chapter" was proposed by Sister J. Beattie, conductress, and responded to by Sister A. E. Savage, worthy grand matron, and Bro. H. E. Wenman, worthy grand patron.

"Our Visitors" was proposed by Sister T. Gregson, associate conductress, and responded to by Sister B. Mulholland, worthy matron of Crescent Chapter, No. 10, Nanaimo.

Recitations were given by Sister E. Bauld, associate matron, and Sister V. M. Gourlay, marshal.

Mrs. Vandersteegen entertained members of her bridge club Wednesday evening. Prizes were won by Mrs. L. Johnson and Mrs. F. Vandersteegen. Refreshments were served by the hostess.

Mrs. A. De Clarke and children have returned from a visit to her sister in Emerson, Wash.

All-star Team To Battle To-morrow

A Saanich league all-star football team will play in an exhibition match to-morrow afternoon at the Hampton Road grounds. Teddy Hughes will referee. The Saanich team follows: D. Shaw, F. Albany, L. Kennedy, F. Elliott, H. Castilo, A. Eelman, M. Ott, G. Bell, Thoms, W. Osman, F. English; reserves, Brown, Pogis, D. Mowatt, C. Kerchin, V. Politano and H. Leggatt.

MOTORBOAT MEETING

A meeting of all persons interested in inboard motorboat racing will be held at the home of T. Waters, 1227 Clover Street, on Monday at 8 o'clock sharp.

W. A. JAMESON IS RE-ELECTED

Returned By Acclamation as President of Victoria Burns Club

W. A. JAMESON

W. A. Jameson was re-elected president of the Victoria Burns Club, according to announcements for the annual meeting mailed to-day by E. M. Whyte, secretary.

The annual gathering will be held on Tuesday evening next in the Chamber of Commerce, at 8 o'clock. All executive officers have been returned by acclamation. The committee of six will be named at the meeting.

Following are the officials re-elected: Hon president, Hon. R. R. Bruce; hon. vice-president, G. C. Grant; president, W. A. Jameson; vice-president, W. B. Grant; treasurer, Captain J. U. Gordon, and secretary, E. W. Whyte.

The executive committee will be chosen from the following nominees: Mrs. A. S. Christie, James Crossan, James A. Dewar, Mrs. G. Gedrim, Mrs. John Grant, Mrs. W. A. Jameson, Alexander Marshall, Duncan MacBride, William McGlashan, James McMartin, Robert Smith and David Taylor.

Following the business of the evening, the following programme of entertainment will be presented: Bagpipe selections, Major Donald Cameron; vocal solos, Mrs. A. M. Watson; elocution, Miss Elma Morbey, A.T.C.L.; foursome reel, Misses Lilian Grant, Gen Dewar, Evelyn Watson and Jessie Pollock. Refreshments will be served.

LAWYERS OF INDIA APPEAL TO LONDON

Bombay, April 6.—The government, defeated in a Bombay court in its attempt to disbar native lawyers for participation in Gandhi's civil disobedience campaign, yesterday carried its case to the Privy Council in London.

Mahatma Gandhi's National Congress Party has won votes of censure against the government in the present central Legislative Assembly on thirteen occasions.

The Viceroy, Earl Willingdon, in a message to the Legislature at New Delhi yesterday, urged the Legislative Assembly not to enforce amendments introduced by the Nationalist opposition in the finance bill. He said they would result in a deficit of about $20,000,000.

The Viceroy's over-riding powers will enable him to enact the bill as it stood originally, even if the Assembly ignores his recommendations.

BOXING

Flint, Mich.—Mose Butch, 127, Pittsburgh, outpointed Roger Bernard, 129, Flint 8.

Philadelphia—George Gibbs, 140½, Philadelphia, outpointed Billy Wallace, 136, Cleveland (10).

Spokane, Wash.—Cecil Payne, 135, Louisville, Ky., stopped Johnny Christmas, 136½, Oakland, Cal. (10).

Hollywood, Cal.—Tony Morgano, 128, Philadelphia, outpointed Lou Fo'dman, 125, New York (10).

Bluefield, W. Va.—Aubrey (Kid) Martin, 126, Helena, outpointed Pete Leno, 125, Cincinnati (10).

WRESTLING

Philadelphia—Dan O'Mahoney, 216, Ireland, threw Alphonse Bisignano, 212, Des Moines, 29.30.

Detroit—Charles (Midget) Fischer, 171, New York, and Bert Rubi, 174, Hungary, drew, one fall each.

Des Moines—Ed (Strangler) Lewis, 208, Glendale, Cal., defeated Louis Plummer, 225, Chicago, two out of three falls.

Bob Fritz Will Coach Winnipegs

Winnipeg, April 6.—Bob Fritz, All-American fullback on the 1934 Associated Press all-star football team, will coach the Winnipeg Rugby Football Club this year, it was announced here yesterday. Fritz Hanson, triple-threat ace of North Dakota State College, also will be on the Winnipegs' lineup.

Scotland Defeats England In International Soccer Match

Duncan Scores Pair of Goals In Shutout Win

Scottish Team Ties Up Series Lead By 2 to 0 Victory Before 130,000

DUKE OF YORK IN ATTENDANCE

Glasgow, April 6.—Scotland defeated England 2 to 0 at Hampden Park today before a crowd numbering 130,000. The final international soccer clash of the season brings the rose and thistle into a tie for honors, each country having won two games and lost one.

Ireland and Wales were out of the running with one win each.

The gates of the great enclosure were closed forty-five minutes before the start. Amublance men and policemen were kept busy attending to fainting cases.

The Duke of York was given a great ovation by the huge crowd. He is the first member of the Royal Family to attend an international match in Scotland.

SCOTS SUPERIOR

Scotland maintained a marked superiority over its opponents for practically the whole of the game, scoring one goal in each half. Duncan, fleet country winger, was the marksman, heading in twice from corners well placed by Napier.

While Duncan obtained the goals that gave his side victory, Walker, Heart of Midlothian centre-forward, was the star of the game. The Derby winger came a close second. The Scottish forwards played magnificently against a defence that appeared shaky at times.

Brook, Manchester City winger, excelled of the English attack, which, however, was unable to produce methodical footwork against the Scottish defence, where Cummings of Partick Thistles was the shining light.

Happgod won the toss for England, but the home players had the best of the opening exchanges. They progressed on the left wing, but Duncan was very slow, Hibbs coming out and clearing. England then settled down and had most of the play, Westwood and Brook testing Jackson.

McPhail missed scoring by inches for Scotland. Gallacher and Barker had many tussles. Walker played in splendid fashion, and his co-operation with Napier was one of the outstanding features of the first half. On one occasion he shot inches wide of the post from 30 yards out.

Bastin, Arsenal star, suffered an injury to his right knee and was out of the game for a short time.

Scotland pressed hard as the English backs appeared shaky. Male several times was guilty of miskicking. There was a thrilling melee in England's goal-mouth, McPhail, Gallacher and Napier missing splendid chances.

Duncan finally drew first blood for Scotland, beating Hibbs following a corner well-taken by Napier.

SECOND HALF

Scotland started in a whirlwind-like manner, Duncan flashing in a fierce shot from thirty yards out. Again Walker, swerving and dribbling, beat the entire defence, but Hibbs threw himself at Gallacher's feet to intercept the centre-forward's pass.

The home players dominated the play and forced [illegible]. From the second, Duncan netted again, heading in Napier's kick. England was unable to strike a cohesive game against the strong tackling of the Scottish defenders. Britton once co-operated in a likely-looking movement with Geldard, but it was broken up by the opposing backs. Westwood and Baker both narrowly missed, and then Brook infused some life into the attack, heading into Jackson's hands.

Shortly afterwards McPhail made a sensational run, beating the defence, but could not outguess Hibbs. England retaliated, and Westwood headed inches wide. Shortly before the end Geldard also sent a shot that went wide of the post.

Scotland—Jackson (Chelsea); Anderson (Hearts), Cummings (Partick Thistle); Massie (Hearts), Simpson, Brown (Rangers); Napier (Celtic), Walker (Hearts), Gallacher (Derby County), McPhail (Rangers), Duncan (Derby County).

England — Hibbs (Birmingham); Male, Hapgood (Arsenal); Britton (Everton), Barker (Derby County), Alsford (Tottenham Hotspurs); Goddard (Everton), Bastin (Arsenal), Currey (Sunderland), Westwood (Bolton Wanderers), Brook (Manchester City).

TOP SOCCER TEAMS DRAW

English First Division Race Unchanged as Arsenal and Sunderland in Ties

London, April 6. — Leading teams in the English Soccer League remained "as you were" to-day as result of drawn games.

Arsenal, playing largely a reserve team, held Chelsea to a 2 to 2 draw at Highbury, while Sunderland, runner-up to the leading Gunners, and West Bromwich Albion each scored one goal at the Hawthorne. Manchester City and Everton also drew 2 to 2 at Maine Road.

The Arsenal team was weakened by the absence of Male, Hapgood and Bastin, playing in the international match at Glasgow. Moss, goalkeeper, and Copping, halfback, were unable to play through injuries

SPURS BEATEN AGAIN

Sheffield Wednesday, cup finalists, walloped the luckless Tottenham Hotspurs 4 to 0 at Sheffield. With the defeat the Spurs' hopes of remaining in the first division football next year went aglimmering, as Leicester City was successful at Leeds 2 to 0. Birmingham and Middlesborough, also in danger of relegation, won their games.

The race in the second division now concerns Brentford and West Ham United. Bolton Wanderers slipped another cog to-day, being beaten 1 to 0 by Plymouth Argyle. Brentford made its position more secure by winning 1 to 0 at Swansea and West Ham United scored the only goal of the match with Bradford City.

In the southern section Charlton Athletic, the leaders, drew 2 to 2 at Bournemouth. Chester's undisputed leadership of the northern section was short-lived. Chester lost 4 to 2 at Barrow and the leadership is again shared with Tranmere Rovers and Doncaster Rovers, both of whom were successful.

Glasgow, April 6.—With interest centred in the international soccer match between England and Scotland at Hampden Park, first division league clubs rested to-day and games were confined to the minor league.

Third Lanark widened the margin over Arbroath to two points by defeating Dumbarton 1 to 0 on the latter's grounds. Arbroath played a scoreless draw at Alloa.

At the other end of the table positions remained unchanged as the Edinburgh City-East Stirling game was postponed and Cowdenbeath won from Montrose 3 to 2.

Walsall 0, Darlington 0.
Wrexham 2, Stockport County 1.

SECOND DIVISION

Alloa 0, Arbroath 0.
Cowdenbeath 3, Montrose 2.
Dumbarton 0, Third Lanark 1.
East Fife 1, Brechin City 2.
East Stirling, Edinburgh City, postponed.
Morton 8, Leith Athletic 1.
Raith Rovers 2, King's Park 0.
Stenhousemuir, Dundee, United (unplayed).

BAER POSSIBILITIES FOR SUMMER ACTION

Cagers Start Hunt For National Title

Teams From Victoria to Halifax Engage in Canadian Senior Men's Play-offs; Raymond-Toilers Series Is on; Windsor Meets St. Catharines

Canadian Press

Toronto, April 6.—With opening salvos already fired, sixteen teams lined up to-day for intersectional strife that leads eventually to the senior men's basketball championship of Canada.

To-night at London, Ont., St. Catharine's Grads and Assumption College, Windsor, tangle in the third and deciding game for the Ontario title. Both teams have already taken a game on their respective home floors.

At Montreal Ottawa Rangers, senior champions of the capital, play Notre Dame De Grace, Quebec winners, in the second of their two-game, total-point series. Ottawa won the first game at home last Saturday, 34 to 32. The winner of this series will meet the Maritime champions in interzone competition.

Dalhousie University Tigers, Halifax, yesterday evening lost by the slim margin of one point to Saint John Trojans in the first of a two-game total-point series for the Maritime title. The New Brunswick champs won 38 to 37.

WESTERN PLAY-OFFS

In the west the hoopsters are even farther advanced. Winnipeg Toilers, former Dominion champions, are again headed titlewards. Bolstered by some newcomers, the team that was knocked out of championship contention by a disastrous plane crash that robbed them of valuable players in 1932, the Toilers are Manitoba champions.

Raymond Union Jacks, champions of Alberta, meet the Toilers in a best of three series April 7, 9, 10. A scarlet fever epidemic has made playing of the series at Raymond impossible, but the games will be held either at Cardston, Lethbridge or Calgary.

The winner of the Alberta-Manitoba series will advance to the Western Canada final against either Victoria Blue Ribbons or Kelowna, now engaged in a series to determine Pacific Coast supremacy.

Winnipeg Wants Leafs-Maroons

Toronto, April 6—Montreal Maroons and Toronto Leafs, who meet in the second game of their Stanley Cup series here to-night, have been invited to play a three-of-five games series in Winnipeg immediately after they have settled the world championship.

Managements of both teams received the proposal to-day from Winnipeg interests and have not yet decided whether they will make the trip.

PICARD STILL LEADS FIELD

Continues to Set Pace in Augusta Invitation Golf With Score of 135

Augusta, Ga., April 6.—Setting a dizzy pace and showing no signs of cracking under the relentless pursuit of two veterans and a couple of unheralded youngsters, Henry G. Picard, Hershey, Pa., was ready to-day for another attack as play in the $5,000 Augusta national invitation tournament entered the third eighteen-hole round. Picard had a total of 135 for thirty-six holes.

While no less than nine professional sharpshooters were toying with par through the first thirty-six-holes, Robert Tyre Jones Jr., the famous shotmaker who flung a challenge at the leaders for a time yesterday only to tire and fall back, lost his big chance to overtake the leaders.

He reeled off a spectacular subpar 33 on the first nine holes of his second round, drawing the cheers of a large gallery that flocked around him.

Word spread that Bob was on his way to a glorious comeback, his greatest effort since he went into retirement except for the annual Augusta affair, and the crowd swarmed after him. But the former king, who had labelled himself "just a nine-hole golfer," lost his stride, began putting erratically and barely fluttered with a par 72.

"BIG BLOCKS" FOR LOCALS

Joe Roberts Heads List of Victorians Securing Major U.B.C. Athletic Awards

Special to The Times

University of B.C., Point Grey, April 6.—A number of young men who first came into the athletic spotlight on the playing fields of Victoria secured "Big Blocks," coveted U.B.C. athletic award, at a gathering in the university auditorium Wednesday afternoon. Chancellor McKechnie bestowed the parchments which entitle the receivers to wear the letters "B.C." in gold on the front of a dark-blue sweater.

Heading the Victoria list was Joe Roberts, popularly known as "Joe-Joe the Tiger." For his season's performances, both in Canadian football and English rugby, Roberts secured two major awards and will in the future wear a "B" on the right arm of his sweater in addition to the frontal adornment.

The only other varsity athlete to receive two big blocks for this year's activities was Art Willoughby, Vancouver, whose combination basketball plays with Skipper Jimmy Bardsley recently caused Blue Ribbon fans much concern. Willoughby was also a star ball carrier for the Canadian football squad.

SENKLER GETS FOURTH

Edmund "Big Ed" Senkler, Victoria, copped his fourth big block as a result of his Canadian football performance this season, when he was on the field for more minutes than anyone else except Ed Kendall, who played one game more than Senkler. Senkler has in former years secured two big blocks for English rugby and one for Canadian football.

John Mortimer, another Victorian, was given a block for Canadian football, and Harry Robson, peppery English rugby halfback, secured a major award for his work.

Ron Upward, whose home is also in Victoria, came through for his second big block in English rugby.

UNIVERSITY BOYS

Three former University School athletes whose parents live in Vancouver figured in the awards. They were Al Mercer and Strat Leggatt, both for English rugby, and Bill Swan for basketball. Jim Mitchell, former St. Aidan's and Brentwood student, got his third big block for English rugby.

During the ceremony, the trophy for the Vancouver City English rugby championship was presented to Tommy Roxborough, captain of the Varsity fifteen.

The ... Sports Mirror

... By L. M. S.

WITH the Blue Ribbons having won the British Columbia senior A men's championship, Victoria basketball followers are now talking Western Canada and Canadian play-offs. Of course, the Ribbons have to eliminate Kelowna in the series which concludes at the High School gym this evening, but the tea and coffee representatives are top-heavy favorites to do just that. Western Canada finals are a little up in the air. The Ribbons (figuring they whip Kelowna) will meet the winner of the Raymond Union Jacks-Winnipeg Toilers play-off, but that series has been blown sky-high by the quarantine order at Raymond owing to a scarlet fever epidemic. There is some talk of bringing the Toilers straight through to the coast for the western final, which would mean that the Union Jacks will have to default. A definite ruling is expected this week-end.

• • • •

As far as the Toilers go, very little is known about this year's edition of the famous club from the Manitoba capital city. We know they defeated Robertson Memorials, last year's Manitoba titleholders, to again become champions of their province. This is the position they occupied two years ago when their club was literally smashed to pieces by a fatal airplane crash while the team was returning from an exhibition series at Tulsa, Okla. Previous to the accident, which took the lives of two players—Mike Shea and Joe Dodds—the Toilers had been unbeatable in Manitoba senior competition in twelve seasons.

• • • •

Following the crack-up the Robertson Memorials took up the torch for Manitoba, and last year opposed Vancouver Province in the western playdowns only to go down to defeat at the hands of the team which went on to lift the Canadian championship. Now the Toilers have hurdled Memorials so they must be just that much better than the club which gave the Province a couple of stiff battles last season.

• • • •

Reports from Alberta state that Union Jacks are in a better position for another crack at the Western Canada title than they have ever been. The club is practically the same that came to Victoria two years ago to go down to defeat at the hands of the Blue Ribbons in the western final. The Jacks are intact this year with the exception of Dean Rolfson, who left last fall to attend Brigham Young University at Provo, Utah. Rolfson's place has been taken by Fred Turner, sensational new star obtained from Lethbridge Young Liberals. Other members of the squad are Sammy Fairbanks, Reed Kirkham, Donny Nilson, Dick O'Brien, Butler Nalder and a chap by the name of West.

Victoria hockey followers have raised quite a bit of criticism over the failure of the Canadian Radio Commission to broadcast the Stanley Cup hockey finals between the Toronto Maple Leafs and Montreal Maroons. Through the courtesy of General Motors the fans will be able to listen in to this evening's game at Toronto, but that is not enough, the local fans claim. They point out that hockey is Canada's national sport and it would be good business for the C.R.C. to put this major sport attraction on the ether waves.

• • • •

The fans claim it would have been a good move especially this year, with two Canadian teams in the final. They argue that the C.R.C. puts on programmes for the benefit of music lovers, why not something for the benefit of the sport followers? Their argument is a good one, and if the commission should take notice possibly there would not be quite so many squawks heard annually when the time arrives for the payment of the $2 license fee.

If Lou Gehrig were a rookie looking for a place on the New York Yankees, instead of being the champion batter of the American League, he would be on his way out. In nine exhibition games played this season, Gehrig collected two weak singles in thirty-three trips to the plate. That gives him a batting average of .61 against pitchers just testing out their arms. Last year he hit .363 against hurlers who were bearing down on every pitch.

• • • •

Gehrig will hit over .300 this season. There is nothing wrong with him. He just has not got the feel of his bat, but still he is lucky that he does not happen to be some ambitious youngster seeking a job on a big league ball club. He would be heading back to some bush league where he started. Babe Ruth is not murdering the ball either. He hit safely seven times in thirty-three times at bat for an average of .212, but he is rounding into condition and should be poling out plenty of singles, doubles, triples and home runs before the baseball curtain rolls up.

LIONS TAKE FIRST CLASH

Northwest Hockey League Champions Whip Detroit Olympics 5 to 1

Vancouver, April 6.—If any of Vancouver's hockey fans who have watched Guy Patrick's Lions perform during the regular Northwest League schedule recently ended, had any doubts about the quality of hockey served up, those doubts should be well hidden to-day.

Yesterday evening the Lions stepped into the first of a best of five games against Detroit Olympics, International Hockey League champions, and handed the visitors a 5 to 1 trimming in a series that has been billed as for the minor hockey league championship.

Against a team composed of young but seasoned players, many of whom saw service with Detroit Red Wings during the N.H.L. campaign, the Lions turned in a performance that earned them the favorite position in the betting to cop the series.

LIONS IN LEAD

Tip O'Neill, second string centre, paved the way for a one-goal first period lead for the Lions when he slipped a pass to Hank Dyck midway through the session and Dyck blazed the disc past one of the smartest net custodians of the eastern circuit—Normie Smith.

Burr Williams, husky defenceman with the Olympics, knotted the count for the visitors late in the second period on a solo effort that carried him the length of the rink, but the tie did not last long. In the next three minutes Lions ripped home two more counters, O'Neill counting the first on a pass from Louis Palm and Bobby Kirk taking a pass from Clint Smith for the second.

Two more tallies in the third frame completed the rout. Bill Hutton, Vancouver rearguard, went into action twenty-three seconds after the period opened, drove in on the Detroit defence and cut loose with a drive that hit the crossbar of the goal and bounced out to fall just inside the goal line. Five minutes before the period ended Kirk carried the puck around the Detroit net and passed out to Dyck, who blazed another high shot under Smith's end for the last goal of the game.

The two squads meet here Monday night in the second game of the series.

Teams follow:

Detroit Olympics—Smith; Foster, Williams; King, Brunoteau, Des Roche. Substitutes: Earl Roche, Tom Anderson, Roulston.

Vancouver Lions—Clark; McFarlane, Hutton; Smith, Kirk, Hextall. Substitutes: O'Neill, Dyck, Palm, Houbrega.

Referee—Amby Moran.

SUMMARY

First period—1, Vancouver, Dyck (O'Neill), 11.32. Penalties: None.

Second period—2, Detroit, Williams, 15.30; 3, Vancouver, O'Neill (Palm), 17.15; 4, Vancouver, Kirk (Smith), 18.46. Penalties: Williams, Roulston, E. Roche.

Third period—5, Vancouver, Hutton, 23; 6, Vancouver, Dyck (Kirk), 15.00. Penalties: Hextall, McFarlane.

MEDICA WINS SWIM CROWN

Dethrones Walter Spence as United States 200-yard Freestyle Champion

New York, April 6. — Jack Medica, twenty-year-old Seattle streak, dethroned Walter Spence, New York, as national A.A.U. 200-yard freestyle champion yesterday evening.

Hailed as the country's foremost freestyle swimmer, Medica was pushed all the way, first by young Johnny Macionis of Yale and then by Jimmy Gihula of the University of Southern California, and was clocked in the remarkably fast time of two minutes 1.8 seconds, fastest 220 ever made in competition.

Medica's time was 1.8 seconds slower than Johnny Weismuller's world record of 2.00 flat but A.A.U. officials hailed it as an even greater performance, since Weismuller's record was hung up from a flying start in a solo time trial.

Gihula, after a slow start, finished in whirlwind style to take second place with Macionis third.

SIR MALCOLM IS WELCOMED HOME

Southampton, Eng., April 6.—Sir Malcolm Campbell, British speed king, returned from the United States today to find a civic reception awaiting him.

At Daytona Beach, Fla., Sir Malcolm drove his racer Bluebird to a new world speed record of 276.816 miles an hour, but failed to attain his goal of 300 miles an hour.

Oklahoma Varsity Gets "Biff" Jones

Norman, Okla., April 6.—The University of Oklahoma yesterday plucked a famous football coach — Capt. Lawrence "Biff" Jones—and "fraternity row" buzzed yesterday evening in gleeful anticipation of halcyon days of victory.

Captain Jones will move at once from Louisiana State, where he tired of the dictatorial tactics of Senator Huey Long last season.

Blue Ribbons Smother Kelowna In First Game

Art Chapman Is Scoring Star In 53 to 20 Victory

Rings Hoop For Nineteen Points as Local Champions Take B.C. Cage Play-off

SECOND GAME IS BILLED TO-NIGHT

Any hopes Kelowna might have had to represent British Columbia in the Canadian basketball play-downs received a rude jolt at the Victoria High School gym yesterday evening when the provincial senior B champions were snowed under a 53 to 20 score by the Victoria Blue Ribbons, recently crowned senior A monarchs, in the first of the two-game total-point series. The exhibition attracted a fair crowd but the fans had to be content with seeing the Ribbon turn in a smart performance.

To-night the clubs will meet in the second encounter with the result a foregone conclusion. The preliminary will get under way at 8 o'clock, with the main attraction to start an hour later.

Kelowna offered no competition whatever for the Victoria club, with the result the game was nothing more than a good workout for them. After piling up a 31 to 9 lead in the first half the Ribbons slackened off somewhat in the early part of the final canto, but went on a scoring rampage in the latter ten minutes to build up a thirty point lead to take into the second battle.

ART CHAPMAN HIGH

Led by Art Chapman the Ribbons worked in great style, and their ball handling was even better than against Varsity. Big Art had a big night, getting nineteen points, eighteen of which were registered in the first half. With the game safely tucked away Manager Barnwell pulled off his high scoring centre in the second period, and gave some of the other players a chance to get into the game. Art was playing in the bucket all evening, and the Kelowna boys found it impossible to block his famous one-handed push shots. Time after time Chapman took the ball in front of the visitors' basket, and then leaping into the air twisted himself around to lift the ball into the can. When his checks did stop him it usually meant a foul shot. Chapman got eight field baskets and three foul shots out of five attempts.

Dashing Doug Feden was second high scorer for the Ribbons with eleven points, closely followed by his guard team mate, Chuck Chapman, with ten. Porky Andrews was good for nine points.

Kelowna had no alibis, as they were simply outclassed on the evening's play. Outstanding for the interior club was sharpshooting Tommy Forbes, former member of the Blue Ribbons. Tommy teamed up with "Pi" Campbell at guard and turned in a good game. He worked hard, and was on the floor for the entire forty minutes. In addition Forbes was leading scorer for the visitors with seven points, six of which resulted from beautiful long shots.

The interior club was handicapped through having to lose practically every centre jump. Art Chapman and Red Martin, who played the position in the final part of the game, gave the Ribbons possession on nine out of ten centre tip-offs. It was such a cinch that the Kelowna centre quit jumping at the finish.

Kelowna had fourteen fouls called on them and the Ribbons eight. The visitors lost Ryan and C. Fettman on personals, while Peden of the Ribbons was chased to the showers. Out of nineteen free shots the Ribbons scored nine.

FIRST HALF

For the first three minutes of the game both teams played ragged basketball. The Ribbons, although in possession of the ball the majority of the time, seemed unable to settle down. After three and a half minutes Chuck Chapman intercepted a pass and dropped in the first basket. Art Chapman went into the bucket and his shot was good for another two points. Forbes got clear out on the side and lifted the ball clean through. The Ribbons called time out to talk things over.

From this point on baskets began to come fast for the Victoria team, and they built up a 20 to 2 margin. Kelowna added a point off a free throw by Forbes. McKay got in to convert a rebound and the score was 22 to 5. The Ribbons stepped on the gas again and before half time had scored nine points, while Kelowna got four through McKay and Forbes.

SECOND HALF

With opening of the second half the Ribbons started to take matters easy with the result the visitors got within twenty points, 38 to 18. Then the local champions put on the pressure once more, and Peden, Andrews, McKeachie and Chuck Chapman added to their totals. The Ribbons finally boosted their score over the fifty mark, and the final gong sounded soon after.

In the preliminary the Beavers defeated Posters Furs in the final of the Sunday School Basketball League consolation series.

BOX SCORE

Victoria—	Field Goals	Foul Shots Attempted	Foul Shots Made	Fouls	Total Points
C. Chapman	4	3	2	1	10
Ross	1	0	0	0	2
Peden	5	4	1	4	11
McKeachie	1	0	0	0	2
A. Chapman	8	5	3	0	19
Martin	0	4	0	1	0
Andrews	3	3	3	1	9
Craig	0	0	0	0	0
Wallis	0	0	0	1	0
Totals	22	19	9	8	53

NORTH WARD, CENTRAL WIN

Take Curtis Cup Fixtures; Latter Beat Oaklands 3 to 0

Boys' Central and North Ward won their Curtis Cup rugby fixtures yesterday, the former downing Oaklands 3 to 0 at the Athletic Park, while the latter took the measure of South Park at Central Park.

Central, holders of the trophy, gained their victory by virtue of an unconverted try five minutes after the start of the match when Stan Bull went over near the flag. His kick for extra points failed.

Central boys pressed most of the way but Oaklands showed particular strength on the defence.

Dan Doswell refereed the feature and the teams lined up as follows:

Boys' Central—F. Winslow, A Corner, R. Acres, B. Corlett, R. Campbell, S. Bull, L. Fuller, D. McKay, G. Todd, J. Munro, L. Mann, R. Taylor, V. Kelley, J. Uren and H. Macdonald.

Oaklands—Braithwaite, Knowles, Bruce, Bentley, McMillan, Warburton, Thomas, McCorkall, Gallop, Porter, Pugh, Bosence, Ready, Glover and Piggott.

Cameraman Catches Goal—Almost In Eye

As Eric Pedley smashed a polo ball for a goal during a game between the Hillcrest Country Club and Santa Barbara teams at Alhambra, Calif., a daring sports photographer nearly caught the flying sphere, shown to the left of his head, full in the face.

ENGLAND IS AFTER FIGHT

Heavyweight Champion Max Baer Gets Two Tempting Offers to Cross Ocean

New York, April 6.—Merry England, her fight fans' pockets jingling with gold, to-day appeared to have a clear inside track on the next important heavyweight championship boxing match.

Two bids of a quarter of a million dollars were tossed at Max Baer and his canny manager, Ancil Hoffman, when they arrived in town yesterday preparatory to leaving on an exhibition tour that will take them later this month to Toronto, Montreal, Quebec and other eastern Canada cities.

Two powerful British syndicates are angling for a Baer-Max Schmeling bout to be staged in London during the King's Silver Jubilee celebration this summer. Armand Vincent, Montreal, represents one, and Walter Rothenberg, German promoter, the other. The former offered $275,000 or the privilege of 40 per cent of the receipts; Rothenberg's was a flat $250,000 guarantee.

GARDEN ON SPOT

Jimmy Johnston, Madison Square Garden matchmaker, has Baer under contract for one fight. The Garden, however, has no one in sight to meet Baer except Jimmy Braddock, the New York State Athletic Commission's No. 1 challenger.

Johnston must name Baer's opponent on or before April 15.

Schmeling has flatly refused to fight in New York, which leaves the Garden perilously close to having no alternative but staging a Baer-Braddock joust. Hoffman told the assembled scribes Baer was willing to fight Braddock within six weeks and then go to London to meet Schmeling provided "the money was put on the line."

As a matter of fact, Baer, frankly admitting he needs money, would be perfectly willing to fight three times this year. The only proviso, however, is a big one.

Wrestling On This Evening

This evening's wrestling card to be presented at the Tillicum gym, Broad Street, will feature heavyweights, in the semi-windup over five eight-minute rounds, Ted Christie, California, will engage Herman Oakes, Philadelphia. The main event scheduled to go eight ten-minute rounds will bring together Count Zarynoff and Mike Strelich. The first bout will start at 8.30 o'clock.

CENTRE JUMP WILL REMAIN

U.S. Basketball Coaches Turn Down Proposal to Cut Down Tip-off Play

Chicago, April 6.—College basketball was kept safe and open for the towering centres yesterday, although action was started to apply the brakes to their scoring rampages under the basket from the pivot post position.

By the surprisingly narrow margin of five votes, 32 to 27, delegates to the National Association of Basketball Coaches' convention voted down the California proposal to eliminate the centre jump except at the start of the games, the second half and at the beginning of overtime.

A few minutes later, the delegates capped a stormy debate by voting to recommend to the national rules committee that a rule be enacted whereby no offensive player, with or without the ball, may remain for more than three successive seconds within the free throw area of his opponent, except to pursue a loose ball. The recommendation, aimed strictly at the big men who hold the pivot post positions, was expected to be made a hardwood law by the rules committee, which meets in New York Sunday and Monday.

Except for a recommendation that technical fouls be called against players who step across the jump circle (an imaginary circle) on a jump ball, no changes were suggested. At present, only the jumper who steps out of the circle is guilty of a technical foul; the player who steps across the centre line to impede his jumping opponent is guilty of a violation, thus surrendering the ball to his opponent out of bounds.

RACE CLASSIC IS WIDE OPEN

Filly, Gelding and Two Colts Rate High in Kentucky Derby Candidates

New York, April 6.—Only one filly ever won the Kentucky Derby, and the victories of geldings have been few, but this year one of each figures prominently with a speedy pair of colts in the pre-race calculations.

The filly is Nellie Flag, from Warren Wright's Calumet Farm; the gelding, Mrs. Walter M. Jeffords' Commonwealth, the two colts, Flat Bye and Sailor Beware, from Mrs. Payne Whitney's Greentree Stable.

Nellie Flag left no doubt as to her class in winning the Matron Stakes at Belmont Park, the Selima at Laurel and the Kentucky Jockey Club stakes at Latonia—the latter two at one mile. She earned $85,790 during the year, and was second only to Chance Sun, the future-book favorite, in that respect.

FASTEST TIME

"She's done everything we ever asked of her," said Trainer B. B. Williams. "She won the Kentucky Jockey Club Stakes in 1.37 2-5, the fastest time ever recorded by a filly in that event."

Commonwealth did not reach his best form until most of the other top-notch two-year-olds had gone into retirement. He showed fine stamina in taking the mile and seventy yards of the Endurance Handicap late in November at Bowie. Altogether, he won five of his nine starts and was unplaced only once in earning $5,705.

In Flat Bye and Sailor Beware He the Derby hopes of Mrs. Whitney, whose Twenty Grand won in 1931. Both were campaigned heavily as juveniles.

Flat Bye started eleven times, won four races and went unplaced only twice in earning $27,090. Sailor Beware faced the barrier twenty-one times and, after showing a tendency to stop in his early races, came on to beat out Omaha in the one-mile junior champion stakes at Aqueduct. He was first in four other races and third three times to win $10,650.

FISH AND GAME BODY TO MEET

The Victoria and District Fish and Game Association will hold a meeting Thursday evening, 7.30 o'clock, in the Chamber of Commerce. Members are asked to attend and bring up any suggestions they may have for the betterment of hunting and fishing on the island. The public is invited to attend as the executive committee has arranged for a two and one-half hour showing of some very fine moving pictures covering the following subjects: Hunting with a camera, salmon fishing in New Brunswick, bird life across Canada, fishing on the Nipigon and several others covering the National Parks of Canada. For further information, telephone E 2112.

Loughran-Louis Fight Is Talked

Veteran Heavyweight Might Test Ability of Latest Sensation From Detroit; Louis Confident He Could Score Knockout Or Win on Points

By JOHN J. ROMANO

Tommy Loughran, former light-heavyweight champion of the world, is suggested as an opponent of Joe Louis. Loughran is now in South America doing his nimble best to avoid the well-meant, but badly directed knockout wallops aimed at him by second-raters, who could not have hit him with a handful of buckshot when he was in his prime. The Arturo Godoys and Jose Santolas would have been the puppets dangling from strings, manipulated by a master, in the days when Tommy was holding off men like Gene Tunney, Harry Greb, Georges Carpentier, and others.

Loughran must be in desperate financial straits to even consider a match with the hard-thumping Louis. Tommy is going back while Joe is forging ahead with a rapidity no other young heavyweight has made in years. They are already comparing Louis with Sam Langford, whom many think the greatest negro walloper of all time. If the Philadelphian needs money so badly he can worry along with any amount of second-raters, who do not figure to hurt him, and who, themselves, are extremely anxious to pick up a few stray dollars. Tom is not a puncher. He could not hurt them. The best he could do is to give them a lesson in the fine points of the manly art. It might cure them of becoming fighters.

LOUIS CAME ALONG FAST

Louis is beginning to champ on the bit. His quick knockout over Lee Ramage and a three-round kayo over Donald "Reds" Barry, who scored a point decision over Ray Impelletiere, has apparently convinced him that he is not the expressed "one year away from a fight with champion Max Baer." Now Joe says he thinks he can stop Baer or whip him on points. That's strong talk from a man less than a year out of the amateurs. But what are you going to do about him?

Joe's record certainly justifies consideration. He is consistent at least. Knockouts over Charley Massera and Lee Ramage mean something when building up a claim for recognition. Ramage won and lost against Steve Hamas. Massera held the former Penn States to a draw. And Louis knocked both of them out cleanly, Ramage twice. On the basis of this reckoning, Louis has as much right in the ring with Baer as Schmeling has. Only the fact that Schmeling once held the title makes him the more distinguished of the pair.

END OF BRILLIANT CAREER

A comparison of Loughran and Louis at the present time is not flattering to the Philadelphian. Tommy has seen his best days. They were those in which he battled his way through the best middles and light-heavies the present generation has seen. It was his misfortune that he did not capture the light-heavyweight crown by defeating a titleholder. Jack Delaney, who was the champion when Tommy challenged, would not meet him, preferring to renounce the title to compete among the heavyweights. Loughran had to beat Mike McTigue and Jimmy Slattery before he was accepted as the leader of the 175-pound division.

Tommy followed the same tactics of Delaney and entered the heavyweight ranks. His attempt to lift the title resulted in a crushing defeat at the hands of Jack Sharkey. Tommy tried manfully to achieve his ambition and made a grand showing against Primo Carnera for ten rounds. Then he tired as Carnera draped his ponderous bulk all over him and wore down his title-inspired ambition. It is now an accepted fact that Carnera does not punch within many pounds of his weight and strength, and it is not to be wondered how the lighter Philadelphian managed to last the route.

Joe Louis is another matter. If there is a better puncher and finisher than the negro around he is hiding his ability for some unknown and foolish reason. Those we have seen, and that goes for Max Baer, who has yet to show Ez is a "finisher," are just maulers compared with the solid-hitting Detroiter. Those who take exception to the statement that Baer is not a "finisher," would do well to go back to the two most important fights Baer has had. Max did not stop Schmeling or Carnera suddenly. Both fights were stopped. Primo was down eleven times but got up fighting without a count. A "finisher" does not permit a helpless opponent to do that—it's a case of being kayoed.

Loughran, a super boxer, was taught by a slugger of the old school, Willie Fitzgerald, Brooklyn, who revelled in slugging, as his Irish name implies. Tommy absorbed the teachings of his mentor and then proceeded to do otherwise. Louis, on the other hand, was drilled by Jack Blackburne, a great lightweight of his day, who thought nothing of spotting a rival as much as twenty-five pounds and giving him an instructive lesson in boxing in the bargain. His pupil is just the opposite. He shuffles in swiftly, and resembles Jack Johnson defensively. One opening is all he requires and the fight is over.

A Loughran-Louis match would not help the game. It will provoke considerable adverse comment and seriously question the value of boxing as a competitive sport between men of equal ability.

KIWANIS CUP FINALS HELD

A.O.F. Marionettes and Lake Hill Wildcats Win Carpet Trophies

A.O.F. Marionettes, skipped by Mrs. Kirchin, yesterday evening sent Esquimalt Redbirds, skipped by Mrs. Acreman, down to a 26 to 17 defeat in the Kiwanis Cup rinks final in the carpet bowling tournament at the Foresters Hall.

L. Cockerill led the Lake Hill Wildcats to a 26 to 12 victory over Willows Rangers, skipped by J. Leiper, in the men's final for the Kiwanis Cup.

A feature of this evening's play will be the singles match between L. Cockerill and C. Lambie, scheduled to start at 7.30 o'clock.

Lake Hill Wildcats will play Willows Cardinals in the Byng Shield final on Monday evening in a game scheduled to start at 8 o'clock.

Oakland Hoopers Win School Title

Defeating North Ward 27 to 16 yesterday afternoon at the George Jay School grounds in a sudden death play-off fixture, Oaklands cagers won the northern section championship of the Victoria and District Schools' Athletic Association Basketball League. The winners led 13 to 7 at half-time and ran in fourteen points to nine by their opponents in the second half.

T. Macedo refereed.

The teams follow:

Oaklands—J. Joyce, F. Billsborough, W. Bowles, T. Smith and D. Turner.

North Ward—C. Couch, B. Wallace, H. Lowe, E. Sage and A. Lee.

MILLERS WIN FINAL BATTLE

Touring Canadian Hockeyists Defeat Japanese Olympic Squad 16 to 2

Tokio, April 6.—North Battleford Millers concluded their hockey tour of Japan to-day with a 16 to 2 victory over the Japanese representative team selected for the 1936 Olympics.

In the seven games of the tour, two of which were played against the Olympic squad and the others against the best teams in Japan, the Canadians rolled up a total of 135 goals while four were scored against them.

Millers will be tendered a farewell banquet by the Japan Skating Association Monday night and will sail for Canada from Yokohama on Tuesday.

Title Carpet Meet Carded at Duncan

The Vancouver Island carpet bowling championship for rinks will be held at Duncan on Easter Monday. This contest for the C. F. Davie Trophy is open to rinks from any club or city on the island, and entries should be forwarded to W. H. Batstone, care of the Canadian Legion, Duncan, not later than April 15. The draw will be announced the next day. Junior players under twenty-one years of age are not eligible for this competition.

OUR MAIL BAG

BASKETBALL BROADCAST

To the Sports Editor:—As a subscriber of The Times and also an ardent radio and basketball fan, I would like to voice my opinion of yesterday evening's broadcast of the game between the Blue Ribbons and Kelowna. Having been unable to get tickets like many other Victorians, to see this game, I did as many hundreds did, sat at home to listen in. What a reception we heard. It was disgraceful. Not the fault of the two men assigned to give the play-by-play of the game, but the hookup and poor control of the station, CFCT.

Really, sir, from a few minutes after the start of the game it was one after another interruption of the broadcast, due apparently to poor transfer of controls from the local studio to the High School. Half the time we would hear part of the game and half the time a recording from the studio. Other times it was off the air entirely. Why can't proper arrangements be made before a game starts?

This complaint, I am sure, is registered not only by myself but many very ardent fans. It would be far better to keep it off the air altogether after such poor broadcasts of the recent games. Many out-of-town listeners are interested in the British Columbia finals and what an opinion they must form of the station in Victoria.

Surely proper care and time will be taken in case our dear sponsor attempts again to try and please the many basketball fans over the air of the basketball games, who can't get admission to the hall where these games are played. Let someone who knows radio look after future broadcasts and we will have no complaints. We subscribe over $20,000 a year to the government so why not some service?

JOHN C. WYLIE

659 Burnside Road, Victoria, April 6.

Toronto Counts On George Hainsworth

Leafs Look to Their Famous Goalie to Shutout Montreal Maroons in Second Game of Stanley Cup Hockey Final; N.H.L. Champs Are on the Spot

By ELMER DULMAGE,
Canadian Press Staff Writer

Toronto, April 6.—At the rate the heavy artillery of the Toronto Maple Leafs is failing to function in these crucial times, round-faced George Hainsworth, the world's most nonchalant goaltender, may be forced to the extreme measure of handing Montreal Maroons a shutout to-night if Toronto's Stanley Cup hopes are to be revived.

It is at a time like this—one game down, four to go—that the National Hockey League champions look to the thirty-seven-year-old netman for help. His most recent response was a string of 2 to 0, 3 to 0, 2 to 1 performances against Boston Bruins. He permitted the Bruins two goals in the four N.H.L. final games.

And as he built his record the Leafs picked up the idea and started going. They will be required to get going to-night in the second game of the Stanley Cup series or the Maroons will be so close to the title it won't make much difference.

IS A HOBBY

Hainsworth, a miniature edition of Ontario's Premier Mitchell Hepburn in appearance, can lay down a shutout barricade with greater facility than any goaltender in National League history. It's a hobby with him. He figures that since he started to play competitively about twenty-one years ago he has scored 170 shutouts. Just the other day Bill Cook named George the greatest goaltender he had ever played with or against in thirteen years of hockey.

If anything, Hainsworth has become a better showman in late years. He has never taken too long to clear the puck while oncoming forwards sweep up to him—always too late. He has reached a point where he seems almost to close his eyes while catching high shots in a gloved left hand.

The Maroons earned all three goals against the Leafs Thursday night, getting more in a little more than sixty-five minutes than Boston scored in four games.

DEFENCE MUST RALLY

But they haven't got George down yet. The outer guards, made up of Red Horner and King Clancy, Hap Day and Bill Hollett, may be higher to-night. They will have to be if the contest develops into a duel of attacking lines instead of a mid-ice checking battle.

The last defence—Hainsworth and Connell—may decide the issue to-night.

Probable line-ups follow:

Montreal—Connell, goal; Wentworth and Evans, defences; Blinco, centre; Robinson, right wing, and Trottier, left wing; subs., L. Comacher, Shields, Northcutt, Smith, Ward, Marker, Gracie, Cain and Miller.

Toronto—Hainsworth, goal; Clancy and Horner, defences; Thoms, centre; Finnigan, right wing, and Kilrea, left wing; subs., Hollett, Day, C. Comacher, Primeau, Jackson, Kelly, Metz, Cotton and Boll.

Officials—A. O. Smith and Rusbe Daigneault.

Canadiens Beaten By Amateur Squad

Montreal, April 6.—Amateur upset professionals here yesterday evening, but an all-star squad from the Montreal senior group had the assistance of Wilf Cude in goal, as they won, 6 to 5, from Canadiens of the National Hockey League in a charity game.

McGill, Crutchfield, Joliat, Kelly, W. Mantha scored for Canadiens. All Star marksmen were Brown (3), Farmer, Ethier (2) and Jotkus.

Racing Results

San Mateo, Calif., April 6.—Results of horse racing here yesterday follow:

First race—$500; three-year-olds and up; 5½ furlongs:
Tenaya (E. Dudley) $22.00 11.00 6.40

Time, 1.43. Hays, Sweet Man and Aiching also ran.

Seventh race—$500; claiming; three-year-olds and up; 1 mile:
Kiss Wagon (Longden) $22.40 $8.60 $3.60
Gabbo (Gray) 4.20 3.40
Steel Signal (O. Burns) 3.40
Time, 1.43 2-5. Esperanto, Boyd McCue, Gertrude L., Star Brook and Eighth Pole also ran.

Maccabees to Meet Esquimalt Sunday

Maccabees football team will meet the Esquimalt junior eleven in an exhibition match to-morrow afternoon at 3.30 o'clock at Bullen Park. Bert Sage will handle the whistle, and the following players are asked to turn out for the Maccabees: Harris, Bastwood, A. McBride, Fieldhouse, Hill, M. McBride, Speller, J. Murray, Howell, Garnet, Wilmshurst and McLellan.

Who's Who in Lawn Bowling

G. A. MARCONINI

Victoria Lawn Bowling Club

G. A. Marconini started his winning ways by taking the novice crown in 1929 and sharing the doubles event with T. McCosh in the British Columbia championships the same year.

He is lefthanded and uses competition bowls of medium bias. He delivers his bowl close to the ground and exemplifies very effectively the follow through, so strongly advocated in many other sports. Mr. Marconini has a weakness for Vancouver and the provincial championships held permanently there.

In the Greater Victoria League last year the team of Marconini, T. Renfrew, A. T. Harris and M. Massey was a big factor in bringing back the Cameron Nicol Cup to the Beacon Hill Club after it had reposed two years with Burnside. In his odd moments Alf Marconini climbs trees in pruning time and specializes in cougars when hunting, a happy combination. His record includes champion of champions of British Columbia in 1933; singles champion of his club for three successive years, 1930, 1931 and 1932, and Vancouver Island singles champion in 1932 and again in 1934. He hopes to repeat in 1935 and make it three in a row.

Road Races To Open Local Track Season

Three Events Scheduled For Good Friday Under Bri- Routes Are Outlined

Distance runners, from juveniles to seniors, will open Victoria's 1935 track season here about two weeks' hence, when they swing away over the gruelling courses in the Britannia Branch, Canadian Legion, B.E.S.L., Good Friday road races.

Leading athletes in the distance classes are expected to turn out in force for the grinds. The seniors will race over a route of approximately nine miles, the juniors, over fourteen and under eighteen years, will cover a five-mile course, and the juveniles, under fourteen, will run two.

A strong contingent is expected to enter from the navy, where track has been claiming considerable attention during recent seasons.

The Canadian Scottish may also have some men in the different classes, while the Y.M.C.A. will in all probability be represented largely in each group.

All competitors in the senior event must hold 1935 amateur cards which they may secure from their clubs or from C. V. McConnell, Victoria Sporting Goods Store.

COURSES

The courses for the different races follow:

SENIORS
Approximately Nine Miles

Start—Leave headquarters on View Street, proceed along Douglas Street to Rogers Avenue, turning on that corner into Quadra Street, along Quadra Street to View Street, to starting point.

JUNIORS
Approximately Five Miles

Start — Leaving headquarters on View Street, proceed along Douglas Street to Cloverdale Avenue, along Cloverdale Avenue to Quadra Street along Quadra Street to View Street, to starting point.

JUVENILES
Approximately Two Miles

Start—Leave headquarters on View Street, proceed along Douglas Street to Beacon Street, thence turn rounding markers, returning along Douglas Street, to starting point.

Entry forms for the race may be obtained from the secretary's office, 715 View Street, and must be filed before Monday, April 15.

CLASSIFIED ADVERTISING RATES
1½c per word per insertion.
Minimum charge 15c.
$1.20 per line per month.
Minimum charge $2.50.

Births, $1.00 per insertion.
Marriages, $1.00 per insertion.
Deaths, $1.00 first insertion, and $1.00 succeeding insertions.
Funeral notices, In Memoriam notices and Card of Thanks, $1.00 per insertion.

In computing the number of words in an advertisement, estimate groups of three or less figures as one word. Dollar marks and all abbreviations count as one word.

In estimating the number of lines to an advertisement count five words for the first two lines and seven words for each line thereafter. This is not an absolute guide to the number of lines, much depending on the length of the individual words.

The Times will not be responsible for more than one incorrect insertion of any advertisement ordered for more than one issue. Any claim for rebate on account of errors or omissions must be made within thirty days from the date of the same, otherwise the claim will not be allowed.

Advertisers who desire it may have replies addressed to a box at The Times Office and forwarded to their private address. A charge of 10c is made for this service.

Subscribers wishing their addresses changed should notify this office as well as the carrier. If your Times is missing, phone E4175 before 6 p.m. and a copy will be sent by special messenger.

Announcements

BORN

FOURNIER—To Mr. and Mrs. J. B. Fournier, 2017 Ontario Street, a daughter, on March 30, at St. Joseph's Hospital.

DIED

CREED—In this city, on Friday, April 5, Sarah Ann Creed, aged ninety-five years. The late Mrs. Creed was born in England and had been a resident of this city for the last fifty-one years. She is mourned by three daughters, Mrs. John Creed, 1421 Pemberton Road; Mrs. W. Emery, 1867 Gladstone Avenue, and Mrs. F. Coulter of 475 Hampshire Road, and one son, George Wage of Vancouver, B.C.; also twenty-one grandchildren, twenty-one great-grandchildren and two great-great-grandchildren.
The funeral will take place on Monday afternoon from McCall Bros. Funeral Home, at 2.30 o'clock. Rev. James Wood officiating. Interment will be in the family plot at Ross Bay Cemetery.

LEIBER—On Friday morning, April 5, at St. Joseph's Hospital, Max Leiber, aged seventy-three years; born in Kerpen, Germany, and a resident of this city for the last forty-four years; late residence, 1616 Oak Bay Avenue. He is survived by his widow, at home, and one brother in Brussels, Belgium.
The funeral will take place on Monday, April 8, at 2 o'clock, in the chapel of the Sands Mortuary Ltd. Rabbi M. Burzer will conduct the service under the traditional Jewish ritual, and the remains will be laid to rest in the Jewish Cemetery. (Funeral private, and no flowers, by request.)

CARD OF THANKS

Mrs. M. Christenson and relatives wish to express their heartfelt gratitude to Drs. Hall and Hall, the sisters and nurses of St. Joseph's Hospital, also to those many kind friends who sent such beautiful floral tributes and cards of sympathy.

IN MEMORIAM

LEBB—In ever-loving memory of my dear husband, Job, who passed away April 6, 1934.

A FALSE FOUNDATION HAS NO VALUE for any permanent structure. This applies to all things in life, from a mansion to the skin on your face. You may powder and paint and from the little cigarette portable, hoping to quiet those nerves within. But insistent cries out, with a head thump and a shout: "Care for me properly before it's too late." Proper eating, drinking and thinking will save your life. Our coarse whole wheat bread (free from molasses, sugar or white flour) is nature's food that builds and satisfies. Our foods are good. Golden Loaf Bakery, 711 Fort St.

A TEMPTING SUNDAY MEAL, DELIciously cooked, by a lady chef. Luncheon, 40c and 50c; dinner, 50c and 60c. Mayfair Cafe, 1011 Broad St.

DATED this 23rd day of March, A.D. 1935.

MOUNT VIEW HOLDINGS LIMITED,
Applicant.

METROPOLITAN LENTEN SERIES

Seasonal Addresses By Rev. E. F. Church Will Continue

Rev. E. F. Church will conduct both services at Metropolitan United Church to-morrow, when he will continue the special series of Lenten sermons. At the evening service he will preach upon the subject, "The Men Who Killed Jesus-Annas, the High Priest." The choir, under the direction of Frank Tupman, will present the anthem, "Evening Hymn," by Gardiner, and Frank Tupman will sing, by request, the solo, "Betrayed and Forsaken," by Maunder.

At the morning service Mr. Church will take as his theme another chapter from the series he is preaching this month, "Seven Steps to the Throne," entitled "He Eats the Passover With His Disciples." The choir will sing the anthem, "Christian, the Morn Breaks" (Shelley). Miss Loise Noble will sing for a solo, "Supplication," by Rowley.

The junior congregation will meet in the junior room at 11 o'clock, under the direction of Rev. J. H. A. Warr, who will tell the story of "Knight Trustworthy."

PLANNING "SETH PARKER" NIGHT

Wilkinson Road Sunday school meets at 10 o'clock, along with the adult men's and women's Bible classes. Public worship follows at 11.15 o'clock, when Rev. W. Allan will preach. The music will include the anthem, "The Lord is My Light" (Kieserling), which will be rendered by the choir. The Wilkinson Male Quartette will also assist in the service.

Garden City Sunday school and adult Bible class meets at 2.15 o'clock and evening service at 7.30 o'clock. This service will be preceded by a half-hour of congregational hymn-singing led by the choir leader, J. Jones.

The choir will render the anthem, "I Will Lay Me Down in Peace" (Gaddy).

Under the auspices of the Women's Auxiliary of Wilkinson Road Church, a "Seth Parker" night is to be given on Wednesday, commencing at 8 o'clock. In addition to the series of popular songs and Seth Parker narratives, readings and musical selections will be rendered by visiting artistes from Victoria.

CLUB RECITAL IS ATTRACTIVE

The visiting choir at the Victoria City Temple twilight recital to-morrow afternoon from 3 until 4 o'clock will be the Beaver Club Choir, composed of members of the staff of the Hudson's Bay Company. This choir won first place among the commercial choirs at the Victoria Musical Festival a year ago.

C. C. Warren, L.R.S.M., A.T.C.M., will conduct and Miss Grace Allen, L.R.S.M., will be the accompanist.

The complete programme follows: Chorus, "The Comrades' Song of Hope" (Adam); solo, "Thanks Be to God" (Dickson), J. Oakman; chorus, "The Lost Chord" (Sullivan); quartette, "Lo, Now a Rose" (Pretorius), Miss E. Telford, Miss H. Butterfield, J. Oakman and J. W. Penn; chorus, (a) "Lullaby" (Brahms) (b) "Deep River" (Burleigh); solo, "O Divine Redeemer" (Gounod), Miss Isabelle Crawford; chorus, "Weep No More" (Adapted by Henry Tolhurst from Rachmaninoff's Prelude in C Sharp Minor); offertory, piano selection by Miss Grace Allen; chorus, "Awake! Awake!" (Charles Wood); duet, "Watchman, What of the Night?" (Sarjeant), J. Oakman and Percy Mickleburgh; chorus, "Morning" (Oley Speaks); solo, "The Blind Ploughman" (Clarke), Maldwyn Humphries; chorus, "And the Glory of the Lord" (Handel).

DR. IMRIE AT EMMANUEL

At the Emmanuel Baptist Church, Fernwood and Gladstone, the pre-Easter services will be continued to-morrow by Rev. Dr. A. S. Imrie. The theme in the morning will be "Beholding the Depth of the Love of God." Miss Gladys Moreland will sing; in the evening the subject will be: Serving God with What We Have."

tion of W. H. Murray. Morning anthem, "Hide Me Under the Shadow of Thy Wings" (West). Evening anthem, "Sweet the Moments Rich in Blessing" (Godfrey). Miss May Zala sings the solo. Soloist for the evening, Mrs. Dr. W. H. Gunn, "With Verdure Clad" (Haydn).

BRITISH-ISRAEL

The following meetings are scheduled to take place in Victoria and district next week. All will start at 8 o'clock unless otherwise stated:

Monday—Middleton Guild, Campbell Building, Victoria; Sooke Branch, Sooke.

Tuesday—Victoria and District Association, Foresters' Hall, Victoria; speaker, Don MacKinnon.

Wednesday—Royal Oak Branch, Royal Oak; speaker, Mrs. Towler, St. Augustine's Mission Hall, Deep Cove; speaker, Mrs. S. H. Brake.

Thursday — Minnie Eason Bible Study Class, 1019 Southgate Street, Victoria, 2.45. Home of Miss Hewett, Prospect Lake; speaker, Mrs. S. H. Brake.

Radio broadcast over Station CJOR, Vancouver each Tuesday evening at 6.30.

The monthly meeting of the Area Council will be held at headquarters, 645 Pandora Avenue, Victoria, on Friday, April 12, at 8 p.m.

ALBERTA M.P.P. INJURED

Edmonton, April 6 (Canadian Press)—Captain H. H. Dakin, Liberal member of the Alberta Legislature for Beaver River, was seriously hurt here to-night when he walked into the side of an automobile at an intersection. He was taken to a hospital with serious chest contusions, a probable fracture of the ankle, and severe hand injuries. His condition was described by doctors as being "serious but not critical."

OUT OUR WAY —By WILLIAMS

WILL RECEIVE NEW MEMBERS

At the First Baptist Church to-morrow, Rev. G. A. Reynolds will be the preacher at both morning and evening services. The morning subject will be "Forward in the Name of God." The choir will render Goss's "Christ, Our Passover, is Sacrificed for Us." The Lord's Supper will follow this service, with reception of new members.

In the evening, following the usual song service, Mr. Reynolds will speak on "Things are not what they seem." The choir will sing "Jesu, Word of God Incarnate" (Elgar).

Wednesday at 8 o'clock, the mid-week prayer service will be held. Prayers are requested for a Canadian-wide revival.

WILL REFER TO PLANE SEANCE

The service at James Bay United Church to-morrow evening will be of a special nature and largely musical. Mrs. S. Hawes will be the soloist, singing Handel's "He Was Despised," and Chris Wade will lead the choir in "The Marvellous Creation," from Haydn's "Creation." Miss Edna Dilworth will be the soloist. Chris Wade, Justin Gilbert and Gilbert Margison will play instrumental numbers as the congregation assembles. Rev. W. B. Brown will conduct the service and give the address on "Is There Life After Death?" with an observation about the recent airplane seance.

Sunday school and Bible class meet at 11 o'clock Sunday morning, with F. W. Davey, Rev. Charles Bishop and Frank Schroeder in charge. The young people meet Monday night and the C.O.I.T. Girls Friday night, with Evelyn Fleming and Miss Morris, respectively, in charge.

REV. W. MUSSEN AT FOURSQUARE

Rev. Walter Mussen, pastor of the Hastings Foursquare Church in Vancouver, will speak twice to-morrow at the Bethany Church of the Foursquare Gospel, 1415 Blanshard Street. Mr. Mussen has been speaking every night this week except Saturday and will conclude his mission in the city with two Sunday Services.

Rev. Guy P. Duffield, pastor of the local Foursquare Church will be away from the city for a few weeks conducting a revival campaign in the city of Penticton. During his absence his pulpit will be occupied by Miss Verna M. Strong, who recently conducted a successful series of meetings in Victoria. Miss Strong will lead the meetings to-morrow and will speak Wednesday and Friday evenings at 8 o'clock, and at each of the regular meetings for the next few weeks.

"UNREALITY" IS LESSON TOPIC

"Unreality" will be the subject of the lesson-sermon in all Churches of Christ, Scientist, to-morrow.

The golden text is: "Judge not according to the appearance, but judge righteous judgment" (John vii 24).

Among the citations which comprise the lesson-sermon is the following from the Bible: "They that trust in the Lord shall be as Mount Zion, which cannot be removed, but abideth for ever." (Psalms cxxv 1).

The lesson-sermon also includes the following passage from the Christian Science textbook: "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "When we come to have more faith in the truth of being than we have in error, more faith in Spirit than in matter, more faith in living than in dying, more faith in God than in man, then no material suppositions can prevent us from healing the sick and destroying error."

SACRAMENT AT KNOX CHURCH

In Knox Presbyterian Church, Stanley Avenue, to-morrow, Rev. J. S. Patterson will preach at both services. At 11 o'clock the Sacrament of the Lord's Supper will be dispensed and the sermon subject will be "I Know that My Redeemer Liveth." The choir will sing "Behold the Lamb of God" (Grell).

At 7.30 o'clock Mr. Patterson has been asked to repeat the sermon on "The Holy City." The choir will render "Turn Thy Face From My Sins" (Sullivan) and Miss G. Beall, soprano, will sing "Beyond the Dawn" (Sanderson). The song service will commence at 7.15 o'clock, led by the young people.

"A Wonderful Forgiveness"

The services to-morrow in St. Andrew's United Church will be conducted by Rev. H. J. Armitage at 7.30 o'clock. The subjects are: "A Wonderful Forgiveness" and "The Perils of Procrastination." The choir will render special music at each service. Sunday school will meet at 9.45 o'clock.

The Easter thankoffering meeting of the Women's Missionary Society will be held in the church on Tuesday evening next at 8 o'clock. Mrs. Chisholm will conduct the devotions and Mrs. W. J. Graham, president of the Presbyterial, will give the address.

On Wednesday afternoon next the Ladies' Guild will hold a daffodil tea at the home of Mrs. G. F. Haley, Gordon Head.

You can buy a DODGE with the *Airglide* Ride

FOR AS LOW AS $1015 FOR THE COUPE DELIVERED IN VICTORIA

Cancer Fund Contributions

There is very little time left before British Columbia's Thunder-bird bowl is sent to the King, bearing the Province's cancer fund contribution. If British Columbia is to stand on an equal with the other provinces for the size of her gift, all prospective subscribers must make haste to turn in their donations.

The following further contributions are acknowledged by The Times:

A.M.C.	$1.00
Mr. and Mrs. H. J. Greatrex	5.00
W. H. Gibson	1.00
A Friend	1.00
Canadian Daughters' League Assembly No 5, per C. M. Ralston, treasurer	5.00
W. Whiting	3.00
Mrs. W. M. Chadwick	1.00
Muriel Chadwick	1.00
Victoria and Island branch Canadian Authors' Association	3.00

MORE BIRTHS IN B.C. REGISTERED

B.C. birth registrations increased substantially in February, according to the monthly Vital Statistics Branch report.

Total for February, 1935, was 879, compared with 757 in 1934.

Deaths also increased from 499 to 579.

Marriages were more numerous, up from 271 to 294.

Victoria reported 51 births, 51 deaths and 22 marriages.

This city in March reported six new cases of cancer, 30 of chickenpox, one German measles, three influenza, 26 mumps, five scarlet fever, six tuberculosis and 24 whooping cough.

DEATH REMOVES J. C. HOLSCLAW

There passed away Thursday last, at the Jubilee Hospital, John Cling Holsclaw, 186 Cadillac Avenue. The late Mr. Holsclaw was seventy-five years of age and is survived by two sons, two brothers and one sister. Announcement of funeral will be made later.

NEWS IN BRIEF

A general meeting of the Civic Employees' Protective Association will be held on Wednesday evening at 8 o'clock.

The regular meeting of the Oaklands P.-T.A. will be held in the school auditorium Monday at 8 p.m., followed by a card game.

J. S. Taylor of Vancouver, the federal C.C.F. candidate for the Nanaimo riding, will speak in the C.C.F. Hall, Mt. Tolmie, to-morrow afternoon at 3 o'clock.

Demolition of five more dilapidated houses has been recommended to the City Council by the city health officer, building inspector and sanitary inspector.

The Margaret Jenkins Parent-teacher Association will hold a five hundred and bridge party on Monday evening in the Margaret Jenkins School at 8 o'clock.

Jas. S. Taylor, the C.C.F. candidate for the Nanaimo federal riding, will open his campaign in Saanich at Marigold Hall to-night at 8 o'clock, when he will outline his platform for the coming federal election.

Ward Two Liberals will hold their monthly meeting at Liberal headquarters Tuesday evening next. It is expected a good speaker will be secured. All Ward Two Liberals are cordially invited to attend.

An application for the installation of a 185-gallon gasoline tank and pump at 620 Discovery Street, filed by J. Rogers with the approval of the fire chief, will be considered by the City Council at its next meeting.

At St. Mark's Troop meeting yesterday, Victor Giles, Bevan Giles and Ted Mottershed passed for their firemen's badges. Games were played and a bun feed was served by Mrs. Giles, the meeting closing with flag down.

Another request has been received at the City Hall from the Gonzales Community Association asking the name of Foul Bay Road be changed. When the matter was considered some time ago both Oak Bay and the city favored maintenance of the old name.

A team representing the Junior Chamber of Commerce will meet one from the Chamber of Civic Affairs, Vancouver, in the City Council chamber on April 13 to debate the question, "Resolved That Canada is Overgoverned." Victoria will take the affirmative.

The Victoria West Liberal Social Club will hold its regular weekly dance this evening in the Liberal headquarters, corner of Government and Broughton Streets. The usual contests will be held. Dancing will be from 9 to 12. All Liberals and their friends are invited to attend.

There will be no meeting of the Victoria night school commercial club on Monday, April 8, owing to the fact that J. H. Beatty, of Sprott-Shaw Schools, who was to be the speaker, will be out of town. The next regular weekly meeting will be held in the Y.W.C.A. at 8 o'clock on Monday, April 15.

Right-of-way for the blind and near-blind at street intersections is sought in a letter filed at the City Hall yesterday by M. C. Robinson, superintendent of the western division of the Canadian National Institute for the Blind. Mr. Robinson in his letter, noted that in Seattle and other points, the blind were provided with white canes which they waved at intersections to secure the right of way. Similar privileges are sought here.

The regular monthly meeting of the Victoria Little Theatre Association will be held in the club rooms on Tuesday evening next at 8 o'clock. There will be a short business session which will be followed by an excellent programme. The board of wardens ask all members to make a special effort to be present. The programme will consist of two one-act plays, and one-half hour of entertainment with Henry Worthington as master of ceremonies. The two plays will be "Where the Whirlwind Blows," and "The Bathroom Door."

The Victoria Geological Society, which was formed as an outcome of the classes in mining and geology held at the High School in February and March, has arranged to have its first meeting since reorganizing at Victoria College on Monday at 8 p.m. The lecturer of the evening will be Rev. R. Connell, the honorary president, who will speak on the "Geology of the Southern Part of Vancouver Island." At the close of the lecture arrangements will be discussed for a field trip to give students of the mining course and others an opportunity to see some of the rocks in place that Mr. Connell will describe in his address. All interested are invited.

DUNCAN WILL ENTER QUEEN

Up-island Town Will Co-operate With May 24 Celebrations in Victoria

At a conference yesterday afternoon at Duncan, Percy George, George Dyson and Mrs. Grace Deaville representing the Victoria Queen Contest Committee interviewed Mayor H. F. Prevost, N. E. Suddaby and W. E. Christmas of the Duncan Sweet Pea Queen Committee. Arrangements were made for the city of Duncan to enter a contestant for Island Queen.

The citizens of Duncan are very enthusiastic and are co-operating with Victoria for the May 24 celebrations this year.

At the invitation of Mayor Prevost, Frank Bickford, campaign manager, and Mrs. Bickford will visit Duncan next week to help get the Duncan contest started.

The committee at Duncan is already lining up contestants and hopes to get off to a good start early next week.

IS LAID TO REST

Funeral services were held yesterday afternoon for James Pottinger. Rev. T. H. McAllister conducted the service, during which the Hymns "O God, Our Help in Ages Past" and "Abide With Me," were sung. Interment was in the Colwood Burial Park. The following acted as pallbearers: O. Walton, F. W. Mayfield, L. M. West, J. Carmichael, C. Williamson and F. Muirhead.

LETTER TELLS MURDER STORY

Inquest on Slaying of Greek Priest at Yorkton, Sask.; Slayer Killed Self

Canadian Press

Yorkton, Sask., April 6.—Twelve-year-old Peter Elash, son of the late Steve Elash, a blacksmith, died of diphtheria December 3, 1930. That night his father conceived the idea of murdering Rev. Father John Bala of the Greek Catholic Mission here and cutting his body into pieces.

Father Bala had stroked the face of the boy as he lay dying, and Elash voted "to square up with that priest Bala." His plot culminated last March 21, when Elash ran amok with a revolver, shooting to death Father Albert Delforge, wounding Father Bala and mortally wounding himself.

The story was unfolded here yesterday at an inquest into Elash's death, which is being continued to-day. A fifty-page letter written by Elash was read into the records, explaining the reason for the attack on the mission that amazed this north Saskatchewan city.

The letter began: "This was to happen. I was to pay back death for death on December 3, 1930. You cultured civilized and Christian people, know ye that the Catholic redemptist priests are carrying on a secret war. . . .

"I swore before God Almighty I myself will square up with that Priest Bala. I will kill him and cut him into pieces, cause his death, take his life for my son Peter's death. When he is dead I will cut him, because if I called the police and doctor they would cut my Peter up trying to find out the cause of his death."

At one time, the letter went on, Father Bala had visited Elash, but, Elash wrote, "I said to myself, 'wait, you devil, I will get you yet'."

Young People's Societies

CATHEDRAL A.Y.P.A.

The weekly meeting of the Christ Church Cathedral A.Y.P.A., held on Wednesday evening, April 3, was in the form of an "April Fools'" party and was arranged by Group 2. For about an hour the members enjoyed children's community games such as "London Bridge" and "Twos and Threes," after which a rousing sing-song was enjoyed in the guild room.

Tickets are now on sale for the concert to be held on Saturday, May 11, and members are reminded of the dance arranged for Friday, April 26, in the K. of C. Hall. As the gymnasium will be occupied on Friday, April 12, the branch will have their usual basketball and badminton on the Thursday evening previous, April 11.

OAKLANDS Y.P.S.

A very interesting and profitable evening was enjoyed by the Oaklands Y.P.S. at their regular fortnightly meeting, held Wednesday evening, in the Oaklands Gospel Hall. About ninety were present, and the president, Mr. F. G. Hamilton, presided.

The meeting was opened by singing a hymn, followed by prayer and the reading of the Scripture portion. Mr. Dave Stewart then conducted a short singing practice. Miss I. Moltishaw rendered a vocal solo, and a double quartette was sung by the young men.

The remaining hour of the meeting was devoted to a Biblical examination contest on the Book of Ruth. Two teams of six girls and five boys were questioned alternately by the president on the details of the Book of Ruth.

Miss May Veale was the winner of the contest, and she was duly presented with a book in appreciation of her mastery of the subject. Mr. Rowland Savage then concluded the session with a five minute talk, emphasizing the divine inspiration and the spiritual value of this beautiful story.

The next meeting will be held on April 17, and will be a questions and answers night. All young Christian people are cordially invited.

METROPOLITAN Y.P.S.

The Metropolitan Young People's Society will have for their guest speaker on Monday, April 8, Rev. O. R. B. Kinney, F.R.G.S., who will illustrate with moving pictures "The Adventures of a Sky Pilot." A varied musical programme has been arranged, with Mrs. Morton as guest soloist; James Mossop, cornet soloist, and Bernard Cronsay at the organ. The public is invited. There will be no charge for admission but a collection will be taken to defray the expenses of Dr. Kinney. The programme will commence at 8 p.m. at the Metropolitan Institute, formerly First Baptist, Quadra Street.

CATHOLIC Y.P. CLUB

The April meeting of the Catholic Young People's Club was held yesterday evening in the Parish Hall. Reports of secretary and treasurer were presented, the latter showing a satisfactory bank balance. The president, Al Dunnett, was in the chair, and "Cab" Collins was elected to fill the office of vice-president. The following heads of committees were appointed: Refreshments, Norah O'Connell; social committee, Bernie Colbert and Tom O'Connell; entertainment committee, Nev. Shanks; sports committee, Tom O'Connell; advertising, Fred Doherty. The partial revision of the constitution was undertaken and will be completed at the next meeting. The end of the bowling season last Tuesday left the Red Devils winners in the league's second half. Next Tuesday at 7 p.m., the Flashes, winners of the first half, will play off with the Red Devils for league honors. On Sunday after the evening service an important meeting will be held and all members, specially those interested in and wishing to play softball, are expected to attend.

LAST RITES MONDAY

Funeral services for Mrs. Sarah Ann Creed, pioneer who passed away yesterday at the age of ninety-five, will be held on Monday afternoon at 2.30 o'clock, at McCall Bros.' Funeral Home. Rev. James Hood will officiate and interment will be in the family plot in Ross Bay Cemetery.

BARING IS GLAD 'CAMBRIDGE WON

"Good old Cambridge," exclaimed Mark Baring, nephew of Lord and Lady Desborough, when he glanced over telegraphic dispatches at the Empress Hotel this morning and noted that his university crew had won the boat race classic on the Thames.

The face of the youthful member of the vice-regal party glowed as he disclosed the news to Capt. M. E. Adeane, one of the governor's aides.

Mr. Baring is a member of the famous London banking family. Since the governor's arrival in the city, Mr. Baring has been staying at the Empress Hotel with Sir Michael Culme-Seymour.

Sir Michael has left to visit Lord Cecil's ranch in the Cariboo, and Mr. Baring plans to go east to-morrow.

Frog And Toad Men's Friends

G. A. Hardy Tells Amusing Stories of Amphibians and Reptiles

"Frogs and toads and other amphibians should be protected. They are among man's best friends," G. A. Hardy told 300 boys and girls to whom he spoke on the subject of "Amphibia and Reptiles," at the provincial museum of natural history this morning. These creatures, he explained, fed on the grubs and insects which damaged gardens.

Mr. Hardy told many amusing and interesting stories of the habits of amphibians and reptiles.

He explained how the tree frog—which really could climb trees through little suction pads on its feet—puffed up a pouch on its neck to half the size of its body and sang with deep resonance because of the air chamber thus formed.

One type of newt found on the Pacific Coast, he said, could emit an evil-smelling substance to keep away its enemies.

Mr. Hardy described the salamander, a more highly specialized form of newt which could live away from water all its life although it was able, if necessary, to keep alive in it.

BREATHE THROUGH SKIN

All the amphibians breathed through their skins. Some had imperfectly formed lungs and some none at all.

Some of the salamanders had poison glands in their tails, while others dropped their tails and left them wriggling on the ground behind them to distract attention.

Mr. Hardy told the differences between the turtle, essentially a sea creature, which had flippers like a whale; the terrapin, which had webbed feet and claws and lived in fresh water, and the tortoise, which was purely a land animal.

In these creatures the shell was really the ribs which had grown together.

SNAPPING TURTLE

The snapping turtle, which was really a terrapin, had razor-edged toothless jaws, which could easily sever a man's finger.

The horned toad, found in the interior of British Columbia, was not a toad at all, he said, but a lizard. It fed on flies and other insects, which it seized with a sticky pad on the end of its tongue.

NERVOUS CHAMELEON

The chameleon, essentially an eastern hemisphere creature, did not change its color to suit its background, but only in accordance with its nervous state.

The rattlesnake, said Mr. Hardy, was the only poisonous snake found in British Columbia, and it did not exist on Vancouver Island, but only in the dry belt.

The rattle had originally served as a protection for the snake, preventing larger animals from stepping on it. Now it served as a protection to man.

The bull snake, found on Vancouver Island, was a constrictor, strangling its prey by wrapping its body around it.

Snakes were a highly specialized form of creature, he said; they crawled with the aid of little hoe-shaped plates on the ends of their ribs, which dug into the ground. They had originally been lizards, but they had lost their legs to enable them to crawl through the underbrush.

Mr. Hardy also discussed the many types of poisonous snakes found in other parts of the world, and told their methods of attack.

The speaker was introduced by Francis Kermode, curator of the museum.

At the conclusion of the lecture a comedy film, entitled "At the Sign of the Times," was shown.

"MURDER" CHARGE AT RELIEF CAMP

Canadian Press

Calgary, April 6—Mayor William Knight, Communist mayor of Blairmore, Alta., speaking at a meeting here yesterday of the United Workers' Council, charged that an inmate of a relief work camp near Blairmore had been "murdered" because of improper food.

Stating an inquest had resulted in a finding of "death from unknown causes," Mayor Knight demanded a full investigation of the case.

Harvey Murphy, Communist candidate in the Blairmore federal riding, reiterated the charge and said the camps were degenerating all who entered them.

MAY QUIT CABINET

Washington, April 6 (Associated Press)—A belief that Postmaster-General James A. Farley will resign from the cabinet to devote all his attention to President Roosevelt's re-election campaign in 1936 was expressed to-day by some of Farley's intimates. When the resignation would take place was not disclosed.

FUNERAL MONDAY

Funeral services for Max Leiser who passed away yesterday at St. Joseph's Hospital will be held at 2 o'clock on Monday afternoon at Sands's Mortuary Chapel. The service will be conducted by Rabbi M. Berner. It will be strictly private. Interment is to be in the Leiser plot in the Jewish Cemetery here.

WILL STUDY ESTIMATES

City Council to Start Big Job; Daylight-saving Comes Up

Following the regular meeting of the City Council on Monday evening, the mayor and aldermen will go into committee on estimates, it was announced at the City Hall to-day.

The council is anxious to get ahead with its budget as soon as possible in order to get its mill rate struck and facilitate the work of the collector's department.

At the council meeting proper, the aldermen will consider, among other things, a petition signed by 1,580 firms and individuals in favor of daylight saving. The petition was organized by James L. McIntyre, who has forwarded with it a covering letter explaining the grounds on which daylight saving is sought.

A request from the Victoria-Saanich Beaches and Parks Committee for an allocation of $2,000 will also be considered.

SINGLE MEN STAND FAST

Unemployed Refuse to Leave City Until Claims Given Recognition

Single unemployed men in Victoria, who reached the city during the last two days from Vancouver Island relief camps, state they intend to continue the present walkout until such time as authorities are prepared to give some recognition of their demands for better camp conditions.

About seventy are taking part in the walkout here.

The men this morning refused the offer of Chief of Police Heatley to have one meal here to-day and return to relief camps within ninety-six hours. They said they would remain together as long as possible.

In an official statement from the Camp Workers' committee this afternoon, the organization condemned the present Royal Commission which is inquiring into camp conditions in Vancouver. Their protests were based on the fact that the commission did not include representatives of the camp workers and was not making public the main reasons for discontent in the camps.

They claim that men in the position of the members of the commission cannot understand the position of the camp workers.

HEADQUARTERS HERE

While remaining in Victoria the organization has established headquarters at 608½ Cormorant Street, and is appealing to the public for food and cash.

The demands of the workers are that work with wages at a minimum rate of fifty cents an hour should be instituted for unskilled laborers, with union rates for skilled laborers. They seek a six-hour day, five-day week, and minimum of twenty work days a month.

NO DISORDERS

No disorders have occurred among relief camp walkouts up to the present time, it was learned here to-day.

One hundred and fifty men were packed in one boxcar at Ruby Creek and wired to their Vancouver headquarters to provide food and lodging for them on their arrival some time to-day.

Many of the walkouts have gone east, evidently making for their homes in the prairie provinces. At Princeton over 400 men are congregated. Refused free meals and lodging, they have been paying 20 cents a meal. Their funds are low and will not last long. What will happen then is a matter of conjecture?

It is said the men at Princeton boarded a coast-bound train but were persuaded to leave again. At Corbin, a coal mining town, east of Fernie, a meeting of striking miners will be held to-night to decide whether or not to return to work.

VANCOUVER SALES

Vancouver, April 6.—The stock sales to-day on the Vancouver Stock Exchange were:

MAN CONVICTED IN VANCOUVER

Canadian Press

Vancouver, April 6.—George Kennedy, thirty, was convicted of living in part off the earnings of prostitution in the Assize Court here yesterday. He will be sentenced at the end of the assizes.

When the jury returned the guilty verdict, after fifty-seven minutes deliberation, the prisoner, his seventy-year-old mother and the girl who, the crown charged, contributed to his support from her immoral mode of life, broke down and wept.

Kennedy told police he intended to marry the girl, with whom he had lived for some time.

FIRE LOSSES

Toronto, April 6 (Canadian Press).—Fire losses in Canada during the week ended April 3, 1935, were estimated to-day by The Monetary Times at $188,600 compared with $288,575 during the preceding week and with $438,900 during the corresponding week of last year. Fire losses from January 1 to April 3, 1935, totaled $3,338,180 against $4,524,825 for the corresponding period of last year.

CANADA LIGHT AND POWER

Montreal, April 6 (Canadian Press)—Net profits for 1934 of $1 a share are reported by the Canadian Light and Power Company, a subsidiary of United Securities Limited. This compares with $1.01 in the preceding year. Dividends at the rate of $1 a year were paid.

J. S. Taylor, C.C.F. candidate for the federal riding of Nanaimo, will speak at Lake Hill Community Hall to-morrow night at 8 o'clock.

POOR PA
BY CLAUDE CALLAN

"My rich Uncle John insulted us relatives when we gathered around him while he was sick. Between groans he offered to settle with us at fifty cents on the dollar."

Ignorance Is Cancer's Ally

Jubilee Fund Will Aid in Arousing Public Intelligence on Disease

"Ignorance has been cancer's most effective ally. It will be overcome when people realize the immense benefit to humanity which will be derived from an aroused public intelligence," says a statement from the B.C. cancer fund committee to-day.

This work may be helped by sending contributions to the King's Silver Jubilee Cancer Research Fund, care of The Times, or to the committee, Pemberton Building, Victoria, B.C.

CARROTS COME FROM PRAIRIES

For the first time in years carrots are being imported from the prairies for the local market. A carload is now rolling west from Edmonton and will arrive in Vancouver on Monday.

City wholesalers hope to have part of this shipment to fill local demand early in the week. The carrots are of fair quality, and have been picked and packed in Alberta.

Wholesalers have been forced to resort to bringing this vegetable from such a distance on account of the fact that all local supplies are exhausted and there are few carrots in other parts of the province.

The wholesale price for carrots is now quoted at $2.25 for 100-pound sack, which is the highest in years.

Ward One Liberals will hold their monthly meeting in the Liberal headquarters, Broughton Street, on Monday at 8 o'clock. All Liberals of Ward One are cordially invited to attend.

NEWS OF CITY AND SUBURBAN CHURCHES

DR. DAVIES HAS MANY QUERIES

Questions Will Be Answered at Both Morning and Evening Services To-morrow

A group of questions affecting the moment of death will be answered by Dr. Clem Davies at his morning service in the Empire Theatre to-morrow. Following are the questions: "If death is so wonderful, why is it so mysterious?" "Does the soul secrete and broadcast ghostly forms and shapes which may be photographed?" "What happens in the hour of death?" "Does the soul act independently of the body and is it able to function at a distance?" "Does the soul take on added vitality at death?" "Is the mind superpsychic in the hour of death?" "Is the soul electrical?" "Does the soul exist independently of time and can it predict future events?" "Can we mentally communicate with persons who reside at a great distance from us?" "Why do we not get greater results in our communication with those who have passed into the psychic realm of the invisible?"

At the evening service, Dr. Davies will answer the following questions: "Why have meat prices begun to soar on the local retail market?" "Will the Prince of Wales be the last King of England?" "What is the significance of the current exhibition of purely historic British films?" "Can you give us an outline of Bible prophecy which specifically refers to this generation?" "What were the conditions whereby a whole nation had neither a sick person nor a weakling for forty years?" "If, according to British-Israel truth the Celto-Saxon races are the chosen people, how can God escape the charge of favoritism?" "Do you believe that starvation and revolution will face the United States during the next two years?" "Why are some people referring to the 'Great Pyramid' in Egypt in connection with God's plan for the world? Is not the Bible the only authority?" "In the judgment of the nations shortly to take place, in the opinion of some, will God judge them according to the ethical and religious standards commonly laid down by the orthodox churches, or by economic and social standards?" "In view of Mayor Leeming's remark that there is widespread apathy toward the tourist trade development movement—what causes do you ascribe to the alleged apathy?"

CHRISTIAN AND MISSIONARY ALLIANCE

Rev. Daniel Walker, of the Christian and Missionary Alliance, Yates Street, will preach at both services to-morrow. "What is Jesus Christ to you after the message?" is the 11 o'clock subject. The Communion of the Lord's Supper will be held. At the evening service at 7.30 o'clock, he will preach on "The Rent Veil! What Does it Mean for us These Days?" Sunday school and Bible class at 2.30 o'clock.

MRS. SCOTT WILL BE SPIRITUAL SPEAKER

At First Spiritualist Church, Sons of England Hall, Broad Street, public circle will be held at 3 o'clock in room 5. Mrs. Scott will be the speaker, taking for her topic, "Spiritual Phenomena." Messages will be given at the close of the address. The soloist will be Mrs. Marie Frankling.

The Monday evening public message circle will be held in room 5 at 7.45 o'clock, conducted by Mrs. Scott. The Thursday "Open Door" circle will meet in room 5 at 7.45 p.m., followed by the usual monthly social hour. A hearty welcome awaits you at all these meetings.

OREGON BISHOP AT CATHEDRAL

Rt. Rev. W. P. Remington to Preach at Morning and Evening Services

Holy Communion will be celebrated in Christ Church Cathedral to-morrow at 8 and 11 o'clock. Rt. Rev. W. P. Remington, Bishop of Eastern Oregon, will preach at 11 and 7.30 o'clock. The hymns at evensong will be of a mission character. J. H. Hinton and Miss Muriel Rye will also give addresses at the close of the evening service.

Children's Lenten service will take place as usual at 3.30 o'clock and will be conducted by Rev. T. R. Lancaster.

The proposed Refresher Course having been superseded by a series of weekly study groups the congregation is referred to the Cathedral leaflet for particulars of the groups.

The fifth of the A.Y.P.A. lectures on "Youth's Responsibilities" will be given at 8 o'clock in the guild room, when Miss Elizabeth Grubb will speak on "The Care of the Less Fortunate." All young people are invited.

DEEPEST SECRET CENTRE SUBJECT

W. N. Weston Will Speak Twice To-morrow

At the Victoria Truth Centre to-morrow morning, W. Newell Weston will speak on "The Deepest Secret of Jesus Christ." There will be a solo by Miss Maud Hartree, "But the Lord is Mindful of His Own" (Mendelssohn). The Sunday school meets at 11 o'clock.

In the evening at 7.30 o'clock, Mr. Weston's topic will be, "Realization and Manifestation." There will be a solo by Miss Dorothy Parsons, "Guardian Angel" (Handel).

The Young People's Society meets on Tuesday evening. At the Wednesday evening meeting at 8 o'clock the subject will be, "Healing of all things." The topic for the Friday evening meeting at the same hour will be "Fundamentals of Truth."

REV. A. W. GAZLEY AT ST. ANDREW'S

Visitor Will Preach Twice in Absence of Pastor

The pulpit of St. Andrew's Presbyterian Church will be occupied to-morrow by Rev. A. W. Gazley, in the absence of the minister, Rev. H. P. S. Luttrell, who is spending the next few weeks at Shawnigan Lake, where he is taking a complete rest. Mr. Gazley will officiate and preach at both services.

In the morning Mrs. Downard, Mrs. Fraser, William Draper and Arnold W. Trevett will sing as a quartette "Casting All Your Cares Upon Him," a composition of McGranahan. The choir will sing Caleb Simper's anthem, "The Lord Is My Shepherd."

In the evening the soloist will be Miss Dwynwen Evans, who will sing "Be Thou My Guide," by Dewhar. The evening anthem will be "What Are These That Are Arrayed in White Robes," by Stainer.

Visitors and strangers to the city are cordially invited to worship with this congregation.

"CHRIST'S CALL TO BUSY PEOPLE"

Rev. James Hood will occupy the pulpit of Belmont United Church morning and evening to-morrow. At the morning service the Sacrament of the Lord's Supper will be dispensed and the theme will be "He Humbled Himself and was made obedient unto death, even the death of the Cross." An appropriate anthem by the choir, under Miss D. Baillie. The evening theme will be "Christ's Call to Busy People." The guest soloist in the evening will be Miss Isabel Crawford, who will sing "There is a Green Hill Far Away" (Gounod).

MISSIONARY AT GOSPEL CHURCH

Rev. Ruby LaVonne Krook Will Speak To-morrow Morning

REV. RUBY LAVONNE KROOK

Rev. Ruby LaVonne Krook, pastor of the Elbethel Gospel Church, on Courtney Street, opposite the Windermere Hotel, is proving an attractive speaker.

Mrs. Krook was formerly a successful business woman but hearing the call of God entered the ministry. She received her theological training at the Bible School of Chicago, where she was president of her class, and after graduation was appointed a missionary in Korea where she labored with success for some years. This was followed by a return to the United States and a teaching ministry and evangelistic work. She established new missions in different parts of the country for the Elbethel denomination, finally accepting the pastorate of the Victoria church. Mrs. Krooks is gifted with an unusual personality, a facility of expression and a rare insight into Bible truths, coupled with a pleasing ministry in music and song.

To-morrow morning she will speak on "The Three-ness of God as revealed in Nature," and will conduct evangelistic services at night. A cordial welcome is extended to all desiring to hear and meet Victoria's woman preacher, Rev. Ruby LaVonne Krook.

RURAL PASTOR AT ST. MARY'S

Rev. A. M. Acheson-Lyle of Colwood at Oak Bay Church

Services at St. Mary's to-morrow will be as follows: Holy Communion at 8 a.m. and 12 noon; Matins and sermon at 11 a.m.; evensong and sermon at 7.30 o'clock. The preacher at evensong will be Rev. A. M. Acheson-Lyle.

Members of the congregation are asked to note the change in time of the evening service. It is hoped that there will be a large number of young people at the 8 o'clock celebration.

On Wednesday evening there will be a Lenten service, with address by the Rev. O. L. Jull. On Thursday there will be celebration of Holy Communion at 10.30 o'clock. The senior session of the Sunday school will meet at 9.45 o'clock and the junior session at 11 o'clock.

GIVES STUDY OF TENNYSON POEM

To-morrow morning at 11 o'clock, Dr. E. A. Henry will give the sixth of his pre-Easter sermons on "The Words from the Cross," taking as his topic the words, "Father, into Thy Hands I commit My Spirit," and to the girls and boys he will tell the story of "A Golden Ball." A. W. Lucking will be the morning soloist and Mrs. Percy C. Richards, L. Abbott and choir will sing the anthem, "How Long Wilt Thou Forget Me, O Lord?" (Pflueger).

At 7.15 o'clock, Mr. L. Abbott will conduct a short service of song; and at 7.30 o'clock, Dr. Henry will give a study of Tennyson's wonderful poem, "Crossing the Bar," closing with a few illustrative lantern slides. Miss Edith Howell will sing "Crossing the Bar" (Rotoli), and the choir will render the anthem, "Souls of the Righteous" (Noble).

The time of meeting of the Sunday school and Bible classes has been changed to 9.45 a.m.

MANY MINISTERS AT ARMY CITADEL

Adjutant and Mrs. Ede, commanding officers, will lead the meetings to-morrow at the Salvation Army Citadel, Broad Street, commencing at 11, 3.15 and 7.30 o'clock. The Citadel band will play at the Jubilee Hospital at 2.30 o'clock.

Special evangelistic meetings will be held every night during next week in the large hall of the Broad Street Citadel, with city ministers of the Gospel kindly assisting.

The week's programme is as follows: Monday, Rev. Daniel Walker; Christian Alliance Church; Tuesday, Rev. Dr. Imrie, Emmanuel Baptist Church; Wednesday, Rev. Dr. Hewett, formerly of the China Inland Mission; Thursday, Percy Willis, West Coast missionary of the Shantymen's Association; Friday, Rev. J. B. Rowell, Central Baptist Church. Adjutant and Mrs. Ede will be in charge and the public is cordially invited.

EASTER SACRAMENT AT VICTORIA WEST

The Easter Sacrament of the Lord's Supper will be observed at Victoria West United Church to-morrow morning, when there will also be a reception of new members. William McDonald will lead the choir in the anthem by Woodward, "The Sun Shall Be No More," and there will be other musical numbers. The service will be conducted by Rev. W. R. Brown, who will speak on "Is a Present Belief in Immortality Necessary for Human Well-being?"

Sunday school meets at 9.45 o'clock and the kindergarten at 11 o'clock, with Gordon Mitchell and Miss Minnie Beattie in charge. The young people meet Tuesday evening, under the leadership of Jack Price.

STONE KINGDOM ADDRESS TITLE

Don MacKinnon Will Speak on Tuesday at British-Israel Meeting

Don MacKinnon, popular member of the Victoria and District Association of the British-Israel World Federation (Canada) will address the open meeting to be held under the auspices of the association next Tuesday evening in the Foresters' Hall, corner Blanshard and Cormorant Streets, at 8 o'clock.

Choosing for his title, "The Stone Kingdom," Mr. MacKinnon will trace the origin, development and present-day significance of the prophetic Stone Kingdom portrayed in the second chapter of Daniel. He will also remark upon the frequent references that are made to stones of various kinds in the Bible and the prominent part that they have played in Bible history, tradition and as emblems throughout all ages.

SPECIAL MUSIC AT CENTENNIAL

Sacred music from the great oratorios by Haydn and Mendelssohn will be heard in Centennial United Church, Gorge Road, to-morrow at 7.30 o'clock. The choir will render the chorus "The Heavens are Telling" from Haydn's Creation, in which the trio part will be taken by Mrs. W. C. Williams, Frank Hollins, and J. Almond; Dr. T. H. Johns will sing the solo "It is Enough" from Mendelssohn's Elijah; and Mrs. Johns will give the solo "Jerusalem" from Mendelssohn's St. Paul; other numbers will be a quartette "Hymn of the Old Church Choir" (Bolman) by the Centennial male quartette, F. Hollins, George Farmer, J. W. Buckler and H. S. Bentham; anthem, "O Thou that hearest Prayer" (Walford Davies) with solo obligato by Miss Janet Hay; solo, "A Dream of Paradise" (Gray) by D. R. Parker and Brahm's "Cradle Song" arranged by Percy Fletcher for ladies' voices. J. W. Buckler will conduct the choir, and Mrs. Paul Green will preside at the organ.

This service will also be the occasion of the rally of the young people of the Presbytery Union, who will be addressed by Rev. C. G. McKenzie B.A.B.D. on "Knowledge and Power."

At 11 o'clock the pulpit topic will be "The Glory of The Cross." The choir will give the anthem, "O Saviour of the World" (Goss) and Miss Edith Howell will sing a solo "There is a Green Hill (Gounod).

"SECRETS OF THE SEAMLESS ROBE"

Dr. W. J. Thompson to Preach at City Temple; Beaver Club Will Sing

An interesting and helpful day is promised at Victoria City Temple, 842 North Park Street, to-morrow. Rev. W. J. Thompson, B.A., D.D., pastor, will preach in the morning on "Secrets of the Seamless Robe." The City Temple Choir will sing "Lord, for Thy Tender Mercies' Sake" (Farrant).

At 3 o'clock the twilight music recitals will continue with the Beaver Club of the Hudson's Bay Company in a special programme. These recitals are attracting crowds of music lovers.

At 7.30 o'clock Dr. Thompson will give as his message "Memorable Words With Wonderful History." The City Temple Choir will render Gounod's composition, "Come Unto Him." Soprano solo by Miss Phyllis Deaville, "The Mount of Olives" (Parker).

BIBLE CONCLAVE ENDS TO-MORROW

Dr. B. B. Sutcliffe to Conclude Conference at Central Baptist

Dr. B. B. Sutcliffe will conclude his Bible conference at the Central Baptist Church to-morrow with three challenging messages. At the morning worship his message will be "The Sufficiency of Christ"; at the afternoon rally at 3 o'clock, "The Final Revelation," and at the evening gospel service at 7.30 o'clock, "The Choice of Destiny." A cordial invitation is extended to all who have not yet heard Dr. Sutcliffe to accept the opportunity to hear these closing messages.

The Victoria Bible School meets on Tuesday evening at 8 o'clock.

COLWOOD AND LANGFORD

The services to-morrow at St. John's, Colwood, will be as follows: Holy Communion, 8 o'clock; Sunday school, 10.30; matins and Holy Communion, 11 o'clock. Preacher, the vicar. At St. Matthew's, Langford there will be Sunday school at 10 o'clock, and evensong at 7 o'clock. The preacher will be Rev. R. E. M. Yerburgh, curate of St. Mary's, Oak Bay.

GOVERNOR AT FIRST UNITED

His Excellency to Read Lesson at Morning Service To-morrow

The morning service in First United Church will be conducted by Rev. W. G. Wilson, D.D., who will continue his series on "Vital Religious Beliefs," and preach on "Why I Believe in the Church." His Excellency the Governor-General will read the morning lesson. The evening service will be in charge of Rev. G. O. Boothroyd, B.D., who has chosen for his subject, "Discarding Excess Baggage." There will be special music both morning and evening.

Under direction of W. C. Pyfe the following music will be rendered: Morning: Solo, "Jerusalem" (Mendelssohn), Mrs. W. H. Wilson; anthem, "Light in Darkness" (Jenkins), soloists, Mrs. C. A. Goodwin and J. Maurice Thomas.

Evening: Solo, "Flee as a Bird," Miss Carol Menzies; anthem, "The Sower Divine" (Gaul), soloist, Mrs. W. H. Wilson; organ voluntaries by Guilmant and Handel; organist, Alfred Gurney.

E. E. RICHARDS AT BRITISH-ISRAEL

"Prophet Joel's Warning Voice" Subject For Talk on Monday

"The Prophet Joel's Warning Voice, Economic, Political, Military, Religious: And the Number 666" will be the subject of E. E. Richards's address, to be given under the auspices of the British-Israel Federation, on Monday, at 8 o'clock, in the Campbell Building, Douglas Street.

In presenting the great prophecy of Joel as the theme of his address, Mr. Richards will deal with its various phases, which on the authority of the word itself, and in the opinion of biblical scholars, relate to the "time of the end." The speaker will take the position that the world is now in the "time of the end," and that the prophecy is an epitome of present-day circumstances and the rapidly developing military crisis, characterized as "The Great Day of the Lord," and that as such, is an eloquent appeal to the church and people to awake to a realization of the situation.

TELLS PROPHECY OF BIBLE STORY

The Spiritual Science Temple services will be held in the Central Auditorium, 1406 Douglas Street, to-morrow, at 7.30 o'clock. F. Karma will conduct the service and has taken for his subject, "This Bible Story, It's Prophets and Prophecy." Messages and healing vespers will be held at the close.

Monday, 8 o'clock, sealed questions; Tuesday, 8 o'clock, tea and readings; Wednesday, developing class; Thursday, 8 o'clock, psycometry; Friday, 8 o'clock, cabinet-seance and messages.

"The Adventures Of a Sky Pilot"

"The Adventures of a Sky Pilot" will be the talk by Rev. G. Kinney on Monday evening in Metropolitan Institute (formerly First Baptist Church), on Quadra Street, at 8 o'clock. Mr. Kinney will illustrate his talk by moving pictures that he has taken himself. The public is invited to attend. Admission is free, and a collection will be taken to defray expenses. The proceeds will be divided between the missionary and maintenance fund and the leadership training fund.

FORMER TORONTO RECTOR SPEAKER

Rev. F. Wilkinson Takes Both Services at St. John's To-morrow

The services at St. John's Church to-morrow will consist of Holy Communion at 8 o'clock, morning prayer and Holy Communion at 11 o'clock and evensong at 7.30 o'clock.

Rev. F. Wilkinson, formerly of St. Peter's Church, Toronto, will preach at the 11 o'clock service and in the evening. Mr. Wilkinson has two sons in the ministry, one being rector of Christ Church Cathedral in Vancouver and the other is at the head of the Kangra Missionary Diocese of Kangra, India.

There will be a short organ recital by G. J. Burnett before the evening service and during the service the choir will sing the anthem, "O Saviour of the World," by Goss. The Sunday school and A.Y.P.A. Bible class will meet at 10 o'clock and the confirmation class will meet at 2.30 o'clock, when the final instruction will be given by Rev. Canon F. A. P. Chadwick.

GUILD OF HEALTH

The next meeting of the Guild of Health will be held on Tuesday, April 9, at 8 p.m. in the Chapel of the Memorial Hall. The Rev O. L. Jull will conduct the meeting and give the address.

Yankee Will Race In English Waters

Famous United States Yacht Will Race Endeavour, America's Cup Challenger, in Races Off English Coast Next Month; Will Sail Across Atlantic

New York, April 6—Yankee, the America's Cup yacht which is going to England next month to race the Endeavour and five other large yachts, will be sailed in all her races during the summer by her owner, George R. Lambert, says James Robbins in The New York Times.

Whilst in this city for a short time last week Mr. Lambert was asked who the skipper of the racer would be and he said he would have her wheel in all her contests.

He is going to take the big racer abroad with the idea of conquest, subject to sport, and in carrying out that spirit wants to do the sailing himself. In handling Vanitie, Mr. Lambert made probably more rapid strides as master of a large racer than any one else ever had.

He was immensely pleased with the trial of Yankee in Massachusetts Bay last week with her racing rig. There was a fresh breeze and the racer's lee rail was put under water. Yet everything held, including her new steel mast that was put to a telling test without her rig being set up gradually in light airs.

MAST NOT EXPENSIVE

In line with the living accommodations on Yankee being solid and complete well beyond all British ideas, her new mast stands up in refutation of the frequently-made claim that Americans gain their ends in yachting by huge expenditures of money.

Yankee's steel mast cost only $4,000. The old wooden ones cost between $6,000 and $8,000. The duralumin one of the cup defender Enterprise in 1930 cost $40,000.

The new stick of Yankee is a tribute to Frank C. Paine, who designed it. To all appearance it is an improvement on any mast that ever has been built, and yet it cost but a small portion of what any other did.

Yankee is going to be sailed the entire way to England, if possible, or unless calms set in which would cause hardship to her crew through long idleness and delay. Mr. Lambert's three-masted auxiliary schooner Atlantic, which will convoy her, also will make the passage under sail if the conditions are not too unfavorable.

That Yankee is to be set for a fast passage is evident from the fact that she is to carry three spinnakers for use out on the ocean. One is her original single headsail, which she had in 1934, the year in which she was built. Two spinnaker poles will be taken, one the full racing size and the other thirty-five feet long.

The radio set with which Yankee will keep in communication with Atlantic will have a sending range of 600 miles by day and 1,000 miles at night.

Yankee's racing mast will be shipped on the liner Olympic, as will be the power tender Utility, which towed Vanitie in and out of port. Log will be used for the same purpose with Yankee abroad.

STRIKE TIES UP VESSELS

Log-boom Men Walk Out in Vancouver and Prevents Three Ships From Loading

Vancouver, April 6.—Three deepsea ships were tied up as the result of a strike by 125 log-boom men and the declaration of the Vancouver and District Waterfront Workers' Association that all logs in the harbor are unfair.

Ms. Silverwillow left for Puget Sound yesterday evening after being unable to take on a cargo of 100,000 feet of cedar logs for South Africa. Ss. Hartington and Ss. City of Vancouver are still here, waiting settlement of the strike.

The men walked out yesterday, claiming that operators of two of the five booming grounds refused to recognize the newly organized Export Log Workers' Association, and that two men had been dismissed through discrimination.

It is further stated that three of the booming ground operators agreed to increase wages May 1, and that the Log Union is now demanding the increase immediately.

Meantime Ss. Border Prince and various smaller coastwise vessels are tied up, as operators state it is cheaper to lay up their craft than acceded to the demands of the crews for improved working conditions, increased wages and overtime.

Nippon Yusen Kaisha Ms. Hikawa Maru arrived at noon to-day with 130 passengers, considerable general cargo and four carloads of silk from Japan.

Dovell and Co. reports Ms. Elbe of North German Lloyd in port to load for Europe. Her outward bookings total 3,000 tons general and grain.

Canadian Pacific coastwise steamship service report Ss. Princess Norah due in port this morning from Alaska.

Vancouver-St. Lawrence Line reports Ms. Pacific Commerce due to leave Montreal for Vancouver, May 8.

FURNESS LINE MAY GET SHIPS

Reports in New York That Anchor Line Will Be Separated From Cunard Line

New York, April 6.—Reports from Glasgow last week tended to confirm that the Anchor Line would be separated from the Cunard, which owns 51 per cent of the stock, and be taken over by the Furness, Withy Company Ltd., of 24 Whitehall Street.

The latter company for some time has desired to own a transatlantic passenger service, and it bid for the White Star ships when they were bought by Lord Kylsant, who was then the chairman of the Royal Mail Steam Packet Company. Anchor Line officials here said yesterday that, in their opinion, if the Furness, Withy Company got control of the fleet it would put new life into the old Scotch company and restore it to its former position. It is expected the Furness, Withy Company will maintain the Glasgow and Moville services to New York and put their two best ships, the Caledonia and the Transylvania, into the West Indies cruise service in the winter, and also build two fast ships.

Of all foods, milk has the highest food value.

PILOTS' LOOKOUT

Pramlington Court, docked Victoria, for lumber at midnight.

Hikawa Maru, passed Victoria, bound Vancouver, from Japan, 7 a.m.

Empress of Russia, sailed from Vancouver, 11 a.m.; due Victoria, 4 p.m. to sail for Orient ports, 5.30 p.m.

Emma Alexander, sailing from Seattle, 5 p.m.; due Victoria, 10 p.m., to sail for California ports at midnight.

Celtic Star, due Race Rocks, bound Vancouver, 5 p.m.

Empress of Japan, due Victoria from Orient and Honolulu, Tuesday a.m.

Loss Reported At Churchill

Port and Hudson Bay Railway Show Deficit; Profit on Elevator, House Hears

Ottawa, April 6.—While the government to-day had heard a suggestion that it enter the marine insurance business, there appeared little likelihood of its adoption. The suggestion was offered with a view to forcing down insurance rates on the Hudson Bay route and encouraging shipping in all Canadian ports. It came from Hon. W. R. Motherwell, Liberal, Melville, Sask., former Minister of Agriculture, but failed to meet the approval of Hon. R. J. Manion, Minister of Railways and Canals.

The House yesterday evening held its annual discussion of the Hudson Bay route when estimates for the railway to the port of Churchill were voted and the usual complaints about high insurance rates were voiced. R. M. Stitt, Conservative member for Nelson, claimed reduction in rates ordered for this year was not enough and that they should be cut in half.

The government was in enough business already, said Mr. Manion, who expressed the belief insurance rates would come down very quickly as the route bore the test of experience.

Eventually the railway would pay its way, Dr. Manion predicted. When conditions in the west returned to normal it would progress much more rapidly.

The Hudson Bay Railway, the elevator at Churchill and the port itself lost $207,000 last year in operation and maintenance expenses, Mr. Manion said. It expected about the same result from this season's operations.

Manitoba's northern port and railway cost about $53,000,000, but no interest charges were added last year to the operating statement. The railway lost $197,000, and the port lost $67,000, but the elevator made $17,000.

Dr. Manion believes the railway eventually will pay its way when the west returns to normal. The elevator is full of grain, but the railway so far has not justified itself from a traffic viewpoint.

The height is in feet and tenths of a foot, measured from the average level of low water.

The figures for height serve to distinguish high water from low water. Where blanks occur in the tables, the tide rises or falls continuously during three of the usual tidal periods.

TWO LINERS SAIL TO-DAY

Empress of Russia Going to Orient and Emma Alexander to California Ports

On her way to ports in Japan, China and the Philippine Islands, the Canadian Pacific liner Empress of Russia will sail from Ritchet Piers this afternoon at 5.30 o'clock, with a fair list of passengers and a heavy general cargo. Capt. Herbert James, R.D., R.N.R., will be on the bridge.

Boarding the liner at Victoria will be Mrs. J. H. Donald for Hongkong and P. Webber for Yokohama, en route through Siberia to Russia.

Among those who sailed this morning from Vancouver by the Empress of Russia were Mrs. J. W. Hackett of Vancouver, en route to Nagasaki to visit her daughter; Mrs. Edith M. Clark of Vancouver, importer of Chinese antiques and Oriental art objects, off on her annual buying trip to the Far East; Walter Reliyer, tea importer of Chicago; J. H. Middlecoat, representative of the Canadian National Railways at Singapore, returning there after furlough in Canada; G. White, C.M.G., British Consul-General at Kobe, returning there from England, and Charles P. Harvey, president of the Gunze Silk Corporation of Philadelphia.

FOR CALIFORNIA

Sailing at midnight to-night for San Francisco, Los Angeles and San Diego the Ss. Emma Alexander of the Pacific Steamship Lines will take from Victoria John Root, Mrs. H. Hargrove, Miss Ada Ogi, Miss Marjorie Tindall, Mrs. C. W. Watt and Miss Alice Styan of Brentwood; Mr. and Mrs. R. S. Brown, Morton H. Ellis, headmaster of Brentwood College, and Mrs. Ellis, and Miss Edith M. Irving and Miss Ethel Irving of Duncan.

Cargo to go aboard the Emma at this port includes a car of malt for San Francisco and some raw silk, left here early in the week from Japan by the Ss. President McKinley.

Vancouver people who came over this afternoon by the Ss. Princess Alice to join the Emma Alexander at Victoria included Mr. and Mrs. A. M. Campbell, Mr. and Mrs. Gerald Myers, Mr. and Mrs. P. G. Groves, Mr. and Mrs. Stanley Nelson, Miss Florence Phinney, Joseph W. Carlick, James Black, Charles Dring, Dr. Frank O'Neill and Dr. H. P. Vandervoort.

Liner Bringing Many Travelers

Empress of Japan Expected Tuesday Morning From Orient and Hawaii

Bringing in a total of 542 passengers, including 220 in the first class and eighty-seven who embarked at Honolulu on Thursday, the Canadian Pacific flagship Empress of Japan is expected here first thing Tuesday morning from the Orient.

The big liner caught the eastbound movement from the Orient to Europe at the beginning of flood tide, and this year an increase in through travel from the Far East is starting already to be noticed as a result of the forthcoming King's Jubilee celebrations in England.

Returning from vacations in Hawaii aboard the Empress Hotel are: Mrs. Eva L. Pricker, Miss Florence A. Johnstone, Mrs. J. Storey, James E. Mann and Mrs. Mabel Ingram of Vancouver; Mrs. Robert Scott of Victoria, Mrs. Florence Hirsch, Mr. and Mrs. L. L. Cady and Mr. and Mrs. Frank Skinner of Seattle; C. A. Bogert of Toronto, chairman of the board of directors of the Dominion Bank of Canada; Mr. and Mrs. A. A. Ferguson of San Francisco and Mr. and Mrs. Arthur Clark of Los Angeles.

Passengers from the Orient include Mrs. Edward Stone, widow of the late general passenger agent of the Canadian Pacific at Hongkong; Mr. and Mrs. James R. Steele, round-the-world passengers from New York; D. W. Hadfield, district locomotive superintendent of the Burma Railway; Norman Tweedlie, official of the finance department of the Shanghai Municipal Council, and H. W. Puttick, district electrical engineer of the East Indian Railways.

An unusually interesting passenger aboard the Empress is Perry Burgess, president of the Leonard Wood Memorial of New York, a frequent traveler to and from the Far East. He is head of the great philantropic institution which has made a conspicuous contribution to the control and cure of leprosy in the Orient.

B.C. Bound Ship Ashore For Time

Kingston, Jamaica, April 6.—Stranded on the treacherous Savanna La Mar Reef on the southwest shore of Jamaica for two days, the Norwegian motorship Ravnaas was once more on her way toward Vancouver to-day.

Laden with sugar for the Pacific port, the 2,441-ton freighter on Tuesday ran afoul of the same coral reef that held the Canadian National steamship Cathcart captive for several hours last week.

Sunrise and Sunset

The Meteorological Observatory, Gonzales Heights, Victoria, B.C.

Sternwheeler Commissioned

Skagit Chief Steams Up Skagit River As Mount Vernon Declares Holiday.

Mount Vernon, Wash., April 6.—To-day is "steamboat day" in northwest Washington.

Reviving memories of the era when hard-boiled skippers raced from landing to landing on Puget Sound, roads were only trails and auto trucks were not even dreamed of, the new sternwheeler, Skagit Chief, puffed its way up the Skagit River on its maiden voyage.

To welcome the 165-foot boat, only paddle-wheel vessel to be built on the Pacific Coast in many years, Mount Vernon planned an all-day celebration.

The swishing of the new Skagit Chief, namesake of one of the Sound's proudest mail packets, around the river bend below the city with a high school band playing from her deck, was the signal for the beginning of the gala affair.

The Skagit Chief takes the place of the old Harvester, which was crushed by an ocean-going vessel at a Seattle dock during a storm last fall. She was built in Seattle and left that port yesterday evening on her first run.

Ms. Rosario leaves Anacortes, 8.30 a.m., arrives Sidney, 1 p.m.; leaves Sidney, 1.30 p.m., arrives Anacortes, 6.15 p.m., via Friday Harbor, Orcas Island and Lopez Island.

SALT SPRING ISLAND

Ms Cy Peck leaves Swartz Bay daily, except Wednesday, at 8.30 a.m. and 4 p.m.; leaves Fulford Harbor daily, except Wednesday, at 6 a.m. and 4 p.m. Sunday service: Leaves Fulford Harbor, 8.45 a.m., 10.30 a.m. and 4.30 p.m.; leaves Swartz Bay, 9.30 a.m., 11.30 a.m. and 5.30 p.m.

PLANE SERVICE

Canadian Airways plane leaves Vancouver daily at 8.30 a.m.; arrives Sequoalt Harbor, 10.15 a.m.; leaves Esquimalt, 6 p.m.; arrives Vancouver, 6.45 p.m.

SEATTLE FISH FLEET SAILS

Men Agree to Go to Banks After Strike, and First Schooners Leave Port

Seattle, April 6.—Their tackle stored and their mooring lines cast off, first units of the major North Pacific halibut fleet put to sea to-day to race to the banks in the Gulf of Alaska, their five-weeks "strike" ended.

The Deep Sea Fishermen's Union voted here yesterday evening to accept the proposal of the Fishing Vessel Owners' Association to put to sea, Harold Lokken, manager of the Association announced. A fleet of 250 schooners has been tied up here, and the southeastern Alaska fleet has also remained in port since the scheduled start of the season five weeks ago.

A number of vessels in southeastern Alaska ports, some of them Seattle boats, which had put north, will have to two or three days' advantage in getting onto the fishing grounds, Lokken said. The Prince Rupert fleet, nineteen out of twenty vessels, sailed yesterday.

The American fishermen were on "strike" demanding a minimum price guarantee of 8 cents a pound for small, large and grey halibut, and 10 cents for medium fish.

Late yesterday, the Owners' Association voted to go out without a minimum guarantee, contingent upon approval by the Fishermen's Union, which was decided favorably last night.

Efforts to obtain an $800,000 RFC loan and bank loan to finance the freezing of surplus catches to keep the price up were unsuccessful. Vancouver and Victoria fleets went out two weeks ago.

MAILS

BRITISH

Close, 4 p.m., April 11, Ss. President Roosevelt, via New York.

Close, 1.30 p.m., April 14, Ss. Montrose.

Brings Party From Mainland

Ss. Princess Elaine in With Excursion; Princess Victoria to Go on Triangle Run

The first excursion party of the spring and summer came to Victoria to-day from Vancouver, when the Ss. Princess Elaine brought 165 passengers.

Fresh from annual overhaul, the Princess Elaine arrived at the Belleville Street docks at 1 o'clock and will leave for Vancouver at 6 o'clock, giving passengers several hours in which to take sightseeing trips or visit friends in the city.

To-morrow the Princess Elaine will return to the Vancouver-Nanaimo service, relieving the Princess Victoria which has been on that run for the last month.

Monday afternoon the Princess Victoria will take the 4.30 o'clock sailing to Seattle, in place of the Princess Alice which will tie up during the next few weeks for annual overhaul, preparatory to going on the Alaska run.

The Princess Victoria will remain on the triangle run until the Ss. Princess Marguerite is commissioned in six weeks or two months.

The Ss. Princess Norah reached Vancouver this morning from Alaska. She has only three more trips north this year, being scheduled to sail April 9, April 19 and April 30. On May 8 the Ss. Princess Louise will take over the Alaska run, the Norah coming to Victoria for annual overhaul before starting her summer trips to the west coast of Vancouver Island.

The Weather

Daily Bulletin Furnished by the Victoria Meterological Department

Victoria, 8 a.m., April 6.—The barometer is falling on the northern Coast and milder weather is becoming general on the Pacific slope. Zero temperatures are reported in northern Alberta and snow eastward to Saskatchewan.

Reports

Victoria—Barometer, 30.18; temperature, maximum yesterday 52, minimum 42, wind, 15 miles S.W., cloudy.

Vancouver—Barometer, 30.14; temperature, maximum yesterday 56, minimum 39, wind, 4 miles S.; cloudy.

ANTI-WAR PROFITS BILL

Washington, April 6 (Associated Press).—Reversing a previous stand, the United States House of Representatives yesterday voted for a ban on war-time conscription of labor and moved slowly and impatiently toward final approval of the McSwain anti-war profits bill.

CHIEF SCOUT CLUB VISITOR

Lord and Lady Baden-Powell Will Speak to Canadian Clubs

Appearances of Lord and Lady Baden-Powell at two luncheons will headline the list of service club speakers for next week. The Chief Scout, founder of the international boys' movement, will address the Men's Canadian Club next Friday in the Empress Hotel.

The Women's Canadian Club will meet Lady Baden-Powell next Tuesday, the day she arrives. She will speak at a gathering in the Empress, to be held at 2.45 o'clock. Her subject will be "Guiding and Our Recent Tour." Mrs. Marjorie Watson Goodwin will be the vocalist, and Mrs. Dorothy Morton Gough, the accompanist.

Rotarians on Thursday will depart from their usual procedure and hold luncheon aboard the C.P.R. steamer Princess Joan. The speaker will be Captain B. W. McMurray, R.N.R., who will discuss his experiences in the days of the sailing ships in a talk on "The Evolution of Water Transportation."

William Downes, provincial entomologist and a recognized authority on garden pests, will address the Gyro Club at its luncheon in the Empress Hotel on Monday, on protection of the spring garden.

The Business and Professional women will hold their card party in the new clubrooms in the Union Bank Building this evening. Miss Helen Wells and Miss Mabel Johnson are conveners and a big turnout is expected. Next week the club women will hold a supper meeting in the Y.W.C.A. at 6.15 o'clock, when K. Symons, headmaster of St. Michael's School, will speak on "The Tower of London."

Bruce M. McKelvie, managing-editor of The Colonist, will be the speaker at the Kiwanis Club luncheon on Tuesday. His topic has not been announced.

Moonrise, Moonset

Wall St. Finishes Week-end Session With Prices Firm

Associated Press

New York, April 6.—The stock market caught its breath to-day after its sharp spurt of the previous session. Some traders showed a disposition to take profits and prices were only a little better than even during most of the proceedings. The close was fairly steady. Transfers approximated 400,000 shares.

While bullish sentiment still seemed to predominate, there was little tendency to reach for equities, either by the public or so-called professionals. After a moderately active and somewhat higher opening, the trading volume dwindled. A few specialties were in demand.

A sharp rally in the guilder brought some confusion to bears on this currency. Other gold bloc monies also recovered sympathetically.

International Nickel, advancing a major fraction, was an active feature among Canadian shares. Canadian Pacific held about unchanged, while Dome and McIntyre were a trifle lower. On the curb, Hiram Walker improved slightly. Dominion government bonds ruled steady. Canadian funds were 1-32 of a cent higher at 99 11-16 cents.

(By H. A. Humber Ltd.)

Dow Jones averages to-day closed as follows:

Thirty industrials—103.04 up 0.31.
Twenty rails—29.56 up 0.07.
Twenty utilities—17.70 up 0.04.
Forty bonds—94.33 up 0.23.

Dow Jones averages at 11 o'clock this morning were as follows:

INDUSTRIALS—
102.94 up 0.41.
RAILS—
29.56 up 0.07.
UTILITIES—
17.71 up 0.05.

PIONEER MAKES RECORD OUTPUT

Canadian Press

Vancouver, April 6.—Pioneer Gold Mines Limited established an all-time high record for monthly bullion production when a total of $202,200 was produced during March. The previous high month was December last when bullion was valued at $164,000.

Expenses for March were $67,000 and net profit before depletion and taxes was $125,200 compared with the December net of $101,500.

LONDON MARKET CLOSED

BASE METALS, SILVERS UP

Canadian Press

Toronto, April 6.—Interest was concentrated in the base metal and silver shares and these groups advanced on heavy turnover in to-day's short session of the Toronto exchange mining section.

Noranda advanced 40 cents to 36.40. Hudson Bay at 13.50 was up 25 cents, Base Metals Corporation at 64 added 6 cents and smaller advances were boarded for Falconbridge and Sherritt-Gordon. Aldermac, one of the penny coppers, closed about a cent up.

Minor gains were boarded for the silvers while some of the oils were fairly active. Royalite came out at 920 for a gain of 50 cents.

Central Patricia advanced 4, San Antonio 5, McWatters 5, Little Long Lac 10 and Buffalo-Ankerite 10, McKenzie 7 and Macassa 4. McMillan drifted down to 16 before recovering part of the loss.

LUMBER OUTPUT ABOVE AVERAGE

Associated Press

Seattle, April 6.—While much above the average, last week's lumber production reported by 523 down and operating mills was 1,000,000 board feet under the previous week's output, the West Coast Lumbermen's Association said to-day.

Last week's production was 98,357,422 feet against a weekly average this year of 82,594,634 feet.

New business reported by 523 mills was 102,485,761 feet, against shipments of 98,715,811 feet. The orders booking were over those of the week before by about 9,000,000 feet.

The unfilled order file at these mills totaling 395,597,375 feet, about 2,000,000 under the previous week's aggregate.

ELECTED CHAIRMAN

Montreal, April 6 (Canadian Press)—Robert F. Kernan, president of the Donnacona Paper Company Limited, was yesterday elected chairman of the executive committee of the Newsprint Export Manufacturers of Canada in succession to L. J. Belnap, Montreal, president of the Consolidated Paper Corporation. Charles Vining, Montreal, was re-elected president and B. K. Martin secretary.

BAR GOLD

London, April 6. — Bar gold advanced 2½d to 144s 1d. (U.S. equivalent, $34.98.)

Montreal, April 6.—Bar gold in London was up 5c at 136.01 an ounce in Canadian funds, 144s 1d in British funds. The fixed $35 Washington price amounted to $35.00 in Canadian.

CONSTRUCTION ISSUES CLIMB

Canadian Press

Montreal, April 6. — Construction issues were the strong leaders on the Montreal Stock Exchange to-day while the remainder of the list moved regularly within a narrow range.

Canada Cement preferred rose ⅝ of a point at 32, and the common gained ⅛ at 6½, while Gypsum jumped a full point at 6½. Cockshutt Plow was narrowly higher.

Power stocks continued their narrow recovery from the lows touched during the week, Canadian Hydro-Electric preferred jumping four full points at 45, and Montreal Power rising ½ at 28⅝. International Nickel touched another new high at 25⅝, up ⅛. Canadian Celanese preferred lost a full point at 106, and Hollinger was down 10 cents at 16.50.

Winnipeg Futures Conclude Active Week With Gains

Canadian Press

Winnipeg, April 6.—The most active trading week in some time concluded quietly on the Winnipeg Grain Exchange to-day. Wheat prices closed ⅛ to ⅜ cent higher, both May and July at 87⅛ cents, after a dull session.

A smart recovery at Liverpool and moderate export sales of Canadian wheat did little more than hold futures steady. Exports totalled 300,000 bushels.

Opening lower, Liverpool closed strongly, ½ to ⅝d higher, recovering part of yesterday's decline. Chicago was steady and Buenos Aires closed 1⅛ cents higher.

Selling was at a minimum, with country marketing of wheat totaling 290,000 bushels, compared to 249,000 on the same day last year. Cash wheat was quiet, small export sales of oats the only feature. Coarse grains held steady.

Chicago, April 6.—A good class of speculative buying that developed in the corn market lifted corn prices late to-day, and helped put backbone into values of other grains.

Boats were loading corn in Chicago to-day for lake shipment to Buffalo. Corn market advances were in the face of assertions that Argentine corn, duty paid, was being offered to Pacific Coast points at far below what domestic corn could be laid down from the central west.

Corn closed firm, unchanged to ⅝ higher, May 84⅝ to 84½; wheat unchanged to ⅝ off, May 84⅝; oats ⅛ down to ⅛ up, and provisions showing 5 to 15 cents gain.

INDUSTRIALS HOLD GAINS

TORONTO, April 6. — Advances carried through to-day's session of the Toronto exchange industrial market but with volume on the small side except in Nickel, Ford A and the leading oils. Construction, steel and food issues were the strongest groups and utilities were again soft.

Nickel advanced to a new high ground for the current movement at 25⅝ while Brazilian was also up a little and Ford 'A' held unchanged. Imperial Oil met with considerable profit-taking and a minor recession while International Petroleum retained a gain.

Building stocks were helped by national plans to aid necessary construction. Gypsum added a half point to Friday's gains, and Canada Dredge advanced ⅝. In the steels, Dominion Bridge moved up 1½, Canadian Car preferred ¾, Page-Hersey ⅝ and Pressed Metals ½.

Bell Telephone turned mildly soft in the utilities and lower prices ruled for B.C. Power B, Porto Rico preferred and Union Gas. Bank stocks were slow.

BAR SILVER AT NEW HIGH

Associated Press

New York, April 6.—Foreign bar silver for commercial use continued its climb in to-day's market with a rise of ½ cent to a price of 62½ cents an ounce, another new high since 1928.

At that level, the white metal was up a full cent from a week ago. Its record low, reached in 1932 was 24⅛ cents.

Brokers said the steady rise reflected the withdrawal of metal from the markets of the world by the U.S. treasury buying programme.

Stock Leaders At Vancouver Pursue Opposite Courses

Vancouver, April 6.—Both Dentonia and Cariboo closed off a cent at the close of the brief session of the Vancouver Stock Exchange to-day, ending at 69c, and $1.21 respectively.

Bralorne lost five cents at $8.10, while Bradian was up five cents at $1.90. Minto lost a half cent at 16½, with Sheep Creek up three cents at $1.17.

No. 6 wheat	62⅝	59⅝
Feed	62⅝	59⅝

Track, 85⅛.

BAR SILVER

London, April 6. — Bar silver, firm, ⅛ higher at 20 7/16d. (U.S. equivalent, 62.19c.)

New York, April 6.—Bar silver, firm; ⅛ higher at 62⅝.

NEW YORK METALS

New York, April 6.—Tin steady; spot and nearby, 49.50; future, 49.10.

Other metals nominally unchanged.

U.S. DOLLAR IN LONDON

London, April 6. — The United States dollar lost ⅛c to the pound to-day, as compared to the overnight New York rate closing at $4.94⅝.

Five Years For Indecent Acts

C. Leonard Hall to Serve Sentence on Seven Charges

C. Leonard Hall, who pleaded guilty in the City Police Court yesterday to seven charges of indecent assault, was sentenced to five years' imprisonment by Magistrate Jay this morning. He was given five years on each count, all sentences to run concurrently.

The prosecution produced two previous convictions against the accused yesterday.

"You have been found guilty of seven different charges of indecency with young boys," the magistrate said. "There was not a single offence, but a continued offence, which started last September and continued until last month—March. You were assuming to assist these boys and undertook to conduct them in study in an institution of this city.

"In this capacity you were placed in a position of trust and the parents had confidence in this institution and naturally, its moral standards. You have sadly abused this confidence . . . this offence is a serious one and must be severely punished."

BONDS GAIN AT TORONTO

Canadian Press

Toronto, April 6—Advances ranging up to 4 points were recorded to-day on the Toronto bond market in the Quebec power issues that were under pressure in the early part of the week.

Gatineau 5s closed to-day at 86½ to 87 against yesterday's closing bid of 84. Beauharnois 5s gained 1½ to 37½d bid, the 5½ issue about 4½ to 80½ bid and the McLaren-Quebec three points to 69 bid.

PERSONS AND EVENTS IN THE NEWS

DAMMING THE NILE

The construction of the great $10,000,000 dam across the White Nile at Gebel Aulia, some thirty miles south of Khartoum, is progressing rapidly as hundreds of workmen toil to complete the huge dam. Above is shown some of the 200 skilled stonecutters at work at Saleitat cutting the granite ashlar for the dam. When completed in 1937 the dam will be three and a quarter miles long and will raise the White Nile thirty feet for a distance of 200 miles.

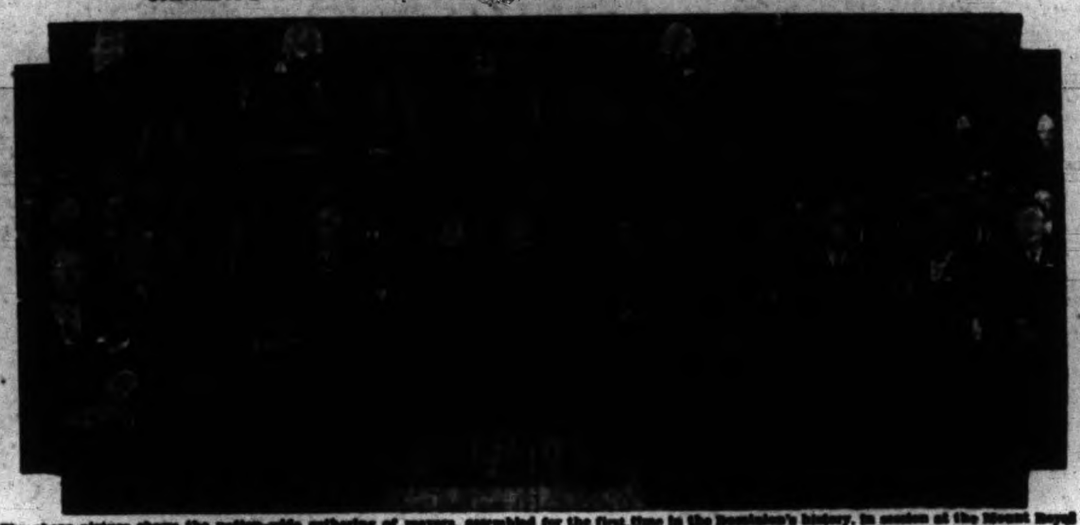
VICTIM WRONG MAN

Victim of tarring and feathering which he declared was meant for another man, Stanley Waters, Seattle garageman, is shown after he staggered into a constable's office and told a weird story of being forced to coat himself with the mixture after being kidnapped. Officers believe his claim of mistaken identity.

CHEVALIER SPRINGS SURPRISE

Maurice Chevalier, the man generally seen in a straw hat, is in a felt. He hasn't felt enough of the spring urge to get out a summer topper.

CANADA'S FIRST DOMINION CONFERENCE OF MAYORS IN SESSION



The above picture shows the nation-wide gathering of mayors, assembled for the first time in the Dominion's history. In session at the Mount Royal Hotel in Montreal. Rear centre (standing), Mayor Camillien Houde, C.B.E., of Montreal, flanked by Mayor James Simpson, Toronto, and Mayor G. G. McGeer, K.C., M.P.P., Vancouver. Immediately in rear of Mayor Houde, seated, is Mayor George Wenige, London, chairman of the conference. Standing, left rear, at table, the three secretaries of the conference, right to left, Fred Bancroft, Toronto; Alderman Leon Trepanier, Montreal, and Alderman E. Binet, Edmonton. Standing, right rear, pipe in hand, is Mayor E. J. Gregg, Halifax.

"THANKS FOR THE BUGGY RIDE"

Gary Cooper, film star, and his wife, the former Sandra Shaw, went for an old-fashioned buggy ride during their vacation at Bermuda, and the camera caught them in the act.

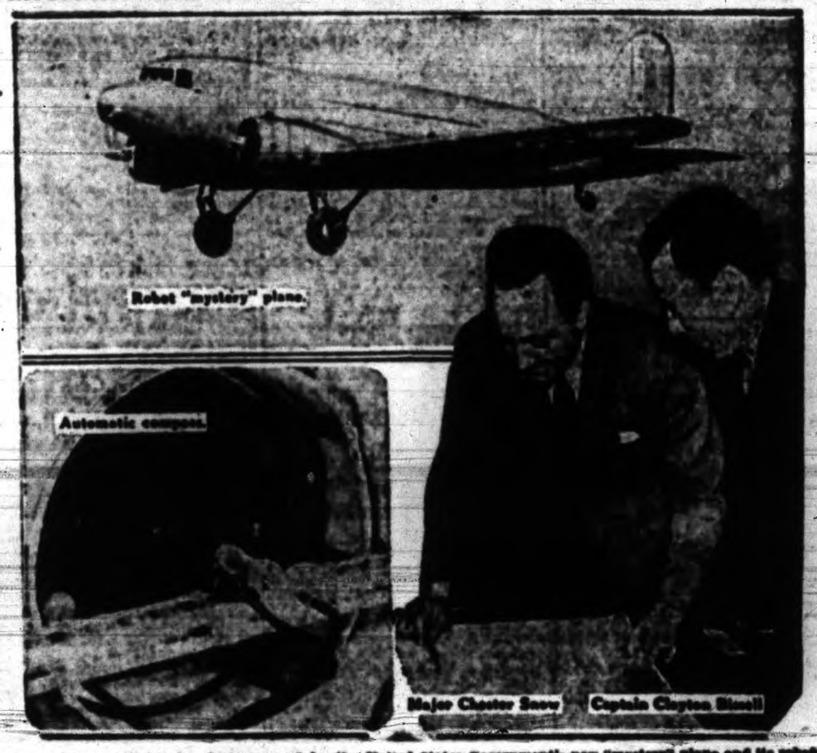
MARY KATE WARE

Stricken with a strange disease which has defied medical science, little Mary Kate Ware, twelve, is shown as she takes a sun bath at a Birmingham hospital. To Mary the changing seasons bring only anguish, for her weird affliction periodically strikes during the spring and autumn, when her fingers shrivel, her face shrinks into pinched lines, the back humps, and her arms become limp and lifeless. Like the famous character of "Dr. Jekyll," she undergoes a transformation back to normal in summer and winter.

LAURA BIDDING FOR LAURELS, TOO

What is sauce for Amelia Earhart is sauce for her, too, believes Laura Ingalls, below, famed United States aviatrix, who has announced intent to rival the No. 1 woman flier in the matter of record flights. Miss Ingalls is preparing for an east-west assault on the seventeen-hour woman's transcontinental air record, in her new, long-range Lockheed shown above. Then she will try to duplicate the non-stop hop to Mexico City which Miss Earhart is now planning.

INTERNATIONAL INTEREST FOCUSSED ON MYSTERY ROBOT PLANE



International interest has been aroused by the United States Government's new "mystery" plane and its robot pilot. The sudden resignation of the commanding officers was not considered likely to cause suspension of tests. They merely added to the mystery. Recent test flights have indicated that the secret invention which the navy department is testing will work efficiently under varied conditions and at the first sign of decent weather conditions the plane is scheduled to be taken on a 2,400-mile flight over the Pacific to Hawaii. The ship, shown above in flight, has a visual radio direction-finder which can pick up the instructions broadcast by radio compass sending stations and give the pilot the angulation necessary to follow a specific course. The instrument is hoop-shaped and automatically registers when the plane strays sufficiently from the course to deflect the radio waves. The robot pilot enables the pilot to set the course without having his hands on the controls. Perfection of the two instruments suggests the enormous possibilities of automatically controlled planes. In time of war, it had been suggested that bombing planes and their deadly cargo could be directed over enemy territory without hazard to the human pilot back at the control station.

LONDON PREPARES FOR GREAT JUBILEE CELEBRATIONS

The above picture shows stands being erected in the Mall, London, in preparation for the Jubilee procession on May 6, when King George celebrates the twenty-fifth year of his reign.

BRITAIN MAKES ANOTHER BID FOR THE SPEED RECORD

One of the big British railway companies has built a secret streamlined locomotive with which they hope to set new records for speed. Here is shown the strange engine in comparison with another of the regular type. Note the peculiar bullet-nose of the engine.

SHE IS TOO SHY TO SUE SALLY RAND

Rosita Royce, who timidly says she is the only bubble dancer who wears no costume at all, but that she would never, never think of suing Sally Rand, even if Rosita did copyright the idea last year. A Sunday school girl from Kansas City, she shyly says she thought of the balloon dance when she was only ten—but has been too shy to come right out and say so until now.

EPISODES IN THE LIVES OF THE ROYAL FAMILY

Here is another happy informal picture of the Queen and three of her sons spending a holiday in the Highlands of Scotland. Reading from left to right, Duke of Gloucester, H.M. the Queen, the Duke of York and the Duke of Kent.

"No Rough Roads for Studebaker Champion"

You are invited to give the new 1935 Studebaker a third-degree road test, which proves the smooth ride.

"Play Your Hunches" Advises Movie Star

Maureen O'Sullivan Rides to Success on Many Impulses She Had; Laurel and Hardy May Fail Now They Are Split Up

The Times Staff Correspondent

Hollywood, April 6.—Play your hunches and you come out all right in the end.

That is the advice of Maureen O'Sullivan, winsome Irish actress who during last year has developed into one of Hollywood's most promising starlets.

Ever since she can remember Maureen has been guided by that inner voice which might be termed either a hunch or an impulse. And so far, at least, everything has come out all right for her. However, she does not take that as an indication that she is particularly lucky.

"I think there is a lot of reasoning behind every hunch," she contends. "Only we come to our conclusions before we are conscious of having done any reasoning. If you think back over the hunches you have played, you will see that there was definite reasoning behind every one of them.

"I know that has been the case with me. I seldom have stopped to figure out anything. I have either done things or refused to do them as the impulse hit me.

"Yet as I look back, I can see that there must have been considerable reasoning behind all my decisions. Otherwise I couldn't have been right so often.

"So far, I have followed only one impulse without reason and I don't know yet how that's going to come out."

ROMANCE INVOLVED?

While she would not say any more about that hunch, I have a slight suspicion that it is connected in some way with her romance with John Farrow, screen writer. And that is a subject which she prefers keeping to herself.

Only once during the half hour or more that we chatted in her studio dressing room did she mention his name. And that was when she gave one of the reasons she really wants to make good.

"I've been awfully lucky since I've been in Hollywood," she remarked. "I never really cared until last year whether I went to the top or not. So long as I worked occasionally and earned enough money to get along on I was content.

"My tastes were very simple, too. I don't know how I even stayed in the business. But now I really want to make good for Johnny and the children I hope to have some day. I want them to be proud of me."

Along with her serious thoughts about her career, Maureen also has developed a few equally serious ideas about her personal life. She decided that she could not devote all her time for playing and yet, as she puts it, "I get awfully bored with myself when I'm not busy."

So she took up sewing, and found that she could do really nice things. She also discovered that she had some latent talent for sketching and is developing that. In addition, she has taken up gardening and found it quite interesting.

BREAK BAD FOR COMICS

The recent split between Laurel and Hardy, brought about because the smaller member of the team refused to sign a new contract, has given rise to plenty of speculation as to just what will happen to these comics.

Hollywood's experience in the past has been that it is disastrous to split popular comedy teams. Raymond Hatton virtually dropped out of sight after his break with Wallace Beery, and Wally went forward as a dramatic actor rather than a comedian.

Wheeler and Woolsey found that they could not make a go of it individually and went back together again. Neither Karl Dane nor George K. Arthur could make any headway after they were broken up. And Polly Moran has done practically nothing since her highly successful teamwork with Marie Dressler.

Laurel started to work at the Hal Roach studio seven years ago as a writer at $50 a week. A year later Roach made him an actor and teamed him with Hardy. Together they have made fortunes for both themselves and Roach. But if precedents mean anything, they will have tough sledding when they attempt to go together.

FINE SINGERS AT THE EMPIRE

Male Ensemble Is One of Many Features With "Georgia Minstrels"

Some splendid singing by a male ensemble, clever tap dancing and some real "darky" humor are features of the revue presented by the "Georgia Minstrels," which opened at the Empire Theatre yesterday, and will show again for the last times this evening. This troupe, which has been famous in America for many years, has lost none of its original charm and finish.

There are forty members of the company. Dressed in their smart and colorful uniforms, they provide a smart entertainment. In the background is a brass band, which lends much to the programme.

There are some fine voices with this company. Several of the men are soloists. The ensemble of ten voices sings such favorites as "Two Tickets to Georgia," "Stay As Sweet As You Are," "Lazy Bones" and "Silver Threads of Gold."

The finale of the revue shows a scene on a plantation in sunny Georgia. The men are dressed as farm hands and sing a number of favorite negro songs and spirituals. The harmony is most pleasing, and in a number of the songs the boys sing without accompaniment. In this scene the members of the brass band march on to the stage in the colorful yellow and green uniforms in which they have been seen on the streets of the city.

Lasses Brown and Tim Owsley are two of the end men.

Develop Black White Colors

Josef von Sternberg, Director, Not in Favor of Present Rush For Color

Hollywood, April 6.—With Hollywood more or less committed to the advancement of color pictures, the sole protestant is the original-minded, Josef von Sternberg, who advocates a more liberal usage of grey.

The sets for his latest picture, "The Devil Is A Woman," starring Marlene Dietrich, show an inventive flair startling in its effect. The walls, the floors, and sometimes the furniture are of a greyish tone, with only the costumes of the actors and actresses lending color to the general scheme.

The camera, says this noted pictorialist, is limited to the photographing of blacks and whites, and so, in a sense, he is utilizing this limitation to heighten and aid the camera's natural response.

His idea is that the use of color in sets gives false values which the camera interprets, not as the eye sees them, but as they must ultimately appear—in black and white, with variations in different tones of gray.

A rather startling example of this new technique was observed the other day when von Sternberg was directing a scene in a quaintly crowded city street which peopled some 350 extras, goats, fighting bulls, chickens and flocks of geese and pigeons.

COSTUMES CARRY COLOR

Nearly everything was in grey; the animals and birds were chosen for their color and many of the extras were clothed in neutral costumes. At balconied windows hung vines which von Sternberg himself sprayed with a half-white paint "to make them photograph as they appear to the eye." The only things of real color in this vast setting of grey were the costumes of Miss Dietrich and Lionel Atwill.

Although he has gone to the extreme of camera "monotone" von Sternberg is convinced of the value of color. "When the camera is developed to the point where it responds to color as the eye does, then I would be the first to make use of it.

"But we are concerned now with an art that expresses itself only in tones of black and white and so it seems practical to me that we should do something about co-operating with this medium of ours—not handicap it."

ACT ON IMPULSE HER ADVICE

If one accepts the word of Maureen O'Sullivan, famous movie actress, shown above, her success in films is the result merely of a series of hunches. She played them as they came, and she won. Of course, there is always some reasoning back of her hunches, she admits, and perhaps some acting ability and personality.

Film-making Is Fragile Work

Film Producers Exercise Great Care in Producing Pictures

Hollywood, April 6.—No watchmaker frets more with delicate mechanism, nor does a horticulturist nurture a rare plant with greater tenderness than a successful film producer exercises care during the production of an important motion picture.

The producer, in fact, deals with the world's most fragile creations—human beings when they are under high emotional stress, striving to emulate and simulate, for the periods they are before a camera, other characters than their own.

Unlike mechanic or gardener, the film producer cannot rely altogether upon his own skill. The moods and dispositions of an army of people decide the duration a picture will be in production, and every day is a costly one during a production's shooting time.

Incidents that occured through the making of "Mississippi," may throw some light on the circumstances over which a producer has little or no control. And it should be borne in mind at the same time that work on this picture as a whole progressed normally.

To begin with, the studio assigned Irvin Cobb to double as sort of a technical advisor during the filming of certain sequences, the author and humorist being regarded as somewhat of an authority on Mississippi lore and legend.

Such detail as bindings on cotton bales during 1860 set "Mississippi" company into a turmoil when Cobb said jute and rope, rather than metal bands, were used.

When a dispute of this kind arises during production of a big feature the wary producer usually finds out for himself. That is the reason why the metal bands remained on the bales, despite Cobb's criticism.

Star illness or disability is, however, the first degree worry of every producer. Without a principal player production of a story for which he is tightly knit virtually comes to a dead halt.

The studio encountered this difficulty when it had barely gotten "Mississippi" under way. W. C. Fields was afflicted suddenly with a hoarseness which reduced his speaking voice to a mere whisper. Despite the marvelous ingenuity of electrical scientists, the higher and lower frequencies of sound recording apparatus were unable to blow Fields's crippled diction into a volume which would have been audible to a theatre audience.

Director Edward Sutherland, fortunately, was able to continue sequences featuring Bing Crosby. This work tided the "Mississippi" company over until within a few days of Fields's recovery.

By a twist in another direction "Mississippi" realized a good break. Prominently cast in the role of a Mississippi belle, Gail Patrick made use of her natural southern accent. In other pictures Miss Patrick had regarded this as a handicap.

Movies Demand Many Big Meals

When Pictures Demand Gluttony Even Starving Extras Rebel

Hollywood, April 6.—More than one audience has left the theatre hungry after witnessing an epicurean banquet served in royal style on the screen. And this happens to be one time when the producer calls on the caterer and not his property man. If it is lobsters which the actors are to be shown eating then it must be lobsters, and nothing else.

Extras, the thousands of actors and near-actors who abound in Hollywood and work seldom, consider participating in a banquet scene a veritable "strike" of movie good luck. It means that they get a fresh meal of the best and sometimes rarest of foods, including huge tureens of caviar, and such delectable French tidbits as escalls.

But eating, even for extras, becomes drudgery, and painful, when the act has to be repeated immediately.

Some thirty players were instructed recently to sit around Claudette Colbert and Joel McCrea at a festive board which Walter Wanger, producer, constructed for his latest picture, "Private Worlds."

This was an ordinary meal they were scheduled to eat—huge batches of scrambled eggs, sausages, coffee, etc.

Miss Colbert and McCrea, having previously enjoyed ample breakfasts, nibbled gingerly at the studio food. But the extras, as usual, heaped their plates.

Just when everyone had enjoyed a surfeit, and all of the food had disappeared, Director Gregory La Cava decided the scene would have to be re-photographed.

New piles of grub were soon heaped up.

"All right! Eat now, and eat heavily!" LaCava shouted.

And the suffering extras ate! But hardly heartily.

CLOSEUP and COMEDY

by DAN THOMAS — GEORGE SCARBO

DURING HIS SCHOOL DAYS WILLIAM BAKEWELL WAS REGARDED AS A GREAT FOOTBALL PROSPECT, BUT SINCE TAKING UP ACTING HE HAS BECOME ONE OF HOLLYWOOD'S BEST TENNIS PLAYERS.

ELD. HEGGIE BORN AND RAISED ON AN AUSTRALIAN CATTLE RANCH, HAD TO TRAVEL 1,000 MILES TO SYDNEY, WALKING PART OF THE WAY, TO START HIS ACTING CAREER.

JOSEPHINE HUTCHINSON, BEST KNOWN AS A STAGE ACTRESS, WHO SUCCUMBED TO THE LURE OF THE SCREEN, ACTUALLY STARTED HER ACTING CAREER IN PICTURES, APPEARING IN A MARY PICKFORD FILM AT THE AGE OF EIGHT.

WILL ROGERS AT CAPITOL

Famous Actor Has Lead in "Life Begins at 40," From Pitkin Success

Homely wit, as humorous as any that Will Rogers himself creates as America's home-spun philosopher, bestows his newest Fox Film picture, "Life Begins At 40," the fun-shaken comedy that comes to-day to the Capitol Theatre.

The cowboy-star is cast as a droll country newspaper editor who injects big-time excitement into small-town folk. He throws the strong light of hilarity and good sense on friend and foe-alike.

From his mouth come some apt gems on life, love, politics, square shooting, contentment.

On age, Will Rogers says in "Life Begins At 40," that "when you get to be forty, your mind sort of begins to chew its cud. You stop going off half cocked and learn moderation. That's when you begin to live."

The humorist adds: "At twenty, we don't care what the world thinks of us. At thirty, we worry about what it thinks of us. At forty, we're sure it doesn't think of us."

"Life Begins At 40" was suggested by the Walter B. Pitkin book success.

Direction is by George Marshall, the production by Sol M. Wurtzel, and the screen play by Lamar Trotti.

Around Will Rogers is grouped an unusual cast, made up of Rochelle Hudson and Richard Cromwell in the juvenile romantic leads, George Barbier, Jane Darwell, Slim Summerville, Sterling Holloway, Thomas Beck, Roger Imhof, Charles Sellon, John Bradford and Ruth Gillette.

COLUMBIA THEATRE

Eugene Pallette has played the role of Sergeant Heath, Philo Vance's ambitious co-worker, in every filmization of an S. S. Van Dine murder mystery. The newest is First National's production of "The Dragon Murder Case," now showing at the Columbia Theatre with Warren William as Philo Vance.

DOMINION THEATRE

Louise Fazenda, after her strenuous comedy role in "The Winning Ticket," had hoped for a rest in the desert sun at Palm Springs. She moved to the popular resort but was barely settled when she was suddenly called back to Metro-Goldwyn-Mayer studios.

Her indispensable brand of comedy was needed for the S. S. Van Dine's detective thriller, "The Casino Murder Case," which opened yesterday at the Dominion Theatre, and which presents Paul Lukas as Philo Vance.

In this new film Miss Fazenda portrays the hilarious maid in the Llewellyn household and matches her comedy with Ted Healy as the bewildered detective sergeant, and Leo G. Carroll as the butler, "Smith."

PLAYHOUSE THEATRE

Rian James, famous novelist and columnist, now a motion picture producer, under Carl Laemmle, Jr., believes firmly in luck, so he arranged to have his wife Diane Corday, cast in a small role in "Gift of Gab," starring Edmund Lowe, now being shown at the Playhouse Theatre.

James explains that he has had published eleven books and novels. Nine he dedicated to his wife, and they sold for motion pictures at high prices. Two, he did not dedicate to her. They were commercial flops. Now, he wants to start his producing career off right by giving her the role.

Movie Star Has Unusual Voice

Experts Fooled By Isabel Jewell; High Voice Records Well

The Times Staff Correspondent

Hollywood, April 6.—Because of the very perverseness of human nature, one of the greatest enjoyments we get out of this life is accomplishing the seemingly impossible.

That is why Isabel Jewell takes such delight in her screen career. Isabel has been doing what experts say can not be done, and doing it so well that even the experts admit that she is good.

Ever since the voice was introduced into motion pictures, sound recording experts have contended that extremely high voices cannot be reproduced without getting an annoying rasping quality. They still stick to this contention despite the fact that Miss Jewell has proved them wrong.

In fact, they are so set on this rule that the average screen candidate with a high voice loses her chance the moment she steps before a microphone.

According to Douglas Shearer, head of the sound department at the Metro-Goldwyn-Mayer studio, the average effective voice for a girl ranges between 500 and 800 cycles. Garbo's is at 500, Joan Crawford's 800, and Norma Shearer's 600 cycles. From there we jump away up to 1,700 cycles for Isabel's usual speaking voice.

Yet, during the last year, this diminutive blonde actress has forged steadily ahead in popularity. Try as they might, sound recorders cannot find any fault with her voice. Despite the fact that it shatters all their rules, it records as clearly and perfectly as Garbo's.

• • •

ONE IN 100,000

Miss Jewell made her debut on the screen in "Blessed Event," along with her erstwhile boy friend, Lee Tracy. Sound engineers literally worried themselves sick every time she opened her mouth. They were sure that each new sentence would bring the unwelcome rasping tone. But it never came.

And when the picture was released, it was discovered that audiences liked her high-pitched voice and comedy mannerisms. As a result, she has continued to play in one picture after another, her most recent being "Times Square Lady."

STARS FAR FROM FAME ONLY TEN YEARS AGO

Famous Artists Had Hardly a Thought of Success on Screen, When One Looks at Them a Decade Back

By DAN THOMAS

Hollywood, April 6.—What has happened to the stars of ten years ago?

There's scarcely a week when I am not asked that question at least once. Everyone, it seems, wants to know what has happened to Phyllis Haver, Billie Dove, Bessie Love, Monte Blue, Johnny Hines, Alice Day, Blanche Sweet and numerous others.

Yet, strange enough, few persons stop to wonder what Janet Gaynor, Gary Cooper or other stars of to-day were doing ten years ago. And some of those stories are just as interesting as the former.

For instance, Kay Francis was cavorting around Europe, having just divorced her second husband, William A. Gaston. At that time she had no thought of entering pictures.

Sally Eilers was a naive red-headed girl attending Fairfax High School here.

STRUGGLING ALONG

Joan Blondell was making a cross country tour with her parents in a second-hand Ford. At that time she worked spasmodically in a vaudeville act with her parents.

Ruby Keeler and Barbara Stanwyck were attending the same high school in Brooklyn.

Dick Powell was collecting nickels from telephone pay stations for the Little Rock, Ark., telephone company and planning on getting married.

THOUGHT HE WAS TOP

Guy Kibbee was earning forty dollars a week playing in midwest stock companies and was convinced that he had reached the top of his acting career.

Janet Gaynor had just quit working in a San Francisco bookstore and was trying to get a job as an extra in Hollywood.

Dolores Del Rio was a Mexico City society bride who didn't know a single word of English.

And so it goes. Right now a lot of people are wondering what will have happened to these stars ten years hence. And in 1945 movie fans will say, "I wonder what has happened to the stars we used to see ten years ago?"

PROFITABLE INVESTMENT

Two years ago Henry East bought a kitten in a pet shop for twenty-five cents. To-day that same cat, now able to do all sorts of tricks, earns from twenty-five to fifty dollars a day for its owner by working in the movies. It made such a hit in "Chasing Yesterday," just completed, that R.K.O. executives have offered it a long-term contract.

HAPPY BIRTHDAY!

Easter Sunday will be the ninth birthday of the screen cartoon character, Oswald the Rabbit. Walt Disney created Oswald for the Universal studio in 1926, getting his inspiration from two bunnies he saw in a store window. A short time later Disney left Universal to go into business for himself. That's when Mickey Mouse was born.

TOO HOT FOR SAFETY

Because it was raining the other day, "The Crusades" troupe had to move from its outdoor set to one of the studio stages for some interior shots. Scores of Arabs, all carrying torches, were needed for the scene. Twice they went through their paces while the cameras ground away. But still Director Cecil B. DeMille was not satisfied.

"Do it again," he ordered. Just then the automatic sprinkler system on the stage went off, the heat from the torches having been too much for it.

For a moment panic reigned. It was fairly pouring outside and an equal amount of water was coming down inside. DeMille bellowed through his megaphone to restore order. When he finally succeeded he said, "There's less water outside—you'd better go out there."

A GIVE AWAY

A set representing the patio of the hotel at Agua Caliente was used for many of the scenes of "In Caliente." But still studio executives felt that they should get more use out of it. So the wall decorations were altered slightly and it was used for a Florida hotel patio in "Alibi Ike."

I hope those films don't happen to hit the same double bill anywhere!

CHILDREN LOOK ON

Joan Bennett's little daughters, Melinda and Diane, had a joint birthday party, so Joan presented them with a miniature merry-go-round replete with zebras, horses and tigers. The machine is operated by electricity and is strong enough to hold adults. So Joan has been using it almost exclusively to entertain her guests.

VICTORIA, B.C., SATURDAY, APRIL 6, 1935

Merriman Talks

TRESPASSING on the preserves of Louis the Farm Page Editor and that new feature in The Times "Your Garden and Mine," I would like to refer back to a paragraph a few weeks ago of how the Welsh of Victoria honored, or dishonored, two fellow countrymen—Jack Price and Tom Uphill—in the B.C. Legislature by presenting them with bouquets of leeks on St. David's Day.

It was a touching little tribute of appreciation from Welshmen to two members of their country who have risen to the height where they help mold the future of the land of their adoption.

Mr. Price and Mr. Uphill beamed with pride.

Mrs. Dorothy Steeves, Rev. Robert Connell and others in the neighborhood of the two Welshmen writhed in misery

Mayor G. C. McGeer reproved his Labor friend and, as the aroma of the leeks spread in his direction, wondered why Mr. Uphill had not submerged the Welsh part of his nature to the Irish and waited for shamrocks on St. Patrick's Day.

Other members wished the friendly Welsh people had remembered that the daffodil stands as a Welsh emblem even more important than the leek—and smells quite different.

MISS NELLIE McCLUNG
She grows her onions.

ONIONS

ALL OF which leads up to the point, without getting technical, that no matter what you call it a leek is still an onion, and onions form the topic of discussion this week.

Perhaps on the Farm Page this week gardeners will be told and advised how to grow onions. This may sound like an absolute breach of professional etiquette, and all that, because Louis has been through agricultural college and knows all about it, but my advice is Don't Grow Onions Yet, whatever he advises.

Gardening Time.

VALLEY OF ONION BREEZES

DON'T BEND your back to the spade this week to prepare the onion bed. The market is going to be flooded.

As Holland is the Land of Tulips, Portland the City of Roses, Japan the Country of Orange Blossoms, and Santa Clara the Paradise of Prunes, so will Victoria soon be the Valley of Onion Breezes.

From inside information secured by reading an article by Nellie McClung, the well-known Canadian authoress, written for The Vancouver Province, I am able to inform you that pretty soon from the sunny slopes of Gordon Head the gentle aroma of onions will be wafted from the countryside down Government and Douglas Streets to greet tourists as they arrive at the inner harbor from the four corners of the globe; or to lull citizens to sleep as they enjoy the balmy spring atmosphere in easy chairs on their front verandas.

"A Little Breeze of Onion on the Shores of the Pacific" will replace our well-known slogan "A Little Bit of England on the Shores of the Pacific."

OLD WORLD CUSTOM

MISS McCLUNG is no ordinary gardener like the English, Scotch and Irish in Victoria who grow a few onions for the springtime to perpetuate the Old World supper custom of bread and cheese and Coco Cola before retiring at night.

She is a gargantuan onion grower. Her onions will be grown by the acre.

On the great broad acres of Gordon Head this famous authoress is realizing a girlhood dream.

"For years," she says, "I have cherished a secret ambition buried deeply in my heart, and only thought of in my wildest moments of imagination. It seemed so far away and unlikely of fulfillment. But to-day, March 1, I have made a start. I am eighteen rows nearer than I was this morning to my goal and have definitely embarked on this career I now feel free to speak about. I would grow onions—acres of onions."

Inhaling the onion breezes.

TEARS AND MORE ONIONS

THEN, APPROPRIATELY enough for an onion rancher, Miss McClung brings tears to one's eyes as she tells of her girlhood days in Manitoba and how her heart always inclined towards onions.

She stresses the importance onions played in those days in Manitoba in the school dinner pail.

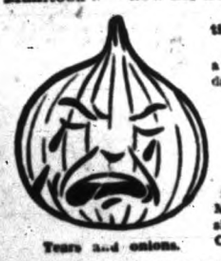
"It has been said," she comments, "an apple a day keeps the doctor away, but an onion a day keeps everybody away."

That was not so in Manitoba, she points out.

"Onion ostracism" was unknown in that great province.

Everybody ate them in self defence.

Then, after further rhapsodies on her onion ranch on the sunny slopes of Gordon Head, Miss McClung expresses longing for the day when she can conscientiously sign herself "Nellie McClung, Onion Grower."



Tears and onions.

A KINGDOM FOR A BURBANK

AND BEFORE this onion plantation of Miss McClung's dream makes itself felt or smelt throughout the capital city of British Columbia, may we echo the verses which Frank Giolma tells me everybody knows, but which I never heard before.

Oh would some Burbank of the west
Possess and plan well
An onion with an onion taste
But a beautiful violet smell.

BRIDGE TECHNIQUE

THAT WILL conclude our gardening article this week. We will now put the tools away and get ready for a lesson in bridge.

The lesson is cribbed from "Club Clippings."

The custom of workers in big stores getting out their own miniature newspapers is growing. Members of Spencer's Sport and Social Club publish Club Clippings.

The club was well advised when it reappointed Bert Simpson editor. He makes a good job of it.

Besides the store and club news Bert runs a bridge column. Here are his lessons:

1. Pick up your cards as dealt. You will be ready to bid ahead of the others.
2. If your hand is rotten, mention it. It will guide your partner in his bid and play.
3. If your partner bids first, don't hesitate to raise; he has to play it.
4. Never hurry; try several cards on a trick until you are sure which one you prefer.
5. Occasionally ask what is trumps. It will show you are interested in the game.
6. Don't show lack of interest when you are dummy. Help your partner out with suggestions.
7. Walk around the table when you are dummy and look at the other hands. Tell them what cards are good and how many tricks they can take if they play right.
8. Talk about other subjects during the game. It makes for good fellowship.

Lee, if this doesn't fill a column you will find in the left-hand drawer in my desk more poetry and comments on Jews, Scots, and bagpipes. Don't use it unless you have to. I am going fishing with a chip on my shoulder. Did a serious bit of work to fill this space for this week about a deserter from the French Foreign Legion. The Mag.Ed. put it away in another part of the paper and left me high and dry to write about onions. Apparently anything with sense in it doesn't get by in this space.

(If he catches a sand dab he will take a close-up picture and write a talk about a battle with a giant skate—Les Colton).

Gleaner: If I send your manuscript back as requested it wrecks next week's line-up, but thanks for the three-cent stamp.

German Military Might Returns In Two Years of Hitler Rule

Old London to Sparkle For King's Jubilee

During the two-month celebration of his monarchial silver anniversary, King George V of England will be greeted everywhere by huge electrically lighted crowns like that above, hundreds of which have been prepared. At left the bust modelled by Lady Hilton Young will be unveiled during the festivities. He is shown at right in 1910, the year he was crowned.

Special Correspondence of The Victoria Daily Times

LONDON.

THIS old gray city will become a sea of flags by day and a gem of light by night for two whole months beginning May 6.

It will know a gayety, prosperity, tiveliness and boom such as it has not seen for many decades. Princes and potentates, generals and admirals, soldiers, sailors and airmen, diplomats and statesmen, delegations from the four corners of the globe will be wending their way to London as the focal point.

The reason will be the silver jubilee of King George V's accession to the throne of Great Britain. For the younger generation of Britons it will be the first of its kind they have seen. For the older people, it will bring reminiscences of the golden and the diamond jubilees of Queen Victoria, grandmother of the present king.

GAVE PREMIERS TROUBLE

KING GEORGE is nearing seventy and so is older than his grandmother was when, in 1887, she celebrated the fiftieth anniversary of her accession to the throne. There is another difference between then. Queen Victoria was revered as an institution. King George is loved as a man. With all her many qualities as a ruler, Queen Victoria never quite understood the changes that had come over the world. She never quite grasped the idea of being a constitutional monarch. She was apt to insist upon having her own way.

Palmerston and Gladstone both had their difficulties with her. If her favorite Prime Minister, Benjamin Disraeli, Lord Beaconsfield, had no such trouble it was because of his cleverness. He once said his bitter rival, Gladstone, addressed the Queen as if she were a public assembly. He himself spoke to her as a woman.

In contradistinction to his grandmother, the success of King George has been that he has been a perfect constitutional monarch. He has never overstepped the line. He has never rowed with his ministers, be they Tory, Liberal or Labor. He has heartened to the voice and mandate of the people. He has lived the life of a modest middle-class English family man and has thus appealed to the good will of his subjects. He has seen thrones topple all around him and to-day is on his own more firmly established than ever.

SAW THRONES TOPPLE

WHEN HE was crowned King, he became one of the big four who reigned over the mightiest kingdoms in the world. The others were his first cousin, then Kaiser Wilhelm II of Germany, his other first cousin, then Nicholas II of Russia, and the aged Franz Josef, emperor of Austro-Hungary. To-day the Czars are no more and Stalin rules Russia; the former Kaiser, aged seventy-five, lives in exile at Doorn, Holland, and Franz Josef lies in his grave; and the Austro-Hungarian empire has been torn to pieces, with the last of its rulers, Emperor Karl, dying in exile.

When George V came to the throne, most of Europe had dynastic rulers. To-day a large part is either republican or under dictatorships. Only one reigning ruler is older than he and that is the King of Sweden, who is seventy-five. Only two have reigned longer than he—King Victor Emmanuel of Italy who came to the throne in 1900, and King Gustaf V of Sweden, who became ruler in 1907.

PROGRAMME IS STRENUOUS

THE CELEBRATIONS in the King's honor will start on his accession day, May 6, when he and the Queen will drive in state to be present at thanksgiving services at St. Paul's Cathedral. The drive to and from the church has been so designed that the maximum of people may see him. That same evening the King will broadcast a message to be sent throughout his empire. Boy Scouts will light bonfires all over the kingdom and all the big public buildings of London will be flood-lit.

For the days and weeks following this, a programme has been laid out which will test the King's endurance to the full. May 8 he will receive the diplomatic corps and the representatives of the empire at Buckingham Palace. May 9 in the morning he will drive to Westminster Hall to receive a congratulatory address from both houses of Parliament and that night will give a state dinner at Buckingham Palace.

MAY 11 IS KINGDOM DAY

ON MAY 11 the other parts of the United Kingdom will have their share in the ceremonies. The Prince of Wales will, as it is fitting, represent the King at the Welsh town of Carditff, while the Duke of York represents his father at Edinburgh and the Duke of Gloucester at Belfast. On the previous Sunday, May 12, there will be thanksgiving services in all the churches in the kingdom. A state ball will be held at Buckingham Palace May 14.

On May 20 there will be a second state dinner at Buckingham Palace and May 22 the King and Queen will go to a reception and ball at the Guildhall tendered them by the Lord Mayor and corporation of the city of London. May 31 the King will hold a levee at St. James's Palace and June 12 there will be a second ball at Buckingham Palace. July 9 there will be an investiture at the Palace, and July 10 there will be another. July 13 he will review the army at Aldershot, and July 16 he will review the navy in a grand display at Spithead. July 20 he reviews the London police at Hyde Park and July 25 he gives a huge garden party at the palace.

But there is one part of his programme especially designed for just the plain folks. The King has always considered himself a Londoner and he wants to see as many of them as possible. Therefore, weather permitting, he and the Queen will drive through four different large sections of London on four successive Saturday afternoons when the people are not at work—May 11, 18, 25 and June 8.

Step-by-step Advance Toward Power Revealed

Adolf Hitler . . . he dreams of greater achievements in the third year of his iron rule over Germany.

Special Correspondence of The Victoria Daily Times

LONDON.

ADOLF HITLER in two years has reconverted Germany into a first-class military power.

On March 23, 1933, in a turbulent session, the Reichstag, with only the Socialists opposing, granted Hitler's demand for four years of dictatorial power.

Since that day, Hitler's course, viewed in retrospect, reveals with crystal clarity how his policies ever have aimed at the one great goal.

First, rival parties were crushed, making Nazi rule absolute.

Military ardor was rekindled, and a great war machine again forged.

Membership in the League of Nations was dropped, when demand for equality was rejected.

The Saar was won back, after fifteen years, in an epochal campaign.

Proclamation was made of universal military conscription and the Versailles treaty scrapped.

Momentous events these, and step by step the forward march of Germany is clearly traced in a review of the two years that have elapsed since Hitler seized the helm:

1933

March 23. — Reichstag passes empowering act granting Chancellor Hitler's demand for four years of dictatorial power.

March 27. — Enabling act scraps Weimar constitution, making chancellor supreme over cabinet; eliminates Von Hindenburg's participation in law making.

April 1.—One-day boycott of Jews ordered as protests pour in from all over the world against alleged atrocities.

April 2.—Ban on Communist party legalized.

April 27.—Equality of offensive as well as defensive weapons demanded at Geneva disarmament conference.

June 1.—National Socialist party made only party in Germany, other parties forbidden, members barred from government key posts.

June 7.—Four-power ten-year pact signed by Germany, Italy, France and England.

June 22.—Socialist party banned, funds and property confiscated.

July 4.—Berlin announces that Catholic centrist, Bavarian People's, Populist and Young German parties will disband.

Oct. 14.—Germany withdraws from disarmament conference and League of Nations.

Oct. 18.—Germany outlines military demands, including Reichswehr of 300,000, forts comparable to those of France, right to fortify right bank of Rhine, possession of military aviation units and heavy guns.

Nov. 12.—Support of government's withdrawal from League and arms parley supported by vote of 92 per cent of 44,400,000 citizens.

Dec. 12.—First all-Nazi Reichstag meets in Berlin, organizes, transacts some business, and adjourns sine die—all in ten minutes.

1934

Jan. 26.—Peace pact signed with Poland.

Feb. 2.—All monarchist organizations dissolved.

March 29. — Military and aviation budgets increased from 423,000,000 marks to 785,000,000 marks.

April 16.—Note to Great Britain refuses return to League until equality demands are met.

June 14.—Moratorium proclaimed on foreign debt payments, including Dawes and Young plans, effective July 1. Hitler flies to Venice and confers with Mussolini.

June 30.—Hitler "purges" ranks of Nazis. Scores slain.

July 25. — Chancellor Dollfuss of Austria slain; Germany denies charge of aiding plot.

Aug. 2.—Paul von Hindenburg, president of Germany, dies; Hitler takes over power.

Aug. 19.—By vote of 9 to 1, German people authorize consolidation of offices of president and chancellor in single leader-chancellor, Hitler.

Sept. 11.—Foreign trade put under government control, by license system.

1935

Jan. 13.—Saar, in plebiscite, votes heavily in favor of return to Germany.

Jan. 30.—All German municipalities [illegible]

March 16. — Germany introduces universal military conscription, scraps Treaty of Versailles.

* * *

HITLER goes into his third year ringed round with implacable foes, among whom fear and enmity have grown since March, 1933. He has lost a friend in Italy and seemingly gained one in Poland. Russia is out in the open, bitterly denouncing Hitler's ambition to expand eastward. On the other hand, there is rumor that Japan secretly has been won over to Germany's side.

War is not the only danger that the dictator faces. Economic conditions in Germany are critical, Hitler's glowing promises of rehabilitation largely unfulfilled. But for the moment this is in the background, as an exultant nation shouts, "We are free at last."

Chief Scout Coming

In the Art of Making Good Use of the Odd Moments Most People Waste; Baden-Powell Has Excelled

SEVENTY-EIGHT years ago a great man was born — a man whose name and works are enduring.

He is Lord Robert Stephenson Smyth Baden-Powell of Gilwell, who is coming to Victoria next week on his world tour.

Most of his four-score of years he has filled to the brim with worthwhile activities. He has excelled in many things, but most of all in the art of making good use of the odd moments that most people waste.

He is one of the mountain-top personalities of the age, one of the leaders of humanity who has made a great contribution towards the betterment of the race, notably in teaching the boys and girls of the world to get out of doors, to hike, to camp, to observe nature, to look up, around and wide and, above everything else, to realize that the greatest joys in life come from "happifying" other people.

BADEN-POWELL . . . seventy-eight years' brimful of worthwhile activities.

WIT QUICKENED AT CHARTERHOUSE

London was the Chief Scout's birthplace. He was the sixth son and the eighth of ten children of the Rev. Prof. Baden-Powell by his third wife, Henrietta Grace. When he was three years of age his father died. At thirteen he became a pupil at the famous Charterhouse School, of which Dr. Haig-Brown was headmaster. At that school he learned many things which had an important influence on his career. For example, outside of the Charterhouse grounds, in a nearby copse, he learned to snare and cook rabbits, and to hide in a tree when Redskins were about in the shape of Masters looking for boys out of bounds.

At nineteen he tried and passed an open examination for a direct commission in the Army and the next September left for India gazetted as a sub-lieutenant in the 13th Hussars

EARLY TRAINING FACTORS

IMPORTANT RESULTS came from his early training:

Acting — He says he is convinced that the training through play-acting which was almost insisted on by Dr. Haig-Brown at Charterhouse, has been of great value to him. With this start he soon developed a remarkable ability in disguising himself, resulting in many mirth-provoking incidents.

On one occasion, in India, a regimental concert was in progress when in walked a general and proceeded up the aisle telling the men loudly to sit down, at which seeing their important visitor, they naturally stood up. Colonel Baker Russell, sitting in the front row, rose hurriedly, came forward to greet his unexpected guest and led him to a seat. The General proved to be a jolly old chap, and before sitting down, turned to the crowd and said that he was ready to join in the fun and would even go on the stage and sing them a song if they wished. There was a roar of approval and the visitor was half-way through the "Major-General" song out of the "Pirates of Penzance," when the colonel realized that he had been "had" and that it was his subaltern Baden-Powell. It turned out that the colonel had not yet met a certain general in Kandahar and B.-P. had actually succeeded in borrowing the general's uniform from a friendly A.D.C.

Music—He lays great stress on the value of music in one's life. He quite early learned to play several instruments and was in the orchestra in Charterhouse. In justification of the many droll roles played from time to time, for his own amusement and, as he says, in happifying others, he quotes Horace Walpole, who said: "A careless song with a little nonsense in it, now and then, does not misbecome even a monarch."

Drawing — One does not know Baden-Powell very long without realizing that for him to live is to draw. He is ambidextrous and can draw two different pictures at the same time. He claims that sketching takes one away from the busy haunts of men to the quiet atmosphere of nature and steeps him in the beauties and wonders that God has set out for his enjoyment.

LOVE OF SPORT

BADEN-POWELL has been a sportsman in the truest sense of the word. He calls life a great game and claims that team games such as football, hockey, polo and the like, promote discipline in obedience to the rules and to the captain, and that they develop the British idea of fair play, and playing all out for one's side and not for selfish glory.

Boatmanship—As a boy, with his brothers, he sailed up and down the coasts of England, always waiting for the opportunity to save a ship in distress that they might collect salvage money. Although they never got the money, he claims there is excellent training in boating which teaches a young man to face danger without panic.

Fishing — Where hasn't the Chief fished? In England, Scotland, Canada, Australia, New Zealand and elsewhere. One Sunday morning in Wales, while the guest of Lord Glanusk, he strolled past the boathouse, just before going to church, saw a rod on the rack, and yielded to the temptation to cast a fly into the lovely pool nearby, was surprised at his luck in catching a twenty-five pounder. Within a week he received a document from a religious conference, written in Welsh and English, rebuking him for fishing on Sunday.

Shooting—He loves to shoot but for the pot only. Speaking of elephant shooting he says: "I have always felt that, if one may say so, an elephant is too big and too sacred a thing for a puny man to slay. To kill an elephant seems as great an impertinence as to blow up part of the Tower of London. But to stalk him with a camera, oh, that is a different pair of shoes—the best sport possible. It implies more crafty stalking and as great daring and skill as ever."

SCHOOL OF THE JUNGLE

WHEN PRIMITIVE MAN left his cave his very existence depended on his ability to read his daily newspaper. First, he turned to the social column to see if he had had any visitors, then to the weather report, and finally, down by the water hole, he carefully read the market report.

Baden-Powell noticed that the Zulus and, to a lesser extent, the Boers, had this ability. Accordingly, he set himself the task of learning the tricks of tracking, gaining many bits of knowledge which he is passing on to the Scouts of the World.

In the South African War, it came to few soldiers to rise as rapidly as he. At the early age of forty-two, he found himself a major-general, and at fifty-two had completed his career as a soldier and retired on a pension.

BADEN-POWELL AND BOY SCOUTING

THE CHIEF SCOUT, in a facetious mood, claims to have lived two lives. In one life he was a soldier fighting for his country, and in life number two he has become a determined worker for peace through the Boy Scout Movement.

On his return to England in 1903, he discovered that some boys, and even girls, had been imitating his South African scouting tricks. After discussing the matter with a number of leading citizens, and particularly after a conversation with Sir William Smith, founder of the Boys' Brigade, he decided to work out a programme which would give greater variety in the training of boys for citizenship.

In 1907 he held an experimental camp and later published his book, "Scouting for Boys," in serial form. Scouting was never intended to be more than a programme to be used by everyone engaged in training boys. Under the term "Scout" he holds up for hero worship the best among backwoodsmen, explorers, pioneers and frontiersmen. He has given his Scouts the motto: "Be Prepared," and the slogan, "Do a Good Turn Daily." He asks them promise not to hurt, but to help somebody every day, and to be loyal to God and the King. Every boys' gang must have rules and he has given his gangs a set of laws—a code of chivalry—which include honor, self-discipline, courtesy, courage, a selfless sense of duty, and the guidance of religion.

RALLIES, JAMBOREES, A WIFE

KING EDWARD was interested in Scouting from its beginning and called for a rally at Crystal Palace in 1909, which was attended by 10,000 Scouts.

In 1912 Baden-Powell met and married Miss Olave St. Clair Soames. This has been described by some of his friends as his greatest stroke of genius. Apparently she was the one person of all others capable of helping him in what threatened to become an overwhelmingly large task. Together they worked on the extension and improvement of the Girl Guide movement, which has been almost as successful, numerically and otherwise, as the Scout movement.

In 1916 the junior branch of the movement, the Wolf Cubs, was started. In 1919 the senior branch called Rovers was under way. In the same year, at Gilwell Park, the Scout Training centre, now attended by leaders from all over the world, was presented Scouting by Mr. de Bois Maclaren.

An international Jamboree was held in 1920 and an international office opened the same year. In 1924 the big Empire Jamboree was held at Wembley. Then in 1929 came the "Coming-of-age Jamboree," held at Arrowe Park near Birkenhead and attended by 50,000 Scouts from all over the world.

BOOKS OF THE DAY

Time To Go Ahead

By KENNETH DRURY

A lot of people hope W. M. Kiplinger and Frederick Shelton are right. They are the business writer and economist respectively, who wrote "Inflation Ahead," published by Simon and Schuster, recently referred to in this column. Some readers have asked for a more definite summary of their conclusions. Here they are:

Beginnings of inflation will be apparent late in 1935. Its effects will be active in 1936, with 1937 and 1938 the earliest years of "prosperity." The years 1939 to 1941 will see a new high plateau of business, and after that—well, you may have to turn back to the files of 1927, 1928 and 1929.

It will not be currency inflation as experienced in some European countries, but credit inflation, built on the employment of the huge accumulations of funds now idle.

What to do? Think in terms of borrowing rather than lending. Buy tangibles, good stocks, depreciated bonds, commodities, farm lands and real estate, the latter with qualifications. Good stocks, now hovering around 100 in the Dow Jones averages, will rise to about 200 in the next four to six years. Bonds will rise from a present average of 80 to 100 in 1936. Right now is the time to buy or build a house. The housing boom, lagging through 1935, will start into 1936. In 1937 it will become cheaper to own than to rent. But one must be cautious about other real estate, because of taxes, and the burden of carrying it for some time before income will be possible.

Now at the beginning of the upward move is a good time to go into business, instead of waiting as most men do until the procession is pretty well past. It is cheaper to-day to get equipment and materials than it will be at any time within the next five years.

New Canadian Quarterly

CANADIAN university quarterlies and other periodical reviews have mostly been known as flaccid publications. There has been the feeling that they served chiefly to provide a permanent resting place for academic efforts worthy of preservation, but not particularly vital. Academic efforts that have been outstanding have found space awaiting them in United States and English reviews; others have stayed at home to be embalmed in domestic publications. Exceptions to the general run of Canadian high-brow publications have been the Dalhousie Review and The Queen's Quarterly, the editing of both of which has been marked with distinction.

To the number of scholarly reviews published in this country, the University of Toronto Press is adding "The Canadian Journal of Economics and Political Science," the journal of the Canadian Political Science Association. It is to be under the editorship of C. A. Curtis of Queen's, H. A. Innis of Toronto, R. A. MacKay of Dalhousie, F. R. Scott of McGill and V. W. Bladen of Toronto, all distinguished authorities in the field of political science and economics. With them will work an editorial advisory board on which are to be found outstanding university men from coast to coast.

The appearance of this quarterly is timely, coming when economics and political science are commanding attention as never before, and when the country is starved for accurate information and authoritative leadership in its thinking. The first issue of the journal indicates that vitality and significance, as well as scholarship, are to characterize it, that it is not to be just another review.

Contents of this first issue include eleven pages of "What Is Left of Adam Smith," by Stephen Leacock of McGill; "The Report of the Duff Commission," a twenty-two-page critical analysis of its findings on the Canadian railroad problem by John L. McDougall of Queen's; a twelve-page appraisal of the Dominion Companies Act, 1934, by R. G. H. Smails of Queen's; thirteen pages on "The Rate of Intelligence in the Social Process," by E. J. Urwick of Toronto; twenty-three pages of discussion on "The Ricardian Theory of Production and Distribution," by Frank H. Knight of Chicago; and shorter articles on The Bank of Canada Act, Natural Products Marketing Act, Farmers' Creditors' Arrangement Act, 1934, and current topics.

Brain Truster... Changing Stresses

PROFESSOR W. A. CARROTHERS, British Columbia's chief brain-truster, is the author of one of the new quarterly's major articles, "Problems of the Canadian Federation."

In this Professor Carrothers goes into the whole issue of "better terms" as demanded by the outlying provinces, both east and west, in the Canadian federal partnership.

Facts Professor Carrothers emphasizes include:

Financial arrangements made between Dominion and provinces at Confederation were essentially in the nature of a compromise, and designed to meet the situation as it then existed. However, at that time there was no thought that many of the services now rendered to the community by governments would become necessary. Consequently, the division of authority, both political and financial, in the British North America Act, was based on a form of society and an idea of government which no longer exists.

It is in those functions allotted to the provincial governments where the greatest increase in demand for services on the part of the public has occurred. Consequently, the provinces find themselves in an impossible financial position.

In a federation like the Dominion of Canada — unlike Great Britain, where financial machinery has been created to take care of the requirements of counties, cities and other forms of local government—we operate on a basis of a written constitution which specifies definitely the power and function of the various governments of the federation.

It has now become necessary, in order to meet a changed situation, to make alterations in the constitution. And this is the major problem facing the people of Canada at the present time.

Fundamental weakness of the Confederation financial arrangements was that the amount of subsidy from the Dominion to the provinces was based on population. But the cost of maintaining government services is related not merely to the population, but also to the degree of government intervention that develops under the influence of changing social and political theory. Also, the cost of each of the functions is relatively heavier in a country such as British Columbia, with a sparse and widely distributed population, than where the population is both large and concentrated.

The result of placing the subsidy on a population basis has been to increase the subsidies to those provinces where the increase was least needed, while the increase in the other provinces have not been in proportion to the increased cost of government.

The effect of Canadian tariff policy since 1879 has been to concentrate the manufacturing industry in Ontario and Quebec. Study of the incidence of the Canadian tariff demonstrates, after balancing gains and losses, that the other seven Canadian provinces find themselves "in the red." These are the provinces dependent mainly on primary production, marketed in free, world-wide competition, while they themselves must purchase in a protected market.

At Confederation, it was not contemplated that the Canadian tariff would be used for other than revenue purposes. The use of the Canadian tariff for purposes of protection, inaugurated with the National Policy, has been a vital factor in changing the financial picture as it existed prior to that time. Consequently, the situation now is that something in the nature of a subsidy is necessary to redress the balance as between the various provinces of Canada.

Subsidies, however, are considered unhappy as a means of redressing the balance.

There are difficulties also in the proposal for the redistribution of taxing authority. Even if the income tax were restored exclusively to the provinces, it would work out unfairly. For Quebec and Ontario would again benefit out of proportion to the other seven, as it is in Quebec and Ontario that the head offices of financial institutions are concentrated, providing additional sources of revenue in succession duties as well as income tax.

BALKANIZATION DECRIED

PROFESSOR CARROTHERS decries any tendency towards sectionalism or division in Canada, any "Balkanization" resulting from a tendency on the part of the various provinces to a definite assertion of their rights.

"We should think in terms not only of our provinces but of the Dominion as a whole," he concludes.

"However, there is little use in making verbal onslaughts on this tendency unless something is done to remove its causes. There is nothing that would do more to remove the cause of sectionalism in Canada than a full and frank examination of the whole question of Dominion-provincial relations, such as has been done in the province of Nova Scotia. There should be a similar investigation by all the provinces of Canada, followed by an investigation of the problem from the Dominion point of view. This being done, a Dominion conference should be called to go into the whole question and establish a basis for the readjustment of Dominion-provincial relations. In doing this, there should not be an attempt at finality, but rather the creation of machinery which would be continuously in operation to meet the changing conditions and changing stresses of this period of economic flux."

Charming But Fuzzy Is New Novel By Eliz. Madox Roberts

THERE are various ways of writing fiction, man being an ingenious creature, and one of them is to carry everything up into the clouds in such a way that the reader never quite figures out just what is going on.

It is this way, unfortunately, that seems to have been followed in "He Sent Forth a Raven," by Elizabeth Madox Roberts.

We have here an author of very substantial talents, writing pages of very beautiful prose—but producing, somewhat, a novel which is shadowy and confusing, and which seems to have in it everything but that touch of reality which makes fiction live.

Her book deals with a robust Kentucky farmer who rebels against Providence when his wife dies and who therefore vows never to set foot on the earth again. So for the rest of his life he stays strictly within his house. He builds a species of bridges over the back door, and superintends the farm work from that vantage point, using a horn to call his hands.

A daughter and a granddaughter live with him. He contrives to break up the daughter's romance and drive her half loony, and the granddaughter makes a go of here only after much difficulty.

Eccentric villagers drift in and out, there is much thoughtful talk about the war, and a dreamy other-worldly atmosphere hangs over things, producing some pages of very great charm but making the thread of the story exceedingly hard to follow.

It is published by Viking.

Another Long Novel But It's Very Good

THE LOT of the average reader will be more pleasant if novelists ever discover that a short novel—other things being equal—is better than a long one.

This remark is provoked by a reading of Thomas Wolfe's new novel, "Of Time and the River."

Here is a book whose length is almost overwhelming. It runs to approximately 1,000 pages, and each page contains a lot of words. All things considered, it is a magnificent book—one of the best novels of our generation, perhaps—but it seems that it would be much better if Mr. Wolfe had contrived to cut it in half.

Still, we must be thankful for what we get. Uneven as the book is, it contains a great quantity of splendid prose, it voices a robust modernism, and it presents some scenes and characters that are quite unforgettable.

It tells about a young southerner who is consumed by the desire to write plays. He goes to Harvard, becomes a teacher in New York, grows disgusted with the native scene and flees to Europe, and at last discovers that he must work out his salvation on the native earth.

In this simple framework, Mr. Wolfe has built up his thousand pages; and if some of them could be dispensed with, others voice a poetry, a love for and an understanding of the native scene, worthy of Whitman. Long as it is, "Of Time and the River" amply repays reading.

It is published by Scribner's.

Travel Book Prize

LOUIS UNTERMEYER, American poet and author, received recently a prize of 5,000 lire for his book on travel in Italy, "The Donkey of God." With Gabriele Faure, French author, Mr. Untermeyer divided the first prize of 10,000 lire offered by an Italian travel agency for the best book about Italy in a recent "international literary contest."

Mr. Untermeyer bought two Sardinian donkeys and brought them back with him as "tangible evidence that the donkey of his book was not merely a fanciful legend." Only one survived the journey. It was sold to the poet's friend, Angelo Patri, and is now leading a sheltered existence on a farm in Haviland Hollow, near Brewster, N.Y.

Library Leaders

Best renters at The Marionette Library:

NON-FICTION

Hudson's Bay lending library:

GREEN LIGHT, by Lloyd C. Douglas.
THREE ENGLISHMEN, by Frankau.
HOUSE DIVIDED, by Pearl S. Buck.
COME AND GET IT, by Edna Ferber.
TZIGANE, by Lady Eleanor Smith.
SPY PARAMOUNT, by E. Phillips Oppenheim.
AMERICAN FAMILY, by Faith Baldwin.
STEPS OF THE MASTER, by H. V. Morton.
HEAVEN HIGH, HELL DEEP, by N. Archibald.
TIME TO KEEP, by H. Sutherland.

THE AMERICAN rights for the English translation of George Le Fevre's account of the Citroen expedition across Asia in 1931 have been acquired by Little, Brown. Major-General Sir E. D. Swinton is making the translation. The book is scheduled for June publication.

ALTHOUGH she has been at work on it for five years, Elizabeth Madox Roberts's new novel, "He Sent Forth a Raven," is less than 300 pages. This is in marked contrast to the tendency toward long novels, say her publishers, the Viking Press.

DESPITE the fears of admirers, "Father Brown" is not dead. G. K. Chesterton has revived him and put him to work on a murder in an Oxford quad, which soon will be brought out in England by Cassell.

HOUGHTON MIFFLIN say that Margaret Ayer Barnes, Pulitzer Prize winner for "Years of Grace" and author of "Westward Passage" and "Within This Present," has written a new novel which is "in no way similar" to her previous books. It will be called "Edna, His Wife," and will be published in the fall.

THE OFFICIAL biography of King Albert of Belgium will be published in the fall by MacMillan. The title has not been definitely selected, but the tentative title is "Until the End." The author is Emile Cammaerts, a Belgian who now lives in England. He had the co-operation of the royal family of Belgium, the Queen Mother having gone over the manuscript personally and provided much material.

"SHADOW OF DOUBT," a novel on which Arthur Somers Roche had just finished proof correcting when he died, is published by Dodd, Mead. It is a combination romance and mystery with a Park Avenue and Broadway background.

DOUBLEDAY, DORAN describe Claude Houghton, whose newest book is "This Was Ivor Trent," as "something of a modern Samuel Pepys." He spends his days at work at the Admiralty, and after hours sloughs off his real name and the memory of details about cruisers and becomes Claude Houghton the novelist.

MARY PICKFORD'S slim book, "Why Not Try God?" is now going into its sixth edition, a total printing of 50,000 copies.

ROBERT O. BALLOU, publisher, has just signed a contract with Dr. Horace M. Kallen for a book on the philosophy and history of consumers' co-operation. It will be called, "America and the Consumer," and will appear in the fall.

S. S. VAN DINE'S next novel probably will be called "The Garden Murder Case." As planned now the scene of crime will be a penthouse garden, high above New York.

VIRGINIA WOOLF is finishing a new novel which, it is expected, will be brought out late in the summer by the Hogarth Press in England. No title has yet been announced.

Win "Story" Prizes

TWO $1,000 first prizes have been awarded in the Doubleday, Doran-Story Magazine Prize novel contest which closed November 1. The judges found it impossible to agree on which of the two novels should have first prize, so two authors received the full amount of the announced award and the novels will be published simultaneously. The prizewinning novels are "Not For Heaven," by Dorothy McCleary, and "Hungry Men," by Edward Anderson. These books were picked from about fifty manuscripts submitted, a requirement being that only those authors who had had a story accepted by Story Magazine were eligible. The judges were Lewis Gannett, book critic; Martha Foley, editor of Story, and Harry E. Maule, editor of Doubleday, Doran.

Reply to Gert Stein

FROM THE Service Press at The Hague comes Transition Pamphlet, which is called "Testimony Against Gertrude Stein." Henry Matisse, Tristan Tzara, Georges Braque, Andre Salmon and Maria Jolas answer statements made in the "Autobiography of Alice B. Toklas," which Miss Stein wrote. In his introduction to the pamphlet, Eugene Jolas comments that "The 'Autobiography of Alice B. Toklas,' in its hollow, tinsel bohemianism and egocentric deformations, may very well become one day the symbol of the decadence that hovers over contemporary literature."

Literary Fellowships

DURING the first month following their announcement that they would award annually two Literary Fellowships to writers in need of funds to carry out book projects, Houghton Mifflin, publishers of Boston, received 1,000 requests for application blanks. Although most of the proposed books are in the field of "pure literature," there are many original projects, ranging from a work on trisecting the angle to an introduction to Chinese chess.

Dreams and Visions

A HISTORY of "dreams and visions," which have influenced the course of civilization, has been prepared by Rene Fulop-Miller and will be brought out by the Viking Press. The title is, "Leaders, Dreamers and Rebels: An Account of the Great Mass Movements of History and of the Wish-dreams that Inspired Them."

W. L. Mackenzie King Biography Subject; Liberal Policy Stated

ON APRIL 8, copies of a biography of William Lyon Mackenzie King will appear on the bookstands in Ontario and Quebec. Three days later, they will be in the book stores in other parts of Canada.

This biography of the Liberal leader has been written by Norman Macleod Rogers, professor of political science and history, Queen's University, and it bears a close relation to that fine book, written about Mackenzie King when he was Premier of Canada, by Senator John Lewis. The book is not political propaganda; it is, rather, a sketch of the public career of Mackenzie King, a career which is unique in Canada for it began when he was in his twenties, when he became the first deputy-minister of the Department of Labor.

The concluding chapters of the book contain an explicit statement of the Liberal policy, and this alone makes it of outstanding importance.

Everything Nautical Explained In Book On Ships and Sailors

THIS reviewer once persuaded a gentleman to read Dana's great sea classic, "Two Years Before the Mast." The gentleman read it, said he liked it fine—and asked where could he find a book which would explain all the nautical terminology, manners, and manoeuvres with which the text was filled.

Your reviewer was stumped. He knew no such book. Writers of sea stories assume that the reader already knows about these things. If the reader doesn't, he's just out of luck.

Now, however, comes the answer to prayer—"Sea Lanes," by Capt. Jonas Pendlebury and Martin D. Stevens. It is just the book a great many of us have been looking for all these years.

These authors have the good sense to assume that the ordinary reader knows nothing whatever of the sea, so they explain everything. They initiate you into the mysteries of tacking, wearing ship, reefing and furling; they explain such phrases as "down helm" and "close-hauled"; they tell what futtock shrouds are, and clew-lines, and job down-hauls, and so on; they tell how ships are navigated, how a skipper "shoots the sun" to get his position—in a word, they clear up all those little puzzlers that usually go entirely unexplained.

In addition, they give an excellent history of travel by sea, tell how ancient and modern ships were developed and operated and, all in all, present a mine of highly interesting information in a very readable style.

It is published by Minton, Balch and Company.

Maiden Lady Says "Yes"

ACT OF DARKNESS," by John Peale Bishop, is a book which starts out to be something extra special and then unaccountably tapers off until the reader wonders just what has happened to it.

It begins by showing us a small town in the upper Shenandoah Valley through the eyes of an adolescent boy. The youngster is just at that age when life assumes an incalculable and subtly frightening aspect; he sees the doings of his elders through a glass darkly, and an atmosphere of brooding mystery and reasonless dread is admirably built up.

Then the emphasis of the story shifts, and what follows—while skilfully presented—is an uncomfortable letdown.

The story becomes chiefly concerned with this lad's uncle, who is a somewhat harum-scarum gentleman farmer. This chap, upon impulse, accomplishes the seduction of a gently nurtured maiden lady, a friend of his wife.

The lady, thinking things over afterwards, is horrified about it all and decides that it could not have happened with her consent. So she has the man arrested for criminal assault.

So the story comes to its wind-up with the gentleman farmer getting tried, convicted, and imprisoned; and as a psychological study of the types involved, it is an excellent bit of work.

It is published by Scribner's.

Best Sellers

Best sellers reported by the book trade across the country are:

What Poets Tell Us

There are in England to-day quite a number of capable poets. Not only poets of the fame of Masefield, de la Mare, W. H. Davies, Siegfried Sassoon, the Sitwells, W. J. Turner, Edmund Blunden or Robert Nichols—but dozens of other hardworking, fierce-thinking, fine-feeling writers of verse. This is important.

It is important to men and women of everyday life because there come times when it is as necessary for an adult to read a poem as it is for a child to take a pill.

The poet, for good or ill, is a person who has just that overload of imagination and urge to express himself that forces an outlet in the form of those crisply trimmed lines of print (with luck) that we know as poems. Short, significant little things they look, usually. We glance at them, when we are in the mood, glance again, think back—then turn to something else with a smile—or, more probably, a snort.

But we have read a poem. We have seen into the mind of an unusually imaginative, sensitive, perceptive fellow creature. Those few lines of penetrating (or ponderous, tinkling, puerile, caustic, foamy or whatever we think them) sentiment represent moments of inspiration, hours of brooding, a flash of insight, an agony of creation—at any rate a mental process that we must stop to consider.

The full-time poet, remember, is in a peculiar position. He is not immersed in the pursuit of market prices, for instance, or the selling of grand pianos, or the production of wheat or films or poultry or a profit for the owners of the firm. He stands back from our absorbing employment. Our occupations, important as they are to us, may seem to him a little dim.

Yet even a poet is human. He has to exist in much the same set of circumstances, eat (at least a little of it) the same food, breathe the same air as we do. He is a man among other men.

* * * *

ALL OF which brings us—at last—to the fact that a book, "The Year's Poetry," published by Bodley Head in London, deserves attention as a collection of the writings of contemporary poets; of men who are a little apart from the conflict of "making a living" and who thus have an opportunity to develop their imaginative and expressive powers, and who are, all the same, men of our own time.

These contributors to "The Year's Poetry," therefore, should be able to tell us, through what they have written, what sort of a year it has been. More effectually, too, than through any other means should we be able to get an idea of what sort of an age and what sort of a country we are living in from the works contained in this book.

The year is 1934. The representative selection of poems has been made by three people—Denys Kilham Roberts, Gerald Gould and John Lehmann. The selection has been made with the aim of presenting "the poems which best represent contemporary tendencies and poets whose work they (the selectors) regard as significant."

So we have one or more poems by some fifty different poets, men and women, including specimens of the work of the famous and established poets whose names I mentioned in the opening paragraph of these lines.

Now each reader must form his own conclusions. One reaction to this volume has been one of profound gloom. These poems depress one. He regrets this intensely; for he feels that the chorus of poets to whom he has been listening here are really representative—and that there has been so little during this past year to inspire them to a more cheerful measure.

To pick out at random some of the verbal gems with which our modern poets' verses sparkle: "Gas-drill" (Sassoon), "Freud" (Nichols), "Inhibition" (T. Sturmond), "By-pass" and "Hiking Girl" and "Hiker" (Plomer), "Skyscraper" (Spender), and "Howitzer" (Madge).

Could any words be more depressing? Could any song be sorrier than the "Unlyric Love Song" of A. S. J. Tessimond on Page 76?

One may be thankful for at any rate some enjoyment. It may sound rather odd; but for "Death," by W. B. Yeats, this book should live on our shelves. Here is one striking contribution—by Hugh MacDiarmid:

THE SKELETON OF THE FUTURE
(At Lenin's Tomb)

"Red granite and black diorite, with the blue
Of the labradorite crystals gleaming like precious stones
In the light reflected from the snow, and behind them
The eternal lightning of Lenin's bones."

G.J.D.'s Music Column

"ELIJAH" PRESENTED IN PAGEANT FORM

THE MEMBERS of the First United Church and the Orpheus Society, who are rehearsing Mendelssohn's "Elijah," to be produced early next season, will be interested to learn that this favorite oratorio is to be presented in pageant form at the Royal Albert Hall, London, under the distinguished conductor, Albert Coates. The work will be given nightly for a fortnight, and its scenic and stage effects will include the trumpet blasts which accompanies the appearance of the prophet Elijah; fire falling from the skies with the hurtling crash of thunder at the words "Let them now descend"; the deluge of rain at "Hearest thou no sound?" the mighty "Be not afraid," with the whole power of the chorus, orchestra and organ bursting with a crash upon the audience, as if all the battalions of heaven with joyous shouts and glad thunder were marching onwards; the sudden earthquake in the chorus "Behold God the Lord Passed By," and again following "A mighty wind rent the mountains," at which great gusts of sound burst forth, increasing with the throes of the earthquake until shock after shock subsides with the quietness of the music.

THE TRANSFIGURATION AND ASCENSION

AFTER which comes the transfiguration of Elijah before his departure; and, finally, abruptly, in a moment, the phrase, "And when the Lord would take him away to heaven" is heard, and after a brief pause the chariot and horses of fire are there, and black clouds hurled about by a whirlwind, and flashes of radiance and mighty thunderings—and Elijah has passed. "He went up by a whirlwind into heaven."

Those who know this work can well imagine the tension on the mind of such scenes to be presented and the genius of the composer, who exhausts every combination of sound and the [illegible] remarkable treatment of so majestic a subject.

MOSCOW'S RICHEST MAN

THE RICHEST man in Moscow is neither an oil magnate, a coal baron, an industrialist or a banker. He is a dramatist named Vassily Vassilovich Shkvarkin, and until recently was relatively unknown. So popular has his rollicking farce "Another Man's Child" become that he is reputed to have e rned 1,000,000 roubles in less than a year.

The farce deals neither with the Five Year Plan nor with any of Russia's industrial collectivisations, and is generally without any serious moment. It has been produced in nearly 1,000 theatres, clubs and dramatic circles throughout Russia, and in Moscow alone it has been staged in four large theatres and in nearly fifty clubs.

WEALTHY PLAYWRIGHTS

BY LAW an author in Russia is entitled to 6 per cent of the box-office receipts from each presentation of four-act plays. With the government tax on such incomes amounting to only 6 per cent, there are at present a number of comparatively wealthy playwrights in that far-off country. One of the peculiarities of these incomes is the fact that these constitute no menace as the nucleus of a new capitalist class in that the accumulated capital cannot be used to create more capital for these authors. They may, however, spend their money on whatever purchases are available or invest it in government bonds, on which they receive 6 per cent interest, but are precluded from engaging in any enterprise which would involve their employing other people.

GOVERNMENT STIMULATES INTEREST IN CREATIVE WORKS

ALTHOUGH inventors are prohibited from collecting more than 100,000 roubles for any one of their inventions, no such limitation is set upon authors and scenario writers. Apparently it is the desire of the government to stimulate interest in creative works of the type acceptable to the Bolshevik mode of thought.

Royalties are not for the Soviet dramatists exclusively, as foreigners, too, have been known to collect handsome sums of paper roubles on plays produced in Russia. The payments, however, cannot be exported and are available for the author's use only when he is in the country.

Just now Bernard Shaw's "The Devil's Disciple" and his "Caesar and Cleopatra," fused with Shakespeare's "Julius Caesar," and Pushkin's "Egyptian Nights," are being produced in Moscow. Should Mr. Shaw go to Russia again, he would probably find a sum of roubles awaiting him in the Gosbank.

STYLISH THING

Although it looks much like a coat, this adaption of the Russian influence is actually a sports dress for town or country wear. Fashioned of a new corded rayon crepe, it is a deep peacock shade trimmed with white piqué and self-material buttons.

PATOU CALLS SUIT BEST '35 MODE

Many Adaptations Make It Useful For Every Need Except Formal Evening Wear, Paris Designer Says

By JEAN PATOU

PARIS.

Patou fashions this successful tailleur of navy silk crepe. The bolero jacket, reaching just over the hip bone, is buttoned all the way down and belted in black patent leather. The blouse combines chiffon and lace and has a yoke worked in the finest smocking effect. The hat is in the new glass fabric in white and opalescent, simply trimmed with navy grosgrain.

THE WELL-DRESSED woman will wear suits this spring from the time she gets up in the morning until she changes into the fluffiest dinner clothes we have had for a while. Suits are nothing new to me. I have always considered the tailleur the top note in any chic woman's wardrobe. However, this season, I have starred it in my new collection.

Every kind and weight of material is used in the new models. Woolens are sheer or heavy, silks stiff or clinging. Every kind of style, too, is found — tailored, definitely feminine, much trimmed, little trimmed.

JACKET MAY CONTRAST

The sober, classically-cut suit serves for active or spectator sportswear, shopping, informal lunches and traveling. The latest idea is to combine a jacket, or newer still, a jacket-cape of rough patterned tweed with a plain skirt. A white or light blouse, also cut on tailored lines, completes the ensemble, with accessories of hand-stitched boxcalf belt, bag and gloves and simple felt or straw hat.

I have stressed the ultra-feminine silk suit for afternoon because it is becoming to all types, especially when it includes a soft, sheer blouse in harmonizing or sharply contrasting color. Here the note of elegance is struck in delicate handwork and detail.

FULL BLOUSE SLEEVES

Distinguishing features of the new suits are very full blouse sleeves, usually of chiffon, extending below the jacket sleeves, and touches of lingerie or lace at the throat.

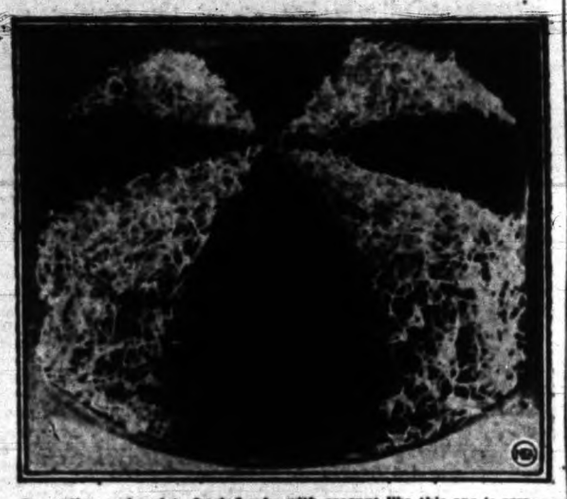
Hats to complete afternoon suit costumes may be of straw or fabric, light or dark, to match suit or blouse, but must have an original trimming. I have used ribbon, flowers, fruit and even vegetables to modernize the 1880 touch found in many afternoon suits. Glass fabric hats are new and are sufficiently ornate in themselves if they have an unusual twist to brim or crown.

Black and white tweed was used by Patou for the jacket-cape of this informal tailleur, which is worn over a black lainage skirt. The belt passes under the cape at back, to give it a youth appearance, which is carried out in a white silk blouse. The hat is white panama with grosgrain band.

STOPS SKIDDING RUGS

There is a new material to put under small rugs to keep them from sliding. It is a sort of mesh and it clings to the floor so that the rug goes over it smoothly and can be vacuumed as usual. Good for houses where there are children.

MAKING CAKES MEASURE UP TO EXPECTATIONS



Decorating a chocolate frosted cake with coconut like this one is easy—mark off cake in eighths and sprinkle coconut on alternate segments.

By MARY E. DAGUE

GOOD news for everybody except maybe the woman who has enjoyed years of prestige as having won all the ribbons year after year at the fair for her cakes. For her it may be a blow to hear that anybody who will use a reliable recipe and follow it implicitly can make a good cake in these scientific days.

OLD RECIPES INACCURATE

If you've ever gone through old recipes you can appreciate the convenience of to-day's standard measurements. Tea cups, coffee cups, pinches, butter the size of an egg, the size of a walnut, handfuls and even bowlfuls were the measures used by our grandmothers. That's why years of experience were needed before one became a good cook. Aside from the vagueness of the measurements the method of mixing was never explained and the oven was left entirely to the notion of the cook. No wonder "good cakes were born, not made" in those days of inaccuracies.

If you want to make the following cake in three layers, double the recipe and use ten-inch rather than nine-inch pans. The frosting will have to be doubled, too.

TWO LAYER CAKE

Two cups sifted cake flour, 2 teaspoons baking powder, ½ teaspoon salt, 2-3 cup butter or other shortening, 1 cup sugar, 3 eggs, 1-3 cup milk, 1 teaspoon vanilla.

Sift flour once, measure, add baking powder and salt and sift three times. Cream butter thoroughly, add sugar gradually and cream together until light and fluffy. Add eggs, unbeaten, one at a time, beating thoroughly after each. Add flour, alternately with milk, a small amount at a time, beating well after each addition. Add vanilla. Turn into two oiled and floured nine-inch layer pans and bake twenty-five to thirty minutes in a moderate oven (375 degrees F.). Spread chocolate frosting between layers and on top and sides of cake.

CHOCOLATE FROSTING

Two cups sifted confectioner's sugar, 2 whole eggs or 4 egg yolks, ½ cup milk, 1 teaspoon vanilla, 4 squares bitter chocolate, 2 tablespoons softened butter.

Melt chocolate over hot water. Combine ingredients in order given, beating with a rotary beater until blended. Place bowl in pan of cracked ice or ice water and continue beating until of right consistency to spread, about three minutes.

Cool cake thorough before frosting. Frost the first layer, then put on the second—placing it precisely so that the edges are even and the cake uniform in heighth. Then spread the frosting on the sides, working it up over the top edge and down around the sides. Then pile remaining frosting in centre of top layer and spread it out to the edges. Mark off in eighths and sprinkle alternate sections with grated coconut.

SPRING BUTTERFLY

Gay as Spring's first butterfly, and as fresh looking, is this red and green striped taffeta toque and scarf set. It shows the new bell-shaped crown, which is a life-saver for the women who just don't look good in the low crowned modes that are so popular.

SHOES ADD POLISH TO COSTUMES

They Are Really Considered Last Word

You can't put your best foot forward unless it is properly shod, no matter how swank your frock or suit. The importance of smart shoes and the conspicuous part they play in costuming is vividly portrayed here. At left, navy blue kid oxfords perforated to reveal design underlaid with white kid is worn with a printed silk dress of dark blue offset with flower design in oyster white and grass green. Centre semi-tailored pumps of dark brown decorated with small metal and kid bow provide an interesting contrast for the beige and corn printed silk frock. At right, high throated rhinocerus oxfords are worn with a black and white check shepherd wool suit and velveteen jacket.

A PAGE FOR THE CHILDREN

Bargaining For Seat At Basketball Game a Treat

Willie Finds Out How Skinny Got a Grandstand Seat for Nothing and Then Gets Into Argument and Nearly Loses His Own in a Trade, But Willie Has to Do the Dishes and Didn't That Make Him Mad

By WILLIE WINKLE

We got our Easter exams coming up pretty soon now, just before we go on our Easter holidays, and just when we ought to be studying, up a bit they go and get everybody in town, including all us school kids and our dads and mothers, excited about the Blue Ribbons. And these Blue Ribbons go and get everybody all so hot and bothered that even the teachers are talking about the games and are the Ribbons going to win the Canadian championship?

Gee, I won't forget last Monday when we all couldn't wait until we heard about who won the protest about that last game with Varsity. Say, was that game close? I sure hope the Ribbons won't make them that close any more or I'll never get any marks at all this Easter in my exams. I can't settle down to work.

Why when we got home from the last game we just couldn't go to bed. We had to sit down and get some cocoa and biscuits and try and quiet our nerves. But gee it made us feel good. Just imagine how had we would have felt if the Ribbons had lost by that one point.

I was lucky getting a seat for those games even if I did have to go with my sister. Skinny and Pinto they went too but they didn't have no front seat, no sir, they had to stand and peek and hope nobody would get in front of them.

HOW THEY PEEKED IN

Skinny and Pinto tried to get somebody to take them in the front door. You know how you see all the kids hanging around there. Well, when they didn't have any luck they sneaked around to the back and got up on a ledge and peeked in the window. Then they got braver and tried to see if they could move the bottom window and sneak in that way but it wouldn't move so they tried the top part and it came down. It was too high to climb over but they could rest their chin on the window frame and get a good look at the game. Next day they had stiff necks and colds in their heads but they didn't care they'd seen the game heaps of people would have been glad to pay good money to have seen.

"Now don't you go putting that in the paper about how Pinto and me saw the game" says Skinny to me after he'd told me about how they saw the game.

"Why?" I asked.

"Can't you see you nitwit that all the other kids in town will be wise to our grandstand seats and we probably won't get a chance to use them again as somebody else will be there before us, particularly kids that live up near the High School," replied Skinny.

"Well you've seen one game for nothing you ought to be sport enough to let somebody else have your place for once," I said.

"Alright," came back Skinny so fast he nearly took my breath away. "If I let somebody have my place will you let somebody have your's? Sure I know you, dad's got tickets for you and Betty."

Now I hadn't bargained on anything like that and I had to stall. I wasn't going to let nobody see those games with Kelowna if I could help it.

A BARGAIN IS MADE

"I don't know whether my dad is going to take me to those games," I finally said. "You see they first said Kelowna would be here Tuesday and Wednesday and my dad said to me, young man you don't go to no basketball games on school nights. You got to get to bed early and see that your lessons are done! After that they decided to have the games on Friday and Saturday so I don't know what's going to happen. Tell you what I'll do if my dad ain't got no tickets for me, you guarantee to give me your grandstand seat an if my dad got tickets I'll let you have mine."

"It's a go," says Skinny delighted with himself. "Here's your dad coming now you go and ask him."

I went up to my dad and asked him and he said: "What do you think, I'm made out of money? Buying fifty cent tickets for you and Betty for all these games would soon have me in the poor house. No you're going to stay home from the Kelowna games and do the dishes."

"The dishes?" I shouted.

"Yes, the dishes," laughed back my dad. And was I mad?

"Alright Willie dear," Skinny started teasing. "You can have my grandstand seat after you've taken off your apron and put the dishes away oh so nicely."

TWENTY-FIVE YEARS A KING

When King George posed for this photograph neither his parents nor his grandparents realized that some day he would prove one of the greatest monarchs ever to sit on the British throne. A charming little fellow in kilts, Prince George was allowed more freedom than his brother, the Duke of Clarence, and heir to the throne, and although he seems rather pensive in the picture, he was a happy boy and full of fun. When the Duke of Clarence died, Prince George became Prince of Wales and in 1910 became King.

RIDES 2,200 MILES TO KEEP PONY

Determined to ride his roan pony 2,200 miles rather than give him up, Loomis "Buck" Stevenson twelve, shown here with "Smokey" near Tulsa, Okla., is making his way from Arizona to Marion, Ill., with his parents, who motor by easy stages and wait for the lad each night. Covering forty miles a day, they plan to reach Marion late this month.

THE FELLOW WE'D LIKE TO MEET

By Ian Drag

Nobody'd call him handsome—
And nobody'd call him wise,
A scholar would laugh at his
His learning would win no prize!
He never makes epigrams clever—
But still you will hear folks say—
"He's the kind of a fellow we'd like to meet
On a dull, cold, rainy day!"

His eyes—they are blue, and twinkle,
His laugh has a lilt of cheer;
And his wrinkled face has a homely grace
Where the kindly lines appear.
He's never done deeds majestic—
To ring through the world away;
But he's just the fellow you'd like to meet
On a dull, cold, rainy day!"

The clouds may be full of shadows
But he—he will find the sun!
And life may be swept with sorrow
And hearts may be drab and dun!
But his friendly grip will warm you—
And blest with his chumship gay,
You will find the blue where the gold shines through
On the coldest, rainiest day!

BEDTIME STORY

Uncle Wiggily's Big Rain

By HOWARD R. GARIS

Many of Uncle Wiggily's friends who lived near his hollow stump bungalow in Woodland were laughing at the old rabbit gentleman. Not laughing at him in any mean way. Oh, no, indeed! They just laughed in a jolly way about his rubber boots and umbrella.

Ever since the beginning of the month of April, which is the one of all the twelve when there are most showers, Uncle Wiggily, when he hopped out of his bungalow to go adventuring, took with him either his umbrella or a pair of rubber boots. He took them, even though the sun was brightly shining.

"I don't want to get wet in an April shower," said the bunny uncle.

"Oh, don't be so fussy! You are neither sugar nor salt to melt in the rain," laughed Nurse Jane. Once she laughed

Down the stream he floated.

especially hard when Uncle Wiggily, taking his umbrella on a very bright day, came back with it all wet. He was sure it had rained. But it hadn't. Mrs. Bushtail, the squirrel lady, had by accident emptied her watering can on the bunny, who was standing under her house tree.

Nurse Jane laughed when Uncle Wiggily took his rubber boots with him on another very sunny day. But he took them to be mended so that time he had the laugh on Miss Fuzzy Wuzzy.

LEAVES UMBRELLA HOME

One bright day, when Mr. Longears was about to leave his bungalow to go adventuring, Nurse Jane said:

"You aren't going to take your umbrella and rubber boots to-day, are you, Mr. Longears.

"No," he answered, "I'm not. You and the others around here laugh at me so much that I'll leave my boots and umbrella home this time."

"You won't need them," said the muskrat lady housekeeper.

"I am not so sure of that," said Mr. Longears. "If I get caught in a big rain it will be your fault if I get wet. Your fault because you laughed at me."

"Don't worry," said Nurse Jane, laughing once more, "you won't get caught in any big rain."

The sun was brightly shining when Uncle Wiggily hopped away adventuring, taking with him neither his boots nor his umbrella. But he had not hopped far through the woods before the skies became cloudy. The wind began to blow and the rain began to fall.

"Just my luck!" said Uncle Wiggily, holding a paw over his pink nose so the twinkle wouldn't get wet. "I'll be soaked!" He would have been but, as it happened, he was near the home of his fat pig friend, Mr. Twistytail. Running between the raindrops Uncle Wiggily reached the pig's house without getting very wet. No sooner was he inside, then the rain pelted down harder. Oh, it was a big rain!

WASH TUB BOAT

"I don't see how I am ever going to get home without rubber boots and my umbrella," said Mr. Twistytail, speaking to the pig and his wife.

"Curly and Floppy have our two umbrellas," grunted Mrs. Twistytail.

"And my rubber boots would be too big for you, Wiggy," said the pig gentleman. "I don't know what you can do except stay here until the shower is over."

"That will be a long time," said Uncle Wiggily. "Why, it's a regular flood!" Truly it was. A stream of water like a river was running in front of the pigs' house. Then, all of a sudden, Mrs. Twistytail said:

"I know how you can get home safe and dry, Uncle Wiggily. I'll let you take one of my wash tubs for a boat. You can put the washboard over it for a top, like an umbrella. A stream of water is running like a river from our house to your bungalow. You can ride home in a wash tub boat with a wash board over you." And that's what Uncle Wiggily did. Down the stream he floated through the big rain in the funny boat and soon he was safe and dry in his bungalow. You should have heard him laugh! And if the gold fish will dust some talcum powder on the chocolate cake I'll tell you next about Uncle Wiggily and Susie's stilts.

THE TINYMITES

Story by HAL COCHRAN Pictures by GEORGE SCARBO

(READ THE STORY, THEN COLOR THE PICTURE)

The giant kept on snoring, and wee Coppy cried, "Come, lend a hand! I think it's up to us to set our friend, the giant, free.

"We do not know who pulled this trick. I must admit, it was real slick. Let's wake him up. I'm sure he'll be surprised as he can be."

Then Scouty started shouting. "Hey! You surely do not wish to stay upon the ground, tied up like this. Wake up and see your plight."

The giant stirred and snored some more. Once more the bunch heard Scouty roar. "Aw, come on! If you're fooling us, it really isn't right.

"We're here to help you, if we can." Then to the man's side Dotty ran. She poked him in the ribs and then he opened up his eyes.

"Say! What has happened here?" he cried. "How come I am securely tied? I'll pay you back for this mean trick. I hope you realize!"

"We didn't do it," Goldy said. And then a squeal from overhead made all the Tinies glance up. "There's the answer," Windy cried.

"Those monkeys, high up in the trees, pulled off this trick, perhaps to tease. Come on, we'll set the giant free; then tan each monkey's hide!"

The vines with which their friend was bound had all been twisted 'round and 'round. "My goodness, this is quite a task," said Goldy, with a smile.

"However, we will work away, if on the ground you'll kindly stay. We'll promise you that you can get up, in a little while."

"Oh, gee, I cannot wait that long," the giant snapped. "I think I'm strong enough to free myself. My muscles I will put to use."

He strained his arms and legs, and then the Tinymites were startled when the vines kept snapping off of him until they all were loose.

THIS CURIOUS WORLD By William Ferguson

As water closes in behind the body of a swift moving fish, it necessarily converges sharply immediately behind the axis of the body. A rounded tail fin would be caught by the water and would act as a drag, but a forked tail leaves this space open.

Auntie May's Corner

Next week two of the most famous people in the world will be visitors in Victoria. They are Lord Baden-Powell, World Chief Scout, and Lady Baden-Powell, World Chief Guide. These two persons have done more than anyone else to give inspiration and training to the youth of to-day. The creation of the Boy Scouts and Girl Guides has captured the enthusiasm of boys and girls in every country of the world.

Lord and Lady Baden-Powell have been to Melbourne, Australia, attending a jamboree and they were given a tremendous reception. Victoria plans to give them a wonderful welcome and while it may not be as loud and large as that in Melbourne it will be just as sincere.

An account of the jamboree in Melbourne will no doubt be of interest to all boys and girls in Victoria so I am going to give you what the newspaper, The Argos, had to say about it. Here it is:

A stirring spectacle was the march of nearly 20,000 Scouts and Guides past the World Chief Scout, Lord Baden-Powell and the World Chief Guide, Lady Baden-Powell, at Melbourne, Australia, on January 1, during the Australian Scout Jamboree. Before the march began, the Chief Guide and the Chief Scout inspected a guard of honor comprising Scouts from all nations at the jamboree, some barefooted, some brown, some black, some white, dressed in "sarongs," blue jerseys, or shirts, erect and looking neither to left nor right, until they were shaken by the hand and given a word of greeting.

At the signal for the march to begin, the Brighton Band, led by a drum-major who performed wonderful evolutions with his staff, crossed the arena to the grandstand. Then came the first of the 8,000 Girl Guides, a dense party bearing fluttering Union Jacks, preceded by three Guides carrying the Chief Guide's standard. From the hill on the right hundreds more emerged, moving in a surge of dark blue, sixteen abreast. For a moment the crowd of 30,000 spectators was hushed, then applause thundered from the packed hillsides. The Guides circled around to face the grandstand, each group saluting Lady Baden-Powell on her dais. Applause rose and fell as 200 New South Wales Guides marching with the swing and lilt of a refreshed army, went by. They were followed by sixty from New Zealand, ninety from Queensland, seventy from Tasmania, and fifty each from South Australia and Western Australia. From Victorian cities and towns, Ararat, Pura Pura, Carranballac, Derrinallum, Miners' Rest, Orbost, Boolara, Hamilton and innumerable others came the remainder of the huge army of girls and women.

The Guides took nearly two hours getting into formation and their march past occupied nearly 16 minutes.

They then formed into the shape of the Guide badge which is on the world flag. In the front rank were Guide Commissioners from Great Britain, South Africa and Belgium.

Looking down on the billows of blue hats, Lady Baden-Powell gave the signal for the Guides to be seated.

* * *

The Scouts following, marched with exuberance and gaiety. They cheered until they were hoarse as they passed the Chief Scout. Fijians, Cingalese, Malayans, Hungarians, Belgians, seemed to step high and bear themselves with great pride. Indians, in perfect time marched with a shorter step. The New Zealanders went past in the regalia of Maoris, bare chests shining in the sunlight, piupiu waving, weapons aloft, and teko-teko charms swinging from their shoulders.

Bare-legged, wearing brilliant red, tight-fitting shirts lined with white, passed the twelve newly arrived Nauru Scouts, who had not left their island before. It was wonderful experience for them, and they seemed to be almost overcome with awe.

The marshaling arrangements worked amazingly well. The march never lost its symmetry, and the few officers who moved along the closely packed ranks giving directions were unobtrusive. The great army seemed to mark and take up positions of its own volition. Dust rose to the right of the grandstand in a thick cloud, but not a head was lowered as the boys emerged from it.

When the march past of the Australian boys began, brown hats and white Sea Scout hats were hoisted on a mass of staves.

After the march past the Chief Scout spoke briefly to the Scouts and Guides and read a message from The King. The Chief Guide made a short address to the Guides and read a message from the Princess Royal.

"THE MAN WHO WON THE WAR"

The Sultan of Zanzibar, while on a visit to London, was being conducted round Madame Tussaud's, the world-famous waxworks, and was enchanted with the exhibits. He came at last to the Hall of Kings, where the Kings of England, from William the Conqueror to Edward VII, were standing in martial array. He admired their wonderful clothes, he touched the gleaming gold armor of Henry V, and pointed to the gold chain of precious stones which the warrior king wore round his neck. The little child Prince of Wales, the son of Edward I, claimed his attention for some minutes. He seemed lost in thought. Maybe the pageantry and pomp of English history were passing before his mind. It was an impressive moment.

The Sultan then passed into the other hall where the group of the present Royal Family and many other people of our own time confronted him. He knew all their names. He knew their history. He was in his element. Round them all he went, recalling a bit of history here, a gallant deed there.

"There," he was told, "is the boy Cornwall, the Naval V.C."

A wonder smile passed across his face.

"M'toto sana," he said. "So young."

Suddenly he stopped. His suite stopped, looked and wondered.

The Sultan was gazing with wide, bright eyes at the immortal Old Bill, in his dirty khaki, and tin hat, his walrus mustache. He had no eyes for the brilliant generals, the gleaming admirals or the kingly company any more.

Round he turned and caught his son by the arm. Never had he appeared more dignified, more impressive.

"The man who won the war," he explained.

BIRD LORE

Teacher: "What little boy can tell me the home of the swallow?"

Bobby (waving an eager hand): "The home of the swallow is in the stomach!"

SPELLING LESSON

"Now if I write 'new' on the blackboard, what does that spell?"

"New."

"Now I'll put a 'k' in front of it and what have we?"

"Canoe."

Manhattan Spring

Earth At 10 Cents a Quart; Chorines Drop Stockings

From A Special Correspondent

THE CALENDAR says it's spring. And scouts returning to the city's spired stockade bring news of nesting wrens, budding crocuses, and wild geese, in northern flight, pausing on Long Island ponds.

In Manhattan you must be attuned to other portents, and not be misguided by the heavy overcoats, dark colors and chill winds. Look aloft—not at the skies but at the billboard artists, splashing gallons of bright colors in heroic-sized messages to the thousands who are about to trade in the old bus for a new car.

Or if the smell of fresh paint has a vernal tang, look into the basements of tenement streets and Greenwich Village. Each coal, wood and kindling merchant (whose name is pretty sure to be Tony) has emerged from his cavern, seen his shadow, and scuttled back to freshen up the sign which reads in staggering letters: "ICE."

ARTISTIC SIDE

VILLAGE TEAROOMS, too, are touching up their tables and benches with dabs of new color. The roast-chestnut vendors are sniffing the air and wondering when it will be profitable to put in a line of cold drinks. Here and there you'll find a newsstand with a southern exposure, its proprietor loiling back in a Riviera pose. Windows are filled with struggling hyacinths, and now and then a geranium. Artists in attic studios are thinking about getting a hair cut. And hatless poets, doubtless full of vernal stirrings, have a kind of somnambulent look as they stroll the narrow sidewalks, bumping into people and being cursed by truck drivers.

Down at the battery, glare of sun on water causes the rail loungers to blink. After a long hibernation, day-dreamers have come back to the park benches. A young man whistles "Springtime in My Heart," slightly off key, as he polishes the brass on the Statue of Liberty boat. More and more stenographers from Wall Street are beginning to drift down to the Aquarium during their lunch hour. On the broad walks, infants in sweater suits, crumpled boxes of popcorn in their hands, are charging among the pigeons.

SPORTING URGE

THE SURFACE cars of lower Broadway have lowered some of their windows, and motormen glare down at agile pedestrians with an all but midsummer vehemence. Gardenia salesmen have taken a stand on the corners, especially near the stock exchange. Chauffeurs of parked limousines frequently alight to stretch, and to gather in select little groups to discuss their employers' affairs.

The rialto is only half aware of the advent of spring. There are a few more thaumaturgists on Forty-second street, working their phoney miracles with cheap razor blades, "silk" socks, trick decks of cards and the like. Chorines from the burlesque shows are beginning to go stockingless on their quick forays to the lunch counters and soda fountains. By day the emergency doors of nearly all the theatres have been thrown open, and stage doormen sit, chairs tilted back in the sun, placidly wielding toothpicks.

Pampered pooches on the avenues are allowed out without their sweaters. Apartment house doormen are beginning to look uncomfortable in their winter livery. In front of the windows of sporting goods concerns stand groups of men—elderly men, lots of them—with a sort of small-boyish look on their faces. They gaze at fishing rods and glistening reels and books of flies. They gaze at canoes and hunting knives, rifles and saddles, flannel shirts and patent camp stoves. Then with a sigh, a visible kind of sigh that resolves itself into a discouraged slumping of the shoulders, they move along toward their offices.

BURSTING BUDS

IN DEPARTMENT store windows, artificial plum and cherry boughs are bursting into bloom. Garden shops near the railroad stations are full of business men who proceed rather furtively about shopping commuters. Many of the latter are pale the purchase of Grace Coolidge or Amelia Earhart rose plants.

It is in the ten-cent stores that you see how the teeming city tries to greet the spring. Throngs of toilers, women mostly, sniff the good earth gratefully (loam or topsoil, in one-quart paper containers, 10 cents), and wistfully survey the bewildering assortments of sprigs and sprouts and packaged seeds. It is hard to choose when one's spring planting all must be done in a little window box.

Bi-taxed Actors

From a Hollywood Correspondent

IN A VISITING mood, I went to see Clive Brook, who had just landed after a stormy crossing from England, but who was feeling very fit indeed. Oh, quite. But his poor little wife had been prostrate the whole voyage.

Mr. Brook, who was born in England, has been batting around Europe for nine months, living out of traveling bags and shaving in trains and leaving his best pipes behind in hotel rooms.

Seems that Mr. Brook has just finished making a picture with Miss Carroll. A picture called "The Dictator," which is a scrubbed-up version of how a physician became the bom of Denmark in the eighteenth century. The whole story never would have got by the censors over here, regardless of its authenticity. "In England, though, historical accuracy counts for something," Brook said.

He told me something which may have some bearing on the willingness of British and American performers to be traded. A citizen of one country appearing in the other country has to pay income taxes in both places. It isn't quite a double tax, but it does amount to about 65c on the dollar. Which is a lot of money, even on a movie star's wage.

INCOMPLETENESS

By H. T. J. COLEMAN
(In The New Outlook)

THAT WHICH I have I may not keep
That which I win is mine alone
Save as I strive—I may not reap
From fields where I have never sown

The eastern skies may be aglow
With witness of the day begun;
Morn is not mine unless I throw
My windows open to the sun.

'Twill not recall the hours misspent
To frame inglorious excuse—
Time is not given to me, but lent;
And power only lives in use.

I seek no heaven of endless rest,
Though after labor rest is sweet,
In this thing only am I blest,
That life is ever incomplete.

Nudist Play ... More Camps

More fleshy than flashy, "The Girl from Child's in 1930" is heralded as the first nudist play. Guy LaFon, as butler, and Theodora Peck, the waitress, say nudists, are too dressed up in this scene to be convincing.

A NOTE on my desk, writes Paul Harrison from New York, said "Call Mr. Rosenblatt of the Nudist Theatre Guild." N-u-d-i-s-t; there was no mistaking the writing.

So I called the number, and a man invited me to attend the first undress rehearsal of the first play to be presented by the new Nudist Theatre Guild. I went over. In a small, overheated rehearsal hall were about a dozen people, most of them young men clad in shorts, socks and shoes. The leading lady, a chubby blonde, wore some sort a flimsy flesh-colored jumper suit, and over that a waitress's apron.

A pretty girl named Lee Molnar also wore a jumper, but demurely concealed herself behind a huge feather fan. She could have spared at least a square yard of material and still been a good many stitches ahead of night club chorus girls. In addition to these there were a couple of females of more advanced years dressed in some outlandish rigs suggesting frowsy states of deshabille.

• • • •

ACTING UP

TOWED by Mr. Rosenblatt, the press agent, I came alongside large Mr. Bud Pollard, "well-known stage and screen producer and director." He is the guiding figure of the Nudist Theatre Guild, which "was formed to openly espouse the movement of nudism." Assured me with a fairly straight face that he and all the members of the company are exponents of nudism, and that the enterprise has the approval and support of "the established nudist movement."

I asked Mr. Pollard whether he ever had visited a nudist camp. He said well, no, he hadn't, because he had his reputation as a director to consider. I then asked the members of the cast whether they ever had visited a nudist camp. They said no, because they had their reputations as actors to consider. Of course, as show people, they had some knowledge of the popular Flo Ziegfeld-Earl Carroll-Billy Minsky school of nakedness.

• • • •

NUDIST PROTESTS

YOUR correspondent did not wait for the rehearsal, if any, but, just for fun, went to chat with the Rev. Dr. Ilsley Boone, executive secretary of the International Nudist Conference, managing editor of The Nudist Magazine, and all-around grand sachem of America's unclothed.

The chipper little minister was not as indignant as I expected him to be at the news of the pseudo-nudist stage activities. He disposed of them in a few well-chosen sentences. Said that the organized nudist movement has no knowledge of the enterprise; that no one associated with it belongs to a recognized nudist organization, so far as he knows; that it has not been and will not be approved; that it is manifestly impossible to represent nudism—on stage or anywhere else—by wearing any clothes at all.

That last may be a little difficult for the uninitiated to understand. It seems, however, that nudists believe in complete nakedness, attaching a stigma of indecency to small vestiges of apparel.

• • • •

LIKES PLAY IDEA

DR. BOONE said the conference, which is a co-ordinating organization of all the camps and groups, would be delighted to support any sincere company of players who'd tour the nudist camps and give performances in the altogether. He even has suggestions for a nudist repertory: Shaw's "Back to Methuselah," Gantillon's "Maya," John Erskine's "Adam and Eve," Thompson's "The Warrior's Husband," Schnitzler's "The Affairs of Anatole" and Behrman's "The Second Man."

The only play written about modern nudism by a recognized dramatist was Tom Cushing's "Barely Proper," a short comedy. When Cushing wrote it he labeled it "an unplayable play," but that was a wrong guess. It has been given several times at summer camps hereabout.

I asked Dr. Boone about the nakedness prospects for the coming summer, and he said they are fine—just fine. There'll be about twice as many camps this year—some twenty-five near New York City and seventy-five scattered around the country in Texas, Nebraska, Michigan, Missouri, Indiana, California and other states.

Incidentally, Dr. Boone's secretary is named Eve.

Wise and Otherwise—

NO MAN is free when he cannot sell his labor.
—Hon. H. H. Stevens, Canada's former Minister of Trade and Commerce.

IN ESSENTIALS a lady remains exactly what she always was. Naturally, as customs and times change, superficials change, but the essentials, never.
—Mrs. Franklin D. Roosevelt.

New Longest Word In Language Adopted At Convention

ABOUT 200 men and women to whom puzzles and mysteries are the principal fun in life have been meeting in New York for a three-day convention. They lost no time in trying out upon their peers their pet baffliers.

The convention is the 103rd semi-annual meeting of the National Puzzlers League, which boasts as its motto: "Puzzling Is the National Indoor Sport of America."

A new tongue twister, a forty-five-letter word that many members of the league confessed they could not pronounce even after practicing it all day, was adopted as the official long word of the association. Here it is: Pneumonoultramicroscopicsilicovolcanokoniosis.

"Puzzlesmith"—that is the name by which the gray-haired, genial president of the league, Everett M. Smith of Boston, is known to his fellows—explained for the benefit of the uninitiated that the word "simply" means a special form of silicosis caused by ultra-microscopic particles of siliceous volcanic dust. The new forty-five-letter-long word of the league replaces the twenty-eight-letter official long word that had been favored previously by members of the league.

THE PREVIOUS LONGEST WORD

THE FORMER honored long word was antidisestablishmentarianism. What did it mean? Puzzlers looked blank a moment, then launched into an excited explanation of "the positively most baffling cryptogram I ever invented," or some other favorite brain child.

Oedipus, who in Charles Jacobsen of Whitestone, Queens, attempted in his role as chairman of the convention to tell of the "noble" heritage of all fans of puzzledom, but even he forgot his official position long enough to propound a few conundrums of his own in honor of Washington's Birthday. Puzzles and mysteries date to Biblical times and have held the interest of every nation at some time; the popularity of the sport is increasing, and—here Oedipus paused a moment and then, eyeing newspaper men with a quizzical smile, shot out.

"Take this anagram: 'Washington Crossing the Delaware'—can you make a new sentence using the same letters and suggesting the same meaning?"

A broad smile shone forth beguilingly from the eager face to which Oedipus was doing his utmost to give an innocent expression. The newspaper men resisted the temptation momentarily, but Oedipus's sugary persuasion lured them into the trap. Too late they discovered their horrible mistake and one by one threw in the sponge.

"Well"—and now Oedipus was beaming triumphantly—"what do you think of this: 'A Wet Crew Gain Hessian Stronghold'"?

TRAIN JOURNEY STUMPS ALL

THE PROBLEM that even the champion puzzlers of the select inner circle could not solve was:

"On a train passing through Easton and Weston are a carpenter, a plumber, a bricklayer and an electrician, whose names are Smith, Jones, Robinson and Green, but not respectively. There are also four merchants, Mr. Smith, Mr. Jones, Mr. Robinson and Mr. Green. All of these live at different points along the line.

"Mr. Robinson lives at Easton. Another merchant lives at Weston. The bricklayer lives half way between the two. Only two of the crowd live as far apart as the plumber and his namesake.

"Most of the men play the races quite regularly. Last year the carpenter claimed to be the biggest loser of the bunch, but it turned out that the electrician was no better. The bricklayer's nearest neighbor, who is also his namesake, lost just half as much as did Mr. Green, his furthest neighbor, who lost exactly three times as much as he did. Robinson was the only one of the crowd who neither won nor lost on the season's races as a whole. Mr. Jones lost just $100.

"Query: What is the name of the carpenter?"

When all had given it up Oedipus said: "The carpenter's name is Smith, but for God's sake don't ask me why or how!"

Dictatorship

Generals and Admirals Have It All Planned For U.S. In Event of War

From a Special Correspondence

WASHINGTON D.C.

WHEN the war clouds scud around over Europe, everybody here begins to remember how we got into the last big war and to wonder whether we will have better luck next time.

The War and Navy Departments have some ambitious plans to turn this government into a military dictatorship in event of war. These plans are embodied in seven bills which the generals and admirals drew up and planned to rush through Congress when war actually came along. They mess up the constitution more than any new deal proposal to date.

Military and naval men are terribly sore at Senator Bennett Clark of Missouri because he found out about the bills and insisted on introducing them in peacetime, when Congress could get a good look at them, without being stampeded into a possibly Hitleresque programme which would be comfortable only to certain brass hats.

Clark happens to have been a wartime colonel who was attached to the army general staff. But they could not stop him and the bills are now being considered by the Senate munitions committee, which will report out some wartime legislation, but does not like the army-navy bills at all.

One objection is that the bills appear to contemplate either a mass military attack on the United States, which few senators believe possible—thanks to our geographic isolation—or a great war of aggression, such as most civilians here oppose.

Another is that at some future time they might suddenly be dragged in, for purposes of Fascist rule, in the case of a mere war with some weak, minor country which would be no national emergency at all.

LIFE AND DEATH POWERS

THE BILLS, if they became law, would empower the President to confiscate private property and enable him to abolish freedom of the press; compel registration for the draft of every citizen over eighteen, all of whom would then be at the president's command and subject to courtmartial for failure to appear upon call to duty; provide for licensing all forms of business in such way as to confer life and death powers and authorize the drafting of labor as well as soldiers.

Use of child labor even might be necessary, according to the "Industrial Mobilization Plan" of which the bills are a part.

The plan also speaks of diverting as many as possible of 10,000,000 employed women and girls over sixteen "to munitions and essential civilian industries."

Four Wives For Each Man

By MARY BARBER

With the British Columbia Delegation to the Imperial Press Conference Meeting in South Africa

CAPETOWN

THERE are two things definitely to be avoided in general conversation in Capetown. Perhaps, for that matter, one might be broader in scope and include all South Africa. One is politics and the other nationality.

This is in connection mainly with the white people; in connection with "the colored folk of the Cape," as the people of various shades of olive skin are called, it is different, though equally mystifying to the visitor. One of the most interesting of the "colored folk" classes are the Malays. There are over 30,000 of them in a quarter in the main part of the city, providing a story that goes back to the days when the tall ships of the Dutch East India Company sailed into Table Bay for refreshments.

CAME AS SLAVES

The first Malays came to the Cape in 1667, to be treated as slaves because of their antagonism to the Dutch, and sent in gangs to work in extremely hazardous undertakings in Table Mountain forests. Toward the end of the seventeenth century, Sheik Joseph, the most famous of Malays, arrived with his harem and followers, to find a warm friend in Governor Simon van der Stel and a better feeling ensued between the two peoples. When Sheik Joseph died five years later, he was buried in a beautiful spot which afterwards was marked by a magnificent tomb known as the Kramat, and every year hundreds of Malays make the pilgrimage to this tomb, a cavalcade of blazing colors, to beat their drums and worship the "holy man."

From the first the Malays showed a marked superiority to the natives of Madagascar and West Africa negroes who were shipped here in shiploads as slaves. They are still known as the aristocrat of the colored people of the Cape, respected for their industry and protected by legislation. They are distinguished by well-shaped, clear-cut features, black, oblique eyes, delicate hands and small feet, and rounded foreheads.

The men were from the beginning excellent craftsmen and builders and there is a distinct Malay influence to be seen in many of the better buildings of the city. One also meets as greengrocers, shoemakers, fishermen, basket weavers, masons and chauffeurs. The women, picturesque figures in wide, voluminous skirts, wide hemmed or ruffled, with tight bodices over which is draped a colorful shawl and with also colorful headdress called a doek and with gold earrings, have for the most part discarded the veil.

BRIDE NOT AT OWN WEDDING

A Malay wedding of the higher caste—caste counting much more than mere wealth—is said to be one of the most gorgeous sights to be seen here. The Malay girl now makes her own choice; she is not present at the marriage ceremony in the mosque, but you may see her driving through the streets in an open carriage afterwards, wearing the golden "medora," gold and silver floral head-dress of the bride. She may be one of several wives, for the Koran allows each man four wives and the South African law does not interfere. But apparently there is little jealousy, each wife receiving equal treatment and her own apartment.

In all religious observances the Malays of Capetown follow the ritual of Islam. In the beginning they were not allowed to build mosques, but of later years this has come about and now several are within the Malay quarter, filled to capacity when as day breaks over their flat-roofed, white-faced houses with their shutters and high steps, and again as the sun is setting, the priest and a number of his followers step out on the minaret of the mosque to call the faithful to prayer.

PILGRIMS' SHIPS SAIL

It was Friday when we spent the morning in the Malay quarter and a holy day and the narrow streets of the quarter were lined with red fezes, silk head coverings and colorful robes of all descriptions as the dark-skinned people wended their way along. We were allowed to enter the temple later and, with shoes off, approached the seat of the priest to have our guide explain the various pictures, chief of which were three of Mecca, the tomb of Mohammed, across the sea and over the Arabian desert.

It is written in the Koran that once in each follower's lifetime he must make the trip to Mecca and each year from Capetown thousands leave on this long journey. When the pilgrim ship leaves the wharf in Table Bay there is heard a single moan from the multitude of friends assembled to say good-bye, a moan which is said to be a sound such as is heard in no other crowd. A priest on shore chants and the faithful answer "Allaho Akbar."

ARTISTS AT TRICKING

The songs of the Malays in the Cape are known as "gommalledjies" and are really folk songs of the people. Some are songs known in Holland centuries ago; some are of the days of yore in their native land, and others date as recently as a few months past. They are a story of the people and of their life and one of the most amusing about which we heard had been composed about one of the cheap shops in the city featuring sales of various natures. Guitars and drums accompany the songs from the Netherlands and East Indies and of recent years an attempt is being made to record this music by European musicians. The men's voices are very good indeed and are heard on occasions over the radio, but the women's voices are apt to be shrill and unmusical.

The Malays are full of superstitious customs and what we might term witchcraft and which is known here as tricking. Through a mesmerizing process they attempt various things of various natures. One of the mysteries which they brought from the East Indies with them is the "Khalifa" or Malay sword ordeal. This performance has been successfully staged in Capetown, with royal visitors from overseas attending. Drums thudding, tambourines playing, players slash their arms with swords to the rhythm of the music. A man with sharp skewers thrust through his ears, throat, shoulders and cheeks walks among the audience. Men stab themselves with daggers in a sort of religious frenzy and ecstasy while incense fills the room. And yet there is hardly a drop of blood to be seen throughout the display and no one has even been able to explain the stoicism of the performers. The number of such displays are now restricted.

"Running amok" is another ancient custom of the Malays, happily only existing in milder form at present at the Cape. The Malay, it seems, does not appreciate the committing of suicide in the usual prescribed manner. When he imagines a wrong has been done him, either by his family or his fellowman, he turns to an old custom which is regarded as honorable among his people. He grasps his kris (knife) handle, draws the weapon and stabs the nearest person to the heart. Then he dashes out into the street, knife in hand, to the shout of "Amok! Amok!" He runs straight on, never turning, stabbing everyone or anyone in his path, until surrounded by followers with their spears, knives or guns, he dies in the excitement of battle.

There is a great breath of the past in the Malay quarter at Capetown; a past that lives with color and romance.

One-way Drinking Street

From a London Correspondent

LONDON.

OXFORD STREET, London W., has now become a one-way drinking thoroughfare and the world has lost one of its best jokes.

For many years now it has been one of the "most amusing things, you must see it, my dear," in London for visitors from the provinces and from abroad—the street where you can drink until 11 p.m. on one side and not after 10 p.m. on the other.

People from all over the world have visited the street in order to see this curious anomaly in what our councils claim is the best-run city in the world.

For the result is that we find restaurants like Frascati—and the Cumberland Hotel—put "out of bounds after 10 p.m. because they happened to be on the wrong side of the street.

The reason for this typically English state of affairs is that these, and many other similar unfortunately placed places where alcoholic refreshment is obtainable, are under the jurisdiction of Marylebone.

The hotels and restaurants on the other side of the street are in Westminster, where the justices, as in most other parts of the metropolis, decided that 11 p.m. was a suitable time to stop drinking.

The advancement of the closing hour from 10 to 11 p.m. was brought about by a concerted attack delivered by the Licensed Victuallers on the Marylebone Justices bench by bringing an application from their members and a petition from their customers.

Sir Henry Curtis Bennett, K.C., championed the cause of the licensed victuallers, while he had as an ally M. St. John Hutchinson, a newly created K.C., representing the hotel and restaurant proprietors.

Against a determined opposition led by the Bishop of Willesden, the Church Army and members of the Free Churches the victuallers won their case—amid loud cheering.

What those Londoners will do now, who used to derive so much enjoyment from pointing out to their friends from the country this supreme example of red tape, I do not know.

I, for one, shall regret the passing of the "one side only" street of drinking. It was possible before to walk down one side of Oxford Street in perfect comfort, as one was generally the only person on the pavement.

Now, when the public houses are open on both sides I suppose the crush will be as unbearable as before. Still, I suppose it has made a number of people happy—I mean the publicans and restaurant owners.

As for the argument about increased drunkenness—it is just nonsense. If a man wants to drink a large amount of alcohol, it is far better that he should have five hours—and do it slowly—than four, and have to pour it down fast.

"The Old Maid" Pathetic

CERTAIN plays which began with unenthusiastic notices on Broadway have risen with the advent of spring into the category of hits.

"The Old Maid" is one of these, a sentimental study of maternal yearning which Zoe Akins has adapted from Edith Wharton's novel. The story, if you don't recall it, concerns a "poor relation" of one of New York's proudest families, who sacrificed her own happiness that she might remain near her illegitimate daughter. But having done that, she watches the girl grow up calling another woman "mother" — while the real mother becomes the "old maid" of the family circle.

There are two stars—Judith Anderson, as the lovely but childless mother-by-adoption; Helen Menken, as the maternally-conscious spinster who has borne a child out of wedlock. They make gripping drama out of "The Old Maid," and even strong men weep quietly through the third act.

Judith Anderson . . Not real mother, but gets the honors.

Broken Homes

Broken Lives Greater Tragedy; Martyrdom Usually Futile

By HELEN WELSHIMER

BROKEN lives are a far greater tragedy than broken homes.

When annual statistics are presented as to the number of children not members of compact family groups, wails of commiseration arise because children are deprived of a healthy, normal, happy environment which is the result of a home in which the father and the mother love each other.

Certainly it is too bad. But—a father and mother who do not love each other cannot produce that background! Nor can they fulfill their own capacities for rich and helpful living as individuals. They are stifled and strangled and choked. That fact should tell them that the environment is bad, and their first need is to seek a cleaner, clearer one.

We have tasks to perform, duties to keep. That we all know. But self-sacrifice will never help us with them. Being false to ourselves, we cannot be true to anyone else. Each one of us is a personality, with a fulfillment which demands that we meet it. That comes first. And when we realize it, we best serve humanity.

MISFIT MARRIAGES

TAKE the case of the young father with brilliance, family position and rich heritage of social background, ideality and talents. He wanted to find a love that would bring him emotional security, beauty, peace and quietude so he might realize the ambitions that were bone of his bone, breath of his breath, as they had been of his father before him.

He put the cloak of his love on a girl. But it didn't fit. He noticed the fact afterwhile. It was a beautiful cloak, woven from much devotion, many dreamings, but she was letting it drag in the dust. He tried to pick it up for her but she merely laughed. She didn't care. She hadn't woven the garment. He had. And he had chosen a girl who didn't fit the cloak.

So he settled down to bondage, believing that chivalry compelled him to keep his bargain. Chivalry to the woman and their children. He hindered his own advancement, became desperately unhappy and made no contributions to the woman's contentment. It is always so.

GALLANTRY GONE AWRY

LET US take the case, too, of the man who is married to a girl whom he still likes and admires, or a girl who has been mated to a man for whom she has a lessened devotion. The man has found the love fulfillment he seeks in another woman, or the girl has found it in another man. But they decide that the gallant thing, the chivalrous thing, is to go through with the first romance. So he surrenders his happiness for a lesser one, or the girl, in the other instance, does the same thing. And no one is happy.

For we can't build happiness on false foundations. We cannot create joy for another by sacrificing our own portion of it. The deceit is always discovered. Honesty may hurt, but if we are courageous enough to employ it, the chances are that life will step in and work a better adjustment for the girl or man the sacrificing one tried to serve, than he or she could have done.

We are afraid to trust life, God, the great cosmic forces of the world!

SENSELESS SACRIFICES

SELF-SACRIFICE never does anything but create unhappiness for the one who makes the splendid gesture, without adding one iota, in the final consummation, to the one for whom it was made.

The fact that two other people find their responses in each other should be conviction of that action's rightness. We speak, of course, of only true, rich, abiding love. Not the counterfeits which may pass for real devotion.

There are working girls who sacrifice so their mothers may have unneeded new curtains. If they didn't, the sun would shine as gaily through the old ones. There are parents who walk in shabby clothes so Johnnie, who cried for a new unneeded sweater, may have it. Johnnie should have been spanked! Or the parents should have been lectured.

We are afraid to take that which is ours.

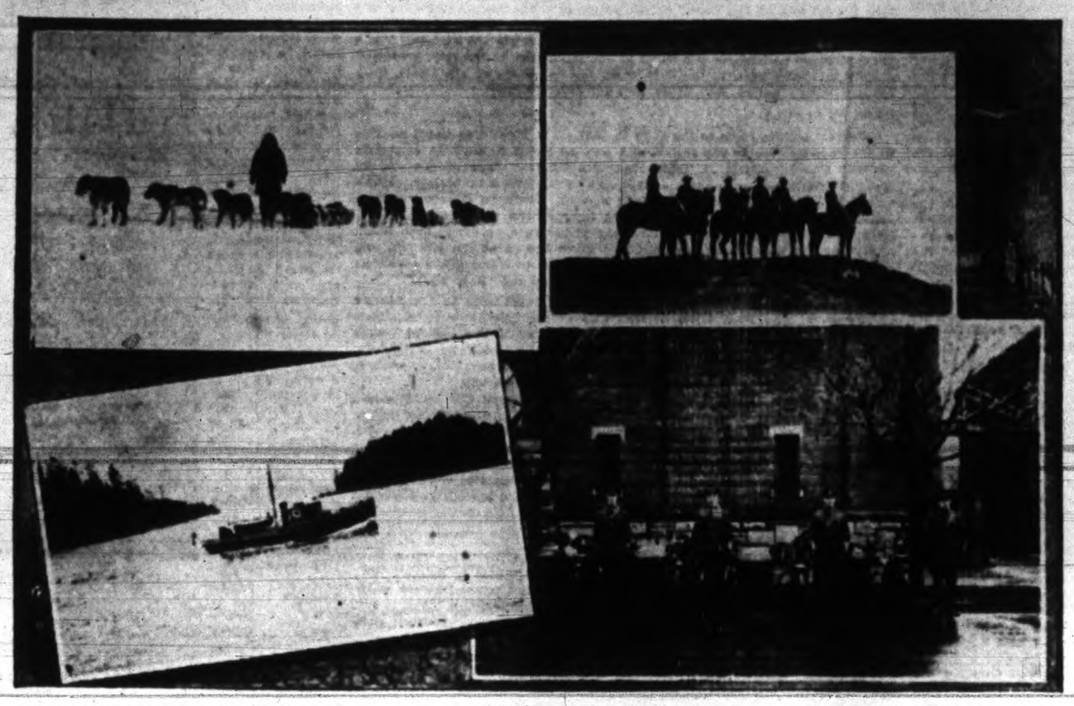
Certainly unselfishness is to be commended highly. But martyrdom is an exceedingly futile state!

Princely Drinking Job

HIS ROYAL Highness Prince Mike Romanoff has a new job. As goodwill agent for a liquor concern, all he has to do is demand certain brands on his rounds of the night clubs and Mayfair saloons.

SCIENCE AND INVENTION

Radio Telegraphy *vs.* The Underworld



GUARDIANS OF BRITISH COLUMBIA—Four types of patrols utilized by the Provincial Police in maintaining law and order in British Columbia. Top left, is the northern patrol, top right, the mounted troop; bottom left, the P.M.L. 8 patroling coastal waters, and, bottom right, the motorcycle patrol. It is on these patrols that the latest addition to the police radio telegraphy system—thirty-pound portable receiving and transmitting sets—are used extensively. They may be taken to any section of the country and within a few minutes set up for operation to report progress of investigations to he adquarters.

ACTION AT HEADQUARTERS—Constable Brian Weld, a member of the police headquarters staff at the Parliament Buildings, in action here in the small office adjoining that of Commission J. H. McMullin, as he writes down bulletins pouring in on the daily schedule. The faint outline of the radio map may be seen on the wall in the background where the small dots indicate points where radio stations are located.

SUCCESSFUL FIELD TEST.—The successful test which marked the completion of one of the new thirty-pound portable transmitting and receiving sets is being conducted here by Sergeant C. G. Clark, N.C.O. at headquarters, and Constable Wilfred Conlan, the builder of the sets, whose work has been warmly praised by Commissioner J. H. McMullin. Constable Conlan is at the dials, with Sergeant Clark reading the test message.

By TED FOX

THE DEVELOPMENT of radio during the last twenty years has been one of the marvels of the present century and outstanding among its achievements is the assistance which it has given police in combating crime.

This, in fact, has been perfected to such an extent that it has now become an issue of radio vs. the underworld, and arch-criminals whose activities are international in their scope are gradually realizing that crime does not pay because of the extension of the tentacles of the law brought about by radio.

This is probably evident to a greater extent in the broad expanses of the Dominion of Canada, than in any other single country of the world. Particularly has radio's worth been proven in British Columbia, where the Provincial Police have established a short-wave radio-telegraphy system second to none from a point of view of service and efficiency and envied by constabularies the world over. The system is the only one of its type operated by police departments in Canada and in efficiency is paralleled only by the system employed by the Pennsylvania State Police of United States.

The nucleus of this British Columbia system is located in the police branch of the government buildings in Victoria, where messages pour in on a steady schedule, bringing to Colonel J. H. McMullin, commissioner of police, and other departmental officials, first-hand news of crime throughout the province. Daily, from a tiny office adjoining that of the commissioner, instructions are sent out to divisional points, where commanding officers are informed of correct procedure and the wishes of the crown in connection with prosecutions and arrests.

In addition, the network provides a greater service. Although it has only been in use a few years, it has, on several occasions, kept the world in contact with matters of wide interest which were confined to isolated areas, and has been the only source through which official news was available on these activities.

EMBRACES WIDE AREA

IN ALL, the network covers an area of 120,000 square miles, including Vancouver and the Queen Charlotte Islands. There are thirteen land, five ship and eight portable stations, with a staff of fifteen regularly employed operators. Other members of the force are available for radio work at all times. One of the biggest features in connection with the radio staff is the splendid technical ability of its members. Every set which the department operates was built by a member of the force and consequently was done at a minimum cost.

While dealing with the matter of cost, it is interesting to note the small appropriation required annually to operate the system. With the network at its present strength, it is estimated no more than $150 is necessary for maintenance allowance. Here again, the technical work of the operators is in evidence, as they are fully competent to repair all breakdowns to equipment.

One of the most important branches of the service is that provided from five patrol boats which police the Coastal waters of British Columbia. Headquarters is at all times in touch with the moving craft, and on a map in the local office the shifting of the boats is charted in order that their exact positions may be known if an emergency call should be received.

The system has been built up gradually since its inception, the latest addition being two portable transmitting and receiving sets, weighing only thirty pounds each. These were constructed by Constable Wilfred Conlan of headquarters, who, with Constable Gordon Daniels of Prince Rupert, has contributed largely in the building of the sets now operating. These portables, which are a marked improvement over the man-carried machines used last year, may be utilized on long patrols by men who often were out of communication with their divisional offices for several days at a stretch when conducting investigations before the advent of radio telegraphy. It will now be possible for them to maintain constant direct contact with their superiors.

STANDARD TRANSMITTER—The standard type, 50-watt transmitter, at police headquarters. It is of tune plate, tune grid design, and utilizes power from the local 110-volt power lines, which is "stepped up" to 1,100 volts by a rectifier.

PIONEERS IN RADIO FIELD

THE BRITISH COLUMBIA Provincial Police were pioneers in using radio for police work and were the first force to utilize short-wave radio telegraphy.

The first sets were built in 1928, when four were completed. After several months of experimenting on land, sea and in the air, this quartette was installed in June, 1929, in Victoria, Prince Rupert, Nelson and Kamloops. During the first month's operation 400 words were transmitted over the set-up. An idea of the development which has taken place is realized when one is told there is now an average of 70,000 words sent over all stations.

With the success of the four installed stations, the authorities, with much foresight, saw the important role which radio was to play in police circles and commenced plans for expanding the network throughout the province.

Subsequently the fifth station was designated in January, 1930, when the Provincial Police divisional office at Vancouver joined the hook-up. Then began the programme of expansion which ultimately was to cover the entire province and leave scarcely any section of British Columbia's far-flung northern areas untouched. Prince George, in the middle of the province, was the sixth unit, this hook-up being completed in May, 1930.

Then came the installation of a set aboard the Police Motor Launch No. 8, stationed at Prince Rupert. Penticton was next in February, 1932. In May, August and December of the same year, stations were installed aboard the P.M.L. 7 at Alberni, at Cranbrook, and the P.M.L. 9 at Pender Harbor, respectively. The fourth of the motor launches, No. 9, stationed at Ocean Falls, joined the network in April, 1933. This was followed by connections with the Provincial Game Department boats Nos. 1 and 2 at Alert Bay and Powell River in April and May of 1933.

Savary Island and the Alert Bay land station were drawn closer to Victoria when their sets were installed in September, 1933. Subsequent installations were made at Port Alice where the P.M.L. 10 is stationed, in July, 1934; Alberni, May, 1934, and Williams Lake, June, 1934.

The last outpost to join was Pouce Coupe in the Peace River district, which placed its first message through to headquarters in October last year. During this period of the establishing of land stations, portable sets were being hooked up and tested and these were permanently included at various intervals last year.

PLAN NEW STATION

THE LONGEST jump of direct contact made daily between two stations is between Victoria and Pouce Coupe, a distance of 520 miles. This, however, will be second to the section to be completed this month when a station will be set up at McDame's Creek in northern British Columbia just south of the Yukon border. This is to be a portable station which will directly contact headquarters over the intervening 1,000 miles.

For the benefit of readers interested in short-wave radio communication, it would not be out of place to give a technical description of the sets operated at divisional points. They consist of standard 50-watt transmitters, tune plate, tune grid. Power is derived from the local 110-volt power lines and is "stepped up" through a transformer to 1,100 volts. It is rectified through a pair of mercury vapor rectifiers.

The receivers are of standard design but a feature of them is the inclusion of what is known as a "rapid switch," by which the operator may change from one police band to another without the inconvenience of spinning a dial and retuning the set. This is an important addition as the efficiency of the system depends on the ability to change rapidly from one wave length to another. The sets are operated on 40, 46, 62, 86, 124 and 175 metre wave lengths.

Experiments are conducted regularly, the latest being the perfection of ultra-high frequency transmission of speech between moving vehicles.

To the average reader radio telegraphy may not seem a very important branch of police work, and it is sometimes criticized as an extravagant expenditure. The extent of its extravagance is indicated by the previously quoted figures on maintenance cost, while its necessity and efficiency has been demonstrated on many occasions.

WORK SPEEDED UP

POSSIBLY one of the leading achievements of the system is the speed which it lends to tracing stolen car reports. Here, the size of the province enters into the picture, when one thinks of the apparent ease with which a car thief might disappear into the interior of British Columbia from one of the larger centres without being detected.

On numerous occasions the radio has provided the sole means by which the police were able to pick up a stolen car within a short time of the theft. If, for instance, a car with a Victoria license number was found in an interior town, the first action of the local constabulary would be to check up the description of the vehicle with the motor office records in Victoria. Naturally this has to be done with all haste before the suspected thief leaves the town. In a few minutes a reply is received from headquarters describing the vehicle and if the description coincides, the arrest is made immediately.

The activities of the British Columbia network, however, are not confined strictly to police work, and on more than one occasion it has been responsible for feeding the public first-hand information on events of wide public interest which have taken place in various sections of the province.

One of the most outstanding instances of this was during the ghastly Merritt murder, in which two Provincial Police officers were killed, allegedly at the hands of Indians of the Canford Reserve, close to Merritt. First word of this came through police radio channels and although press correspondents were rushed to the interior during the investigation, official news continued to come from the portable set which was dispatched from headqarters immediately.

RELIEVED FLOOD AREA

THE SEVERAL hundred people who were stranded at Hagensborg on the Bella Coola River during the heavy floods there last year are indebted to the police radio for the quick relief which they received from government departments. Through the system police craft in the near vicinity were ordered to render all possible aid.

Progress of the pioneering expedition conducted by Charles E. Bedaux, famous explorer, through the wilds of British Columbia's northland was recorded to the public solely by the police. They were able to pick up bits of information as the party passed through different points, this being relayed to headquarters and subsequently, through newspapers, to the anxious public.

In the planning of the system the authorities have left little undone. From the frozen wastes of the northland to the sunny shores of Vancouver Island there is not a point uncovered by the network and this, coupled with the fact that the department keeps constantly abreast of every new development in the radio world, makes the network stand out and bring additional commendation to the oldest territorial police force in Canada, which has always held a leading place in the everlasting battle against those determined to defeat the ends of justice.

CAESAREAN BIRTHS MADE MUCH SAFER TO-DAY

Handicaps of Early Surgery Overcome by Use of Anesthetics and Expert Assistance in Well-equipped Hospitals

By DR. MORRIS FISHBEIN

ONE OF the most dramatic operations in medicine is that which involves cutting into the body of a prospective mother to remove her child.

All sorts of superstitions are associated with common knowledge of this operation. It is said to have been called the Caesarean operation because Julius Caesar, it was believed, was born by that method.

The first actual Caesarean operation which can be authenticated was one which took place in Germany in 1610. It is conceivable that the operation had been done before that time, but those cases are not authenticated.

There are records of other cases performed in the eighteenth century. These are exceedingly interesting, because it must be remembered that up to that time anesthetics had not been invented, neither had surgeons learned how to prevent infections—a procedure introduced by Joseph Lister toward the end of the nineteenth century.

For a long time there was considerable argument among surgeons as to whether the abdomen should be sewed up or kept together with adhesive tape after the operation. Then, gradually, stitching came into general use.

First authentic record of a successful Caesarean operation in England with both mother and child living, was recorded in 1738.

Possibly the first Caesarean operation successfully performed in the United States was done in 1822.

However, there is a good record of a case performed in 1794 by Dr. Jesse Bennett of Virginia. This case was not reported at once in medical records, since the doctor had performed the operation on his own wife.

When asked why he had not reported his case, Bennett replied, "No doctor with any feelings of delicacy would report an operation that he had done on his own wife."

In that operation the patient was stretched on a crude table consisting of two planks, and put under the influence of a large dose of opium. The doctor did the operation himself and sewed up the wounds. The patient survived and the child, a daughter, is said to have lived to be seventy-three years of age.

These are remarkable records and indicate the tremendous handicaps overcome by our pioneer surgeons in their effort to meet the needs of the ill under primitive conditions.

Surgeons work to-day in hospitals finely equipped. They have the benefit of numerous anesthetics suited to the individual case.

The surgeon may be assisted by one or more helpers who aid in speeding up the work and in handling emergencies. Nurses take care of the necessary apparatus, and the chance of the patient for recovery is far beyond that under the primitive conditions of an earlier day.

How Tears Kill Germs

INFECTIONS of the eyes would be far more frequent were it not for the germicidal action of tears.

Experimenters have now learned that this germ-killing power of tears is due to a chemical coming into the class of enzymes. Like the different enzymes that aid in the process of digestion by breaking up complex compounds so that they can be absorbed by the body this chemical breaks up and dissolves bacteria.

Similar secretions have been found to be present in other parts of the body.

Five thousand of London's 17,000 constables are bachelors; they receive free living quarters, but pay for their meals out of a mess fund.

There were 1,128 daily newspapers and 217 weeklies in Germany in 1933, as compared with 2,703 dailies and 248 weeklies in 1932.

Invention Makes News Cuts At Small Cost Without Experts

ANYBODY can make newspaper cuts now from photographs—that is, with a few minutes' instruction and one of the patented automatic engraving plants or robot engravers that are now being turned out.

A British Columbia newspaper, The Nelson News, is one of the first papers to instal this equipment, which enables it now to present the local news of the day in pictures, reproduced at such a low cost as to be within the means of a small-town paper.

The experience of training even cub reports as photo-engravers producing news cuts under the new system was told graphically to members of the New York State Publishers' Association at their recent meeting.

George B. Williams, secretary and treasurer of The Geneva (N.Y.) Daily Times, explained the ease with which his paper had installed one of the $1,200 engraving plants of the Polygraphic Company of America, New York City.

A letter from F. F. Payne, publisher of The Nelson (B.C.) News, testified that The News "employed an absolutely green man on this work" and that the public "is showing an enormous interest in the local pictures which we are able to run."

The Polygraphic process, explained in detail in The Editor and Publisher Monthly Equipment Review for April 14, 1934, utilizes a special "Contrasto" strip film which eliminates west negatives and several other of the intricate engraving processes. Mr. Williams told of putting in the system as follows:

"Many of the changes necessary for setting up the dark room and the work room were made by our own force, working on spare time. Of course, it is necessary to have water, gas and electricity available.

"A representative of the Polygraphic Company came to our plant and in three days instructed two of our men in the use of the Contrasto film. We decided to have one of our reporters who has had some experience in photographic work and our composing room foreman trained. After securing knowledge of how to use the film, we started in without further instructions. There were, however, one or two small technical difficulties regarding etching, so we did not make good progress.

"While I was on my vacation, through newspaper friends, I was allowed to go through a large photo-engraving plant. There was great difficulty in securing this privilege and the way I was conducted through the plant, determined in my mind the fact that it would be impossible to send any of our operators away for instruction.

"While in New York City, Mr. Wines of A.N.P.A., put me in touch with E. W. Greene of Boston. Mr. Greene had been an instructor for five years in a school where photo-engraving was taught.

ADVERTISING CUTS ALSO MADE

"In November, Mr. Greene, who has developed work of an advisory nature for papers, came to us at a charge of $100 per week plus expenses. In a week's time he had our men well started on their way. Since that time we have had both good and poor pictures in the paper. The failures in results seem to occur when we have tried to reproduce pictures that were too complicated for our people. We have found that it is necessary to have a good picture to start with, but given a good picture we now feel quite certain of being able to secure fair results.

"One of the first problems was developing people on our staff to take news pictures. This is gradually being accomplished.

"Then we found that even given a good zinc etching, the stereotyping and press equipment had to be checked carefully. This we have started to do and are making progress each week.

"So far the engraving has been done by a reporter on a part-time basis. I believe when we really get into the swing of things we will be able to put a cut through in an hour from the time the print is brought to the man for engraving.

"There has been considerable interest on the part of our readers due to the pictures and we believe this will increase and become a valuable circulation builder. Twice we have made cuts for an advertiser which he has used in our paper, securing new advertising. I believe this is a feature that can be developed further. We charge the regular code price for this work."

Boy's Topsy-turvy Interior Amazes Doctors

All this poking, prodding and peering is a big pain to Wallace Rosall, six-year-old Glendale, Cal., lad shown left under X-ray examination, but what chance has he to skip out and play when he is such a fascinating subject for inquisitive doctors? Wallace always seemed a normal lad, but the X-ray photo above shows what prying medicos found wrong with him. His heart is on the wrong side, he has only one lung, his intestines are in his chest and on his hip, and he has no alimentary canal.

Farm and Garden

Anywhere Is Good Place For Garden

Flat Site Suitable for Formal Affair; Slope Has Drainage Advantages; Irregular Areas Cater to Surprises

By QUERCUS ALBA

IF YOU want a garden, and want it badly enough, you may make a garden anywhere. Yes, a garden may be made on a dead flat bit of ground, on a sloping site, on an irregularly-shaped lot, on rocky ground or on a site comprising some or all these natural features. But the important thing is to choose the site with the gardening prospects definitely in view.

A flat piece of land has certain advantages. Such a site is well adapted to extensive lawns, to large perennial borders, to the cultivation of flowering trees and shrubs.

A flat site lends itself to the more formal type of gardening. It is not to be supposed by this that the old Victorian carpet bedding form of gardening is suggested, but that more formal type which to-day has taken the place of it.

For instance, a formal rose garden, bounded by a hedge or stone wall, with grass paths and a sundial in the centre, or a slightly sunken garden after the Dutch mode. All this and much more can be done on a flat site. A flat site may be altered by excavation so that it is no longer a flat site, but this would be at a considerable expense in most cases, and so it is suggested that, as a rule, a flat site is more easily landscaped in the formal manner.

ADVANTAGES OF A SLOPE

A sloping site has many points in its favor. The drainage is, as a rule, much more perfect, without artificial aid, than that of a flat site, making for the well-being of plants, trees and shrubs. Again, such a site lends itself to the formation of terraces or different levels, to the construction of shrubbery banks, and sloping borders.

A great deal depends upon the direction of the slope or slopes, just how it should be treated to the best advantage, but no matter how the slopes occur, they may be taken advantage of by careful planning and the planting of the right thing in the proper place.

An irregularly-shaped bit of ground can be made into a very attractive garden by reason of its irregularity. An odd-shaped lot allows one to make a garden that cannot all be seen at once. There is always the possibility of having a surprise "just around the corner." By careful planning and planting, this may be carried to a very great extent in even a small garden. A pool, with waterlilies and goldfish, may be a hidden attraction which one may be made to come upon suddenly.

A rock garden, hidden from the main garden, may be of interest at all seasons of the year. If a low bit of ground exists it may be made into a bog wherein moisture-loving perennials and other bog plants may be grown to advantage. An iris garden in a sunny but secluded spot, a rhododendron glade, or a heath garden may be made features. In fact, an irregular lot is a good kind of lot on which to make a garden.

Next week I will continue discussing how to build a garden according to the contours of your land.

Mating

Too Many Cockerels Weakens Progeny; Dubbing Makes for Greater Virility

By J. H. TERRY
Poultry Commissioner

WITH ALL the talk of marketing acts, controlled selling act, quotas, etc., it is curious to note that the producer does not seem to take heed of the advice oftentimes given to cut costs at home by exercising economy.

How often one has visited farms where flock matings are in progress, and beheld the spectacle of as many as twelve to fifteen cockerels or male birds running with 100 hens or pullets? Upon remarking about the matter, the invariable reply is: "Oh, we had a few spare cockerels; we like lots of male birds."

The writer has always maintained that from six to eight males were plenty for Mediterranean breeds, and from eight to ten for the heavyweights or general purpose fowls.

One of the biggest arguments against a multiplicity of males is the fact that it is almost impossible to get a large number of males in one pen of equal vigor and stamina. It has often been noted that there are generally one or two browbeaten males present. Result is, they spend most of the day on the roosts, and at night come down to feed and, incidentally, to mate with the more energetic of the hens. These are generally still scratching after the majority of the males have retired.

In striking collaboration of the writer's assertions, comes a report from the Oka Agricultural Institute, Quebec. It might be remarked that in the writer's estimation, there is not another experimental or demonstration farm in the whole North American continent where experiments are conducted more painstakingly or thoroughly. This farm is operated by Trappist monks, and in incubation experiments, it may be mentioned that the machines are attended by brothers twenty-four hours daily, throughout the hatch.

The experiment mentioned is that of an accidental discovery made whilst dubbing the breeding males. This is done in most eastern Canadian provinces to avoid frostbites. It was found that the operation seemed to endow the birds with additional vigor. The following year, 1932, a Leghorn male was given forty hens in a pen, and 98 per cent fertility was secured. In 1933 a male was given sixty females, and 96 per cent fertility was registered. Last year 100 hens were placed with a dubbed Leghorn cockerel, and 90 per cent received fertilization.

It should be noted that in some parts dubbing takes place in October to allow the birds to recover. In Manitoba, the Leghorn pullets and cockerels are dubbed at six weeks of age, on account of the small size of the comb and wattles. It should be mentioned that in the above experiments the comb and wattles were dubbed.

It is suggested by the report that the heat and blood of the comb and wattles are transferred to the generating organs, giving them added activity.

It is too late for this season, but many breeders should be able, by dubbing their males, to cut down expenses of feed, and also by reducing the birds, be able to select a group of breeders.

Turkeys From Canada Best

Reports from Great Britain concerning the turkeys sent by Canada to the British Christmas market are full of praise, and unite in saying that Canadian turkey raisers, and all those who were associated with the shipments this season, have demonstrated their ability to supply to the British trade exactly what it wants. W. Waldron, markets commissioner for Saskatchewan in the British Isles, paid personal visits to the London central meat markets at Smithfield to see the Canadian turkeys being unpacked and at the same time to look over some of the British and continental birds. In a written report he stated:

"Without the slightest hesitation one can state that the birds sent from Canada this season are the best that have ever come from the Dominion. The turkeys themselves are well finished, the grading leaves nothing to be desired, and the packing and the markings have received careful attention. One wholesaler remarked that 'the Canadian birds are a pattern to anybody,' while another importer who had not been particularly pleased with some of the birds last year declared that 'Canadians would carve a special niche for themselves if they kept to that kind of quality for export'."

Where To Put Your Annuals

For Dry and Poor Soils

Tom Thumb nasturtiums (many colors and varieties, all about nine inches tall); candytuft (white spiral, nine inches, and rose cardinal, six inches); antirrhinum (many varieties and sizes); clarkias (two to three feet tall).

For Shady Situations

Nigella (Miss Jekyll, blue, fifteen inches); coreopsis (Drummondi, thirty inches); tiger star (nine inches); eutoca viscida (blue, nine inches); evening primrose (two feet); night scented stock (nine inches); nicotina (eighteen inches); verbena (six inches); pentstemons (fifteen inches).

For the Rockery

Gypsophila (white and pink varieties, nine inches); saponaria calabrica (pink, six inches); nemophila (blue and white varieties, six inches); limanthes Douglasi (yellow, four inches); scarlet linum (twelve inches); lavia elegans (nine inches); dwarf antirrhinums (four inches).

Advise More Pear Planting

According to The Agricultural Situation and Outlook, issued by the Dominion Department of Agriculture, a general survey of production of fresh pears in Canada suggests that pear acreage can be increased 20 per cent before the domestic market reaches a saturation point. This situation, together with an increased export demand, seems to warrant consideration being given to the possibility of increased plantings, mainly of the Bartlett variety.

The United Kingdom cannot get enough Canadian pears, the British market absorbing all the Canadian exports and asking for more. The 1934 statistics show that 44 per cent of the total imports of pears into Great Britain were from empire sources, Canada contributing less than 5 per cent. During the twelve months ended March 31, 1934, exports of canned pears from Canada to the British market increased 46 per cent compared with the previous season's exports. On the other hand, fresh pears amounting approximately to 180,000 bushels are imported every year into Canada from the United States, a large proportion of this import finding its way into canned stock.

Island Colts Sell For $75

According to reports to the Dominion Department of Agriculture the horse business on Vancouver Island is brisk, with a demand in every district for horses from 1,400 to 1,600 pounds for farm and logging purposes. At a sale south of Nanaimo on February 20, yearling colts sold for $75 each. Farmers on the island do not prefer horses from the interior, as these animals are not usually quiet enough for the small farmers who have tree stumps to contend with.

Garden Hints For This Week

BORDER CARNATIONS should be planted out as soon as possible. Those wintered in frames will be quite ready for the open ground, but any from the heated greenhouse had better be thoroughly hardened off before planting out. Give manure in moderation; do not add leaf mold; plant in a sunny, well-drained position.

* * *

POTATOES of the early kinds may still be planted. Walter Jones, of the Experimental Farm, does not recommend dipping cut potatoes in lime, sulphur being much better for the purpose.

* * *

SWEET PEAS may be sown outdoors this month or young plants in pots can be purchased and set out.

* * *

ANNUALS—Sow hardy and half-hardy varieties where they are to bloom. Sow thinly.

* * *

GLADIOLUS — Continue to plant. Bone-meal is a suitable fertilizer.

* * *

TAKE CUTTINGS of perennial phlox and choice lupins, root in sand.

* * *

LILY POND—Look over and give it a thorough cleaning out. Replant the lilies in fresh soil and place them where they get the most sunshine.

* * *

DAHLIA SHOOTS of three to four inches long are best for cuttings. These can be inserted singly in small pots and when well rooted shift into larger pots to be planted out sometime in May. We know dahlia growers who never put in tubers, relying entirely on cuttings.

* * *

BEGONIAS—The earliest seedling should be ready to prick out into well-drained, clean pans filled with peat, loam and sand.

Governor-General Plants Tree In Park

Here is a view of a recent ceremony in Beacon Hill Park, when the Earl of Bessborough officiated with the spade in planting an ash tree. On the left can be seen Alderman John Worthington, Chairman of the Parks Board, while in the background is Acting-Mayor F. S. Brown.

Pale Hyacinth Sprang From Spartan's Blood

Flower of Sorrow, Mythology Says, But Bulb Typifies Awakening Earth; Rubaiyat of Omar Khayyam Popularized White Variety in Victoria; Should Have Soil Change Each Year; Scoring and Slicing Two Methods of Propagation

By A. L. P. S.

OUT OF the blood of a beautiful Spartan youth, Hyacinthus, who was killed accidentally while tossing a discus, grew a little flower which hung its head in perpetual sorrow, so mythology says.

Whether the ancient Greek legend is right or wrong, the hyacinth with its drooping bells painted every lovely pastel shade typifies spring. Its colors reflect the warming earth, but do not shout aloud of the heat and brightness of summer.

Many a person out for a drive along the Island Highway in April has noticed a soft patchwork quilt of flowers on the slopes just past Parson's Bridge. This was the hyacinth plantation of Kelvin Grove, the farm of Malcolm and Neil Pollock. Fifteen thousand bulbs went to make this kaleidoscope of light blues, mauves, pinks, creams and whites.

Unfortunately this year motorists will not be treated to such a sight, as the Pollocks sold a great number of their bulbs this winter, and have only some 6,000 young stock left. From this it can be seen there is a fair demand for hyacinths, though, as in the case of all commodities, they have suffered from general financial conditions.

NO DEMAND

A short time ago there was no demand for white hyacinths. People would buy pink and blue varieties, in fact any color but white. For some reason they turned up their noses at the white hyacinth.

Then the Persian poet, Omar Khayyam, came to the rescue of Neil Pollock, who looks after the sales end of the brothers' business. Mr. Pollock remembered a verse from the "Rubaiyat," the famous song of wine:

"If all thy worldly goods thou art bereft,
And two small loaves are all that thou hast left,
Take one, and with the dole
Buy white hyacinths to feed thy soul."

Mr. Pollock got a local artist to paint a sign with these lines inscribed on it. The advertising paid and there was an immediate turnover. Now, Mr. Pollock says, he sells more white hyacinths than any other color.

All varieties of hyacinths are equally hardy, and the Pollocks have had little trouble with diseases among these bulbs. This is probably due to the fact they lift their hyacinths every year and put them in new soil.

RICH SOIL

Hyacinths need a rich, heavy loam, as they are rank feeders. Plenty of well-rotted manure should be dug in when preparing the beds. If the gardener has none of this, bone meal will do.

At Kelvin Grove they lift their hyacinths in July or August and replant them at any time in September or October. The bulb is most useful to greenhouse men both as pot plants or for cut flowers. In the garden the blooms last for about three weeks, while in a vase they are good for ten days.

Hyacinths are propagated in two ways. When the bulbs are lifted little V-shaped knicks are taken out all around the tuber with a sharp knife. As the plant increases at its base during its rest period, little bulblets will form at the knicks when they are in the bins. These bulblets can be broken off when it is time to replant, and set out in a separate bed. In about two years they will mature into a full-sized plant.

Another common method is to slice the bottom of the bulb. Whenever there is a threat of destruction nature tends to reproduce, so bulblets will form where the slice has been taken out. However, the Pollocks prefer the first method, as they feel the latter weakens the original bulb.

Trillium for Ontario Emblem

A year ago the three professors of botany of the Western University, London, the University of Toronto, and Queen's University, were commissioned to investigate as to what flower should be chosen as a provincial emblem for Ontario. After an exhaustive investigation they decided that the White Trillium was the flower most widely grown and the best liked throughout the province, and it is expected that the Ontario government will shortly pass a bill designating the White Trillium as the provincial emblem. Here is a picture of White Trillium, which is a beautiful flower with very fine foliage.

Queen Of Pinks

This magnificent hyacinth has a spike ten inches long.

Chance Began Plough Concern

A Canadian romance is unfolded in The Implement and Machinery Review (Great Britain). Quoting the phrase of the poet Schiller, "There is no such thing as chance," the journal says "yet 110 years ago, as a sailing vessel was nearing the port of New York, one of the passengers tossed a shilling in the air, and as it fell with the face of George III uppermost, it decided a course of action which led to a banquet being held recently at Brantford, Ontario, with Colonel the Hon. Harry Cockshutt at the head of the table.

"The man who flipped the coin in such seeming disregard of destiny was James Cockshutt, grandfather of Col. Cockshutt, and as it was 'heads' that showed up, he decided to take the steps which eventually led him to settling in Brantford, Ontario, instead of Pittsburg, U.S.A. The family has been intimately associated with Brantford for over a century, and now honor has been done to one of its members, Col. Cockshutt, on the completion of fifty years' unbroken service with the Cockshutt Plough Company."

There seems to be very little known about the black stripe disease in carrots. Most agriculturists on the island put it down to soil condition and not parasites.

Search For Perfect Cow

Perfect bodies, perfect feet, and perfect backs are not the only objects this modern world admires. There is also a demand for perfect cows.

Unknown to the general public, scientists of the University of California have been trying for the past seventeen years to develop a perfect Jersey cow and bull to serve as the start of a dependable strain of high-producing animals without undesirable hereditary defects.

This work is being carried on through intensive, selective breeding experiments.

Cultivation Means Stirring of Soil

Better Than Manure; Breaks Up Particles and Allows Plants to Draw on Great Reservoir of Water in the Ground

By E. M. STRAIGHT
Superintendent, Experimental Station, Saanichton

LAST WEEK we discussed the fertilizer factor in its relation to crop production. In a word we said the little plant must be fed all along the way, but with plants as with animals, other factors present themselves, such as health, parasites, cleanliness, ventilation, sanitation, etc. At this time cultivation is on review.

What is cultivation? Simply stated, cultivation is the process of stirring the soil. Why should soils be stirred? Literally, to manure a soil was to work or stir it by hand, as the derivation of the word shows. No further back than Robinson Crusoe we have an example of that lonely gardener "manuring" the garden, when what he really did was to stir it. One of the earliest agricultural writers maintained that soils did not need fertilizers, that they could be maintained in a high state of fertility for an indefinite period by correct working. During his lifetime he was able to do that on a given area.

He died thinking he had proved his case, for the soil continued to yield satisfactory crops. That he was only partially right modern investigation has shown, but that the "manure" that many soils require is work has been demonstrated over and over again.

The truth is that the physical and the chemical character of soils are factors in crop production of much importance, but of the two the physical character is the greater. No species of fertilizer would ever stimulate some soils into activity until the physical condition of such soils was improved. Such improvement is brought about by cultivation.

Why should soils need stirring? A soil is composed of grains of rock of varying sizes. Suppose each grain were as large as a marble, and a sufficient number of them were placed in a bushel box to fill it. It is evident that all the space in the box would not be filled by marbles. In the vicinity of 50 per cent of the space would be occupied by air. It is the same with soil. As soil grains are of varying shapes and sizes, in the course of time they become pressed together until air is more or less excluded. Sometimes water occupies the little space remaining, which keeps out air as effectually as solid rock.

AIR FOR GROWTH

Air is essential to the germination of seed and the subsequent growth of the plant. No plant ever emerged from seed without air. Cultivating or stirring the soil is the process of breaking the soil grains apart, stirring in air if you will—more necessary than potash or similar chemical supplied in the fertilizer.

Of equal importance is soil moisture. Experiment and experience go to show that production, other things being equal, is about proportional to the water supply during the period of active vegetation. One series of experiments carried on by Hall (England) is quite convincing on this point. A certain soil supplied with five inches of water throughout the season produced fifteen bushels of wheat; six inches gave twenty; seven and one-half inches gave twenty-five; nine inches gave thirty; ten and three-quarter inches gave thirty-five, and twelve inches gave forty.

The large amount of water necessary for best results is never supplied by rain during the growing season. The great reservoir of the soil is the farmer's chief dependence, otherwise water artificially applied. The melting snows of winter, and water during excessive rainfall are carried into the soil by gravity to be drawn on by the plant in the time of its need.

Water is carried into the soil by gravity, but there is another force which tends to lift it out of the soil to the surface, whence it is immediately evaporated and lost to soil and plant. The force which lifts it is known as capillary attraction, and is the same force which lifts oil in the wick of a lamp. The air space or pore space of the soil, before referred to, corresponds to the pore space in the lamp wick, and lifts water in exactly the same way. It is a principle of all capillary rise that the finer the pores the higher the water will rise in them, as may be demonstrated by placing tubes of different sized bore in a vessel of water, and noting the distance that water will creep up in the tubes.

To persuade water to rise from the lower recesses of the soil to the area occupied by the roots of the plant, after having provided such reservoir, are processes accomplished by cultivation. By breaking up the subsoil the farmer provides the reservoir, and by rolling he induces the water to rise, but the most important work of cultivation from the moisture standpoint is to prevent the escape of the moisture by evaporation in mid-air.

This matter of shallow cultivation is so important in a dry time that it cannot be overestimated. We know of one case where a gardener forbade any one to walk over his cultivated fields. If any one did this contrary to his wish, the footprints were carefully raked out. Notice in early morning where you walked the night before, and be convinced that here is where you are losing the precious soil moisture. The pressed soil of the footprints is wet, while the remaining soil is dry.

Grafting

Simple Way of Changing Variety of Tree; Apple and Pear Should Be Grafted Now

By "CERES"

GRAFTING holds terrors for the amateur gardener. In most cases he steers clear of it, or calls in the aid of an expert. Yet, in reality, there is nothing very mysterious or complicated about grafting.

It is simply a method of changing a tree from one variety to another. The switch around is brought about by inserting a twig of a new variety, known as a scion, into the stock or sawed-off branch of the old tree. Of course an apple tree cannot be changed into a cherry tree, but a King can be turned into a Newton, and a Bosc pear can be switched over to the more favored Bartlett.

Grafting of apple and pear trees can be undertaken at any time from now until about the beginning of May on Vancouver Island. It is a little late to graft cherry or plum trees, as their buds are already swelling.

Scions should be cut from well-ripened, hard wood of the previous year's growth when the tree is dormant. They should be about three or four buds long, and should be trimmed off wedge-shaped at the larger end.

Scions should be stored in moist sand or sawdust in a cool cellar, or buried in the ground out of reach of the frost until required.

BARK GRAFT

A bark graft is the quickest, easiest and best method of grafting. It consists of making a longitudinal cut about an inch long on a branch which has been sawn squarely off about six inches from the crotch.

This split is then pried open and the scion shoved in between the bark and the wood, with the cut side next to the wood. The stub, slit and all are waxed over, and the scion is held in place with some cloth or raffia until a union has been obtained.

The best type of wax to use for small jobs is the one recommended by the Provincial Department of Agriculture. It consists of two pounds of resin, one pound of beeswax, and half a pint of raw linseed oil. The resin and beeswax are melted and the oil added. After stirring, the whole concoction is poured into a can of cold water and worked into a soft condition with the hands. This wax stays soft and is ready for use without the trouble of heating.

Two or three scions are usually inserted, one on each side of a sawed-off branch, in order to reduce the possibility of failure. Quite often the whole lot catch and then pruning has to be resorted to. The gardener should not attempt to change his tree over all at once. Generally, about a half of the top of the tree is removed in the first year, and the rest slowly cut out as the years go by.

Pebbles Make Good Labels For Rockery

MANY GARDENERS in Victoria, especially those who collect rare varieties, label their plants. Others prefer not to bother, or are blessed with such a super-memory that they can string off long botanical names without batting an eyelash. Unfortunately the latter, when the crucial test comes, often mutters: "Gosh darn it, that name is on the tip of my tongue. I'll bet I'll remember it as soon as you leave."

In the ordinary garden the common wooden label, seven or nine inches long, with the name written in pencil, is popular though by no means permanent. Metal tabs marked by acid are more serviceable.

But in the rockery both these types of labels are out of place. The long markers are difficult to stick in the thin soil in parts of the rock garden, and when in are unsightly. The best way to record the names of little alpines is by means of stones.

Polished pebbles picked up on the beach can have the names of the plants painted on them. A good, thick black enamel will make a fairly permanent marking. These labels will be found to blend in with the rockery, and yet are much easier to read than the wooden or metal varieties.

George Gilbert of Gananoque, Ontario, has an apple which has been preserved for fifty-five years. It is said to be the oldest apple in Canada.

Mystery Shadows Birth and Death of Statler Heiress

Adopted By Hotel Magnate, She Won Note As Sportswoman—But Succumbed Finally to Her Family's Tragic Destiny

GOLFER and all-around athlete, the former Elva Statler had triumphed over a childhood injury which was the first of a series of misfortunes to mar her life.

A DARING OUTDOOR WOMAN, she nevertheless gave way to frequent spells of moodiness—such as that on the tragedy-shadowed night before her mystifying death, when she wept in the midst of a group of gay friends who had stopped with her at a roadhouse en route home from a charity ball.

DAUGHTER OF FATE, the former Elva Statler inherited riches—and a grim destiny. Her mysterious death of carbon monoxide poisoning at Pinehurst, N.C., two months after her marriage, was another dark chapter in her foster family's tragic history. This sketch was made from a recent photo of her.

TRAGEDY HOUSE, this Pinehurst cottage was occupied by the newly-wed Mr. and Mrs. H. Bradley Davidson Jr. In a garage on the grounds, the dead body of the bride was found—slumped over the floor-board of her car—mysteriously a victim of carbon monoxide gas.

QUESTIONED in connection with his wealthy bride's strange death, H. Bradley Davidson Jr. is shown before a coroner's jury in Pinehurst.

WHO WAS Elva Statler? Who were the real parents of the girl elevated by Fate from comparative poverty to the affluence of heiress to the hotel magnate's millions?

Here is a mystery even more baffling than circumstances that attended her death of monoxide poisoning at Pinehurst, N.C., only fifty-eight days after becoming the bride of H. Bradley Davidson Jr.

Cunningly her foster-father, Ellsworth M. Statler, founder of the huge hotel system that still bears his name, concealed the identity of each of the four children he adopted—not even the Erie County (N.Y.) court records in Buffalo, where the adoptions were legalized, list the baptismal names. Of Elva it says simply: "Elva Statler became one year of age June 7, 1913." Efforts to trace their parentage always have been futile.

LEGEND CALLS ADOPTIONS OMENS OF FORTUNE

The legend surrounding the adoption also is tinged with the eerie quality to which five deaths in nine years among the Statlers have called attention. Old employees of the Statler organization tell of the founders' early superstition that his expanding business would prosper if he adopted a baby whenever he opened a new hotel.

It has always been held by friends of the family that Elva and Ellsworth Statler, the only surviving foster-child of the family, were blood twins, for they are recorded as being born on the same day. There is, however, no evidence to confirm this coincidence.

Whatever the natural heritage of the children may have been, in the hands of child-training specialists and picked tutors they became young men and women of whom their foster-parents were proud; but of the four, Elva's attainments were the most remarkable.

HEAD INJURY HANDICAPPED HER

Always a moody child and handicapped by a head injury suffered when she was thrown off her bicycle in collision with an auto, she was subject to uncontrollable fainting spells. She nevertheless attained athletic and scholastic prowess through determination and application that was reminiscent of the elder Statler's career. Only a succession of accidents kept her from attaining championship rank, in all probability.

She was attending Radcliffe College, for instance, when she determined to become a member of the swimming team for the next Olympics. To have more time for perfecting herself in her specialties, she resigned from college and moved to an apartment in Boston.

Misfortune then struck at her ironically. In diving practice she injured her back so seriously that she was forced to drop natatorial competition for ever; and it may have been brooding over this first taste of failure that accounts for her sensitiveness during recent months, when she referred to herself as "poor little rich girl and step-child of the world."

Though forced to abandon her favorite sport, she still was actively athletic. She was a marvelous golfer, an accomplished horsewoman and a lover of outdoor winter activities. It was while golfing at Pinehurst a year ago that she met Davidson, nearly twenty years her senior, with whom she fell violently in love.

SENSITIVENESS MARRED MARRIED HAPPINESS

Highly excitable and emotional, marriage failed to bring her the happy contentment with which friends hoped her life, already so full of good things, would be crowned. She was injured again in a honeymoon accident. Her sensitiveness to criticism frequently brought her to tears and she continued to be moody and resentful; but reconciliations quickly followed spats with her husband like those that occurred the night before she died.

By cutting short her life in a mystery like that in which her birth is veiled. Fate seems to have patterned Elva Statler's end after those of others of the hotel magnate's family. This the chronology of tragedy they compiled:

October, 1926—Mrs. Mary Madderback Statler, foster-mother, dies.

August 27, 1927—Marian Frances Statler, twenty-four, dies of mystifying heart ailment.

April, 1928—Ellsworth M. Statler dies, leaving $7,000,000 fortune.

December, 1933—Milton H. Statler, oldest adopted child, killed in auto accident.

February 27, 1935—Elva Statler Davidson found dead.

SINKING OF YACHT CLIMAXES TRAGEDIES

One more item in the sad Statler saga: in December, 1926, the Statler yacht Miramar, with thirteen aboard, en route to Florida for delivery to a new lessee, vanished without trace, after last being seen off Savannah Light.

Only two of the Statlers survive: Ellsworth, who lives in England; and foster-father's second wife and widow, Mrs. Alice S. Statler.

Dorothy Dix's Letter Box

DEAR MISS DIX—Can there be a happy marriage with love only on one side? A young man is in love with me who is everything that a man should be, kind, considerate, dependable, honorable, upright and well-to-do, but with all of these good qualities I do not love him. I have tried hard enough, but my efforts have been useless. Five years ago I fell in love with a man who really cared nothing for me, took me out only when he had nothing else to do, who lied to me, stood me up repeatedly and used me simply as a doormat, but it didn't matter. I took anything just to be with him now and then. Four years have passed since we last met, but he is still in my mind and heart.

Shall I marry this fine fellow who loves me dearly, knowing I will be a dutiful wife, will give him respect, admiration and everything else marriage demands of a wife—except love? So I ask again can marriage be a success with love only on one side?

WONDERING.

Answer—No. Never. Especially when one of the parties to the marriage loves some one else. For between husand and wife there will stand forever the shadowy ghost of the old romance that will keep them from ever really coming together in the oneness that alone makes marriage a success.

There is no truth in the old superstition that a new love automatically kills an old love. Many men and women think that marriage is a panacea for blighted affections, and that as soon as the marriage ceremony is said over them their wounded hearts will cease to throb with pain and the memory of the old sweethearts will be blotted from their minds and they will no more crave the touch of a vanished hand.

Nothing of the kind happens. On the contrary, the very fact that the beloved one is beyond reach, the fact that he or she is forbidden fruit, makes him or her more alluring. That person becomes a memory, a dream forever embedded in the amber of romance, something that can never be destroyed because it exists only in the imagination. Always those who marry without love will be contrasting this paragon of their dreams with the imperfect human being to whom they are married. And so marriage becomes that especial hell that is filled with vain regrets and bitter self reproaches for the folly they have committed, in taking a step that separated them from the one of their desire.

Nor is love the solace it is supposed to be. Nothing is more thrilling than to be loved by one you love. Nothing is so boring as to be loved by one you do not love. Kisses are fine on the lips, or dust and ashes. Caresses thrill, or you shrink away from them with repulsion. Nothing gets on the nerves like having to pretend to emotions you do not feel, like having to summon up a joyous smile for some one of whom you are tired to death, like having to remember to be tender and affectionate. Nothing else is so wearisome as the continual society of those who love you so much that they always want to be with you and whom you care for so little that you would be glad never to see them again.

Of course, in the unequal marriages in which one kisses and the other permits himself or herself to be kissed, as the French say, the deluded lovers always believe that they at least will be happy in having those they desire, but they never are, because they soon find out that they have only the empty shells, the bodies of their husbands or wives, and that their spirits have escaped them.

And they think that because they love they can make those they love, love them, but this, too, is impossible. Love comes and goes as it will and no man compels it. Many and many a man and woman would give their very souls to be able to respond to the wives and husbands who love them, but they cannot quicken their heart beats, strive as they may.

So I would earnestly advise you not to marry one man while loving another. The good man deserves a better fate than a wife who merely tolerates him.

DOROTHY DIX.

• • • •

DEAR MISS DIX—I am twenty years old and have been going with boys for so many years that I am tired of it all and want to settle down and have a husband and home of my own. I have met a boy that I like and who is in love with me and he wants to start saving for an engagement ring, but I want to get married right away. He is only eighteen. Can a boy so young be sure of himself? Is it true that youth never knows real true love that lasts? What is your advice?

MILDRED.

Answer—My advice is to wait. If you rush a boy into marriage before he is ready for it, you are certainly heading for trouble. This boy, in the first place, is entirely too young to marry. All that he is capable of at eighteen is calf love, and if that lasts it is a miracle and not anything that you have a right to count on. His tastes are unformed. He is in the jelling stage himself and he hasn't the slightest idea of what he is going to be when he grows up or what he will want in a wife. The girl he likes to-day he won't look at to-morrow, so even if you could marry him on a passing fancy of adolescence, you would be taking a million-to-one chance of his still being in love with you ten years hence.

And in the second place, the boy has nothing to marry on. He hasn't even the price of an engagement ring. If you coerce him into marrying you now, what do you propose to live on? You will still have to eat and have clothes and a place to live in after you are married. Are you going to inflict a husband on your mother and father to support, or are you going to burden his parents with having to feed and clothe you? For boys and girls to marry and dump their husbands and wives and subsequent babies down on their parents is certainly playing it pretty low down on the old people.

So give up all thoughts of being a cradle-snatcher. Let this poor boy alone. Let him grow up before he takes upon himself the responsibilities of matrimony. And if you are so anxious to marry, pick out a man instead of a boy for a husband.

But the fact that at twenty you have been going around so long that you are blase, certainly should be a warning to all the little girls who are in such a hurry to grow up and step out. It is a pitiful thing for a girl to have skimmed all the cream off her youth before she is really old enough to appreciate its flavor.

DOROTHY DIX.

• • • •

DEAR MISS DIX—In a controversy between huband and wife, wife contends that if you are in love you cannot see any physical defects in the one you love. The husband contends that if you love you see the defects, but it does not affect your love. Which is right?

THE McD.'s.

Answer—The husband. Loving does not affect one's eyesight or intelligence. It does not make you see a tall, romantic-looking chap in your short, tubby little husband, or behold your wife as Miss Canada if she happens to be fat and red-headed and snub-nosed. But it doesn't keep you from loving them.

The only people who have the faculty of seeing just what they wish to see in another are mothers.

DOROTHY DIX.

The Way Beyond

By JEFFERY FARNOL

"Yes sir, yes! he answered and, with agony in his own eyes, watched the despair this answer wrought.

"You did not . . . mean to do it?"

"No, no! God knows I didn't sir."

"His own pistol, Richard!"

"Yes sir, yes. I . . . we . . . he made to shoot and I . . . we struggled and . . . sir, what must I do? Will you . . . shall I ring the bell . . . alarm the house?" And Richard turned, reaching towards the silver table bell.

"No! No!" gasped Sir Peter, checking him with a wild, vehement movement. "Come home! And . . . you may still call me 'father' Richard. I am more your father than ever . . . now. Let us go! Mutely obedient Richard crossed towards the window.

"But . . . these candles, Father?"

"Leave them . . . alight . . . And you are forgetting your hat, Richard." Fumbling it clumsily, Richard took up his hat and came to the window.

"Richard, you have dropped your gauntlet!"

Richard took up the fallen glove and stood aside that his father might precede him through the window.

"You first, dear lad!" So Richard stepped forth into the cool night but drew something very stealthily from his pocket and turning to close the window after his father contrived to drop that something into the room.

"Never mind the window, Richard—come!"

And so, swift, silent and mute, more like flitting shades than living men, they went together—away through the deepening shadows . . .

But in the great, silent house behind them, after some while, was sound of somewhat unsteady footsteps and a voice, a little uncertain, crooning a song; and the words these:

"Oh—the best of all ways
For to lengthen our days
Is to steal a few hours from the night, boys."

Then the door of that death chamber swung open and Lord Ilford stood on the threshold, slim, elegant and slightly drunk as usual.

"Aha—lights!" quoth he "You're not yet in bed then, worthy sire? Good! For 'the best of all ways to lengthen our days is—'" the crooning voice was suddenly dumb, the lounging, swaying figure steadied, grew tense and utterly still, then, very deliberately Lord Ilford stepped into the room, slowly he approached and standing above that awful, sprawling shape, looked down into the large, blood-spattered visage with strangely impersonal curiosity. Now as he stood lost in this cold and passionless contemplation he seemed, in some indefinable manner, to take on size and stature, and presently, his golden head still down bent, his blue eyes still fixed in this same terrible, wholly untroubled scrutiny, he addressed this ghastly thing speaking in gentle monotone

"So, my lord, there you are at last! The death you have invited so frequently and merited so long, has you at last! A violent ugly death and yet—very swift . . . in a moment of time! Yet my little mother, the gentle creature you killed—died slowly . . . inch by inch . . . through long! weary years . . . and you—in an instant! So mercifully! Is this justice? I wonder?" He shivered suddenly and the flickering candles flickered in sudden breath of night-wind through the open window and glancing thither, he beheld that which lay there, and crossing the floor with soundless, unhurried steps he picked up a handkerchief and saw in one corner, deftly embroidered the initials R. V.

With this in his hand Lord Ilford came back to stare down again into the marred face and at the contorted form with keen questioning eyes as if the dead might yet tell him something. Then he sank upon his knee and in the same emotionless, deliberate way, grasped the stiffening arm, jerked it, pulled it until from beneath the inert bulk he had drawn the clenched right hand; then soft yet fierce imprecation he glanced up and round about this silent chamber with eyes that, questing to and from, held a wild and fearful horror at last, as, muttering savagely, he drew from these dead clutching fingers something that he stared at with the same fearful horror, something that he folded as it had been some holy relic and thrust into his bosom.

Then uttering whispered yet frightful imprecation, he leapt up and for a moment seemed as he would stamp and trample the dead beneath vengeful, merciless feet; instead, he crossed to the door, softly closed it, locked it and removing his tight-fitting coat, became very dreadfully busy.

And when this work was accomplished to his satisfaction, Lord Ilford donned his coat, adjusted hair and cravat delicately before a mirror and tugged at the bell which, as he knew, rang in Jasper Clipsby's bedroom. After no great lapse of time, his quick ears caught the faint shuffle of approaching feet, fingers tapped softly on the half-open door, then Lord Ilford spoke:

"Come in, Clipsby, my father is dead! See here, man, see here!" A strangled, wailing cry, and the shape that had entered the room so quietly, shrank back and back to the panelled wall and crouched there dumb and with staring eyes fixed and glaring.

"Shocks you does it, Clipsby? And no wonder! Pretty ghastly! Slumped in the chair so—and still at his wine! And the pistol—see where it dropped from his dying fingers—here beneath his dangling hand . . . Look, and the rug beneath his chair—soaked! Must have done it an hour ago at least, eh, Clipsby? Last man in the world to have killed himself, eh Clipsby? Suicide! Amazing! Wake the servants! Rouse the house! Suicide—eh, Clipsby? Astonishing! Stir, man, stir!"

CHAPTER XIII

They had reached home, the father and son, they stood fronting each other in the dim light of the single candle Richard had lit at the dying fire, and surely never did candle show two more haggard, careworn faces.

"Oh, Father," whispered Richard at last, "It is awful to think . . . of it lying there . . . waiting to be found."

"Richard . . . Richard," gasped Sir Peter, covering his face, "It is more awful to think of the consequences to . . . my dear son! Through an accident yet the world will call it . . . murder. And all my hopes for you . . . my dreams . . . Oh God Help . . . God teach me how to save him . . . my boy . . . my son!" The stately form was bowed, shaken by wild passion of grief, through those clutching fingers tears fell sparkling; and in this dreadful moment Richard saw this austere father of his with a new vision, and feeling the deep sanctity of the kinship that knit them, clasped this father that had so awed him hitherto, hugged him in quick, yearning arms and agonized with filial love and pity, strove desperately to soothe and comfort.

"Father . . . dear Father, I never dreamed you could love me so . . . never dared to think it—"

"Seemed I so remote then boy? It is sometimes a pain to show my feelings . . . yet you might have guessed! I would give my life for you, Richard."

"I know it now, Father, oh I know it. I've grown a man to-night . . . And in that ghastly moment you bade me . . . call you 'Father'! This memory will keep me strong . . . And, Father, for your comfort, believe me no vile . . . intentional murderer. Think the best of me. Oh, believe that I . . . I am to do what you would do . . . trying, before God, to be worthy of you and my dear mother!"

(To Be Continued)

HOROSCOPE

"The stars incline, but do not compel"

SUNDAY, APRIL 7, 1935

Adverse planetary aspects appear to dominate to-day, according to Astrology. It is a date for reflection and self-analysis.

Saturn is in a place that bodes ill for certain classes of workers and for farmers in various states. Extremes will mark the experiences of many for they will enjoy profits followed by heavy losses.

There is a sign indicating widespread deception or misrepresentation in mining and other industries in which there will be a tendency to speculate.

The coming summer will be a period of increasing prosperity that should be used wisely. Warning is given that habits of laziness formed during dependence on relief projects will destroy many possible careers.

Religious interest will increase through constructive work along advanced ideas, it is forecast. Churches will progress through the leadership of young clergymen.

Women will advance through the development of old-time household arts, it is prophesied. Home-making is to be a major interest in the reactionary tendencies of the year, although the cross will compete determinedly for salaried positions.

The moon to-day is in a sign that encourages lawful interests and talents. Hobbies are recommended for all who carry heavy professional or political responsibilities.

While persecutions will affect religious organizations in Europe and other parts of the world the result will be growth and access of power, astrologers prognosticate.

Persons whose birthdate it is have the augury of a year of success in work, progress and exciting experiences.

Children born on this day probably will be sensitive and intelligent, many subjects of this sign have psychic gifts.

William Wordsworth, poet, was born on this day, 1770. Others who have celebrated it as a birthday include Hugh Blair, Scottish divine, 1718, and William Ellery Channing, Unitarian minister and philanthropist, 1780.

MONDAY, APRIL 8, 1935

According to astrology this is a fairly good day in planetary direction. It is a time for pushing all important claims in courts and for seeking the support of persons of influence.

The planetary government encourages big business and promises the starting of new projects of magnitude. The year is to be famous for the launching of gigantic enterprises from which all the people may benefit.

Women to-day are well guided by the stars, which seem to forecast a gradual attainment of security in the world of work in which they are to find their right places.

This is a lucky wedding day for those who marry with the idea of mutual helpfulness. Real partnerships are formed under this planetary sway.

Wall Street will centre attention before the end of the month through sudden fluctuations of standard stocks, astrologers predict.

Intercommunications by means of air are to arouse national and international anxiety, it is forecast. The radio may be the source of arousing sentiment in the United States that may have far-reaching effects. False hopes of plenty that has not been earned, criticisms of city, county and state affairs and other propaganda creating unrest may be responsible for grave consequences.

Industries related to engineering equipment, chemicals, motors, airplanes and steel construction should profit greatly through the coming summer.

Persons whose birthdate it is have the augury of a year of great progress in business or professional affairs. Pleasures and friendships should multiply.

Children born on this day probably will be clever in the use of talents, engaging in personality and generally successful in their careers.

David Rittenhouse, astronomer, was born on this day, 1732. Others who have celebrated it as a birthday include Bryant B. Wiley, painter, 1861, King Albert of Belgium, father of present ruler, 1875, and Frederick Eugene Ford, journalist, 1904.
